

NEWS RELEASE

Delek US Holdings Reports Fourth Quarter 2022 Results and Raises Quarterly Regular Dividend by \$0.01 to \$0.22 per share

2/28/2023

Fourth Quarter

- Net loss of \$118.7 million for fourth quarter or \$1.73 per share
- Adjusted net income of \$60.8 million or \$0.88 per share, and Adjusted EBITDA of \$220.9 million
- Returned \$104.1 million to shareholders through dividends and share repurchases
- Refining impacted by unplanned downtime
- Record contributions from Logistics business
- Initiated sum of the parts valuation unlock initiative
- Launched cost reduction and process improvement efforts

Full-Year 2022

- Delivered \$257.1 million of net income and \$1,185.8 million of Adjusted EBITDA
- Returned \$236.4 million to shareholders through dividends and share repurchases, \$172.4 million in the second half of 2022
- Capital spending of \$343.1 million, with \$152.4 million for growth and \$190.7 million for sustaining/regulatory
- Achieved crude utilization rate of 93 percent in Refining
- Grew Logistics business through Delek Permian Gathering and acquisition of 3 Bear

BRENTWOOD, Tenn., Feb. 28, 2023 /PRNewswire/ -- Delek US Holdings, Inc. (NYSE: DK) ("Delek US", "Company") today announced financial results for its fourth quarter ended December 31, 2022.

"2022 was a record year for Delek US. Market conditions were strong for refining and midstream, and we were well

positioned to capture opportunities throughout the year," said Avigal Soreq, President and Chief Executive Officer of Delek US. "Refining's crude utilization rate was 93 percent for 2022. This includes unplanned downtime at the Big Spring Refinery during the fourth quarter of 2022. Our Logistics segment ran extremely well all year, its record EBITDA reflects this, as well as the successful integration of the 3 Bear assets."

"During 2022, we returned to shareholder friendly pre-pandemic practices. We returned \$236 million through share repurchases and dividends for the year. To improve our cost structure, we launched a cost reduction and process improvement effort. We expect \$30 million to \$40 million of lower costs in 2023, and \$90 million to \$100 million on an annual run rate basis once complete. And finally, we are focused on our sum of the parts strategic initiative. Currently, we are evaluating various options and opportunities around logistics and retail, we look forward to unlocking value for our stakeholders," Mr. Soreq continued.

"Looking ahead, the refining cracks remain elevated. We believe we are well positioned to capture opportunities in the market, given the successful turnaround at the Tyler Refinery, and no significant planned downtime scheduled until late 2024. With this, the board was very supportive and approved an additional 5 percent increase to the quarterly regular dividend, raising it to 22 cents per share," Mr. Soreq concluded.

⁽¹⁾ Adjusted to reflect the retrospective change in accounting policy from LIFO to FIFO for certain inventories.

Refining Segment

The refining segment Adjusted EBITDA was \$182.0 million in the fourth quarter 2022 compared with a loss of \$(3.3) million in the same quarter last year. The increase over 2021, is primarily due to higher refining crack spreads. During the fourth quarter 2022, Delek US's benchmark crack spreads were up an average of 76.0% from prior-year levels.

Logistics Segment

The logistics segment Adjusted EBITDA in the fourth quarter 2022 was \$90.6 million compared with \$68.1 million in the prior year quarter. The increase over last year's fourth quarter was driven by strong contributions from the Delek Permian Gathering system and the acquisition of 3 Bear Delaware Holding - NM, LLC ("3 Bear") on June 1, 2022.

Retail Segment

For the fourth quarter 2022, Adjusted EBITDA was \$7.8 million compared with \$10.0 million in the prior-year period for the retail segment. The decrease was primarily driven by reduced volumes and lower average margins during the fourth quarter in 2022 compared with the fourth quarter of 2021.

