

Strategic Education, Inc. Environmental Policy

Strategic Education, Inc. (Strategic Education) is dedicated to creating economic mobility for working adults through innovative learning programs. In our pursuit of this mission, we maintain physical locations to support our employees and students and are committed to managing our facilities in a way that reduces energy consumption, water usage, and waste generation.

- Reducing the physical footprint of corporate offices and campuses reduces energy consumption, water usage, and waste generation
 - Strategic Education continues to pursue its goal of reducing the size of its physical footprint, and reduced its overall real estate at the end of 2025 by more than 25% compared to the square footage occupied at the end of 2024, by implementing more efficient workspace design and eliminating underused facilities

- Reducing energy consumption
 - Capella University and Strayer University offer robust online curriculums, with 100% of instruction delivered online at Capella University and the majority of instruction delivered online at Strayer University; this online curriculum gives students the ability to access and complete coursework online, reducing the need for physical space and commuting, which in turn reduces energy, water usage, and waste generation
 - Much of Strategic Education's workforce is accustomed to working remotely, again reducing the need for physical space and commuting, which in turn reduces energy, water usage, and waste generation
 - Our Minneapolis, MN corporate office is located within a LEED Gold certified building (Leadership in Energy and Environmental Design), which is a U.S. Green Building Council certification
 - The Herndon, VA corporate office is located in a building that is benchmarked within the ENERGY STAR program, which is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy focused on protecting the environment through energy efficient products and practices
 - Our Media Design School at Strayer campus in Auckland, New Zealand is located in a 6 Star Green Star rated building, which represents leadership in environmentally sustainable building practices
 - Strategic Education is investing in energy-saving interior design options, including updated lighting packages with more efficient LED lighting; occupancy sensors to reduce energy consumption in areas that are not being used; and programmable heating and cooling systems that will only run during operating hours
 - Within campus locations, many property management teams are equipping spaces with energy-saving features including more efficient LED lighting, motion sensor lighting, and energy efficient HVAC systems

- Reducing water usage
 - Our Herndon, VA and Minneapolis, MN corporate offices and many campus locations, including Australia and New Zealand campuses, use water efficient fixtures to decrease the amount of water usage

- Reducing waste generation from business operations
 - Strategic Education has recycling programs within operations in the U.S., Australia, and New Zealand to encourage employees to recycle products, including a national contract with a document management company which provides corporate and campus locations with shredding bins on-site to allow business materials to be recycled
 - In 2023, 2024, and 2025, Strategic Education securely recycled approximately 8, 7, and 7 U.S. short tons of paper, respectively
