A detailed reconciliation between GAAP results and results excluding certain items ("non-GAAP") is included in the following tables attached to this document. In situations where a non-GAAP reconciliation has not been provided, the Company was unable to provide such a reconciliation without unreasonable effort due to the uncertainty and inherent difficulty predicting the occurrence, the financial impact and the periods in which the non-GAAP adjustments may be recognized. Management uses non-GAAP measures that exclude certain items in order to better assess operating performance and help investors compare results with our previous guidance. This document also references "free cash flow", a non-GAAP measure, which the Company defines as cash flow from operations less additions to property, plant and equipment and purchased software. The Company's non-GAAP information is not necessarily comparable to the non-GAAP information used by other companies. Non-GAAP information should not be viewed as a substitute for, or superior to, net income or other data prepared in accordance with GAAP as a measure of the Company's profitability or liquidity. Readers should consider the types of events and transactions for which adjustments have been made.
