2022 Investor Presentation

Disclaimers

Forward-Looking Statements

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In some cases, you can identify forward-looking statements by terms such as “anticipate,” “believe,” “estimate,” “expect,” “forecast,” “intend,” “outlook,” “model,” “may,” “might,” “plan,” “project,” “will,” “would,” “should,” “could,” “can,” “predict,” “potential,” “strategy, “target,” “explore,” “continue,” or the negative of these terms, and similar expressions intended to identify forward-looking statements. However, not all forward-looking statements contain these identifying words. These statements may relate to the impact on our business and the businesses of our prospective and existing customers of the COVID-19 pandemic, our market size and growth strategy, our estimated and projected costs, margins, revenue, expenditures and customer and financial growth rates, our Q2 2022, 2022, medium term, and long-term financial outlook and performance against our multi-year financial framework, our plans and objectives for future operations, growth, initiatives or strategies, including our planned 2022 investment in research and development. By their nature, these statements are subject to numerous uncertainties and risks, including factors beyond our control, that could cause actual results, performance or achievement to differ materially and adversely from those anticipated or implied in the forward-looking statements. These assumptions, uncertainties and risks include that, among others: our rapid growth and limited history with key features of our platform makes it difficult to evaluate our prospects and future operating results; we may not be able to sustain our revenue and customer growth rate in the future; our business would be harmed by any significant interruptions, delays or outages in services from our platform, our API providers, or certain social media platforms; if we are unable to attract potential customers through unpaid channels, convert this traffic to free trials or convert free trials to paid subscriptions, our business and results of operations may be adversely affected; the effects and duration of the ongoing COVID-19 pandemic are unpredictable and may materially affect our customers and how we operate our business, and the duration and extent to which the pandemic continues to threaten our future results of operations; any cybersecurity-related attack, significant data breach or disruption of the information technology systems or networks on which we rely could negatively affect our business; and changing regulations relating to privacy, information security and data protection could increase our costs, affect or limit how we collect and use personal information and harm our brand. Additional risks and uncertainties that could cause actual outcomes and results to differ materially from those contemplated by the forward-looking statements are included under the caption “Risk Factors” and elsewhere in our filings with the Securities and Exchange Commission (the “SEC”), including our Annual Report on Form 10-K for the year ended December 31, 2021 filed with the SEC on February 23, 2022, as well as any other future quarterly and current reports that we file with the SEC. Moreover, you should interpret many of the risks identified in those reports as being heightened as a result of the ongoing and numerous adverse impacts of the COVID-19 pandemic. Forward-looking statements speak only as of the date the statements are made and are based on information available to Sprout Social at the time those statements are made and/or management's good faith belief as of that time with respect to future events. Sprout Social assumes no obligation to update forward-looking statements to reflect events or circumstances after the date they were made, except as required by law.

Use of Non-GAAP Financial Measures

We have provided in this presentation certain financial information that has not been prepared in accordance with generally accepted accounting principles in the United States (“GAAP”). Our management uses these non-GAAP financial measures internally in analyzing our financial results and believes that use of these non-GAAP financial measures is useful to investors as an additional tool to evaluate ongoing operating results and trends and in comparing our financial results with other companies in our industry, many of which present similar non-GAAP financial measures. Non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable financial measures prepared in accordance with GAAP and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP. A reconciliation of our historical non-GAAP financial measures to the most directly comparable GAAP measures has been provided in the financial statement tables included at the end of this presentation, and investors are encouraged to review these reconciliations. The Company cannot provide reconciliations between its forecasted non-GAAP measures and the most comparable GAAP measures without unreasonable effort due to the unavailability of reliable estimates for certain items. These items are not within the Company’s control and may vary greatly between periods and could significantly impact future financial results.

Customer Metrics and Market Data

This presentation includes useful customer metrics and other data, which are defined at the back of this presentation. Unless otherwise noted, information in this presentation concerning our industry, including industry statistics and forecasts, competitive position and the markets in which we operate is based on information from independent industry and research organizations, other third-party sources and management estimates. Management estimates are derived from publicly available information released by independent industry analysts and other third party sources, as well as data from our internal research, and are based on assumptions made by us upon reviewing such data, and our experience in, and knowledge of, such industry and markets, which we believe to be reasonable. Projections, forecasts, assumptions and estimates of the future performance of the industry in which we operate and our future performance are necessarily subject to uncertainty and risk due to a variety of factors. We have not independently verified the accuracy or completeness of the information provided by independent industry and research organizations, other third parties or other publicly available information. Accordingly, we make no representations as to the accuracy or completeness of that information nor do we undertake to update such information after the date of this presentation.

*All financial metrics are as of or for the three months ended 3/31/22. Revenue growth represents year-over-year growth of 1Q22 over 1Q21.

Investments Highlights

Empowering businesses to operationalize social

Recurring SaaS model (99% subscription)

