About SELLAS Life Sciences Group

SELLAS Life Sciences Group is a development-stage biopharmaceutical company focused on novel cancer immunotherapeutics for a broad range of cancer indications. SELLAS' lead product candidate, galinpepimut-S (GPS), is a cancer immunotherapeutic agent licensed from Memorial Sloan Kettering Cancer Center that targets the Wilms Tumor 1 (WT1) protein, which is present in an array of tumor types. GPS has potential as a monotherapy or in combination to address a broad spectrum of hematologic cancers and solid tumor indications. GPS is Phase 3-ready for two indications, acute myeloid leukemia (AML) and malignant pleural mesothelioma (MPM), and is also in development as a potential treatment for multiple myeloma and ovarian cancer. SELLAS plans to study GPS in up to four additional indications. SELLAS recently received Orphan Drug designations from the U.S. Food & Drug Administration (FDA), as well as the European Medicines Agency, for GPS in AML and MPM; GPS also received Fast Track designation for AML and MPM from the FDA.
