NOTES TO FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Hartford Fire Insurance Company (the "Company" or "Hartford Fire") have been prepared in conformity with statutory accounting practices prescribed or permitted by the State of Connecticut Insurance Department (the "Department"). The Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the State of Connecticut Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Statutory Accounting Principles ("NAIC SAP"), as detailed in the NAIC Accounting Practices and Procedures Manual have been adopted as a component of prescribed practices by the State of Connecticut. There are no material differences between the accounting practices and procedures prescribed by the Department and NAIC SAP. During 2022 and 2021, the Company did not have any permitted practices.

C. Accounting Policy

2. The Company had no Securities Valuation Office - identified investments in exchange traded funds or bond mutual funds that qualified for bond accounting treatment.
6. Loan-backed bonds and structured securities are carried at either amortized cost or the lower of amortized cost or fair value in accordance with the provisions of Statement of Statutory Accounting Principles ("SSAP") No. 43-Revised (Loan-backed and Structured Securities). Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method, except for highly rated fixed rate securities, which use the retrospective method.

D. Going Concern

Management does not have any substantial doubt about the Company's ability to continue as a going concern.

Note 2 – Accounting Changes and Corrections of Errors

No significant change.

Note 3 – Business Combinations and Goodwill

No significant change.

Note 4 – Discontinued Operations

No significant change.

Note 5 – Investments

D. Loan-backed Securities

1. Prepayment assumptions for single class and multi-class mortgage-backed/asset-backed securities were obtained from broker dealer survey value or internal estimates.
2. The Company had no other-than-temporary impairments ("OTTI") for loan-backed securities recorded during the year for which the Company had either the intent to sell the securities or the inability or lack of intent to retain.
3. The following table summarizes OTTI recognized during 2022 for loan-backed securities held as of March 31, 2022 because the present value of estimated projected cash flows expected to be collected was less than the amortized cost of the securities:

(1)	(2)	(3)	(4)	(5)	(6)	(7)
CUSIP	Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	Present Value of Projected Cash Flows	Recognized OTTI	Amortized Cost After OTTI	Fair Value at Time of OTTI	Date of Financial Statement Where Reported

Total			\$ 251,835			

4. Security Unrealized Loss Aging

All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):

- a. The aggregate amount of unrealized losses:
1. Less than 12 Months \$ 74,721,028
2. 12 Months or Longer \$ 18,592,281
- b. The aggregate related fair value of securities with unrealized losses:
1. Less than 12 Months \$2,296,971,920
2. 12 Months or Longer \$ 248,157,468

5. As of March 31, 2022, loan-backed securities in an unrealized loss position were comprised of 612 securities, primarily related to residential mortgage-backed securities, U.S. government agency securities, and commercial mortgage-backed securities, which were depressed primarily due to higher interest rates and/or widening of credit spreads since the securities were purchased. The Company does not have an intention to sell the securities outlined above and has the intent and ability to hold the securities until values recover. Furthermore, based upon the Company's cash flow modeling and the expected continuation of contractually required principal and interest payments, the Company has deemed these securities to be temporarily impaired as of March 31, 2022

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

3. Collateral Received
- b. The Company did not accept collateral that is permitted by contract or custom to sell or repledge as of March 31, 2022.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

The Company had no repurchase agreements transactions accounted for as secured borrowing.

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

1. Company Policies or Strategies for Engaging in Repo Programs
- From time to time, the Company enters into reverse repurchase agreements where the Company purchases securities and simultaneously agrees to resell the same or substantially the same securities. The agreements require additional collateral to be transferred to the Company when necessary and the Company has the right to sell or re-pledge the securities received. The Company accounts for reverse repurchase agreements as collateralized financing. The receivable for reverse repurchase agreements is included within short term investments.

B. Federal Home Loan Bank (FHLB) Agreements

1. The Company is a member of the Federal Home Loan Bank of Boston ("FHLBB"). Membership allows the Company access to collateralized advances, which the Company intends to use for general corporate purposes or to earn incremental investment income.

