CHANGING WORLD**

BECOMING A HIGHER GROWTH, MORE CAPITAL EFFICIENT, AND NIMBLE COMPANY

Growing our market leading businesses

- PGIM achieved robust third-party and affiliated flows
- Retirement Strategies had the best first quarter of Pension Risk Transfer (PRT) sales and highest Individual sales in over a decade
- Group Insurance and Individual Life sales growth reflects product and segment diversification
- International sales benefit from recent product launches in Japan and expanding distribution in Brazil

Divesting lower growth businesses

- Completed Guaranteed Universal Life (GUL) reinsurance transaction
- Reached agreement to sell Argentina business
- Decided to exit Assurance business

Strengthening our operating model

- Delivering exceptional sales, service, and claims experiences
- Generating and reinvesting efficiencies to fuel future growth

MAINTAINING DISCIPLINED CAPITAL DEPLOYMENT

(1) Capital returned to shareholders in the first quarter of \$726 million includes share repurchases of \$250 million and dividends of \$476 million.

PGIM

Active Global Investment Manager Across a Broad Range of Private and Public Asset Classes

Earnings Contribution to Prudential

Trailing twelve months⁽¹⁾
(\$ millions)

3rd Party Net Flows

(\$ billions)

Key Priorities

- Maintain strong investment performance⁽²⁾
 - Percentage of AUM⁽³⁾ outperforming public benchmarks:
3 Year: 66%, 5 Year: 80%, 10 Year: 92%
- Leverage leading asset management capabilities to grow our mutually reinforcing business system
- Globalize both product and client footprint and continue to add capabilities
- Grow in alternatives, including private credit, and other high margin areas
- Selectively acquire new capabilities through programmatic M&A

Asset Management Fees

Trailing twelve months
(\$ millions)

(1) Based on pre-tax adjusted operating income excluding Corporate & Other operations.

(2) PGIM calculations as of March 31, 2024 for \$786 billion of third-party AUM managed against public benchmarks. Past performance is not a guarantee or reliable indicator of future results. All investments involve risk, including the possible loss of capital. Performance is defined as outperformance (gross of fees) relative to each individual strategy's respective benchmark(s).

(3) Represents PGIM's benchmarked AUM (74% of total third-party AUM is benchmarked over 3 years, 67% over 5 years, and 49% over 10 years). This calculation does not include non-benchmarked assets (including general account assets and assets not managed by PGIM). Returns are calculated gross of investment management fees, which would reduce an investor's net return. Excess performance is based on all actively managed Fixed Income, Equity, and Real Estate AUM for Jennison Associates, PGIM Fixed Income, PGIM Quantitative Solutions, PGIM Real Estate, PGIM Private Capital, and PGIM Investments.

FORWARD-LOOKING STATEMENTS

Certain of the statements included in this presentation, including those regarding our plans to become a higher growth, more capital efficient and nimble company, our capital deployment strategy, including planned dividends and share repurchases, our plans with respect to the Argentina and Assurance businesses, and those under the headings “Key Priorities,” “Adjusted Operating Income & EPS Considerations,” “Adjusted Operating Income Rollforward by Business,” and “Seasonality of Key Financial Items,” constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as “expects”, “believes”, “anticipates”, “includes”, “plans”, “assumes”, “estimates”, “projects”, “intends”, “should”, “will”, “shall”, or variations of such words are generally part of forward-looking statements. Forward-looking statements are made based on management’s current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. Prudential Financial, Inc.’s actual results may differ, possibly materially, from expectations or estimates reflected in such forward-looking statements. Certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements can be found in the “Risk Factors” and “Forward-Looking Statements” sections included in Prudential Financial, Inc.’s Annual Reports on Form 10-K and Quarterly Reports on Form 10-Q. Each of our forward-looking statements contained herein is subject to the risk that we will be unable to execute our strategy and other risks. In addition, our statements under the heading “Seasonality of Key Financial Items” are subject to the risk that different earnings and expense patterns will emerge. Prudential Financial, Inc. does not undertake to update any particular forward-looking statement included in this presentation.

Prudential Financial, Inc. of the United States is not affiliated with Prudential plc which is headquartered in the United Kingdom.

NON-GAAP MEASURES

This presentation includes references to adjusted operating income, adjusted book value, and adjusted operating return on equity, which is based on adjusted operating income and adjusted book value. Consolidated adjusted operating income, adjusted book value, and adjusted operating return on equity are not calculated based on accounting principles generally accepted in the United States of America (GAAP). For additional information about adjusted operating income, adjusted book value, and adjusted operating return on equity and the comparable GAAP measures, including reconciliations between the comparable measures, please refer to our quarterly results news releases, which are available on our website at investor.prudential.com. Reconciliations are also included as part of this presentation.

