INVESTOR PRESENTATION

Q3 2020

FORWARD-LOOKING STATEMENTS

Statements made in the course of this presentation that express a belief, expectation or intention, as well as those that are not historical fact, are forward-looking statements under the Private Securities Litigation Reform Act of 1995. They involve a number of risks and uncertainties that may cause actual events and results to differ materially from such forward-looking statements. These risks and uncertainties include, but are not limited to: impacts from the COVID-19 pandemic and governmental responses to limit the further spread of COVID-19, including impacts on the company's operations, and the operations and businesses of its customers and vendors, including whether the company's operations and those of its customers and vendors will continue to be treated as "essential" operations under government orders restricting business activities or, even if so treated, whether site-specific health and safety concerns might otherwise require certain of the company's operations to be halted for some period of time; uncertainty with respect to the duration and severity of these impacts from the COVID-19 pandemic, including impacts on the general economy; other economic conditions in the markets served by EnPro's businesses, some of which are cyclical and experience periodic downturns; prices and availability of its raw materials; the impact of fluctuations in relevant foreign currency exchange rates; unanticipated delays or problems in introducing new products; announcements by competitors of new products, services or technological innovations; changes in pricing policies or the pricing policies of competitors; and the amount of any payments required to satisfy contingent liabilities related to discontinued operations of its predecessors, including liabilities for certain products, environmental matters, employee benefit obligations and other matters. EnPro's filings with the Securities and Exchange Commission, including its most recent Form 10-K and 10-Q, describe these and other risks and uncertainties in more detail. EnPro does not undertake to update any forward-looking statements made in the course of this presentation to reflect any change in management's expectations or any change in the assumptions or circumstances on which such statements are based.

We own a number of direct and indirect subsidiaries and, from time to time, we may refer collectively to EnPro and one or more of our subsidiaries as "we" or to the businesses, assets, debts or affairs of EnPro or a subsidiary as "ours." These and similar references are for convenience only and should not be construed to change the fact that EnPro and each subsidiary is an independent entity with separate management, operations, obligations and affairs.

This presentation also contains certain non-GAAP financial measures (*) as defined by the Securities and Exchange Commission. A reconciliation of non-GAAP measures to the most directly comparable GAAP equivalents is included as an appendix to this presentation.

BUSINESS OVERVIEW

WHO IS ENPRO?

A leading technology company using materials science to push the boundaries of the semiconductor, life sciences, and other technology-enabled sectors

ENPRO MISSION AND VISION

WE ARE A PURPOSE-DRIVEN COMPANY WITH STRONG VALUES, A FORWARD-THINKING OPERATING PHILOSOPHY, AND A WAY OF WORKING THAT DRIVES BEST-IN-CLASS VALUE CREATION OVER THE LONG TERM.

HIGHLY ENGINEERED PRODUCTS AND SERVICES THAT PROVIDE DIFFERENTIATED PERFORMANCE DERIVED FROM MATERIALS SCIENCE EXPERTISE, MANUFACTURING KNOW-HOW, AND TRADE SECRETS

DUAL-BOTTOM LINE CULTURE ENABLING HUMAN DEVELOPMENT THROUGH THE WAY WE WORK

COMMITMENT TO SOCIALLY AND ENVIRONMENTALLY RESPONSIBLE PRACTICES

ENPRO'S STRATEGY

1. Focusing on niche, high-margin materials science-related businesses with strong cash flow in markets with favorable tailwinds
2. Increasing exposure to aftermarket and faster growth technology businesses
3. Leveraging the EnPro Operating System to increase margins and cash flow return on investment
4. Maximizing long-term shareholder returns through commitment to disciplined capital allocation

VALUE CREATION AT ENPRO

Increasing Profits	• Increasing stability and predictability of our cash flows by increasing our aftermarket and recurring revenue mix • Increasing exposure to markets that are growing more than 7% annually through organic and inorganic investments
Leveraging Inorganic Growth to Enhance Organic Growth	• Seeding future organic growth through M&A • Acquiring companies that add to the breadth of our expertise and allow us to expand our existing high-growth markets
Improving Capital Efficiency	• Leveraging the EnPro Operating System to increase returns on invested capital by improving margins and cash flow return on investment • Allocating capital through disciplined and balanced approach to maximize long-term shareholder returns
Maintaining Market Leadership	• Maintaining market leading positions enabled by proprietary intellectual property and trade secrets
Driving Dual Bottom Line Culture	• Cultivating our culture of Safety, Excellence, and Respect • Empowering our employees through a culture of authenticity and self-awareness that fosters superior decision-making