State law limits the Company's ability to pledge, hypothecate or otherwise encumber its assets. The amount of advances that can be taken is limited to a percentage of the fair value of the assets that ranges from a high of 97% for U.S. government-backed fixed maturities maturing within 3 years to a low of 40% for A-rated commercial mortgage-backed fixed maturities maturing in 5 years or more. The Company has determined that \$1.3 billion is the maximum amount it can pledge to secure FHLBB advances. The Company calculated this amount based on statutory admitted assets and capital and surplus. The Company would need to seek prior written approval from the Department in order to exceed this limit. FHLBB membership requires the purchase of additional member activity stock of 3% or 4% of any amount borrowed.

4. On March 16, 2022, Hartford Fire paid an ordinary cash dividend of \$419,900,000 to The Hartford Financial Services Group, Inc. ("The Hartford").

Note 14 – Liabilities, Contingencies and Assessments

G. All Other Contingencies

On September 14, 2021, The Hartford announced that it entered into a new agreement-in-principle with the Boy Scouts of America ("BSA"), related to sexual molestation and sexual abuse claims associated with liability policies issued by various Hartford writing companies in the 1970s and early 1980s, with the agreement-in-principle including the BSA, its local councils and the representatives of a majority of the sexual abuse claimants. As part of the agreement-in-principle, The Hartford will pay \$787 million, before tax, for claims associated with policies mostly issued in the 1970s. In exchange for The Hartford's payment, the BSA and its local councils will fully release The Hartford from any obligation under policies The Hartford issued to the BSA and its local councils. In addition, the representatives for the claimants joining this agreement-in-principle will support a plan of reorganization which incorporates the settlement.

The agreement-in-principle was reached in connection with BSA's Chapter 11 bankruptcy and a written settlement agreement (the "Settlement") was executed on February 14, 2022. The Settlement will become final upon the occurrence of certain conditions, including, but not limited to, confirmation of BSA's plan of

NOTES TO FINANCIAL STATEMENTS

reorganization, receipt of executed releases from the local councils, and approval of the Settlement as part of the confirmation of BSA's plan of reorganization by the bankruptcy and district courts. While the confirmation hearing regarding BSA's bankruptcy plan concluded in April, a final decision from the bankruptcy court on whether to approve BSA's plan of reorganization is not expected until May, at the earliest. Assuming that all conditions are satisfied, the parties to the Settlement expect to receive civil district court approval by mid 2022. Upon civil district court approval, The Hartford will pay the settlement amount of \$787 million.

However, no assurance can be given that all the conditions precedent to the Settlement will be satisfied or that final court approval, if obtained, will not be delayed for various procedural reasons. If the conditions precedent to the Settlement are not satisfied or the requisite court approvals for BSA's plan of reorganization are not obtained, it is possible that adverse outcomes, if any, could have a material adverse effect on the Company's operating results.

COVID-19 Pandemic Business Income Insurance Coverage Litigation

Like many others in the property and casualty insurance industry, beginning in April 2020, the Company and various affiliates of the Company (collectively the "Hartford Writing Companies") have been served as defendants in lawsuits seeking insurance coverage under commercial insurance policies issued by the Hartford Writing Companies for alleged losses resulting from the shutdown or suspension of their businesses due to the spread of COVID-19. More than 280 such lawsuits have been filed, of which more than 60 purport to be filed on behalf of broad nationwide or statewide classes of policyholders. These lawsuits have been filed in state and federal courts in roughly 35 states. Although the allegations vary, the plaintiffs generally seek a declaration of insurance coverage, damages for breach of contract in unspecified amounts, interest, and attorneys' fees. Many of the lawsuits also allege that the insurance claims were denied in bad faith or otherwise in violation of state laws and seek extra-contractual or punitive damages.

The Company and its affiliates deny the allegations and continue to vigorously defend these suits. The Hartford Writing Companies maintain that they have no coverage obligations with respect to these suits for business income allegedly lost by the plaintiffs due to the COVID-19 pandemic based on the clear terms of the applicable insurance policies. Although the policy terms vary depending, among other things, upon the size, nature, and location of the policyholder's business, in general, the claims at issue in these lawsuits were denied because the claimant identified no direct physical damage or loss to property at the insured premises, and the governmental orders that led to the complete or partial shutdown of the business were not due to the existence of any direct physical loss or damage in the immediate vicinity of the insured premises and did not prohibit access to the insured premises, as required by the terms of the insurance policies. In addition, the vast majority of the policies at issue expressly exclude from coverage any loss caused directly or indirectly by the presence, growth, proliferation, spread or activity of a virus, subject to a narrow set of exceptions not applicable in connection with this pandemic, and contain a pollution and contamination exclusion that, among other things, expressly excludes from coverage any loss caused by material that threatens human health or welfare.