Disruptive inbound trial model and fast time to value

Durable moats and barriers to entry

Mission critical system of record for digital business

Founder-led leadership team and exceptional culture

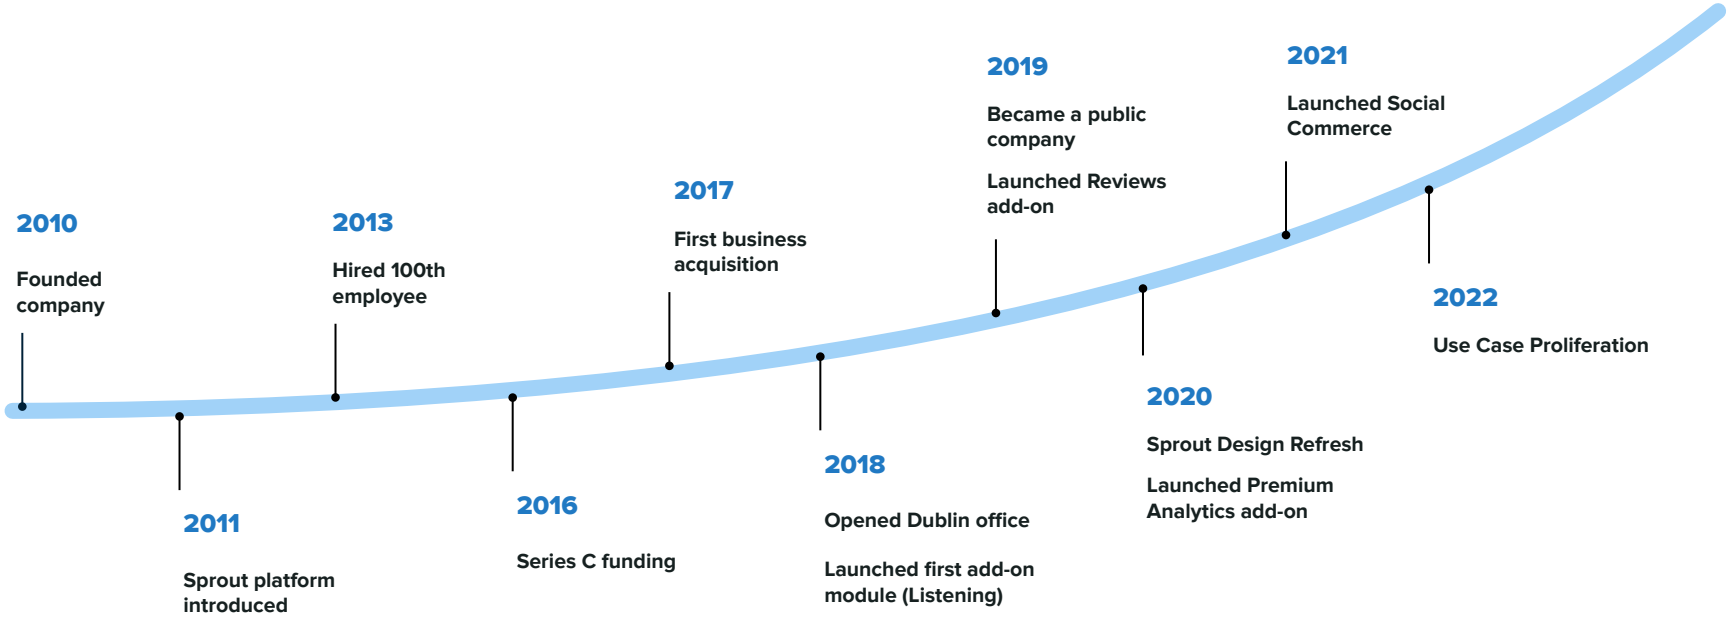

Highly scalable single code base

Large and rapidly growing TAM

Our history

Sprout was built on the premise that social media would change the way the world communicates and how virtually every aspect of business operates.

Social media has fundamentally transformed the way consumers connect with brands

With more than

3.9 billion

consumers using social media

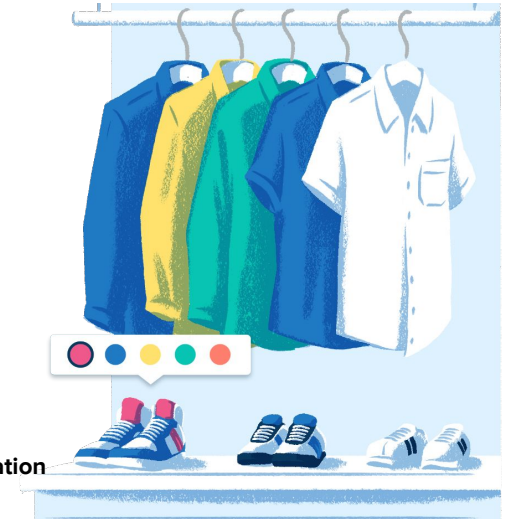

Businesses must adapt or risk becoming irrelevant to nearly half of the world's population. The ways that business attract, acquire, sell to and service customers is being completely transformed.

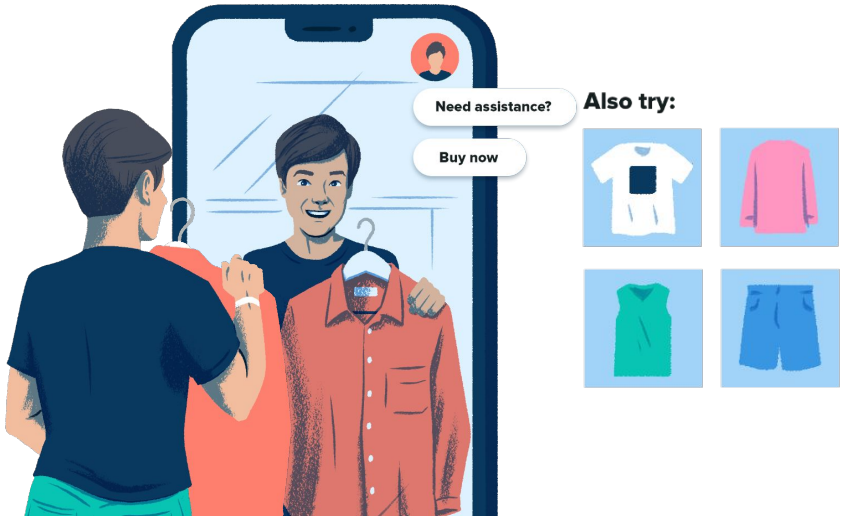

Total Global Social Media Users per Statista, January 2022

And changed the entire customer experience, across the enterprise

This digital transformation requires virtually every part of an organization to adapt and re-tool. Social is a horizontal technology that has tangible benefits to nearly every department of a modern business; businesses must maximize the value of social data.

