

Forward-looking statements

ABOUT THIS PRESENTATION

This presentation is provided by Oklo Inc. ("Oklo") for informational purposes only. The information contained herein does not purport to be all inclusive and no representations or warranties, express or implied, are given in, or in respect of, this presentation. To the fullest extent permitted by law, in no circumstances will Oklo or any of its subsidiaries, interest holders, affiliates, representatives, partners, directors, officers, employees, advisers or agents be responsible or liable for any direct, indirect or consequential loss or loss of profit arising from the use of this presentation, its contents, its omissions, reliance on the information contained within it, or on opinions communicated in relation thereto or otherwise arising in connection therewith.

NO OFFER OR SOLICITATION

This presentation does not constitute an offer to sell or the solicitation of an offer to buy any securities, or a solicitation of any vote or approval, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. This presentation is not, and under no circumstances is to be construed as, a prospectus, an advertisement or a public offering of the securities described herein in the United States or any other jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended, or exemptions therefrom.

NO REPRESENTATIONS OR WARRANTIES

This presentation is for informational purposes only and does not purport to contain all of the information that may be required to evaluate Oklo. Viewers of this presentation should make their own evaluation of Oklo and of the relevance and adequacy of the information and should make other investigations as they deem necessary. This presentation is not intended to form the basis of any investment decision by any potential investor and does not constitute investment, tax or legal advice. No representations or warranties, express or implied, are or will be given in, or in respect of, this presentation or any other written, oral or other communications transmitted or otherwise made available to any party in the course of its evaluation of an investment in Oklo, and no responsibility or liability whatsoever is accepted for the accuracy or sufficiency thereof or for any errors, omissions or misstatements, negligent or otherwise, relating thereto. To the fullest extent permitted by law, in no circumstances will Oklo or any of its subsidiaries, interest holders, affiliates, representatives, partners, directors, officers, employees, advisers or agents be responsible or liable for any direct, indirect or consequential loss or loss of profit arising from the use of this presentation, its contents, its omissions, reliance on the information contained within it, or on opinions communicated in relation thereto or otherwise arising in connection therewith. The information contained in this presentation is preliminary in nature and is subject to change, and any such changes may be material. Oklo disclaims any duty to update the information contained in this presentation.

FORWARD-LOOKING STATEMENTS

This presentation includes statements that express Oklo's opinions, expectations, objectives, beliefs, plans, intentions, strategies, assumptions, forecasts or projections regarding future events or future results and therefore are, or may be deemed to be, "forward-looking statements." The words "may," "will," "could," "specie," "intends," "intends," "seeks," "estimates," continue," "might," "possible," "potential," "predict," "project," and "rod," "could," "sommit" or, in each case, their negative or other variations or comparable terminology, and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this presentation and include statements regarding our intentions, beliefs or current expectations concerning, among other things, the availability and costs of nuclear fuel, timing, goals and benefits of nuclear fuel recycling, results of operations, financial condition, liquidity, prospects, growth, strategies and the markets in which Oklo operates. Such forward-looking statements are based on information available as of the date of this presentation, and current expectations, forecasts and assumptions, and involve a number of judgments, risks and uncertainties. As a result of a number of known and unknown risks and uncertainties, the actual results or performance of Oklo may be materially different from those expressed or implied by these forward-looking statements: risks related to the deployment of Oklo's powerhouses and other facilities; the risk that Oklo is pursuing an emerging market, with no commercial project operating; regulatory uncertainties; the potential need for financing to construct plants; market, financial, political, environmental and legal conditions; the effects of competition; risks related to acquisitions, divestments, or joint ventures (including the resulting integrati

INDUSTRY AND MARKET DATA

In this presentation, Oklo relies on and refers to certain information and statistics regarding the markets and industries in which Oklo competes. Such information and statistics are based on Oklo's management's estimates and/or obtained from third party sources, including reports by market research firms and company filings. While Oklo believes such third party information is reliable, there can be no assurance as to the accuracy or completeness of the indicated information. Oklo has not independently verified the accuracy or completeness of the information provided by the third-party sources.