In addition to the inherent difficulty in predicting litigation outcomes, the COVID-19 pandemic business income coverage lawsuits present numerous uncertainties and contingencies that are not yet known, including how many policyholders will ultimately file claims, the number of lawsuits that will be filed, the extent to which any state or nationwide classes will be certified, and the size and scope of any such classes. The legal theories advocated by plaintiffs vary significantly by case as do the state laws that govern the policy interpretation. These lawsuits are at various stages of litigation: some are in the earliest stages of litigation, many complaints are in the process of being amended, some have been dismissed voluntarily and may be refiled, while others have been dismissed through rulings in favor of the Hartford Writing Companies. Discovery is underway in certain single plaintiff cases and class actions. More than 50 policyholders have appealed dismissals in favor of the Hartford Writing Companies. To date, the Hartford Writing Companies' have received four appellate affirmances of trial court decisions in the Hartford Writing Companies' favor, including two decisions from the Second Circuit, and decisions from the Fifth and Sixth Circuit Courts of Appeal. The remainder of Hartford Writing Companies' appeals are at various stages of the process.

In addition, business income calculations depend upon a wide range of factors that are particular to the circumstances of each individual policyholder and, here, almost none of the plaintiffs have submitted proofs of loss or otherwise quantified or factually supported any allegedly covered loss, and, in any event, the Company's experience shows that demands for damages often bear little relation to a reasonable estimate of potential loss. Accordingly, management cannot now reasonably estimate the possible loss or range of loss, if any. Nonetheless, given the large number of claims and potential claims, the indeterminate amounts sought, and the inherent unpredictability of litigation, it is possible that adverse outcomes, if any, in the aggregate, could have a material adverse effect on the Company's operating results.

In addition to the matters discussed above, the Company is or may become involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Company accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. Subject to the uncertainties discussed in Note 1.C.11 in the 2021 Annual Statement regarding Asbestos/Environmental reserves, management expects that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to the financial condition of the Company. The Company is or may become involved in various other legal actions, some of which assert claims for substantial amounts. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses and costs of defense, will not be material to the financial condition of the Company.

NOTES TO FINANCIAL STATEMENTS

Note 20 – Fair Value Measurement

A. Fair Value Measurements

Fair value is determined based on the "exit price" notion which is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. Financial instruments carried at fair value in the Company's Financial Statements include bonds, stocks and derivatives. The Company's estimates of fair value for financial assets and financial liabilities are based on the framework established in the fair value accounting guidance. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets and requires that observable inputs be used in the valuations when available. The Company categorizes its assets and liabilities measured at estimated fair value based on whether the significant inputs into the valuation are observable. The fair value hierarchy categorizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2 or 3).

- Level 1Unadjusted quoted prices for identical assets, or liabilities, in active markets that the Company has the ability to access at the measurement date.
- Level 2Observable inputs, other than quoted prices included in Level 1, for the asset or liability or prices for similar assets and liabilities.
- Level 3Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Because Level 3 fair values, by their nature, contain one or more significant unobservable inputs as there is little or no observable market for these assets and liabilities, considerable judgment is used to determine the Level 3 fair values. Level 3 fair values represent the Company's best estimate of an amount that could be realized in a current market exchange absent actual market exchanges.

In many situations, inputs used to measure the fair value of an asset or liability position may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value. Transfers of securities among the levels occur at the beginning of the reporting period. In most cases, both observable (e.g., changes in interest rates) and unobservable (e.g., changes in risk assumptions) inputs are used in the determination of fair values that the Company has classified within Level 3. Consequently, these values and the related gains and losses are based upon both observable and unobservable inputs. The Company's bonds included in Level 3 are classified as such because these securities are primarily within illiquid markets and/or priced by independent brokers.