UPDATE ON CURRENT BUSINESS ENVIRONMENT

FOCUSED ON PROTECTING OUR PEOPLE, BUSINESS, AND COMMUNITY

Protecting Our People

- Expanded IT infrastructure to enable working remotely and virtual meetings
- Baseline COVID-19 testing
- Digital contact tracing
- Suspended all non-essential travel
- Implemented flexible work options, where feasible
- Restricted visitors to EnPro facilities
- Trained employees in enhanced cleaning and disinfecting protocols
- Provided supplemental PPE at facilities
- Implemented safe operating procedures such as temperature scanning, use of masks, and social distancing
- Created a dedicated internal website for updates on the actions we are taking, status of all of facilities, and FAQ's

Protecting our Business

- Enacted cost reductions resulting in full year 2020 savings of ~$30M, estimate half will be sustainable annual savings moving forward
- Capital expenditure reductions
- Headcount reduction plans
- Discretionary spending reductions
- Working capital management to ensure efficient accounts receivable processing with our customers

Protecting our Community

- Distributed thousands medical grade (N95) masks to doctors and hospitals in the United States and Europe
- Connected institutions with EnPro suppliers to source difficult to find materials like infrared thermometers and masks
- Enabled employees to access urgent medical supplies for themselves and their families' immediate need within COVID-19 afflicted areas

We Have Taken Numerous Actions to Maintain our Business Operations and Ensure the Safety of Our Employees

FOUR-PHASE RESPONSE TO NAVIGATE THE COVID-19 PANDEMIC

Our cross-functional COVID-19 Response & Support Team, made up of our global executive leadership team, is working around the clock to manage our business continuity plans and coordinated response

THE HEALTH AND SAFETY OF OUR EMPLOYEES, COMMUNITIES, CUSTOMERS, AND SUPPLIERS IS OUR NUMBER ONE PRIORITY

PHASE 1
Health and Safety

- Mobilized COVID-19 Response & Support Team
- Developed 'global safe work playbook', a standardized approach for COVID-19 pandemic preparedness and response
- Enacted preventative measures in line with recommendations from global and local authorities
- Implemented flexible and remote work options
- Enacted safe operating procedures, including temperature screenings, additional PPE, physical plexiglass workspace barriers, and enhanced visual management to support social distancing

PHASE 2
Business Stability and Progression

- Planning for several contingency scenarios
- Planning for running business in adverse conditions, resetting business to new demand levels, managing liquidity, and being responsive to customers
- Taking decisive, informed actions to prevent the spread of COVID-19
- Developed playbooks to respond to changing demand levels
- Focused on supply chain stability, progression, and risk mitigation
- Enacted cost reductions resulting in full year **2020 savings of ~$30M**, estimate half will be sustainable annual savings moving forward

PHASE 3
Process and Cost Improvement

- Monitoring and improving:
  - Processes
  - Procedures
  - New ways of working
- Finding solutions to allow employees to thrive in new environment
- Enhanced customer experience

PHASE 4
Current and Post-pandemic Period

- Adapting to the new normal
- Refocusing on our core strategy
- Digital transformation of workplace and work routines
- Supply chain reconfiguration

Taking the Necessary Actions to Protect our People and Organization

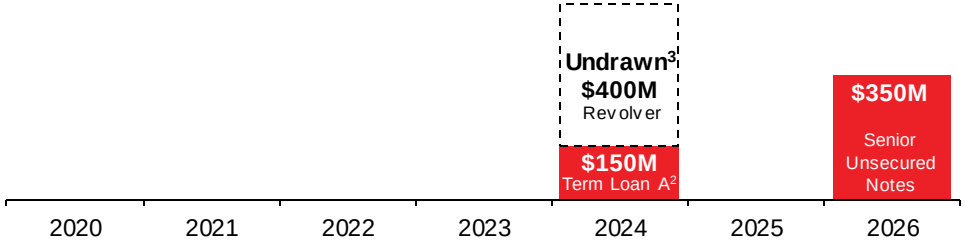
BALANCE SHEET & CASH FLOW

Net Leverage

Reported September 30, 2020 ($M)