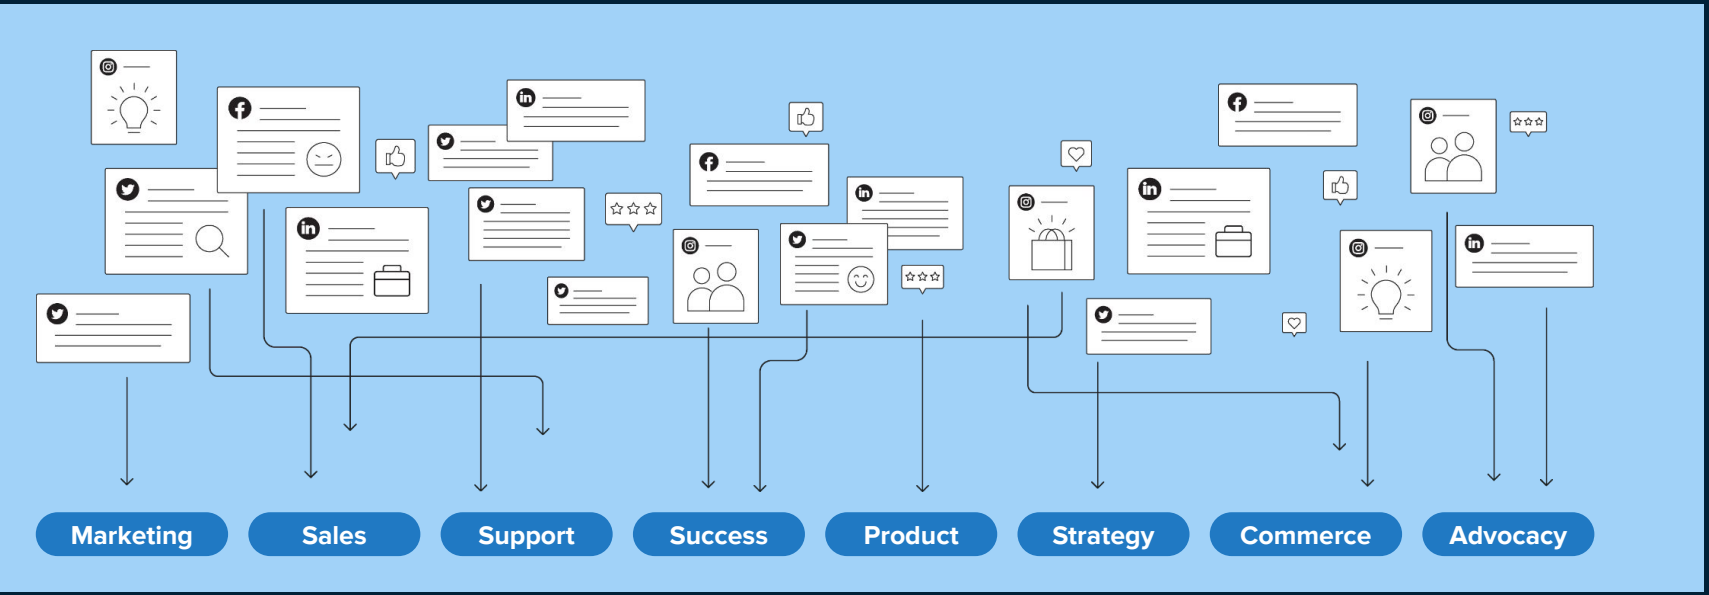

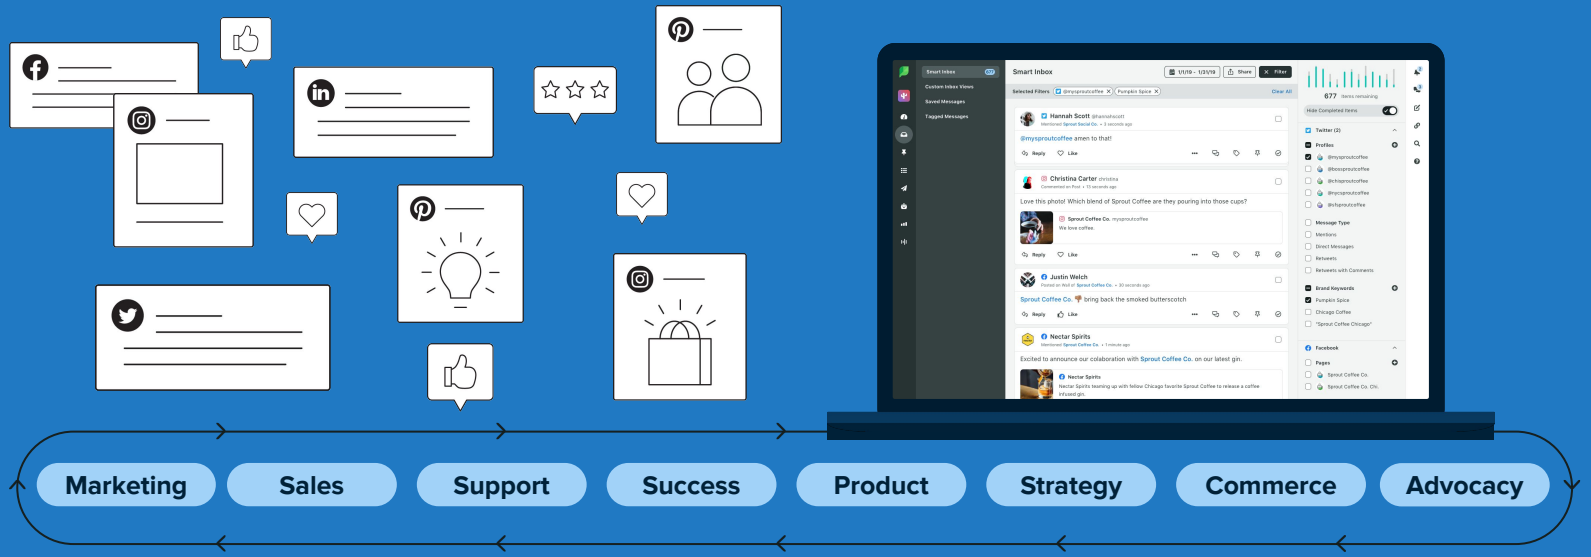

Requiring an entirely new system of record

Social media is massive, scattered, multi-purpose and does not conform to our existing business systems. A centralized platform is critical to creating strategic business value.