1. The following table presents assets and (liabilities) carried at fair value by hierarchy level:

Valuation Techniques, Procedures and Controls

The Company determines the fair values of certain financial assets and liabilities based on quoted market prices where available, and where prices represent a reasonable estimate of fair value. The Company also determines fair value based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's default spreads, liquidity and, where appropriate, risk margins on unobservable parameters.

The process for determining the fair value of investments is monitored by the Valuation Committee, which is a cross-functional group of senior management within the Company. The purpose of the Valuation Committee is to provide oversight of the pricing policy, procedures and controls, including approval of valuation methodologies and pricing sources. The Valuation Committee reviews market data trends, pricing statistics and trading statistics to ensure that prices are reasonable and consistent with our fair value framework. Controls and procedures used to assess third-party pricing services are reviewed by the Valuation Committee, including the results of annual due-diligence reviews. Controls include, but are not limited to, reviewing daily and monthly price changes, stale prices, and missing prices and comparing new trade prices to third-party pricing services, weekly price changes to published bond prices of a corporate bond index, and daily over-the-counter derivative market valuations to counterparty valuations. The Company has a dedicated pricing unit that works with trading and investment professionals to challenge the price received by a third-party pricing source if the Company believes that the valuation received does not accurately reflect the fair value. New valuation models and changes to current models require approval by the Valuation Committee. In addition, the Company's enterprise-wide Operational Risk Management function provides an independent review of the suitability and reliability of model inputs, as well as an analysis of significant changes to current models.

Bonds and Stocks

The fair value of bonds and stocks in an active and orderly market (e.g., not distressed or forced liquidation) are determined by management using a "waterfall" approach after considering the following pricing sources: quoted prices for identical assets or liabilities, prices from third-party pricing services, independent broker quotations, or internal matrix pricing processes. Typical inputs used by these pricing sources include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Most bonds do not trade daily. Based on the typical trading volumes and the lack of quoted market prices for bonds, third-party pricing services utilize matrix pricing to derive security prices. Matrix pricing relies on securities' relationships to other benchmark quoted securities, which trade more frequently. Pricing services utilize recently reported trades of identical or similar securities making adjustments through the reporting date based on the preceding outlined available market observable information. If there are no recently reported trades, the third-party pricing services may develop a security price using expected future cash flows

NOTES TO FINANCIAL STATEMENTS

based upon collateral performance and discounted at an estimated market rate. Both matrix pricing and discounted cash flow techniques develop prices by factoring in the time value for cash flows and risk, including liquidity and credit.

Prices from third-party pricing services may be unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

The Company utilizes an internally developed matrix pricing process for private placement securities for which the Company is unable to obtain a price from a third-party pricing service. The Company's process is similar to the third-party pricing services. The Company develops credit spreads each month using market based data for public securities adjusted for credit spread differentials between public and private securities which are obtained from a survey of multiple private placement brokers. The credit spreads determined through this survey approach are based upon the issuer's financial strength and term to maturity, utilizing independent public security index and trade information and adjusting for the non-public nature of the securities. Credit spreads combined with risk-free rates are applied to contractual cash flows to develop a price.

The Securities Working Group performs ongoing analyses of the prices and credit spreads received from third parties to ensure that the prices represent a reasonable estimate of the fair value. This process involves quantitative and qualitative analyses and is overseen by investment and accounting professionals. As a part of these analyses, the Company considers trading volume, new issuance activity and other factors to determine whether the market activity is significantly different than normal activity in an active market, and if so, whether transactions may not be orderly considering the weight of available evidence. If the available evidence indicates that pricing is based upon transactions that are stale or not orderly, the Company places little, if any, weight on the transaction price and will estimate fair value utilizing an internal pricing model. In addition, the Company ensures that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models utilizing spreads, and when available, market indices. As a result of these analyses, if the Company determines that there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly and approved by the Valuation Committee.

