# Vontier Unveils Smart, Sustainable Fleet Solutions at ACT Expo 2025 — United for a Multi-Energy Future

2025-04-23

Showcasing integrated solutions across CNG, RNG, hydrogen, electric, and biofuels, and advanced telematics, Vontier helps thousands of fleets worldwide cut costs, reduce emissions, and accelerate their journey to zero.

RALEIGH, N.C.--(BUSINESS WIRE)-- **Vontier Corporation** (NYSE: VNT), a leading global provider of critical technologies and solutions to connect, manage and scale the mobility ecosystem, will showcase its cutting-edge sustainable fleet solutions at the 2025 **Advanced Clean Transportation (ACT) Expo** (April 28–May 1) in Anaheim, California.

Visitors to booth #4225 will discover Vontier's multi-energy solutions that seamlessly support compressed natural gas (CNG), renewable natural gas (RNG), hydrogen, electric, and drop-in fuel applications – a versatility unmatched in the market today. Rather than imposing one-size-fits-all approaches, Vontier delivers data-driven, customized solutions that help fleet operators simultaneously reduce total cost of ownership and emissions, while enhancing operational flexibility and maximizing uptime. Through integrated technologies that connect every aspect of fleet operations, Vontier provides actionable intelligence that empowers operators to make strategic energy transition decisions perfectly aligned with their specific operational needs and sustainability objectives.

As the global fleet management market continues to experience 10%+ growth, driven by surging e-commerce demand, expanding last-mile delivery networks, and rapid adoption of telematics and autonomous technologies – Vontier leads this industry evolution. ACT Expo attendees will experience Vontier's multi-energy vision through engaging interactive displays and immersive demonstrations:

- **Hydrogen & RNG Innovation Center by ANGI Energy Systems:** Experience comprehensive clean fuel solutions featuring hands-on access to production-ready hydrogen and CNG/RNG dispensers, immersive 3D visualizations of complete station infrastructure (compression, storage, cooling, controls), revolutionary

waste-to-energy RNG technology, and the ANGI Portal's predictive maintenance platform – all delivering maximum reliability for forward-thinking fleet operators.

- **Electrification at Scale with Driivz:** Experience Vontier's integrated fleet electrification offering featuring the Driivz industry-proven EV charging and energy management platform that delivers operational excellence for operators and a seamless charging experience to drivers, whilst integrating with on-site renewables and battery storage and optimizing energy usage and resilience.
- **Fueling the Now with Gasboy and Gilbarco Veeder-Root:** Optimize your current fuel operations with Gasboy's versatile AtlasX commercial dispensers and Gilbarco's high-flow Encore biodiesel/DEF solution for heavy-duty applications – both fully compatible with biofuels to start your decarbonization journey and seamlessly integrated with the cloud-native EKOS fleet management platform that unifies operational data to reduce cost-per-mile and maximize return on investment.
- **Fleet Intelligence from Teletrac Navman:** Orchestrate your entire multi-energy operation with Teletrac Navman's comprehensive telematics platform that enhances fleet-wide safety, compliance, and operational efficiency, featuring their newly updated Enhanced Privacy Mode on their camera line and specialized analytics tools designed specifically to support mixed-energy fleets through strategic transition planning.

Underscoring Vontier's consultative approach, Joel van Rensburg, President of Alternative Fuels at ANGI Energy Systems, will speak at ACT Expo's educational session, "The Role of Regulations in Advancing Sustainability" on Monday, April 28 at 8:30 AM PT. He will explore how policy shifts are influencing fleet investment strategies – and how Vontier is helping customers adapt with flexible, scalable, and reliable infrastructure solutions that make decarbonization economically viable through optimized total cost of ownership.

In addition to ACT Expo, Teletrac Navman, ANGI Energy Systems, and Gasboy will also showcase their solutions together at **NAFA 2025**, booth #1445, from April 28-30 in Long Beach, CA.

## About Vontier

Vontier (NYSE: VNT) is a global industrial technology company uniting productivity, automation, and multi-energy technologies to meet the needs of a rapidly evolving, more connected mobility ecosystem. Leveraging leading market positions, decades of domain expertise and unparalleled portfolio breadth, Vontier enables the way the world moves – delivering smart, safe and sustainable solutions to our customers and the planet. Vontier has a culture of continuous improvement and innovation built upon the foundation of the Vontier Business System and embraced by colleagues worldwide.