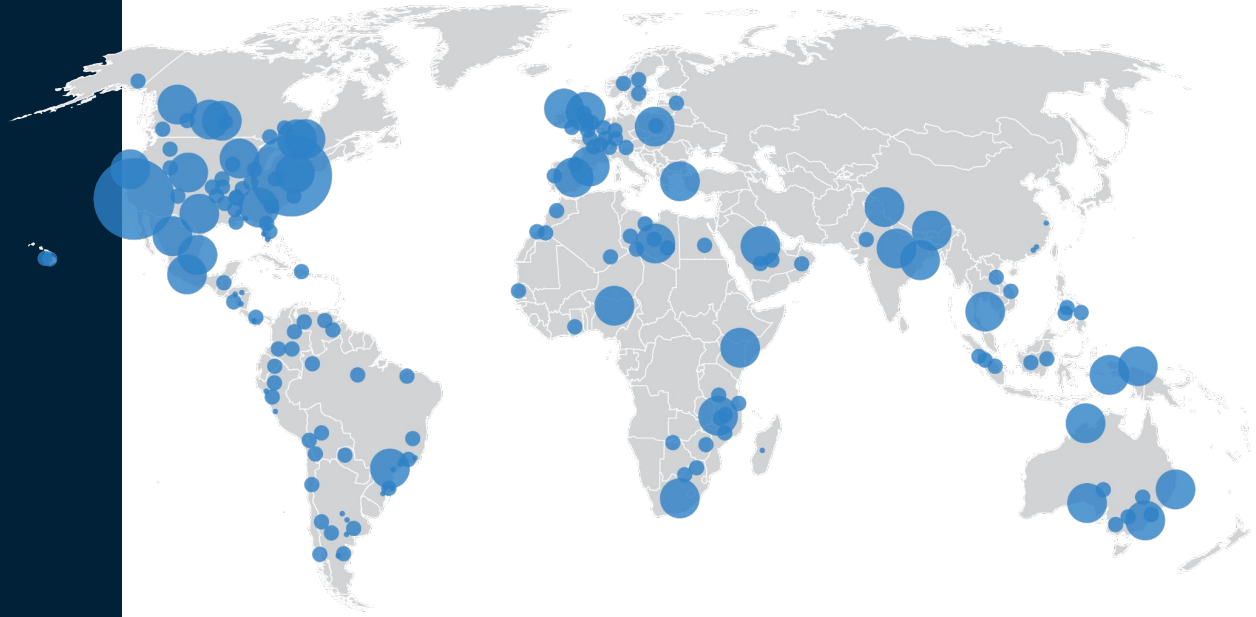

Sprout is the platform solution

Sprout consolidates the complexity of social channels into a powerful, elegant and seamlessly integrated platform that can be leveraged across an organization.

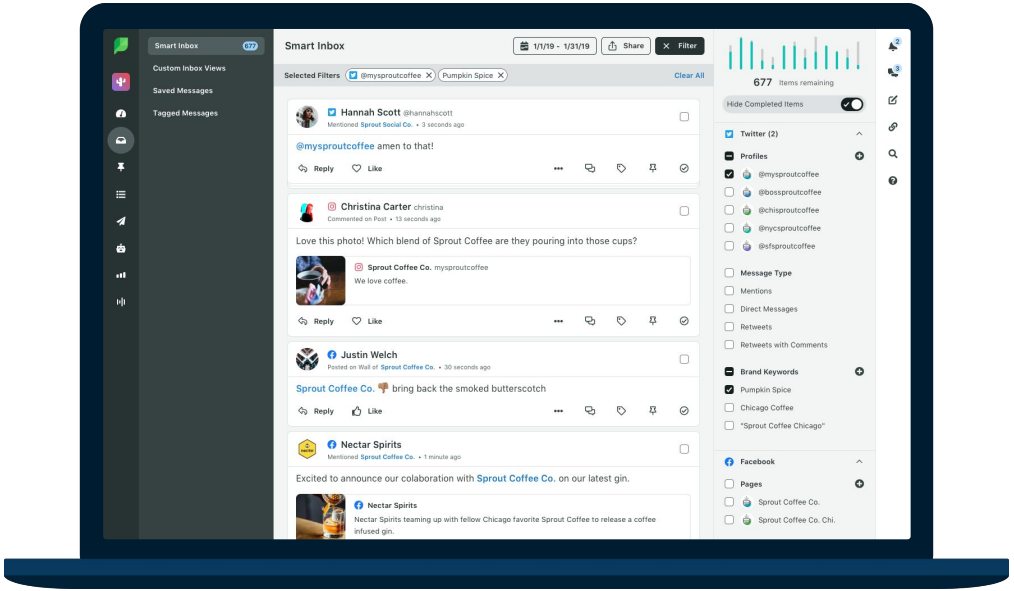

Sprout's platform is mission-critical for more than 32,000 customers globally

A powerful, fully integrated platform

Our core platform was built to facilitate social communication. We've expanded our capabilities to handle new use-cases as more of the customer experience has shifted to social, and as businesses mature in their standardization of social.

