NEWS RELEASE

I.T. Rapid Solutions Offers Its Services To The Terex Organization

7/13/2001

WESTPORT, CT, July 13, 2001 – Terex Corporation announced today the availability of consulting services for the entire Terex organization through I.T. Rapid Solutions, LLC. I.T. Rapid Solutions, a subsidiary of EarthKing, Inc. and part of the Terex family, specializes in the complete life cycle of Information Technology project management. I.T. Rapid Solutions is a group of senior level I.T. specialists serving in the areas of business analysis, database design, implementation/integration, project management and hosting. The group has formalized contractual relationships with many providers of additional services and hundreds of technical skill sets, and is positioned to provide complete customer solutions. The company focuses on I.T. projects in the construction, aggregates, mining, earthmoving, and recycling industries.
Current companies that use I.T. Rapid Solutions include Terex, Terex Mining, Compass (an Asplundh division), Martin Marietta Materials, FleetEdge, EarthKing, eConstructionParts, as well as others within the industry. Specific projects include an online used parts system for Terex Mining and eConstructionParts, a Surplus Asset Management System for Martin Marietta Materials, and a reporting mechanism for a GPS user interface for FleetEdge.

IT Rapid Solutions is a resource available within the Terex organization that can provide solutions such as application development, business systems, networks, project management, Website hosting, as well as graphic design and programming, all of which are individually tailored for the specific needs of, and more cost-effective for, each Terex group company.

More information on I.T. Rapid Solutions can be found at www.itrapid.com or by contacting Brian Noble, Business Analyst/Business & Strategic Relationship Manager at (203) 221-4387 or bnoble@itrapid.com. I.T. Rapid Solutions,

together with Terex Corporation and EarthKing Inc., is located in Westport, Connecticut.