Corporate and Other Activity

Adjusted EBITDA from Corporate, Other and Eliminations was a loss of \$(59.5) million in the fourth quarter 2022 compared to a loss of \$(42.0) million in the prior-year period. The higher losses are driven by general and administrative costs, primarily related to benefit related expenses.

Shareholder Distributions

During the fourth quarter 2022, Delek US repurchased approximately 2.8 million shares of Delek US common stock for approximately \$89.6 million, with an average price of \$31.70 per share. In addition, in the fourth quarter, the Board of Directors increased the quarterly regular dividend by \$0.01 per share to \$0.21 per share. On February 27, 2023, the Board of Directors approved an additional \$0.01 per share increase in the quarterly regular dividend to \$0.22 per share that will be paid on March 17, 2023 to shareholders of record on March 10, 2023.

Liquidity

As of December 31, 2022, Delek US had a cash balance of \$841.3 million and total consolidated long-term debt of \$3,053.7 million, resulting in Net debt of \$2.21 billion. As of December 31, 2022, Delek Logistics Partners, LP (NYSE: DKL) ("Delek Logistics") had \$8.0 million of cash and \$1,661.6 million of total long-term debt, which are included in the consolidated amounts on Delek US' balance sheet. Excluding Delek Logistics, Delek US had \$833.3 million in cash and \$1,392.1 million of long-term debt, or a \$558.8 million net debt position.

Fourth Quarter 2022 Results | Conference Call Information

Delek US will hold a conference call to discuss its fourth quarter 2022 results on Tuesday, February 28, 2023 at 2:00 p.m. Central Time. Investors will have the opportunity to listen to the conference call live by going to www.DelekUS.com and clicking on the Investor Relations tab. Participants are encouraged to register at least 15 minutes early to download and install any necessary software. Presentation materials accompanying the call will be available on the investor relations tab of the Delek US website approximately ten minutes prior to the start of the call. For those who cannot listen to the live broadcast, the online replay will be available on the website for 90 days.

Investors may also wish to listen to Delek Logistics' (NYSE: DKL) fourth quarter 2022 earnings conference call that will be held on Tuesday, February 28, 2022 at 3:30 p.m. Central Time and review Delek Logistics' earnings press release. Market trends and information disclosed by Delek Logistics may be relevant to the logistics segment reported by Delek US. Both a replay of the conference call and press release for Delek Logistics will be available online at www.deleklogistics.com.

About Delek US Holdings, Inc.

Delek US Holdings, Inc. is a diversified downstream energy company with assets in petroleum refining, logistics, pipelines, renewable fuels and convenience store retailing. The refining assets consist primarily of refineries operated in Tyler and Big Spring, Texas, El Dorado, Arkansas and Krotz Springs, Louisiana with a combined nameplate crude throughput capacity of 302,000 barrels per day. Pipeline assets include an ownership interest in the 650-mile Wink to Webster long-haul crude oil pipeline. The convenience store retail segment operates approximately 249 convenience stores in West Texas and New Mexico.

The logistics operations include Delek Logistics Partners, LP (NYSE: DKL). Delek Logistics Partners, LP is a growth-oriented master limited partnership focused on owning and operating midstream energy infrastructure assets. Delek US Holdings, Inc. and its affiliates owned approximately 78.8% (including the general partner interest) of Delek Logistics Partners, LP at December 31, 2022.

Safe Harbor Provisions Regarding Forward-Looking Statements

This press release contains forward-looking statements that are based upon current expectations and involve a number of risks and uncertainties. Statements concerning current estimates, expectations and projections about future results, performance, prospects, opportunities, plans, actions and events and other statements, concerns, or matters that are not historical facts are "forward-looking statements," as that term is defined under the federal securities laws. These statements contain words such as "possible," "believe," "should," "could," "would," "predict," "plan," "estimate," "intend," "may," "anticipate," "will," "if", "potential," "expect" or similar expressions, as well as statements in the future tense. These forward-looking statements include, but are not limited to, statements regarding throughput at the Company's refineries; crude oil prices, discounts and quality and our ability to benefit therefrom; cost reductions; growth; scheduled turnaround activity; investments into our business; the performance and execution of our midstream growth initiatives, including the Permian Gathering System, the Red River joint venture and the Wink to Webster long-haul crude oil pipeline, and the flexibility, benefits and the

expected returns therefrom; projected benefits of the 3 Bear Acquisition, renewable identification numbers ("RINs") waivers and tax credits and the value and benefit therefrom; cash and liquidity; emissions reductions; opportunities and anticipated performance and financial position.