	Credit Facility	**$0**
	Senior Notes[1]	**$346**
	Term Loan[2]	**$147**
	Capital Lease Obligations	**$0**
A	Debt Components	**$493**
B	Cash and Equivalents	**$441**
C = (A – B)	Net Debt	**$52**
D	LTM September 30, 2020 Adj. EBITDA*	**$164**
E = (C / D)	**Leverage Ratio**	**0.3x**

Debt Maturity Schedule



Commentary

- Strong balance sheet; net debt to adjusted EBITDA* of 0.3x and ample liquidity consisting of $441M cash and $389M [3] available under revolver
  - No debt coming due until 2024
- Pro forma [4] net debt to adjusted EBITDA leverage ratio remains well within long-term target leverage range of 1.5x to 2.0x
- Year-to-date free cash flow* of $36.6M was down from $76.0M in the prior-year period
  - Excluding cash taxes on Fairbanks Morse divestiture and environmental settlement payments, year-to-date cash flow greater than prior-year
- Paid $5.4M in dividends, or $0.26 per share in Q3 2020
- New two-year $50M share repurchase authorization

Strong and Flexible Balance Sheet Positions Company to Confidently Weather Downturn and Capitalize on Further Opportunities

[1] Includes impact from unamortized debt issue costs. [2] The Term Loan Facility amortizes on a quarterly basis in an annual amount equal to 2.50% of the original principal amount of the Term Loan Facility in each of years one through three, 5.00% of such original principal amount in year four, and 1.25% of such original principal amount in each of the first three quarters of year five, with the remaining outstanding principal amount payable at maturity. [3] Company has full availability of $400M revolver, less $11M in outstanding letters of credit. [4] Note: Based on last-twelve-month results; includes impact of Alluxa acquisition, reshaping of heavy-duty truck business, and the pending sale of GGB's bushing block business as if all transactions occurred at the end of Q3 2019.

* Non-GAAP measure; refer to appendix for reconciliation to GAAP.

COVID-19 SCENARIO ANALYSIS

- For the fourth quarter, anticipate year-over-year demand to be solid for both semiconductor and food and pharma, with continued softness in heavy duty truck, general industrial, oil and gas, petrochemical, and aerospace
- For the full year, revised scenario planning ranges based on market dynamics, portfolio reshaping actions, and seasonal and customer-specific demand patterns:
  - **Year-over-year sales decline of a little over 15%**
  - **Adjusted EBITDA margins of approximately 15%**
    - This compares to prior scenario planning ranges of a 15% to 25% decline in sales and adjusted EBITDA margins of 13% to 14%
- Businesses have already taken actions to mitigate impacts of decreased demand due to COVID-19; further contingency plans are ready, if needed, to adjust businesses to meet new demand levels and recover from economic slowdown

Well Prepared for Near-term Challenges and Will Move Quickly to Address Additional Risks if they Present Themselves

CAPITAL ALLOCATION AND PORTFOLIO MANAGEMENT OVERVIEW

DISCIPLINED CAPITAL ALLOCATION STRATEGY

REINVEST IN THE BUSINESS

- $22 million in FY19 capital expenditures; $11.8 million YTD Q3 2020
- Approximately 57% in FY19 maintenance-related and balance focused on growth