Administrative momentum

Executive Orders on nuclear energy

- Pursue regulatory reforms–U.S.
 Department of Energy (DOE) and
 U.S. Nuclear Regulatory Commission
 (NRC)–to accelerate test and
 commercial advanced reactors.
- Provide renewed support for reshoring of nuclear recycling technology
- Categorize civil nuclear power as national security interest
- Unlock access to qualifying government fuel stockpiles, transforming fuel from a bottleneck to a strategic enabler

The One Big Beautiful Bill (OBBB)

- Demonstrates continued support for advanced nuclear power
- 48E: Robust investment tax credits, including transferability, with byconstruction date of 2033 for full then partial phase-out until 2036
- 45Y: Mirror 48E but with new nuclear energy community bonus credit
- Restores and prioritizes nuclear in DOE lending programs
- Accelerated environmental reviews under the National Environmental Policy Act (NEPA)

America's Al Action Plan

- Proactionary innovation posture benefits advanced nuclear permitting and deployment
- Al infrastructure growth (e.g., data centers) drives need for resilient, highdensity clean power
- Includes policy actions to streamline siting and permitting – applicable to Al and nuclear buildout

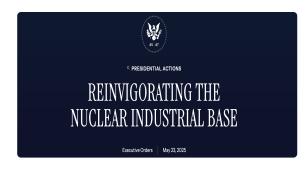

The Administration's Executive Orders will accelerate the deployment of domestic advanced nuclear energy

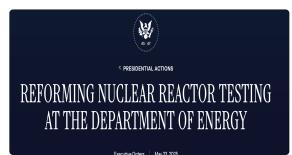

The White House, Washington D.C.

Trump Administration's nuclear Executive Orders

Executive Orders (EOs) elevate nuclear energy as a national and economic security interest, introduce much-needed regulatory reforms, and accelerate nuclear fuel recycling and availability of government fuel supplies for early project deployments

Oklo is uniquely positioned to benefit from the Administration's Executive Orders on nuclear energy

Why it matters to Oklo Summary • Makes broad actions to revitalize the domestic nuclear supply • Oklo is one of a few fast reactor companies that can utilize E PRESIDENTIAL ACTIONS downblended uranium and plutonium-based fuels, which don't require chain, including a specific focus on nuclear fuel REINVIGORATING THE enrichment, accelerating fuel supplies for early reactor deployments • Makes transformational actions to leverage government fuel NUCLEAR INDUSTRIAL BASE stockpiles and accelerate nuclear fuel recycling to supply early Oklo is the leading company focused on nuclear fuel recycling, enabling domestic nuclear projects acceleration of our recycling business plan • Prioritizes deployment of nuclear reactors at locations with • Oklo's small advanced reactors are well suited to the power needs of DEPLOYING ADVANCED NUCLEAR REACTOR national security interests, including AI data centers distributed defense locations • Oklo can utilize all types of government fuel stockpiles, including Allocates government fuel supplies and accelerates nuclear <u>TECHNOLOGIES FOR NATIONAL SECURITY</u> fuel recycling for facilities at national security locations plutonium, and is the leader in nuclear fuel recycling • Reforms activities at the NRC and targets 400 GW of new • Oklo can benefit from a more efficient review timeline and certainty nuclear by 2050 ORDERING THE REFORM OF THE of execution in the licensing process with the NRC • Mandates 18-month review deadlines, specifically for new NUCLEAR REGULATORY COMMISSION reactors, caps NRC licensing fees, and directs modernization • Promised changes can accelerate deployment of Oklo powerhouses of nuclear related regulations

Directs DOE to accelerate testing and deployment of

• Launches a pilot program that targets three operational

advanced nuclear reactors

advanced reactors by July 2026

AT THE DEPARTMENT OF ENERGY

• Oklo could qualify for a pilot project that targets operational

advanced reactors by July 2026, further accelerating our time to

market

One Big Beautiful Bill (OBBB) provides continued support for the advanced nuclear industry