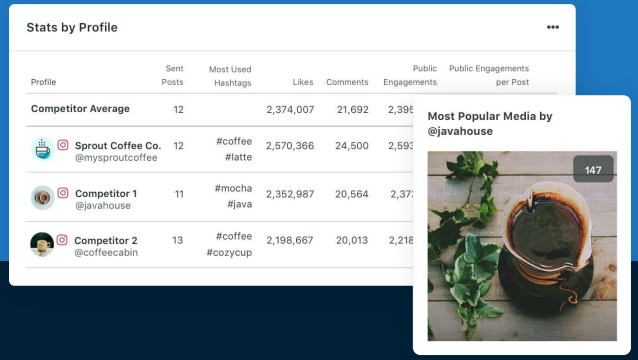

Core Platform

Expanded Capabilities

Premium Add-ons

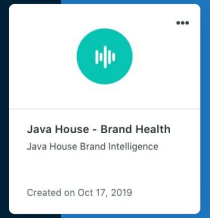

Engagement | **Publishing** | **Reporting** | **Collaboration** | **Automation** | **Reputation** | **Commerce** | **Analytics** | **Listening** | **Advocacy**

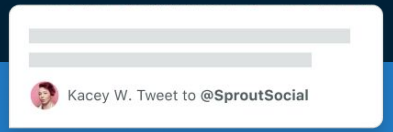

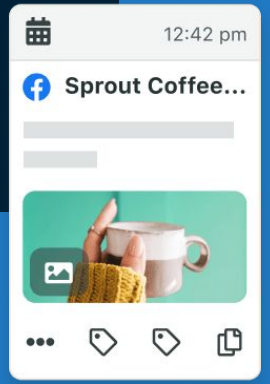

Providing real-time insights for brands across billions of data points

Social data is an unprecedented source of business intelligence — allowing businesses to better understand their customers, markets, competitors and to shape their strategy based on real-time global insights from billions of consumers.

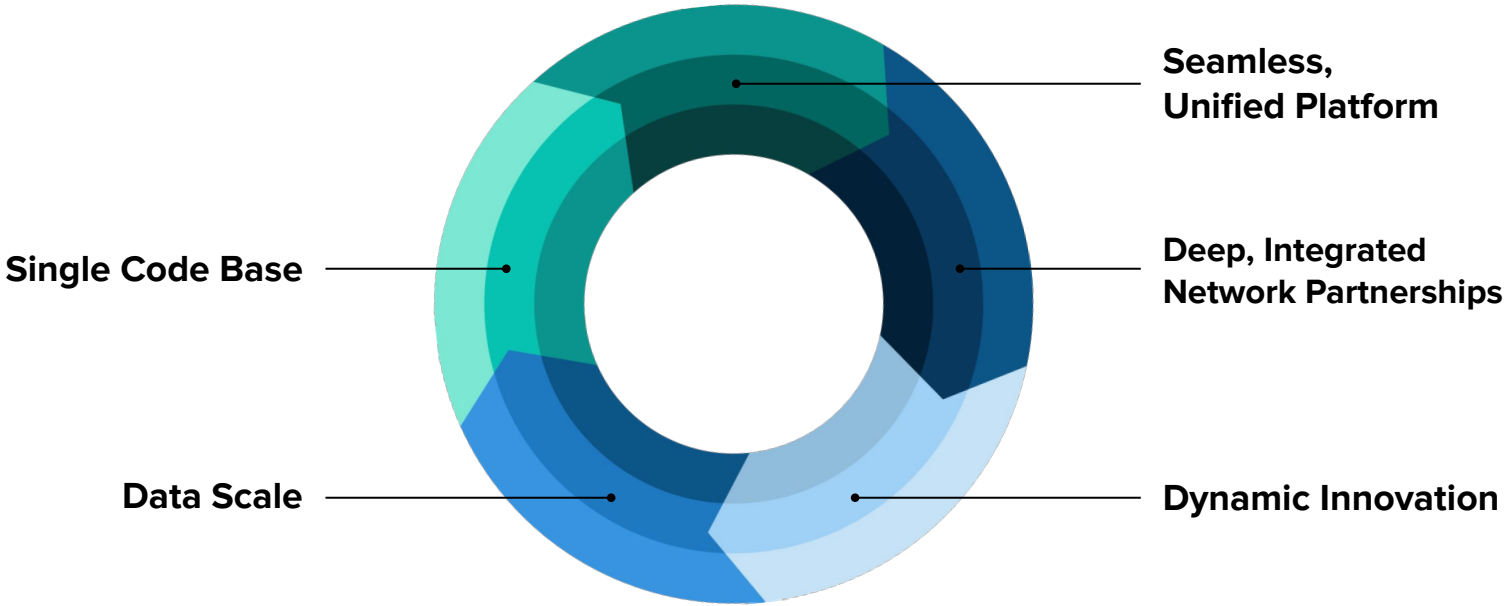

With compounding competitive advantages

Our approach to building powerful tools on a single code-base allows us to address the needs of a large number of brands, while using our scale to quickly compound value. The single code-base allows us to innovate quickly and deliver feature enhancements to all of our customers at once.

Meaningful barriers to entry

We are well positioned to lead our market. Our primary competitors have taken a different approach; other software vendors have been unable to adapt effectively to social and are increasingly leaning in to social partnerships with Sprout.

Direct Competitors

Specialized & lack integration

Platform / technology limitations

Disparate systems pieced together through M&A

Custom & services heavy

Other Software Vendors

Social is horizontal and can't be compartmentalized

Built on common, unique ID

Anonymized data / GDPR Issues

Social demands a discrete system of record and data

Entrenched network & integration ecosystem

We have deep, integrated network relationships that are increasingly hard to replicate; our expanding set of technology partner integrations is growing the value of our social system of record.