The Company conducts other specific monitoring controls around pricing. Daily analyses identify price changes over 3% for bonds and 5% for equity securities and trade prices for both bond and stock securities that differ over 3% to the current day's price. Weekly analyses identify prices that differ more than 5% from published bond prices of a corporate bond index. Monthly analyses identify price changes over 3%, prices that have not changed and missing prices. Also on a monthly basis, a second source validation is performed on most sectors. Analyses are conducted by a dedicated pricing unit that follows up with trading and investment sector professionals and challenges prices with vendors when the estimated assumptions used differs from what the Company feels a market participant would use. Examples of other procedures performed include, but are not limited to, initial and on-going review of third-party pricing services' methodologies, review of pricing statistics and trends, and back testing recent trades.

The Company has analyzed the third-party pricing services' valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Most prices provided by third-party pricing services are classified into Level 2 because the inputs used in pricing the securities are observable. Due to the lack of transparency in the process that brokers use to develop prices, most valuations that are based on brokers' prices are classified as Level 3. Some valuations may be classified as Level 2 if the price can be corroborated with observable market data.

Derivative Instruments

The fair value of derivative instruments are determined using pricing valuation models for over-the-counter derivatives that utilize independent market data inputs, quoted market prices for exchange-traded derivatives and over-the-counter-cleared transactions, or independent broker quotations.

The Derivatives Working Group performs ongoing analysis of valuations, assumptions and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. The Company performs various controls on derivative valuations which include both quantitative and qualitative analyses. Analyses are conducted by a dedicated derivative pricing team that works directly with investment sector professionals to analyze impacts of changes in the market environment and investigate variances. There is a monthly analysis to identify market value changes greater than pre-defined thresholds, stale prices, missing prices and zero prices. Also on a monthly basis, a second source validation, typically to broker quotations, is performed for certain of the more complex derivatives. In addition, on a daily basis, market valuations are compared to counterparty valuations for over-the-counter derivatives. A model validation review is performed on any new models, which typically includes detailed documentation and validation to a second source. The model validation documentation and results of validation are presented to the Valuation Committee for approval. There is a monthly control to review changes in pricing sources to ensure that new models are not moved to production until formally approved.

The Company utilizes derivative instruments to manage the risk associated with certain assets and liabilities. However, the derivative instrument may not be classified with the same fair value hierarchy level as the associated assets and liabilities. Therefore the realized and unrealized gains and losses on derivatives reported in Level 3 may not reflect the offsetting impact of the realized and unrealized gains and losses of the associated assets and liabilities.

2. Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

The table below provides a roll-forward of financial instruments measured at fair value using significant unobservable inputs (Level 3) for the period ended March 31, 2022:

(A) All amounts in this column are reported in net realized capital gains (losses). All amounts are before income taxes.

(B) Transfers in and/or (out) of Level 3 are primarily attributable to changes in the availability of market observable information and changes to bond and stock carrying value based on the lower of cost or market requirement.

3. Valuation Inputs for Investments

For Level 1 investments, which are primarily comprised of exchange-traded equity securities and open-ended mutual funds, valuations are based on quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

STATEMENT AS OF MARCH 31, 2022 OF THE HARTFORD FIRE INSURANCE COMPANY

NOTES TO FINANCIAL STATEMENTS

For the Company's Level 2 and 3 bonds and stocks, typical inputs used by pricing techniques include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Derivative instruments are valued using mid-market inputs that are predominantly observable in the market.

A description of additional inputs used in the Company's Level 2 and Level 3 measurements is listed below:

Level 2 The fair values of most of the Company's Level 2 investments are determined by management after considering prices received from third party pricing services. These investments include mostly bonds and preferred stocks.

Asset-backed securities, collateralized loan obligations, commercial and residential mortgage-backed securities - Primary inputs also include monthly payment information, collateral performance, which varies by vintage year and includes delinquency rates, collateral valuation loss severity rates, collateral refinancing assumptions, and credit default swap indices. Asset-backed securities and residential mortgage-backed securities prices also include estimates of the rate of future principal prepayments over the remaining life of the securities. These estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral.

All other corporate bonds, including surplus debentures - Primary inputs also include observations of credit default swap curves related to the issuer and political events in emerging market economies where applicable.

State, municipality and political subdivision bonds - Primary inputs also include Municipal Securities Rulemaking Board reported trades and material event notices, and issuer financial statements.