	Summary	Why it matters to Oklo
Tax credits	 Investment (48E) and production (45Y) tax credits remain in full for advanced nuclear until 2033 and phase out around 2036 	 Investment and production tax credits enhance project economics for early-stage Oklo projects The OBBB provides certainty on the tax credit landscape
Loan Programs Office (LPO) lending capacity	 Energy Dominance Financing program to support qualifying projects, including advanced nuclear 	LPO loans provide critical capital for early-stage nuclear projects that cannot yet access commercial debt markets cost effectively
Accelerated NEPA reviews	OBBB sets strict deadlines for environmental assessments (EAs) and environmental impact statements (EISs) under NEPA	Ensures that EAs and EISs are completed within 180 days of payment, providing more certainty to project timelines
100% bonus depreciation	 The bill allows for expensing of 100% for Qualified Production Property that begins construction by 2029 and is placed in service by 2033 	Oklo may be able to monetize tax benefits from bonus depreciation as we build out manufacturing capacity

America's Al Action Plan

Al policy tailwinds are increasing demand for resilient, distributed, high-density clean power; Oklo is well positioned to serve this need.

Winning the Race
AMERICA'S
AI ACTION PLAN

Three pillars

- Accelerate Al innovation
- Build AI infrastructure
- Lead international AI diplomacy and security

Plan highlights

- Constructively builds on recent nuclear EOs
- Strategic shift from "precautionary" to "proactionary," prioritizing speed, competitive leadership, and a free-speech-centered AI vision
- 90+ Federal policy actions announced July 23, 2025
- Deregulation, open source encouragement
- Workforce training for physical and technical AI roles
- Distributed AI infrastructure growth (e.g., data centers, defense sites) is driving demand for co-located nuclear reactors

Our mission is to provide clean, reliable, and affordable energy on a global scale.

Oklo's three competitive advantages will enable the deployment of powerhouses at scale

Attractive build, own, operate business model

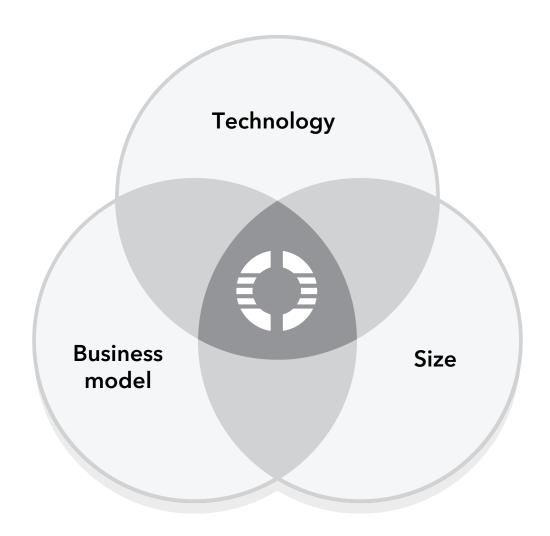

Selling power directly to customers under long-term contracts provides recurring revenues and a streamlined regulatory pathway

Small, scalable design

Oklo's small, scalable design combines the use of existing industrial materials with factory fabrication, allowing the company to deploy nuclear reactors at multi-gigawatt scale

Proven technology

Oklo's powerhouses are based on proven fast reactor technology, which significantly reduces R&D costs and accelerates licensing timelines and early deployments

Oklo quarterly progress update

Project execution

✓ Kiewit selected as lead constructor for the Aurora at Idaho National Laboratory (Aurora-INL)

Licensing progress

- ✓ NRC accepts Oklo's licensed operator topical report for review
- ✓ Completed Phase I of the NRC preapplication readiness assessment
- ✓ Alchemy begins site characterization work

Fuel, recycling, & feedstock

✓ Oklo and Hexium partnership to explore a laser-based enrichment process

Customer pipeline

- ✓ Oklo issued Notice of Intent to Award for U.S. military installation
- ✓ Liberty Energy partnership to launch next-generation integrated power solution

Corporate & business dev.