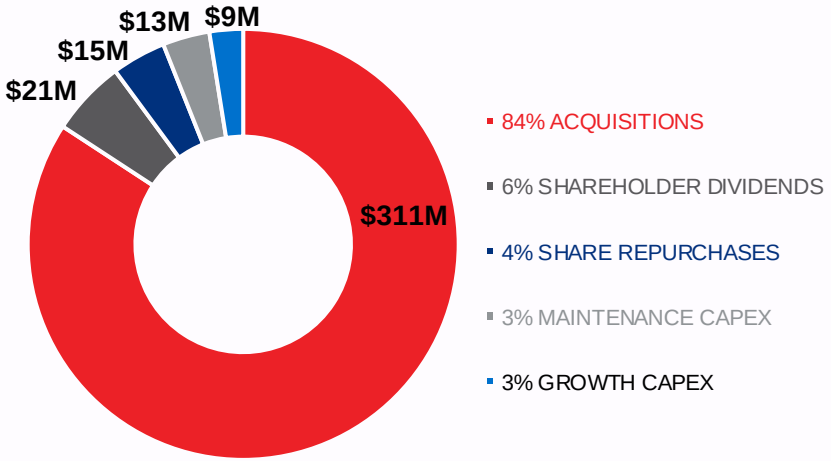
STRATEGIC ACQUISITIONS

- High technical know-how, IP-rich offering
- Experienced management with proven track record
- Primarily aftermarket focus

RETURN CASH TO SHAREHOLDERS

- Current dividend yield of 1.7%(1)
- Approximate 4% increase in quarterly dividend on February 19; $0.26 dividend declared on October 28
- New two-year $50M share repurchase authorization

2019 CAPITAL ALLOCATION ($M)



(1) Dividend yield as of 11/13/20

INORGANIC VALUE CREATION DELIVERED THROUGH DELIBERATE M&A APPROACH

ENPRO'S M&A CRITERIA

MARKET FIT

- Addressable market growth >7% per annum, driven by key technology growth trends
- High barriers to entry (e.g., intellectual property, switching costs, trade secrets, etc.)
- Market segment with high degree of aftermarket exposure or recurring revenue
- Relatively fragmented competitive base, providing potential for follow-on acquisitions

ORGANIZATIONAL PROFILE

- Experienced management team in place
- Ability to integrate with EnPro culture and values of Safety, Excellence, and Respect

FINANCIAL PROFILE

- EBITDA margins >20%
- EBITDA >$10MM
- eCFROI >20%; High cash flow, asset light characteristics

ILLUSTRATIVE AREAS OF INTEREST

This Approach will Expand Our Expertise in Materials Science into Attractive Technologies and Services

SHIFTING CHARACTERISTICS THROUGH THOUGHTFUL PORTFOLIO SHAPING ACTIVITIES

SHIFTING FROM…	…TO
Leadership in high-value niche markets with established, premium brands	Invested in high-value niche markets with addressable market growth of >7% p.a., driven by technology tailwinds
	Portfolio of businesses with high cash flow and low asset intensity
Supporting mission-critical applications in highly demanding and extreme operating environments	Applying advanced materials technologies to support mission critical applications within cutting-edge industries
Low-cost relative to applications served; value-based pricing leverage	Stable market dynamics with high recurring revenue mix and aftermarket exposure
Applying manufacturing know-how and trade secrets; significant application and technical expertise	Applying manufacturing know-how and trade secrets; significant materials technology and application expertise
Embedded with our customers; substantial switching costs and barriers to entry	Competing in industries with attractive structures including high customer switching costs and barriers to entry such as intellectual property and customer qualifications

ENPRO'S PORTFOLIO TRANSFORMATION

1. **Focusing on niche, high-margin materials science-related businesses with strong cash flow in markets with favorable tailwinds**
2. **Increasing exposure to aftermarket and faster growth technology businesses**
3. **Leveraging the EnPro Operating System to increase margins and cash flow return on investment**
4. **Maximizing long-term shareholder returns through commitment to disciplined capital allocation**

Successful Execution of Portfolio Shaping Actions Resulting in a More Durable Business Model

	Transaction	Strategic Rationale
Acquisitions	**Alluxa** *Closed 4Q20*	• Materials science • High-growth, high-margin business • Fragmented competitive base • Robust end market growth • Strong, experienced management team • Meets stated M&A criteria
	LeanTeq Co., Ltd. *Closed 3Q19*	
	The Aseptic Group *Closed 3Q19*	
Divestitures	**Air Springs** *Announced 3Q20*	• Non-core businesses and product lines • Reduces exposure to non-materials science-based sectors • Low return on operating capital
	Heavy-Duty Truck Product Lines *Announced/Completed 3Q19 – 3Q20*	
	Bushing Block *Announced 2Q20*	
	Fairbanks Morse *Closed 1Q20*	