Investors are cautioned that the following important factors, among others, may affect these forward-looking statements. These factors include, but are not limited to: uncertainty related to timing and amount of future share repurchases and dividend payments; risks and uncertainties with respect to the quantities and costs of crude oil we are able to obtain and the price of the refined petroleum products we ultimately sell, uncertainties regarding future decisions by OPEC regarding production and pricing disputes between OPEC members and Russia; risks and uncertainties related to the integration by Delek Logistics of the 3 Bear business following the recent acquisition; risks and uncertainties related to the Covid-19 pandemic; Delek US' ability to realize cost reductions; risks related to Delek US' exposure to Permian Basin crude oil, such as supply, pricing, gathering, production and transportation capacity; gains and losses from derivative instruments; risks associated with acquisitions and dispositions; acquired assets may suffer a diminishment in fair value as a result of which we may need to record a write-down or impairment in carrying value of the asset; the possibility of litigation challenging renewable fuel standard waivers; changes in the scope, costs, and/or timing of capital and maintenance projects; the ability to grow the Permian Gathering System; the ability of the Red River joint venture to complete the expansion project to increase the Red River pipeline capacity; the ability of the joint venture to construct the Wink to Webster long haul crude oil pipeline; operating hazards inherent in transporting, storing and processing crude oil and intermediate and finished petroleum products; our competitive position and the effects of competition; the projected growth of the industries in which we operate; general economic and business conditions affecting the geographic areas in which we operate; and other risks described in Delek US' filings with the United States Securities and Exchange Commission (the "SEC"), including risks disclosed in our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and other filings and reports with the SEC.

Forward-looking statements should not be read as a guarantee of future performance or results and will not be accurate indications of the times at, or by, which such performance or results will be achieved. Forward-looking information is based on information available at the time and/or management's good faith belief with respect to future events, and is subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in the statements. Delek US undertakes no obligation to update or revise any such forward-looking statements to reflect events or circumstances that occur, or which Delek US becomes aware of, after the date hereof, except as required by applicable law or regulation.

Non-GAAP Disclosures:

Our management uses certain "non-GAAP" operational measures to evaluate our operating segment performance and non-GAAP financial measures to evaluate past performance and prospects for the future to supplement our GAAP financial information presented in accordance with U.S. GAAP. These financial and operational non-GAAP measures are important factors in assessing our operating results and profitability and include:

- Adjusting items certain identified infrequently occurring items, non-cash items, and items that are not
 attributable to or indicative of our on-going operations or that may obscure our underlying results and
 trends;
- Adjusted net income (loss) calculated as net income (loss) attributable to Delek US adjusted for relevant
 Adjusting items recorded during the period;
- Adjusted net income (loss) per share calculated as Adjusted net income (loss) divided by weighted average shares outstanding, assuming dilution, as adjusted for any anti-dilutive instruments that may not be permitted for consideration in GAAP earnings per share calculations but that nonetheless favorably impact dilution;
- Earnings before interest, taxes, depreciation and amortization ("EBITDA") calculated as net income (loss) attributable to Delek adjusted to add back interest expense, income tax expense, depreciation and amortization:
- Adjusted EBITDA calculated as EBITDA adjusted for the relevant identified Adjusting items in Adjusted net income (loss) that do not relate to interest expense, income tax expense, depreciation or amortization, and adjusted to include income (loss) attributable to non-controlling interests;
- Refining margin calculated as gross margin (which we define as sales minus cost of sales) adjusted for
 operating expenses and depreciation and amortization included in cost of sales;
- Adjusted refining margin calculated as refining margin adjusted for other inventory impacts, net inventory LCM valuation loss (benefit), unrealized hedging (gain) loss, and non-cash changes in fair value of the S&O obligation associated with hedging activities;
- Refining production margin calculated based on the regional market sales price of refined products
 produced, less allocated transportation, RFS renewable volume obligation and associated feedstock costs.
 This measure reflects the economics of each refinery exclusive of the financial impact of inventory price risk
 mitigation programs and marketing uplift strategies;
- Refining production margin per sales barrel calculated as refining margin divided by our average refining sales in barrels per day (excluding purchased barrels) multiplied by 1,000 and multiplied by the number of days in the period; and
- Net debt calculated as long-term debt including both current and non-current portions (the most comparable GAAP measure) less cash and cash equivalents as of a specific balance sheet date.