- ✓ Oklo and Korea Hydro & Nuclear Power (KHNP) collaboration
- ✓ Oklo and Vertiv partner to advance solutions for U.S. data centers

Financial

- ✓ 2Q cash burn remains on track with our expectations
- ✓ Strong balance sheet with cash and marketable securities of ~\$683 million

Licensing progress and regulatory tailwinds

Completed NRC Phase I readiness assessment

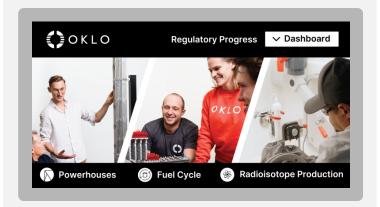

- Completed Phase 1 of the NRC readiness assessment for the Aurora-INL combined license application (COLA)
- NRC identified no significant findings, reinforcing readiness to proceed with submission of these parts of the COLA.
- Targeting submission for Phase I of Aurora-INL's COLA early Q4 2025

Licensed operator topical report accepted for review

- Proposes operator licensing by Aurora technology, not by individual site
- Oklo's business model building, owning, and operating its powerhouses to sell power—is closely aligned with this licensing strategy, built for repeatability and efficiency.
- Once approved, the report can be referenced in future applications, reducing re-review and enabling scalable deployment.

Launch of Oklo's regulatory dashboard

- Launched new public dashboard at <u>www.oklo.com/</u> <u>regulatory</u>
- Covers licensing progress across powerhouses, fuel, and isotope production
- Designed to increase transparency and accessibility for all stakeholders

Oklo has a comprehensive fuel strategy based on Oklo's unique fuel cycle

	Summary	Why It Matters
Government nuclear fuel supplies	 Oklo was awarded 5 metric tons of HALEU fuel from the U.S. Department of Energy in 2019 Oklo can utilize all government fuel sources that could be made available in the administration's recent nuclear related Executive Orders 	 Oklo is the only advanced nuclear company with fuel secured for its first commercial facility Oklo and other fast reactor companies are uniquely positioned to utilize all government fuel stockpiles, including plutonium based fuels that don't require enrichment
Commercial HALEU supply	 Oklo has a signed memorandum of understanding with Centrus to provide HALEU for Oklo powerhouses Oklo is collaborating with Hexium to expand the commercial HALEU supply 	 Centrus is currently the only domestic producer of HALEU The collaboration aims to explore a laser-based enrichment process called AVLIS for producing HALEU
Recycled fuel	Oklo fast reactors can utilize spent nuclear waste recovered by Oklo's nuclear fuel recycling technology	 Oklo is the leading advanced nuclear company pursuing a vertically integrated nuclear power and recycled fuel business, providing the company with a structural long- term supply chain and cost advantage

Understanding HALEU supply, cost, and market dynamics

Enrichment cost primer^(1,2,3)

- Major drivers are ore and enrichment costs
- Enrichment cost = SWU (\$/kg)
 →1kg HALEU needs ~35-60 SWU (estimated)
- Plus 30-50 kg of natural uranium per 1 kg HALEU
- Over the last 10 years, uranium ore and enrichment prices have ranged from\$25-\$100/lb and \$40-\$180/SWU

Enrichment model fit

- Our growing and high-volume fuel demand make us a valuable long-term customer for commercial suppliers
- Needing several tons per core matches enrichment "module" capacities quite well
- Smaller size also means more units, which means more annual consumption
- Laser enrichment and other advanced technologies could unlock cheaper, batch-friendly options in future
- History of SWU cost reduction from introduction of new technologies such as centrifuges

Oklo's differentiator and longterm advantage

- Fast spectrum reactors enable use of plutonium-bearing transuranic fuels
- Enabled by:
 - → Executive Orders
 - → DOE material access
- Recycling requires more capital but opens a long-term self-sufficient fuel supply loop
- Recycling aligns with fast reactor efficiency: less waste, more output, fewer external dependencies
- Reduces need for enrichment

Oklo's fuel strategy will enable rapid and resilient deployment

Oklo's comprehensive fuel strategy

Government materials

Downblended enriched U (e.g., EBR-II)

Government materials

Alternative fuel material (e.g., Pu)