PRO FORMA BRIDGE (LTM)

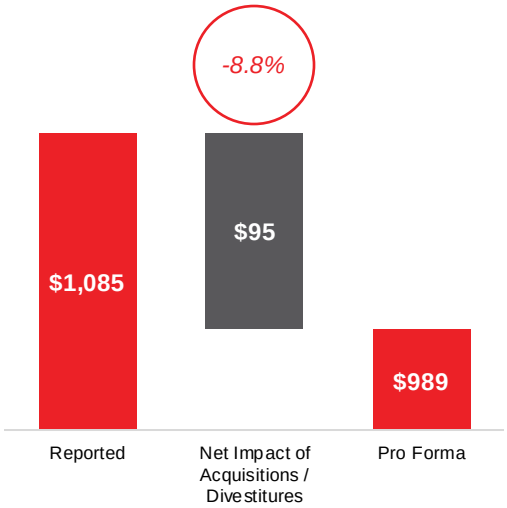
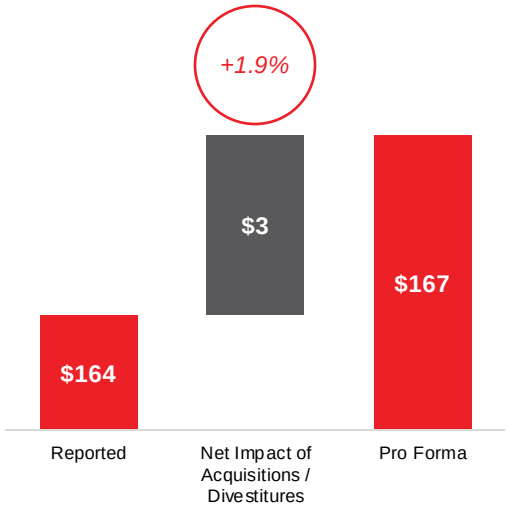
RESHAPING ACTIONS HAVE SIGNIFICANTLY ENHANCED PROFITABILITY OF THE PORTFOLIO

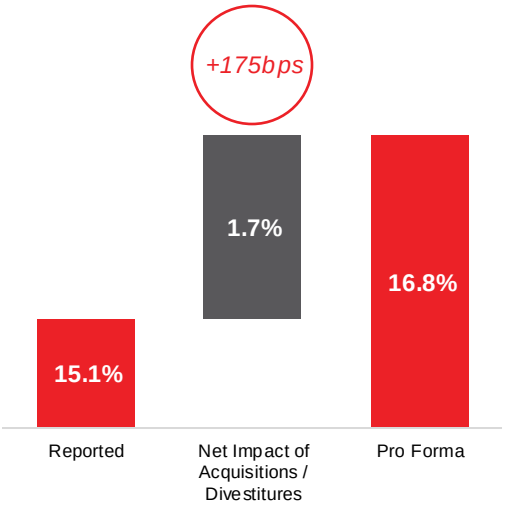
Sales



Adjusted EBITDA*



Adjusted EBITDA Margin*



Increases Exposure to More Resilient, Leading Edge, Advanced Technology and Materials Science-based Niche Markets Poised for Growth, with Semiconductor as Largest End Market

Note: Last-twelve-month results; includes impact of Alluxa acquisition, reshaping of heavy-duty truck business, and the pending sale of GGB's bushing block business as if all transactions occurred at the end of Q3 2019

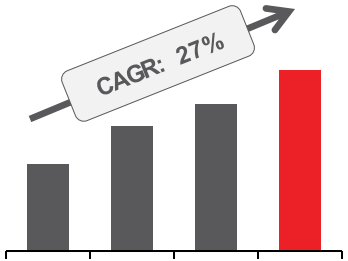
* Non-GAAP measure; refer to appendix for reconciliation to GAAP.

