

# Vontier to showcase technologies that give fleets total control across every site, vehicle and energy type at ACT Expo 2026

2026-04-28

ANGI Energy, Gasboy, Driivz and Teletrac Navman will demonstrate smart multi-energy solutions designed to reduce costs, lower emissions and strengthen fleet resilience

RALEIGH, N.C.--(BUSINESS WIRE)-- As commercial fleets face mounting pressure to balance cost, efficiency and reliability, **Vontier** (NYSE: VNT) is heading to **ACT Expo 2026** (May 4–7, Las Vegas) with a clear message: the path forward requires a unified, multi-energy platform built for control, resilience and operational clarity.

Exhibiting at Booth #2237, Vontier will bring together ANGI Energy, Gasboy, Driivz and Teletrac Navman to demonstrate how connected hardware, software, insights and services can work as one system across every site, vehicle and energy type.

“Fleet operators are navigating a period defined by macro volatility, new energy technologies and rising operational demands,” said Mark Morelli, CEO of Vontier. “At ACT Expo, we’re showing how a unified fleet platform gives operators the visibility, resilience and control they need to optimize energy spend, reduce emissions and build for the future.”

## Smart Multi-Energy Solutions to Cut Costs and Lower Emissions

Across the booth, Vontier will spotlight technologies that help fleets move confidently into a multi-energy future.

At the center is **ANGI Energy**, North America's leading provider of CNG and RNG compression systems. ANGI Energy will showcase its full suite of technologies – from compression and dispensing to complete refueling systems – supported by wrap-around service, remote diagnostics and real-time monitoring through the ANGI Energy Portal. The result is a lower-carbon fueling ecosystem designed for uptime, safety and operational efficiency.

Alongside ANGI Energy, **Driivz** will demonstrate how its smart EV charging and energy management platform, Driivz InSite™ for Fleets, keeps electric vehicles powered, optimized and ready to move. With tools that reduce energy costs, optimize charging schedules and streamline operations, Driivz helps fleets electrify without compromising performance.

Together, these solutions illustrate Vontier's multi-energy strategy: enabling fleets to decarbonize while maintaining the operational control required to run at scale.

## Total Control of Your Fleet's Fuel and Energy

Vontier will also highlight how its platform brings the same level of intelligence and control to traditional fueling operations.

**Gasboy** will showcase a comprehensive product lineup, including dispensers, controllers and site management software solutions that give fleet managers real-time visibility into equipment, inventory, fuel processes and reporting. With EKOS serving as the digital backbone, fleets can turn data into an operational advantage.

Gasboy will also feature its automatic vehicle identification system, which transforms vehicles into secure, automated payment credentials – preventing misfuelling and fraud, improving throughput and enabling precise mileage and fuel-consumption tracking.

Rounding out the platform, **Teletrac Navman** will demonstrate software and video telematics solutions that improve driver safety, increase efficiency, and support fleets through the energy transition. From real-time GPS tracking to driver-safety coaching and sustainability insights, Teletrac Navman helps fleets operate smarter and safer.

Underscoring Vontier's consultative approach to fleet decarbonization, Joel van Rensburg, President of ANGI Energy and Marty Tuft, Corporate Fleet Director at Waste Management (WM), will speak at ACT Expo's educational session, "**Beyond the Bin: A Blueprint for Waste-to-Energy Partnerships Driving Fleet Decarbonization**," on Tuesday, May 5 from 2:10–2:30 p.m. PT. Additionally, Driivz's Blake Jessen, VP of North America will speak in an educational session "**Fleet Ready by Morning: What It Takes to Scale EV Depot Operations Without the 2am Calls**," on Wednesday, May 6 from 1:00 to 1:10 p.m. PT.

## About Vontier

Vontier (NYSE: VNT) is a global industrial technology company uniting productivity, automation and multi-energy technologies to meet the needs of a rapidly evolving, more connected mobility ecosystem. Leveraging leading market positions, decades of domain expertise and unparalleled portfolio breadth, Vontier powers the way the world moves - delivering smart, safe and sustainable solutions to our customers and the planet. Vontier has a culture of continuous improvement and innovation worldwide. Additional information about Vontier is available on the Company's website at [www.vontier.com](http://www.vontier.com).