Fresh HALEU supply

Centrus, Hexium, among others

Recycled fuel

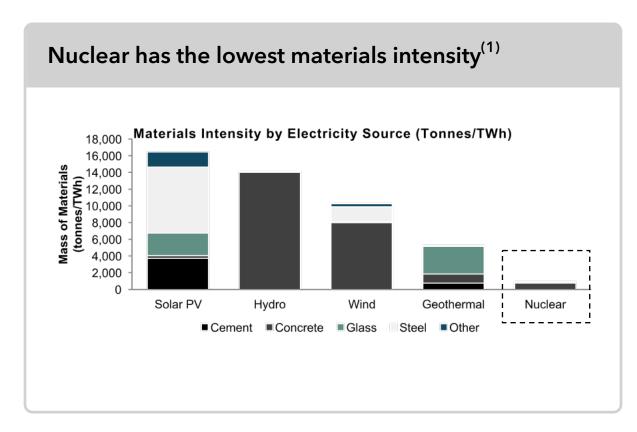

TRU Fuel: long-term differentiator

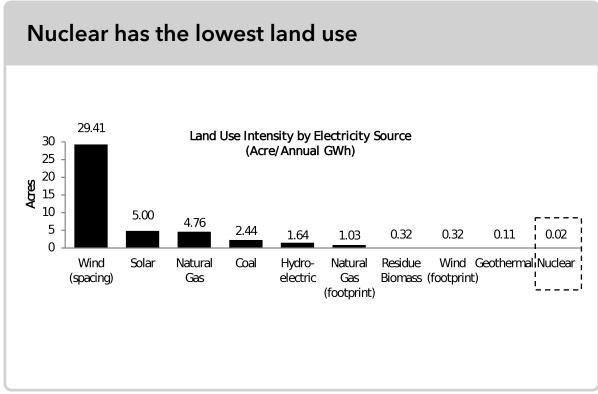

Key messages

- Oklo is the only advanced nuclear company with fuel secured for its first commercial facility
- Oklo's fast reactor designs are positioned to leverage existing government fuel stockpiles, including plutonium-based fuels that do not require enrichment
- Oklo is securing commercial high-assay low-enriched uranium (HALEU) supply through partners like Centrus and Hexium.
- Combining nuclear generation and fuel recycling creates a long-term supply chain and cost advantage.
- Oklo is building a diversified, domestic fuel portfolio to enhance supply security.
- Oklo's designs can use materials others' cannot, supporting faster deployment timelines.
- Recent EOs unlock access to enough government fuelincluding plutonium and downblended HEU-that could support dozens of early powerhouses.

Given its land and materials advantage, nuclear should lead on cost

Changing cost paradigms

Key messages

- Design plants with inherent and passive safety features
 - Fewer systems and components with regulatory oversight, e.g. "nuclear grade"
 - Smaller size further reduces number of systems and components with regulatory oversight
- Modernize design, procurement, installation, and operation of "nuclear grade" equipment
 - Antiquated supply chains ripe for modernization and diversification

Powerhouse supply chain breakdown (% components)(1)

70%

NON-NUCLEAR SUPPLY CHAINS

Conventional energy, industrials, and chemicals

CONVENTIONAL NUCLEAR SUPPLY CHAINS

Kiewit selected as lead constructor for the Aurora-INL

Progress on Oklo's path to first commercial deployment

- Oklo entered into a Master Services
 Agreement with Kiewit to provide design,
 procurement, and construction services
 for the Aurora-INL.
- Pre-construction activities are expected to begin in the 3rd quarter of 2025, including site mobilization and early procurement.
- Targeting commercial operations between late 2027 and early 2028, pending regulatory approvals and construction progress.

Oklo's preferred site for its first Aurora powerhouse in Idaho (Image: Idaho National Laboratory)

Oklo and KHNP sign agreement to collaborate on advanced nuclear projects

Strategic collaboration overview

- Oklo and KHNP signed a memorandum of understanding (MOU) to explore cooperation on advanced nuclear projects.
- Areas of potential collaboration include project development, licensing, manufacturing, and supply chain initiatives.
- The agreement reflects a shared interest in deploying advanced reactors in global markets and advancing nuclear innovation.
- The partnership builds on Oklo's strategy to establish international partnerships in support of commercialization.