We believe these non-GAAP operational and financial measures are useful to investors, lenders, ratings agencies and analysts to assess our ongoing performance because, when reconciled to their most comparable GAAP financial measure, they provide improved relevant comparability between periods, to peers or to market metrics through the inclusion of retroactive regulatory or other adjustments as if they had occurred in the prior periods they relate to, or through the exclusion of certain items that we believe are not indicative of our core operating performance and that may obscure our underlying results and trends. "Net debt," also a non-GAAP financial measure, is an important measure to monitor leverage and evaluate the balance sheet.

Non-GAAP measures have important limitations as analytical tools, because they exclude some, but not all, items that affect net earnings and operating income. These measures should not be considered substitutes for their most directly comparable U.S. GAAP financial measures. Additionally, because Adjusted net income or loss, Adjusted net income or loss per share, EBITDA and adjusted EBITDA, and Adjusted Refining Segment Margin or any of our other

identified non-GAAP measures may be defined differently by other companies in its industry, Delek US' definition may not be comparable to similarly titled measures of other companies. See the accompanying tables in this earnings release for a reconciliation of these non-GAAP measures to the most directly comparable GAAP measures.

 $^{^{(1)}}$ Adjusted to reflect the retrospective change in accounting policy from LIFO to FIFO for certain inventories.

⁽²⁾ In the current period, we reassessed the classification of certain expenses and made certain reclassification adjustments to better represent the nature of those expenses. Accordingly, we have made reclassifications to the prior period in order to conform to this revised current period classification, which resulted in a decrease in the prior period general and administrative expenses and an increase in the prior period operating expenses of approximately \$16.8 million for the year ended December 31, 2021.

 $^{^{(1)}}$ Adjusted to reflect the retrospective change in accounting policy from LIFO to FIFO for certain inventories.

Significant Transactions During the Quarter Impacting Results:

Insurance Recoveries

During the fourth quarter 2022, we received insurance recoveries related to the fire and freeze events that occurred during the first quarter 2021, which unfavorably impacted our results during the first two quarters of 2021. For the three months ended December 31, 2022, we have recognized an additional \$5.2 million (\$4.0 million after-tax) of business interruption insurance recoveries, which were recorded in other operating income on the consolidated statement of income. We have additional business interruption claims that are outstanding and still pending which are expected to be recognized in future quarters. Because business interruption losses are economic in nature rather than recognized, the related insurance recoveries are included as an Adjusting item in Adjusted net income and Adjusted EBITDA.

Other Inventory Impact

"Other inventory impact" is primarily calculated by multiplying the number of barrels sold during the period by the difference between current period weighted average purchase cost per barrel and per barrel cost of materials and other for the period recognized on a FIFO basis. It assumes no beginning or ending inventory, so that the current period average purchase cost per barrel is a reasonable estimate of our market purchase cost for the current period, without giving effect to any build or draw on beginning inventory. These amounts are based on management estimates using a methodology including these assumptions. However, this analysis provides management with a means to compare hypothetical refining margins to current period average crack spreads, as well as provides a means to better compare our results to peers.