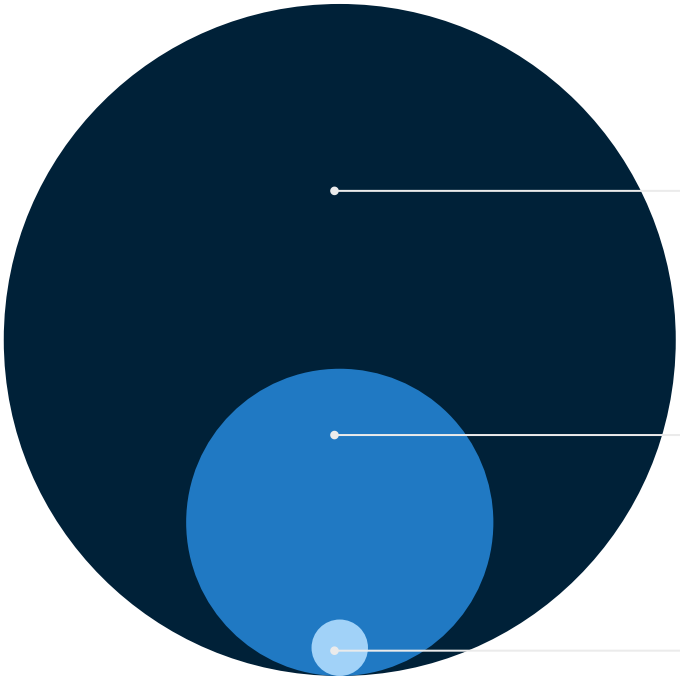

Top customer-rated platform

Sprout is the top customer-rated platform across these major categories relative to our primary competitors. Our ability to earn top ratings from more than 3,000 customers across SMB, mid-market and enterprise companies alike, is a testament to our differentiated platform.

	Ease of Use	Admin	Product Direction	Support	Performance & Reliability	Ease of Setup	Focus
	9.0	**8.9**	**9.0**	**8.9**	**8.8**	**8.8**	**SMB, Mid-Market, Enterprise**
A	8.4	8.5	7.9	8.0	8.6	8.4	Consumer, SMB
B	7.5	6.6	8.2	7.4	7.5	6.6	Enterprise
C	7.4	7.2	8.0	7.7	8.2	6.5	Enterprise

*Ratings reflect Sprout Social's rating and the ratings of its primary competitors by G2 as of January 26, 2022

In a very large market

>$100B 2025 SAM Forecast*

>20% Annual Growth

>$44B Current SAM*

2021 Estimate

<1% Current Penetration*

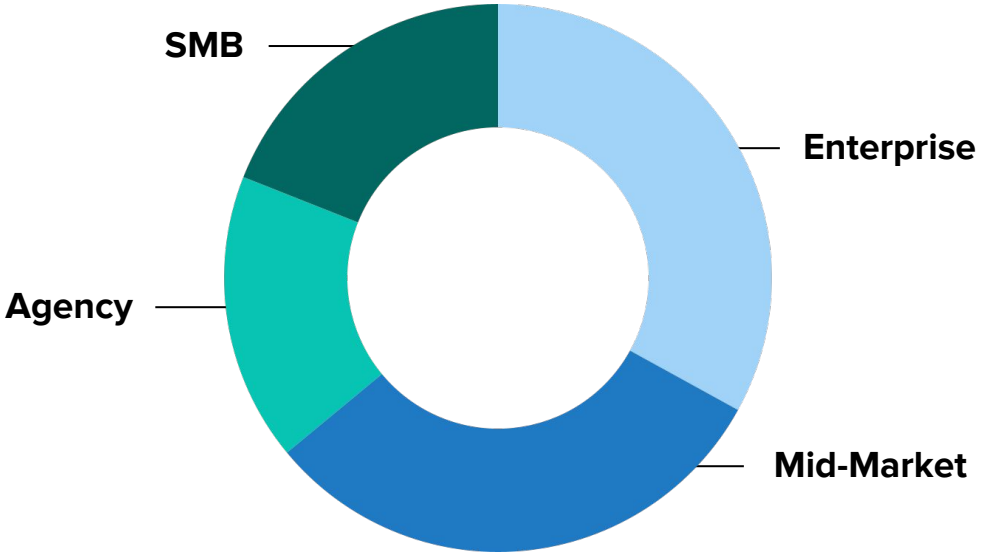

Sprout and all of our direct competitors combined today serve a small fraction of global businesses

