LithiumAmericas

NEWS RELEASE

Opening Our Tech Center with Our Stakeholders

10/3/2023

On July 20, 2022, Lithium Americas celebrated the inauguration of its new Lithium Technical Development Center (“LiTDC”) in Reno, with a formal ribbon-cutting ceremony. Lithium Americas' President and CEO, Jonathan Evans, was joined by then-Nevada Governor, Steve Sisolak; University of Nevada, Reno President, Brian Sandoval and members of the Fort McDermitt Paiute and Shoshone Tribe.

The 30,000 ft2 facility was developed to demonstrate the chemical process designed for Thacker Pass in an integrated process testing facility. Lithium Americas and the University of Nevada, Reno are collaborating on this commercial work, while also educating the next generation of engineers and researchers who will play an essential role in curbing harmful carbon emissions.

This facility is unique in the U.S. and will serve as an economic driver for Nevada’s growing battery supply chain.

Following is a video recap of the inauguration event:
