NOTES TO FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Pacific Insurance Company, Limited (the “Company” or “Pacific”) have been prepared in conformity with statutory accounting practices prescribed or permitted by the State of Connecticut Insurance Department (the “Department”). The Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the State of Connecticut Insurance Law. The National Association of Insurance Commissioners’ (“NAIC”) Statutory Accounting Principles (“NAIC SAP”), as detailed in the NAIC Accounting Practices and Procedures Manual have been adopted as a component of prescribed practices by the State of Connecticut.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices prescribed by the Department is shown below:

C. Accounting Policy

2. The Company had no Securities Valuation Office-identified investments in exchange traded funds or bond mutual funds that qualified for bond accounting treatment.
6. Asset-backed securities are carried at either amortized cost or the lower of amortized cost or fair value in accordance with the provisions of Statement of Statutory Accounting Principles (“SSAP”) No. 43 (Asset-backed securities). Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method, except for highly rated fixed rate securities, which use the retrospective method.

D. Going Concern

Management does not have any substantial doubt about the Company’s ability to continue as a going concern.

Note 2 – Accounting Changes and Corrections of Errors

Effective January 1, 2025, the Company adopted the principles-based bond definition (“PBBD”) to determine if a debt security is a bond. The PBBD assesses debt securities based on the substance of the investment over the legal form. Debt securities that meet the PBBD are classified as issuer credit obligations or asset-backed securities. Debt securities that do not meet the PBBD are reported as other long-term invested assets at the lower of amortized cost or fair value with changes in measurement to reflect a lower value or changes in fair value recorded as unrealized gains or losses. Non-bond debt securities whose primary source of repayment is derived through rights to underlying collateral are admitted if the underlying collateral primarily qualify as admitted invested assets. Non-bond debt securities that are residual tranches or first loss positions held from the same securitization that did not qualify as a bond under the PBBD are admitted assets to the extent the underlying collateral primarily qualifies as admitted invested assets. On January 1, 2025, the new guidance was adopted on a prospective basis and reported as disposals at book adjusted carrying value (“BACV”) and acquisition at BACV resulting in no gain or loss from change in accounting principle or restatement of prior year’s information. No assets were reclassified off of Schedule D-1 as a result of the Company’s adoption of the PBBD.

Effective January 1, 2025, residuals reported in other long-term invested assets are reported at the lower of amortized cost or fair value under the allowable earned yield method with temporary reductions in fair value recorded as unrealized losses. Under the allowable earned yield, the yield is determined at acquisition as the discount rate that equates the initial best estimate of the residual’s cash flows to its acquisition cost. Interest income is then recorded using the effective yield method using the allowable earned yield, capped by the amount of cash distributions received. Cash distributions received below interest recognized are carried forward to future periods and distributions received in excess of interest recognized are recorded as reduction in amortized cost. Residuals are tested for other-than-temporary impairment (“OTTI”) on an ongoing basis, with required assessment anytime the fair value is less than the reported value. As of January 1, 2025, the Company did not hold any residuals.

D. Asset-Backed Securities

1. Prepayment assumptions for single class and multi-class mortgage-backed/asset-backed securities were obtained from broker dealer survey values or internal estimates.
2. The Company had no OTTI for asset-backed securities recorded during the year where the Company had either the intent to sell the securities or the inability or lack of intent to retain.
3. The Company had no OTTI recognized on asset-backed securities as of March 31, 2025.

NOTES TO FINANCIAL STATEMENTS

4. Security Unrealized Loss Aging

All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$	1,310,150
2. 12 Months or Longer	\$	16,692,660

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$	59,324,157
2. 12 Months or Longer	\$	109,959,596

5. As of March 31, 2025, asset-backed securities in an unrealized loss position were comprised of 137 securities, primarily related to residential mortgage-backed securities and commercial mortgage-backed securities which were depressed primarily due to higher interest rates and/or widening of credit spreads since the securities were purchased. The Company does not have an intention to sell the securities outlined above and has the intent and ability to hold the securities until values recover. Furthermore, based upon the Company's cash flow modeling and the expected continuation of contractually required principal and interest payments, the Company has deemed these securities to be temporarily impaired as of March 31, 2025.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

3. Collateral Received

- b. The Company did not accept collateral that is permitted by contract or custom to sell or repledge as of March 31, 2025.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

The Company had no repurchase agreements transactions accounted for as secured borrowing.

