

# Vontier Earns Top Accolade at International Sustainability Awards

2026-06-15

The global mobility technology company earned top distinction with two Gold awards for Environmental Leadership and Sustainable Business Innovation

RALEIGH, N.C.--(BUSINESS WIRE)-- Vontier (NYSE: VNT), a leading global provider of critical technologies and solutions to connect, manage and scale the mobility ecosystem, today announced it won Gold at the prestigious International Sustainability Awards® (ISA) 2026 for both the Best Environmental Sustainability and Best Sustainable Business Model categories. Vontier was also recognized as the overall winner for 2026, ISA's highest distinction.

Vontier's Kaizen for Climate initiative stood out for its measurable impact, workforce-led innovation and the deep integration of sustainability into core business operations. It empowered Vontier's frontline manufacturing teams to drive emissions reductions through structured continuous improvement.

Rather than imposing solutions from the top down, Vontier embedded sustainability within its Kaizen continuous improvement methodology, mobilizing hundreds of colleagues across global manufacturing sites to identify and implement practical efficiency gains that reduced costs and emissions.

"Winning two golds and the top recognition from the International Sustainability Awards is a remarkable accomplishment for Vontier, but what truly inspires us is how we achieved these results," said Katie Rowen, EVP, Chief Transformation and Operations Officer. "We have ambitious targets and a team that embodies the spirit of curiosity, creativity and innovation. This, plus our culture of continuous improvement, keep sustainability integrated into every facet of our business."

The International Sustainability Awards® accepts entries from public and private organizations of all sizes worldwide, attracting a highly competitive international field.