ALLUXA AT A GLANCE

Key Statistics

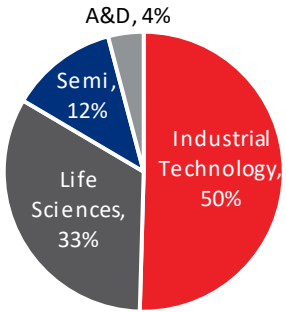
Founded	2007
Facilities	2
Location	Santa Rosa, CA
Transaction Timing	Announced 9/28/20 Closed 10/26/20

Revenue ($M)

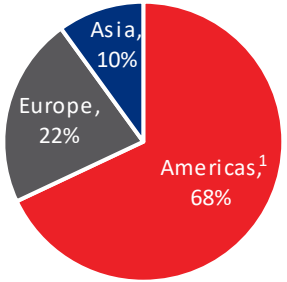


32% of 2019 sales were sole source [2]

2019 Sales By Application



2019 Sales By Geography



ALLUXA APPLICATIONS

Industrial Technology	Life Sciences	Semiconductors	Aerospace & Defense
LiDAR	Advanced Fluorescence Microscopy	Lithography (EUV and others)	Thermal Imaging
Sensor	PCR	Wafer Inspection	Satellite Optics
Autonomous Vehicles	DNA Sequencing		Weapon Systems
Spectroscopy	Flow Cytometer		Remote Sensing

Leading Optical Filters and Thin-Film Precision Coatings Technology Company Serving Diverse, Attractive End Markets

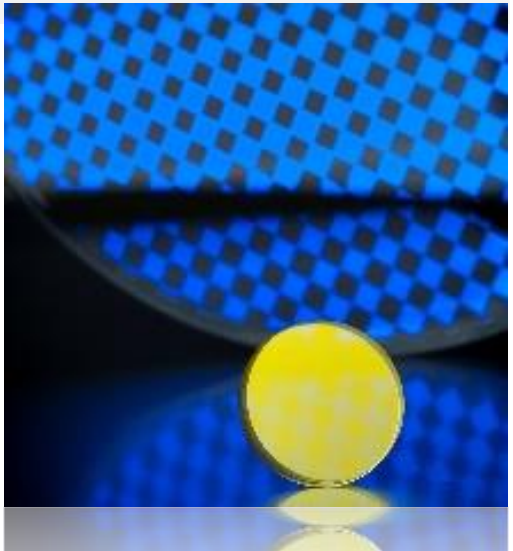
[1] Includes Canada and South America. [2] Sole source defined as business that has very low risk of displacement by a competitor based on technical difficulty, technology, and/or competitive landscape

ALLUXA ADDS SIGNIFICANT VALUE TO OUR PORTFOLIO

Strengthens and expands EnPro's materials science exposure in specialty optical filters and thin-film coatings technology, with a focus on serving the most challenging applications in high-growth markets, primarily industrial technology, life sciences, and semiconductor

Adds proprietary technology platform, processes, and capabilities with a highly differentiated product suite and service offering, including proprietary advanced SIRRUS™ automated plasma deposition software

Aligns with EnPro's growth strategy and acquisition criteria with attractive growth opportunities, comprehensive technical capabilities, compelling financial performance, and a proven and experienced management team