Oklo and Vertiv collaborate to advance power and cooling solutions for U.S. data centers

Joint technology development agreement overview

- Oklo and Vertiv, a leader in data center infrastructure, entered a joint development agreement to codevelop advanced power and cooling solutions.
- The partnership focuses on the co-development of advanced thermal management solutions for data centers powered by Oklo plants.
- Vertiv will leverage steam from Oklo's plants to drive chillers, enhancing the overall energy efficiency of the data center.
- Approach delivers a turnkey solution for powering and cooling data centers with enhanced performance and reduced emissions—enabled by Oklo's flexible siting model, which allows co-location and efficient use of steam for thermal applications

Oklo and Liberty Energy launch next-generation integrated power solution

Accelerating time to power

- Oklo and Liberty Energy are partnering to offer a flexible deployment path—nearterm gas, long-term nuclear—all in one turnkey package.
- The solution begins with Liberty's natural gas generation and load management system, with a phased integration of Oklo's Aurora powerhouses for zerocarbon baseload power.
- Customers gain access to immediate, uninterrupted energy, with a path to longterm clean energy infrastructure.
- The partnership builds a joint commercial platform to serve energy-intensive customers.

Render of Oklo Aurora powerhouse (Image: Oklo)

Oklo selected as intended awardee to power U.S. military installation

What the selection means & what comes next

- The U.S. Air Force issued a NOITA naming Oklo the apparent successful awardee to power U.S. military installation.
- Oklo would design, construct, own, and operate a powerhouse delivering electricity and heat under a long-term power purchase agreement.
- The selection represents a first-of-a-kind deployment of advanced fission at a U.S. military installation.
- Oklo is actively working with the U.S. Air Force and DLA Energy on next steps, and will to providing further updates as the process advances.

Render of Oklo Aurora powerhouse (Image: Oklo)

Key 2Q 2025 financial highlights

2Q 2025

2Q 2025 Loss from operations

2Q 2025 Loss from Operations of \$28.0 million primarily driven by:

- Payroll, General Business Expenses & Professional Fees associated with the capital raise
- Includes ~\$11.4 million of non-cash stock-based compensation expense

2Q 2025 Loss before income taxes

Loss before income taxes of \$24.3 million is derived from our loss from operations adjusted for:

• Net interest and dividend income of ~\$3.8 million

YTD 2025 Cash used in operating activities

Includes total net loss of \$34.5 million, adjusted primarily for:

- Non-cash charges of ~\$13.7 million from stock-based compensation
- Other non-cash adjustments of ~\$9.9 million primarily for working capital and deferred taxes

Cash and marketable securities

- Cash and equivalents of \$226.8 million and marketable securities of \$456.2 million.
- Includes \$440.1 million from Oklo's successful marketed follow-on equity offering net of fees

\$28.0M

\$24.3M

Loss before income taxes

\$30.7M

vs. FY forecast of \$65M -\$80M

\$683.0M

As of June 30, 2025

Oklo investment highlights

Advanced nuclear power

Oklo uses proven fast reactor technology that reduces complexity, costs, and construction time, enabling nuclear reactor deployment at scale

Nuclear fuel recycling

Oklo intends to recycle used nuclear waste, which can be used as fuel in its reactors, unlocking nuclear energy abundance

Radioisotopes

Attractive high-margin business that utilizes fresh and co-product radioisotopes, providing synergies with the nuclear power generation and nuclear fuel businesses

Attractive business model

Vertically integrated business model across nuclear power, nuclear fuel, and radioisotopes provides recurring revenue and cash flow to investors

Superior economics

Strategic reactor design decisions and nuclear fuel recycling result in low capital costs, operating costs, and levelized cost of energy

14 GW customer pipeline

Scalable product offering validated by a 14 GW pipeline, with customers across data center, utility, oil and gas, and industrial sectors