*See Appendix for detailed calculation

With proven success across segments

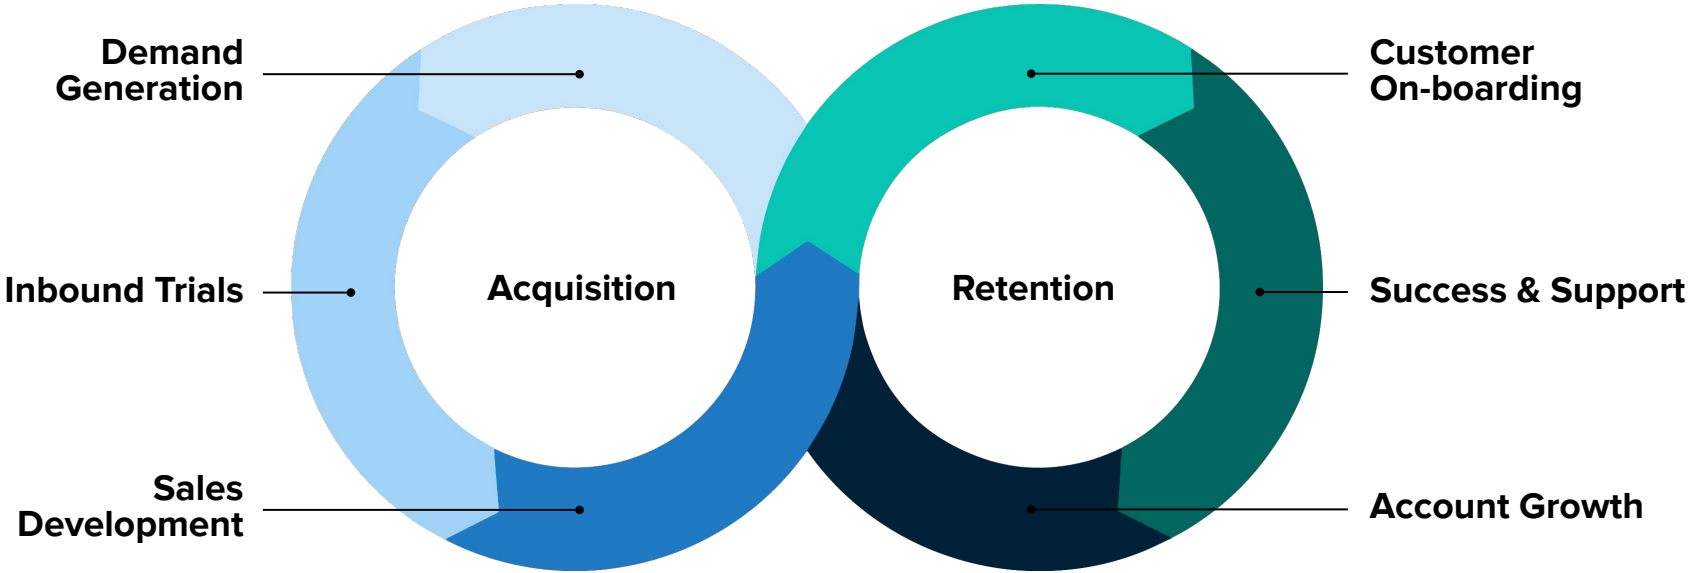

We believe every market segment represents a multi-billion dollar addressable market. Sprout has proven our ability to serve each part of the market effectively, with industry-leading customer satisfaction and unit economics in each.

- >6:1 overall LTV:CAC Ratio*
- Highly diverse customer base with no revenue concentration
- Growing ACV and revenue across every segment
- Broad perspective. Our smallest segment has 3,000+ customers
- Every segment served from a single code-base and distribution model

*As of 3/31/2022. Visual reflects ARR distribution by segment as of 3/31/2022.

Disruptive and efficient inbound GTM model

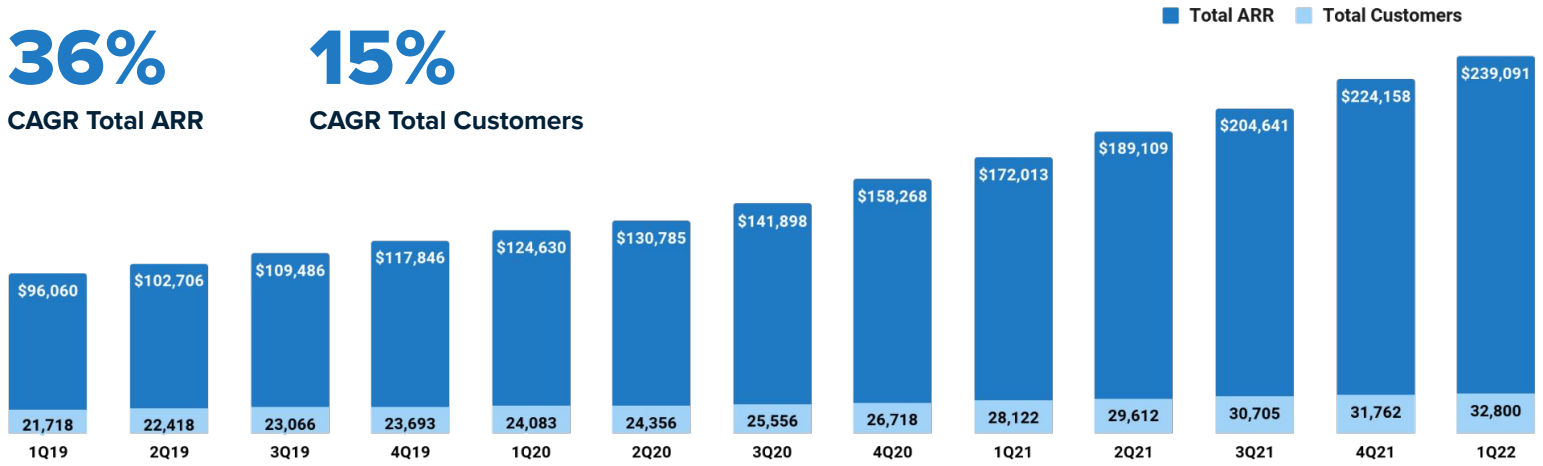

Consistently expanding ARR

In addition to consistently growing our customer base over time, we've seen the value of those customers increase disproportionately, compounding our ARR growth.

36%
CAGR Total ARR

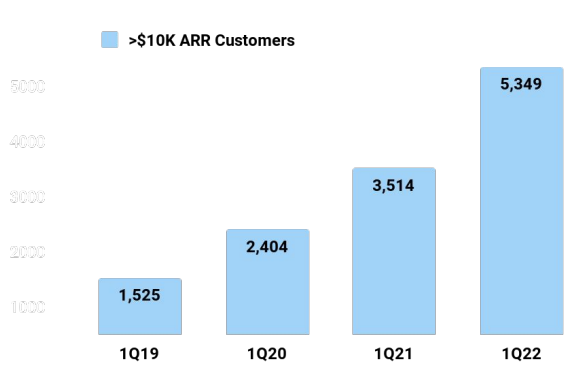

15%
CAGR Total Customers

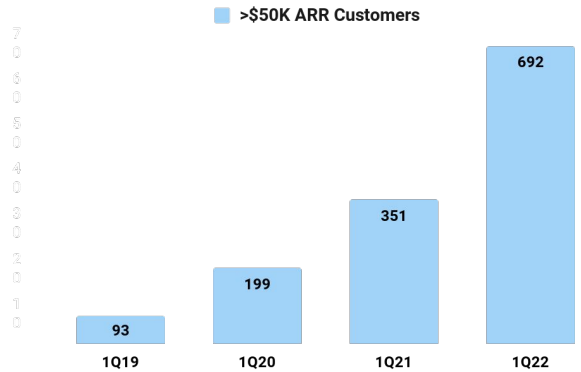

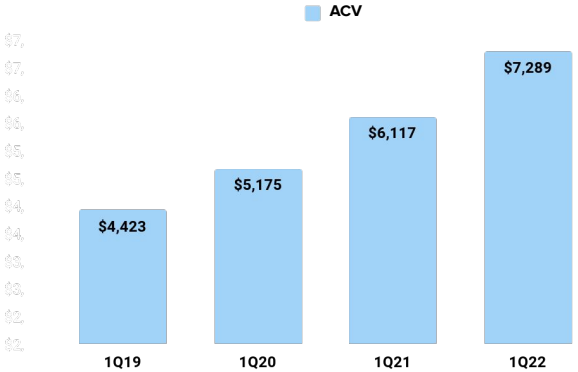

Compound Average Growth Rate (CAGR) measured over the trailing 3 year period 1Q19 to 1Q22

Accelerating customer expansion

As our platform and enterprise growth efforts unfold, larger initial deal sizes, strategy to drive higher value for existing customers and a steady penetration of larger customers each compound multi-year ACV expansion.