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

The Company had no reverse repurchase agreements transactions accounted for as secured borrowing transactions.

H. Repurchase Agreements Transactions Accounted for as a Sale

The Company had no repurchase agreements transactions accounted for as a sale transaction.

Note 14 – Liabilities, Contingencies and Assessments

G. All Other Contingencies

On February 14, 2022, The Hartford Insurance Group, Inc. ("HIG") executed a final settlement agreement (the "Settlement") with the Boy Scouts of America ("BSA"), the Local Councils, and the attorneys representing a majority of the alleged victims, pursuant to which HIG agreed to pay \$787 million for sexual molestation and sexual abuse claims associated with liability policies issued by various Hartford writing companies in the 1970s and early 1980s. In exchange for its payment, HIG receives a complete release of its policies issued to BSA and the Local Councils, as well as an injunction against further abuse claims involving BSA. All conditions precedent to the Settlement have been satisfied, including approval by the bankruptcy court and the district court, and on April 20, 2023, HIG paid the Settlement amount of \$787 million. Certain objecting parties have appealed the district court's ruling and that appeal is pending before the Third Circuit. If the court approvals for the BSA's plan of reorganization are not affirmed on appeal, it is possible that adverse outcomes, if any, could have a material adverse effect on the Company's operating results.

Additionally, the Company is or may become involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Company accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. Subject to the uncertainties discussed in Note 1.C.11 in the 2024 Annual Statement regarding Asbestos/Environmental reserves, management expects that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to the financial condition of the Company. The Company is or may become involved in various other legal actions, some of which assert claims for substantial amounts. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses and costs of defense, will not be material to the financial condition of the Company.

Note 20 – Fair Value Measurements

A. Fair Value Measurements

Fair value is determined based on the "exit price" notion which is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. Financial instruments carried at fair value in the Company's Financial Statements include bonds. The Company's estimates of fair value for financial assets and financial liabilities are based on the framework established in the fair value accounting guidance. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets and requires that observable inputs be used in the valuations when available. The Company categorizes its assets and liabilities measured at estimated fair value based on whether the significant inputs into the valuation are observable. The fair value hierarchy categorizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2 or 3).

Level 1 Unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access at the measurement date.

Level 2 Observable inputs, other than quoted prices included in Level 1, for the asset or liability or prices for similar assets and liabilities.

Level 3 Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Because Level 3 fair values, by their nature, contain one or more significant unobservable inputs as there is little or no observable market for these assets and liabilities, considerable judgment is used to determine the Level 3 fair values. Level 3 fair values represent the Company's best estimate of amounts that could be realized in a current market exchange absent actual market exchanges.

In many situations, inputs used to measure the fair value of an asset or liability position may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value. Transfers of securities among the levels occur at the beginning of the reporting period. In most cases, both observable (e.g., changes in interest rates) and unobservable (e.g., changes in risk assumptions) inputs are used in the determination of fair values that the Company has classified within Level 3. Consequently, these values and the related gains and losses are based upon both observable and unobservable inputs. The Company's bonds included in Level 3 are classified as such because these securities are primarily priced within illiquid markets and/or priced by independent brokers.

1. The Company's financial instruments held at fair value were not material.

NOTES TO FINANCIAL STATEMENTS

Valuation Techniques

The Company determines the fair values of certain financial assets and financial liabilities based on quoted market prices where available and where prices represent a reasonable estimate of fair value. The Company also determines fair value based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's default spreads, liquidity and, where appropriate, risk margins on unobservable parameters.

Bonds

The fair value of bonds in an active and orderly market (e.g., not distressed or forced liquidation) are determined by management using a "waterfall" approach after considering the following pricing sources: quoted prices for identical assets or liabilities, prices from third-party pricing services, independent broker quotations, or internal valuation models. Typical inputs used by these pricing sources include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Most bonds do not trade daily. Based on the typical trading volumes and the lack of quoted market prices for bonds, third-party pricing services utilize matrix pricing to derive security prices. Matrix pricing relies on securities' relationships to other benchmark quoted securities, which trade more frequently. Pricing services utilize recently reported trades of identical or similar securities making adjustments through the reporting date based on the preceding outlined available market observable information. If there are no recently reported trades, the third-party pricing services may develop a security price using expected future cash flows based upon collateral performance and discounted at an estimated market rate. Both matrix pricing and discounted cash flow techniques develop prices by factoring in the time value for cash flows and risk, including liquidity and credit.

