NEWS RELEASE

Introducing Vontier Vantage Point, a New Source of Mobility Intelligence

2026-10-08

Vontier's new intelligence platform processes 250 billion real-world data points to help business leaders understand what's changing, why it matters and what's next.

RALEIGH, N.C.--(BUSINESS WIRE)-- Every day, billions of signals move through the mobility ecosystem. Fuel is pumped. Transactions are completed. Fleets move goods and people. Equipment powers critical infrastructure. Most of that information remains fragmented across disconnected systems and reports, making it difficult to understand what is happening across the market in real time.

Today at the National Association of Convenience Stores (NACS) Trade Show 2026, **Vontier** (NYSE: VNT), a leading global provider of critical technologies and solutions that connect, manage and scale the mobility ecosystem, previewed its Vontier Vantage Point, a mobility intelligence platform.

Vontier Vantage Point processes more than 250 billion data points across nearly 60,000 connected sites and 1.35 million monitored devices, bringing together information spanning fueling, retail transactions, fleet activity, charging infrastructure, car wash, equipment performance and market activity into a single intelligence platform. The platform is capable of providing a more complete view of how mobility markets are operating and changing.

The scale of the platform allows retailers and operators to identify emerging shifts in consumer behavior, pricing, reliability and broader market trends earlier than most publicly available reports. Designed to evolve alongside the mobility ecosystem, the platform creates opportunities to connect insights across a growing range of innovations, including EV charging, energy management, car wash operations and emerging retail technologies.

At a time when the mobility industry is navigating changing consumer behavior, evolving energy models, digital transformation and increasing operational complexity, Vontier Vantage Point is designed to help leaders move beyond fragmented reporting and understand emerging patterns while there is still time to act.

"Data has become one of the industry's most valuable assets, yet much of it remains fragmented across systems, businesses and markets," said Rasha Hasaneen, Chief Growth and Innovation Officer, Vontier. "Vontier Vantage Point leverages our unique position and technology capabilities across the mobility ecosystem to help businesses understand what's changing, why it matters and what's next."

Throughout NACS, Vontier will invite retailers, fleet operators, technology providers and industry leaders to share the questions they believe the industry most needs answered. Those discussions will help shape the first analyses, benchmark studies and industry insights, ensuring the platform is focused on the challenges that matter most to the industry.

Vontier remains committed to honoring customer data ownership, segmentation and privacy. All insights generated through Vontier Vantage Point are based on synthesized data to enable broader market intelligence.

Attendees can learn more about Vontier Vantage Point at the Vontier booth #C6623 during the NACS 2026 Expo.

About Vontier

Vontier (NYSE: VNT) is a global industrial technology company uniting productivity, automation and multi-energy technologies to meet the needs of a rapidly evolving, more connected mobility ecosystem. Leveraging leading market positions, decades of domain expertise and unparalleled portfolio breadth, Vontier powers the way the world moves – delivering smart, safe and sustainable solutions to our customers and the planet.