Recent Customer Highlights

Omnicom MediaGroup · KraftHeinz · MarshMcLennan Agency · IBM Watson Health · Johnson & Johnson MEDICAL DEVICES COMPANIES

Strong economics, optimized for growth

Attractive returns on growth investments and a strong competitive position reinforce investments to support long duration growth

Appendix

Annual Recurring Revenue ("ARR"). We define ARR as the annualized revenue run rate of subscription agreements from all customers as of the last date of the specified period. We believe ARR is an indicator of the scale of our entire platform while mitigating fluctuations due to seasonality and contract term.

Organic ARR. We define organic ARR as total ARR excluding the impact of recurring revenue generated from legacy Simply Measured products. We believe organic ARR is an indicator of the scale and visibility of our core platform while mitigating fluctuations due to seasonality and contract term.

Organic Revenue. Total revenue excluding the revenue impact from the 2017 acquisition of Simply Measured.

Non-GAAP gross margin. We define non-GAAP gross margin as GAAP gross profit, excluding stock-based compensation expense. We believe non-GAAP gross margin provides our management and investors consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations, as it eliminates the effect of stock-based compensation, which is often unrelated to overall operating performance.

Non-GAAP operating loss. We define non-GAAP operating loss as GAAP loss from operations, excluding stock-based compensation expense. We believe non-GAAP operating loss provides our management and investors consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations, as it eliminates the effect of stock-based compensation, which is often unrelated to overall operating performance.

Non-GAAP net loss. We define non-GAAP net loss as GAAP net loss, excluding stock-based compensation expense. We believe non-GAAP net loss provides our management and investors consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations, as this non-GAAP financial measure eliminates the effect of stock-based compensation, which is often unrelated to overall operating performance.

Non-GAAP net loss per share. We define non-GAAP net loss per share as GAAP net loss per share attributable to common shareholders, basic and diluted, excluding stock-based compensation expense. We believe non-GAAP net loss per share provides our management and investors consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations, as this non-GAAP financial measure eliminates the effect of stock-based compensation, which is often unrelated to overall operating performance.

Free cash flow (FCF). We define free cash flow as net cash provided by (used in) operating activities less purchases of property and equipment. Free cash flow does not reflect our future contractual obligations or represent the total increase or decrease in our cash balance for a given period. We believe free cash flow is a useful indicator of liquidity that provides information to management and investors about the amount of cash used in our core operations that, after purchases of property and equipment, is not available for strategic initiatives.

Free cash flow margin (FCF Margin). We define free cash flow margin as free cash flow as a percentage of revenue.

Dollar-based net retention rate. We calculate dollar-based net retention rate by dividing the organic ARR from our customers as of December 31st in the reported year by the organic ARR from those same customers as of December 31st in the previous year. This calculation is net of upsells, contraction, cancellation or expansion during the period but excludes organic ARR from new customers. We use dollar-based net retention to evaluate the long-term value of our customer relationships, because we believe this metric reflects our ability to retain and expand subscription revenue generated from our existing customers.

Average Contract Value (ACV). We define ACV as the ending period total ARR divided by the ending period total customer count.

LTV:CAC. We calculate the lifetime value of our customers and associated customer acquisition costs for a particular year by comparing (i) gross profit from net new organic ARR for the year divided by one minus the estimated subscription renewal rate to (ii) total sales and marketing expense incurred in the preceding year.

Number of customers. We define a customer as a unique account, multiple accounts containing a common non-personal email domain or multiple accounts governed by a single agreement. We believe that the number of customers using our platform is an indicator not only of our market penetration, but also of our potential for future growth as our customers often expand their adoption of our platform over time based on an increased awareness of the value of our platform and products.

Number of customers contributing more than $10,000 in ARR. We define number of customers contributing more than $10,000 in ARR as those on a paid subscription plan that had more than $10,000 in ARR as of a period end. We view the number of customers that contribute more than $10,000 in ARR as a measure of our ability to scale with our customers.

Number of customers contributing more than $50,000 in ARR. We define number of customers contributing more than $50,000 in ARR as those on a paid subscription plan that had more than $50,000 in ARR as of a period end. We view the number of customers that contribute more than $50,000 in ARR as a measure of our ability to scale with our customers and attract the largest organizations. We believe this represents potential for future growth, including expanding within our current customer base.

We calculated our current >$44B Served Addressable Market estimate as follows: (i) utilized data from The US SBA, The US Census Bureau, The OECD and Statista to estimate the total number of businesses in the United States and globally in each of our served market segments (Enterprise, Mid-Market, SMB) with a social media presence; (ii) utilized internal data and estimates to estimate of the number of such businesses that require a social media management platform (the "Target Businesses"); (iii) calculated the average of our ACV and our estimate of our primary competitors' ACVs in each segment; and (iv) multiplied the estimated average segment ACVs by the estimated number of Target Businesses in each applicable segment.

We calculated our >$100B 2025 Served Addressable Market forecast using the methodology above. We used internal estimates informed by research from the Harris Poll to determine the projected business presence on social media in 2025 that will require a social media management platform, multiplied by our internal projected average segment ACVs in 2025 for Sprout Social and its primary competitors in the applicable segment.

Current Penetration of our Served Addressable Market. We estimate the current total revenue of SPT and each of our primary competitors and divide by our current SAM to determine current market penetration.