Prices from third-party pricing services may be unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market-based data. Additionally, the majority of these independent broker quotations are non-binding.

HIG utilizes internally developed pricing models for private placement securities for which HIG is unable to obtain a price from a third-party pricing service. HIG's process is similar to the third-party pricing services. HIG develops credit spreads each month using market-based data for public securities adjusted for credit spread differentials between public and private securities which are obtained from a survey of multiple private placement brokers. The credit spreads determined through this survey approach are based upon the issuer's financial strength and term to maturity, utilizing independent public security index and trade information and adjusting for the non-public nature of the securities. Credit spreads combined with risk-free rates are applied to contractual cash flows to develop a price.

HIG has analyzed the third-party pricing services' valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Most prices provided by third-party pricing services are classified into Level 2 because the inputs used in pricing the securities are observable. Due to the lack of transparency in the process that brokers use to develop prices, most valuations that are based on brokers' prices are classified as Level 3. Some valuations may be classified as Level 2 if the price can be corroborated with observable market data.

Valuation Controls

The process for determining the fair value of investments is monitored by the Valuation Committee, which is a cross-functional group of senior management within HIG. The purpose of the Valuation Committee is to provide oversight of the pricing policy, procedures and controls, including approval of valuation methodologies and pricing sources. The Valuation Committee reviews market data trends, pricing statistics and trading statistics to ensure that prices are reasonable and consistent with our fair value framework. Controls and procedures used to assess third-party pricing services are reviewed by the Valuation Committee, including the results of annual due-diligence reviews. Controls include, but are not limited to, reviewing daily and monthly price changes, stale prices, and missing prices and comparing new trade prices to third-party pricing services, and weekly price changes of a corporate bond index. HIG has a dedicated pricing unit that works with trading and investment professionals to challenge the price received by a third-party pricing source if HIG believes that the valuation received does not accurately reflect the fair value. New valuation models and changes to current models require approval by the Valuation Committee. In addition, HIG's enterprise-wide Operational Risk Management function provides an independent review of the suitability and reliability of model inputs, as well as an analysis of significant changes to current models.

2. Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

The Company's financial instruments with fair value measurements using significant unobservable inputs (Level 3) were not material.

3. Valuation Inputs for Investments

For Level 1 investments, valuations are based on observable inputs that reflect quoted prices for identical assets in active markets that HIG has the ability to access at the measurement date.

For the Company's Level 2 and 3 bonds, typical inputs used by pricing techniques include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates.

A description of additional inputs used in the Company's Level 2 and Level 3 measurements are included in the following discussion:

Level 2	<p>The fair values of most of the Company's Level 2 investments are determined by management after considering prices received from third-party pricing services. These investments include mostly bonds.</p> <p>Asset-backed securities - Primary inputs also include monthly payment information, collateral performance, which varies by vintage year and includes delinquency rates, collateral valuation loss severity rates, collateral refinancing assumptions, and credit default swap indices. Asset-backed securities prices also include estimates of the rate of future principal prepayments over the remaining life of the securities, if applicable. These estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral.</p> <p>Issuer credit obligations - Primary inputs also include observations of credit default swap curves related to the issuer and political events in emerging market economies where applicable.</p> <p>Municipal bonds - Primary inputs also include Municipal Securities Rulemaking Board reported trades and material event notices, and issuer financial statements.</p>
Level 3	<p>Most of the Company's securities classified as Level 3 include less liquid securities such as lower quality asset-backed securities. Also included in Level 3 are securities valued based on broker prices or broker spreads, without adjustments. Primary inputs for non-broker priced investments, including asset-backed securities, are consistent with the typical inputs used in the preceding noted Level 2 measurements, but are Level 3 due to their less liquid markets. Additionally, certain long-dated securities are priced based on third-party pricing services, including certain municipal securities, foreign government/government agency securities and bank loans, which are included with issuer credit obligations. Primary inputs for these long-dated securities are consistent with the typical inputs used in the preceding noted Level 1 and Level 2 measurements, but include benchmark interest rate or credit spread assumptions that are not observable in the marketplace. Primary inputs for privately traded equity securities are internal discounted cash flow models utilizing earnings multiples or other cash flow assumptions that are not observable.</p>

C. Fair Values for All Financial Instruments by Levels 1, 2 and 3

The tables below reflect the fair values and admitted values of all unaffiliated admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and partnerships). The fair values are also categorized into the three-level fair value hierarchy as described above in Note 20A.