Credit derivatives - Primary inputs include the swap yield curve and credit default swap curves.

Foreign exchange derivatives - Primary inputs include the swap yield curve, currency spot and forward rates, and cross currency basis curves.

Interest rate derivatives - Primary input is the swap yield curve.

Level 3 Most of the Company's securities classified as Level 3 include less liquid securities such as lower quality asset-backed securities, collateralized loan obligations, commercial and residential mortgage-backed securities primarily backed by sub-prime loans. Also included in Level 3 are securities valued based on broker prices or broker spreads, without adjustments. Primary inputs for non-broker priced investments, including structured securities, are consistent with the typical inputs used in the preceding noted Level 2 measurements, but are Level 3 due to their less liquid markets. Additionally, certain long-dated securities are priced based on third party pricing services, including certain municipal securities, foreign government/government agency securities, and bank loans. Primary inputs for these long-dated securities are consistent with the typical inputs used in the preceding noted Level 1 and Level 2 measurements, but include benchmark interest rate or credit spread assumptions that are not observable in the marketplace. Significant inputs for Level 3 derivative contracts primarily include the typical inputs used in the preceding noted Level 1 and Level 2 measurements; but also include equity and interest rate volatility and swap yield curves beyond observable limits.

The valuation methodologies used to determine the fair values of bonds, stocks and derivatives are described in the above Fair Value Measurements section of this note. The amortized cost of cash, cash equivalents, short-term investments and low-income housing tax credits approximates fair value. Fair values for mortgage loans were estimated using discounted cash flow calculations based on current lending rates for similar type loans. Current lending rates reflect changes in credit spreads and the remaining terms of the loans.

D. Financial Instruments for Which Not Practicable to Estimate Fair Values

At March 31, 2022, the Company had no investments where it is not practicable to estimate fair value.

E. Financial Instruments Measured Using the NAV

At March 31, 2022, the Company had no investments measured using the NAV.

Note 21 – Other Items

C. Other Disclosures

In 1992, Hartford Fire issued a stop loss reinsurance agreement between the Company and First State Insurance Company ("First State"), to support the runoff insurance obligations of First State, New England Insurance Company and New England Reinsurance Corporation, collectively the "First State Companies". The current stop loss cession was triggered during the first quarter of 2003. In 2004, the Department approved an agreement between the parties to maintain a level of statutory surplus within a range above \$25 million but not to exceed \$35 million at such time there is a cession of incurred losses. The terms of this agreement were last modified in 2019 and obligate Hartford Fire to make payments to First State up to \$1.2 billion to the extent that (i) First State Companies' net retained paid losses exceed a stipulated dollar amount, which was exhausted in 2006, and (ii) First State Companies' statutory capital and surplus falls below \$25 million. This agreement was further amended in 2019 to include coverage for unallocated loss adjustment expense. First State Companies' consolidated statutory surplus as of March 31, 2022 and December 31, 2021 was \$29.4 million and \$29.7 million, respectively. As of March 31, 2022 and December 31, 2021, the First State Companies' total cession to Hartford Fire was \$845.2 million in loss and loss expense reserves.

Note 22 – Events Subsequent

The Company had no material subsequent events through May 10, 2022.

Note 23 – Reinsurance

No significant change.

Note 24 – Retrospectively Rated Contracts & Contracts Subject to Redetermination

F. Risk-Sharing Provisions of the Affordable Care Act ("ACA")

The Company did not write any accident and health insurance premium during the reporting period that is subject to the ACA risk-sharing provisions.

Note 25 – Changes in Incurred Losses and Loss Adjustment Expenses

Reserves as of December 31, 2021 were \$10,137,260,897. Prior accident year reserves are now \$9,601,836,376 as a result of payments and reserve changes attributable to insured events of prior accident years. From January 1, 2022 through March 31, 2022, \$516,786,689 has been paid for loss and loss adjustment expenses attributable to insured events of prior accident years. In addition, the Company released reserves of \$18,637,832, related to the re-estimate of unpaid losses and loss adjustment expenses for prior years. These reserve changes are largely due to releases in workers' compensation.