ALLUXA HAS COMPELLING STRATEGIC AND FINANCIAL BENEFITS

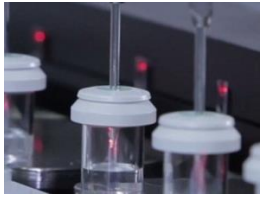
1 PROPRIETARY TECHNOLOGY & PROCESSES	Alluxa's design expertise and proprietary SIRRUS™ plasma deposition software allow the company to provide specialized filters and coatings specific to customer requirements and support the company's ability to service customers across numerous end markets.
2 WELL-POSITIONED IN THE INDUSTRY	Alluxa holds a highly defensible position across end markets through the harmonization of its proprietary software, hardware, processes, and deep engineering expertise to meet challenging customer specifications and manufacture filters that competitors do not supply.
3 GROWTH ACCELERATION	Alluxa is expected to grow faster than its current served markets, primarily including industrial technology, life sciences, and semiconductor markets, through 2024 and has a proven ability to pivot its sales focus to meet the demand of growing end markets.
4 SUPPLIER OF CHOICE WITH STRONG CUSTOMER RELATIONSHIPS	Alluxa has cultivated long-term relationships across its diversified customer base through its proprietary technical capabilities and customized product offering. In 2019, Alluxa was the sole source supplier to its customers on approximately one third of its sales, with a fragmented customer base of over 350 customers.
5 PROVEN & EXPERIENCED LEADERSHIP	Alluxa's senior management team, who will continue with the business after closing, possess an average of over 20 years of experience in the optics and high-technology fields, resulting in an intimate knowledge of the business and market, the company's intellectual property and trade secrets, and deep industry relationships.
6 COMPELLING FINANCIAL PROFILE	Alluxa has an attractive revenue and margin profile, with 18 quarters of consecutive revenue growth. By solving customers' most difficult challenges across a wide range of rapidly growing end markets, we expect Alluxa's track record of double-digit annual revenue growth to continue under our ownership.

SUCCESSFUL INTEGRATION OF RECENT ACQUISITIONS

The Aseptic Group (joined Garlock)

Acquisition increases aftermarket presence in the growing pharmaceutical and biopharmaceutical markets

- Announced and closed on July 2, 2019
- Distributes, designs and manufactures sterile fluid transfer products for the pharmaceutical and biopharmaceutical industries
- Recognized supplier of single-use high purity fluid path components that has been serving some of the world's largest pharma companies for over 20 years
- Headquartered in Limonest, France (one facility)



LeanTeq Co., Ltd. (joined Technetics Group)

Acquisition increases aftermarket presence in the growing semiconductor wafer production market

- Announced on July 22, 2019; closed on September 25, 2019
- Provides cleaning and other refurbishment services for critical components and assemblies used in state-of-the-art semiconductor equipment
- This equipment is used to produce the latest and most technologically advanced microchips for smartphones, autonomous vehicles, high-speed wireless connectivity (5G), artificial intelligence, and other leading-edge applications
- Headquartered in Taoyuan City, Taiwan (3 facilities: 2 Taiwan, 1 US)

The Integration of These Businesses is Progressing According to Plan with Results In Line with Expectations

SUCCESSFUL EXECUTION OF PORTFOLIO SHAPING ACTIONS

Fairbanks Morse Divestiture

(Closed Q1 2020)

- Produces large medium-speed diesel engines, primarily for U.S. Navy
- Divestiture exits a capital-intensive business with lumpy cash flows and customer concentration
- Focuses EnPro on businesses that offer highly engineered products & services to niche markets based on core competency of materials science

FAIRBANKS MORSE

Bushing Block Divestiture

(Announced Q2 2020)

- Announced plans to exit GGB's bushing block business, headquartered in Dieuze, France
- Refocuses GGB on its higher-margin product lines
- This process is ongoing and EnPro is committed to exiting the bushing block business as soon as possible

GGB

Heavy Duty Truck Product Lines Divestitures

(Announced/Completed Q3 2019 – Q3 2020)

- Includes: TrailerTail, Brake Shoe, Aeris, AirBatRF, Motor Wheel, Crewson, Lunar
- Reduces exposure and supports reshaping of heavy-duty truck business to focus on higher margin product lines

STEMCO

Air Springs Divestiture

(Announced Q3 2020)

- Manufacturer of Goodyear licensed air springs, as well as Super Cushion® and Spring Ride® air springs
- Divestiture exits non-core product line
- Reduces exposure and supports reshaping of heavy-duty truck business

STEMCO

ENPRO OPERATING SYSTEM

Restructuring and impairment costs	35.1	22.1
Environmental reserve adjustments and other costs associated with previously disposed businesses	14.5	13.4
Loss on sale of business	16.3	-
Loss on extinguishment of debt	-	18.1
Acquisition and divestiture expenses	8.9	2.0
Pension expense (income) (non-service cost)	3.3	11.9
Non-controlling interest compensation allocation**	0.5	-
Other	0.3	2.1
Adjusted EBITDA	$ 169.4	$ 178.1

* Adjusted EBITDA as presented also represents the amount defined as "EBITDA" under the indenture governing the Company's 5.75% Senior Notes due 2026.