Segment Reporting

During the fourth quarter 2022, we realigned our reportable segments for financial reporting purposes to reflect changes in the manner in which our chief operating decision maker, or CODM, assesses financial information for decision-making purposes. The change primarily represents reporting the operating results of wholesale crude operations within the refining segment. Prior to this change, wholesale crude operations were reported as part of corporate, other and eliminations. Through September 30, 2022, the CODM believed that contribution margin was a meaningful measure of performance, and it was used by CODM to analyze the Company and stand-alone operating segment performance. During the fourth quarter 2022, the CODM determined that EBITDA is the key performance measure for planning and forecasting purposes and discontinued the use of contribution margin as a measure of performance. While these reporting changes did not change our consolidated results, segment data for previous years has been restated and is consistent with the current year presentation.

Inventory Intermediation Agreement

On December 22, 2022, Delek US entered into an inventory intermediation agreement (the "Inventory Intermediation Agreement") with Citigroup Energy Inc. ("Citi"). Pursuant to the Inventory Intermediation Agreement, Citi will (i) purchase from and sell to Delek US crude oil and other petroleum feedstocks in connection with

processing operations at certain refineries, (ii) purchase from and sell to Delek US all refined products produced by such refineries other than certain excluded products and (iii) in connection with such purchases and sales, Delek US will enter into certain market risk hedges in each case, on the terms and subject to the conditions set forth therein.

On December 27, 2022, in connection with entry into the Inventory Intermediation Agreement, Delek US and J. Aron & Company LLC ("J. Aron") agreed to terminate the existing supply and offtake agreements, with each such termination effective as of December 30, 2022.

Restructuring Costs

In November 2022, we announced that we are progressing a business transformation focused on enterprise-wide opportunities to improve the efficiency of our cost structure. For the three months ended December 31, 2022, we recorded restructuring costs totaling \$12.5 million (\$9.5 million after-tax) associated with our business transformation. These costs are recorded in general and administrative expenses in our consolidated statements of income and are reported in our Corporate segment.

Ulncludes sales to other segments which are eliminated in consolidation.

 $^{^{(2)}}$ Adjusted to reflect the retrospective change in accounting policy from LIFO to FIFO for certain inventories.

⁽³⁾Trading and supply activities include the employment of marketing uplift strategies and the execution of risk management programs to capture the physical and financial opportunities that extend from our refining operations.

⁽⁴⁾ Reflects the prior period conforming reclassification adjustment between operating expenses and general and administrative expenses.

⁽⁵⁾Defined as refining production margin divided by the respective crack spread. See page 17 for crack spread information.

 $^{^{(6)}}$ Crude throughput as % of total nameplate capacity of 302,000 bpd

⁽¹⁾ Formerly known as the Big Spring Gathering System. Excludes volumes that are being temporarily transported via trucks while connectors are under construction.

 $^{^{(2)}\!2022}$ volumes include volumes from June 1, 2022 through December 31, 2022.

 $^{{}^{(3)}\!\}text{Mcfd}$ - average thousand cubic feet per day.

⁽⁴⁾Excludes jet fuel and petroleum coke.

⁽⁵⁾Consists of terminalling throughputs at our Tyler, Big Spring, Big Sandy and Mount Pleasant, Texas terminals, El Dorado and North Little Rock, Arkansas terminals and Memphis and Nashville, Tennessee terminals.

⁽¹⁾ Retail fuel margin represents gross margin on fuel sales in the retail segment, and is calculated as retail fuel sales revenue less retail fuel cost of sales. The retail fuel margin per gallon calculation is derived by dividing retail fuel margin by the total retail fuel gallons sold for the period.

⁽²⁾Same-store comparisons include period-over-period changes in specified metrics for stores that were in service at both the beginning of the earliest period and the end of the most recent period used in the comparison.