(Amounts in thousands)		March 31, 2025					
Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)

Bonds	\$ 699,112	\$ 742,617	\$ —	\$ 695,407	\$ 3,705	\$ —	\$ —
Mortgage loans	11,685	13,112	—	—	11,685	—	—
Cash, cash equivalents and short-term investments	38,901	38,901	304	38,597	—	—	—
Surplus debentures	7,721	7,816	—	7,721	—	—	—
Total assets	\$ 757,419	\$ 802,446	\$ 304	\$ 741,725	\$ 15,390	\$ —	\$ —

The valuation methodologies used to determine the fair values of bonds are described in the above Fair Value Measurements section of this note. The amortized cost of cash, cash equivalents and short-term investments approximates fair value. Fair values for mortgage loans were estimated using discounted cash flow calculations based on current lending rates for similar type loans. Current lending rates reflect changes in credit spreads and the remaining terms of the loans.

D. Financial Instruments for Which Not Practicable to Estimate Fair Values

At March 31, 2025, the Company had no investments where it is not practicable to estimate fair value.

E. Financial Instruments Measured Using the NAV

At March 31, 2025, the Company had no investments measured using the NAV.

Note 21 – Other Items

C. Other Disclosures

Effective January 1, 2025, the Company adopted the PBBD and residual interest change in accounting. See Note 2 for more information.

In 1992, Hartford Fire Insurance Company ("Hartford Fire") issued a stop loss reinsurance agreement between Hartford Fire and First State Insurance Company ("First State"), to support the runoff insurance obligations of First State, New England Insurance Company and New England Reinsurance Corporation, collectively the ("First State Companies"). The current stop loss cession was triggered during the first quarter of 2003. In 2004, the Department approved an agreement between the parties to maintain a level of statutory surplus within a range above \$25 million but not to exceed \$35 million at such time there is a cession of incurred losses. The terms of this agreement were last modified in 2019 and obligate Hartford Fire to make payments to First State up to \$1.2 billion to the extent that (i) First State Companies' net retained paid losses exceed a stipulated dollar amount, which was exhausted in 2006, and (ii) First State Companies' statutory capital and surplus falls below \$25 million. This agreement was further amended in 2019 to include coverage for unallocated loss adjustment expense. As of March 31, 2025 and December 31, 2024, the First State Companies' total cession to Hartford Fire was \$825.7 million and \$857.7 million, respectively, in loss and loss expense reserves. The Company shared in the Hartford Fire reserve changes based on its pool percent stated in Note 26 of the 2024 Annual Statement.

Note 22 – Events Subsequent

On April 17, 2025, Pacific paid an ordinary cash dividend of \$33,400,000 to HIG.

The Company had no other material subsequent events through May 7, 2025.

Note 23 – Reinsurance

Note 24 – Retrospectively Rated Contracts & Contracts Subject to Redetermination

F. Risk-Sharing Provisions of the Affordable Care Act ("ACA")

The Company did not write any accident and health insurance premium during the reporting period that is subject to the ACA risk-sharing provisions.

Note 25 – Change in Incurred Losses and Loss Adjustment Expenses

Reserves as of December 31, 2024 were \$418,570,460. Prior accident year reserves are now \$391,934,164 as a result of payments and reserve changes attributable to insured events of prior accident years. From January 1, 2025 through March 31, 2025, \$24,584,516 has been paid for loss and loss adjustment expenses attributable to insured events of prior accident years. In addition, the Company released reserves of \$2,051,780, related to the re-estimate of unpaid losses and loss adjustment expenses for prior years. These reserve changes are mainly due to releases in workers' compensation and to a lesser extent homeowners. Reserves were also released pursuant to the terms of the stop loss reinsurance agreement in place between Hartford Fire and First State whereby, Hartford Fire, the lead company in the Pool, released reserves of \$32 million, which impacts the Company by the pool percent stated in Note 26 in the 2024 Annual Statement, and First State strengthened reserves by \$32 million.