**Non-controlling interest compensation allocation represents compensation expense associated with a portion of the rollover equity from the acquisition of LeanTeq being subject to reduction for certain types of employment terminations of the LeanTeq sellers. This expense is recorded in selling, general, and administration expenses on our Consolidated Statement of Operations and is directly related to the terms of the acquistion of LeanTeq. This expense will continue to be recognized as compensation expense over the term of the put and call options associated with the acquisition unless certain employment terminations have occured.

Supplemental disclosure: For the year ended December 31, 2019, approximately 60% of the adjusted EBITDA as presented above was attributable to EnPro's subsidiaries that do not guarantee the Company's 5.75% Senior Notes due 2026

Adjusted EBITDA	$ 42.1	$ 42.7	$ 120.2	$ 126.1

**Non-controlling interest compensation allocation represents compensation expense associated with a portion of the rollover equity from the acquisition of LeanTeq being subject to reduction for certain types of employment terminations of the LeanTeq sellers. This expense is recor ded in selling, general, and administrative expenses on our Consolidated Statements of Operations and is directly related to the terms of the acquisition of LeanTeq. This expense will continue to be recognized as compensation expense over the term of the put and call options associated with the acquisition unless cer tain employment terminations have occurred.

Supplemental disclosure: Adjusted EBITDA as presented also represents the amount defined as "EBITDA" under the indenture governing the Company's 5.75% Senior Notes due 2026. For the nine months ended September 30, 2020, approximately 68% of the adjusted EBITDA as presented above was attributable to EnPro's subsidiaries that do not guarantee the Company's 5.75% Senior Notes due 2026

Other	0.3			0.1		
Adjusted income from operations before income taxes	21.1			22.7		
Adjusted income tax expense	(7.0)			(7.5)		
Income from redeemable non-controlling interest, net of taxes	(0.3)			-		
Adjusted income from continuing operations attributable to EnPro Industries, Inc.	$ 13.8	20.6	$ 0.67**	$ 15.2	20.7	$ 0.73**

Management of the Company believes that it would be helpful to the readers of the financial statements to understand the impact of certain selected items on the Company's reported income from continuing operations attributable to EnPro Industries, Inc. and diluted earnings per share attributable to EnPro Industries, Inc., including items that may recur from time to time. The items adjusted for in this schedule are those that are excluded by management in budgeting or projecting for performance in future periods, as they typically relate to events specific to the period in which they occur. This presentation enables readers to better compare EnPro Industries, Inc. to other diversified industrial manufacturing companies that do not incur the sporadic impact of restructuring activities, costs associated with previously disposed of businesses, or other selected items. Management acknowledges that there are many items that impact a company's reported results and this list is not intended to present all items that may have impacted these results.

The environmental reserve adjustments and other costs associated with previously disposed businesses, net loss on sale of businesses, and pension expense (income) (non-service cost) are included as part of other expense. The non-controlling interest compensation allocation, acquisition and divestiture expenses, and other costs are included in selling, general, and administrative and other operating expenses. Restructuring, impairment, and legal settlement costs are included as part of other operating expense and cost of sales.

The adjusted income tax expense presented above is calculated using a normalized company-wide effective tax rate excluding discrete items of 33.0% for continuing operations. Per share amounts were calculated by dividing by the weighted-average shares of diluted common stock outstanding during the periods.

*There were 0.1 million potentially dilutive shares in the quarter and nine months ended September 30, 2020 and 0.1 million potentially dilutive shares in the quarter ended September 30, 2019 that were excluded from the calculation of consolidated earnings per share in the respective period since they were antidilutive. These shares were added back for the purpose of calculating adjusted net income per share for that period.

** Adjusted diluted earnings per share.

***Non-controlling interest compensation allocation represents compensation expense associated with a portion of the rollover equity from the acquisition of LeanTeq that is subject to reduction for certain types of employment terminations of the LeanTeq sellers and is directly related to the terms of the acquisition of LeanTeq. This expense will continue to be recognized as compensation expense over the term of the put and call options associated with the acquisition unless certain employment terminations have occurred.