Our 2Q24 earnings rollforward is based on adjusted operating income. Due to the inherent difficulty in reliably quantifying future realized investment gains/losses and changes in asset and liability values given their unknown timing and potential significance, we cannot, without unreasonable effort, provide rollforward based on income from continuing operations, which is the GAAP measure most comparable to adjusted operating income.

We believe that our use of these non-GAAP measures helps investors understand and evaluate the Company's performance and financial position. The presentation of adjusted operating income as we measure it for management purposes enhances the understanding of the results of operations by highlighting the results from ongoing operations and the underlying profitability of our businesses. Trends in the underlying profitability of our businesses can be more clearly identified without the fluctuating effects of the items described below. Adjusted book value augments the understanding of our financial position by providing a measure of net worth that is primarily attributable to our business operations separate from the portion that is affected by capital and currency market conditions, and by isolating the accounting impact associated with insurance liabilities that are generally not marked to market and the supporting investments that are marked to market through accumulated other comprehensive income under GAAP. However, these non-GAAP measures are not substitutes for income and equity determined in accordance with GAAP, and the adjustments made to derive these measures are important to an understanding of our overall results of operations and financial position. The schedules accompanying this release provide reconciliations of non-GAAP measures with the corresponding measures calculated using GAAP. Additional historic information relating to our financial performance is located on our website at investor.prudential.com.

Adjusted operating income is a non-GAAP measure used by the Company to evaluate segment performance and to allocate resources. Adjusted operating income excludes "Realized investment gains (losses), net, and related charges and adjustments". A significant element of realized investment gains and losses are impairments and credit-related and interest rate-related gains and losses. Impairments and losses from sales of credit-impaired securities, the timing of which depends largely on market credit cycles, can vary considerably across periods. The timing of other sales that would result in gains or losses, such as interest rate-related gains or losses, is largely subject to our discretion and influenced by market opportunities as well as capital and other factors.

NON-GAAP MEASURES (CONTINUED)

Realized investment gains (losses) within certain businesses for which such gains (losses) are a principal source of earnings, and those associated with terminating hedges of foreign currency earnings and current period yield adjustments, are included in adjusted operating income. Adjusted operating income generally excludes realized investment gains and losses from products that contain embedded derivatives, and from associated derivative portfolios that are part of an asset-liability management program related to the risk of those products. Adjusted operating income also excludes gains and losses from changes in value of certain assets and liabilities relating to foreign currency exchange movements that have been economically hedged or considered part of our capital funding strategies for our international subsidiaries, as well as gains and losses on certain investments that are designated as trading. Adjusted operating income also excludes investment gains and losses on assets supporting experience-rated contractholder liabilities and changes in experience-rated contractholder liabilities due to asset value changes, because these recorded changes in asset and liability values are expected to ultimately accrue to contractholders. Additionally, adjusted operating income excludes the changes in fair value of equity securities that are recorded in net income.

Adjusted operating income excludes “Change in value of market risk benefits, net of related hedging gains (losses)”, which reflects the impact from changes in current market conditions, and market experience updates, reflecting the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which we believe enhances the understanding of underlying performance trends. Adjusted operating income also excludes the results of Divested and Run-off Businesses, which are not relevant to our ongoing operations, and discontinued operations and earnings attributable to noncontrolling interests, each of which is presented as a separate component of net income under GAAP. Additionally, adjusted operating income excludes other items, such as certain components of the consideration for acquisitions, which are recognized as compensation expense over the requisite service periods, and goodwill impairments. Earnings attributable to noncontrolling interests is presented as a separate component of net income under GAAP and excluded from adjusted operating income. The tax effect associated with pre-tax adjusted operating income is based on applicable IRS and foreign tax regulations inclusive of pertinent adjustments.

Adjusted operating income does not equate to “Net income” as determined in accordance with U.S. GAAP. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and our definition of adjusted operating income may differ from that used by other companies. The items above are important to an understanding of our overall results of operations. However, we believe that the presentation of adjusted operating income as we measure it for management purposes enhances the understanding of our results of operations by highlighting the results from ongoing operations and the underlying profitability of our businesses. Trends in the underlying profitability of our businesses can be more clearly identified without the fluctuating effects of the items described above.

Adjusted book value is calculated as total equity (GAAP book value) excluding accumulated other comprehensive income (loss), the cumulative change in fair value of funds withheld embedded derivatives, and the cumulative effect of foreign currency exchange rate remeasurements and currency translation adjustments corresponding to realized investment gains and losses. These items are excluded in order to highlight the book value attributable to our core business operations separate from the portion attributable to external and potentially volatile capital and currency market conditions.
