Forward-Looking Statements

Certain of the statements contained herein are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as “anticipates,” “intends,” “plans,” “seeks,” “believes,” “estimates,” “expects,” “projects,” and similar references to future periods.

Forward-looking statements are based on our current expectations and assumptions regarding economic, competitive, legislative and other developments. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. They have been made based upon management’s expectations and beliefs concerning future developments and their potential effect upon The Hartford Financial Services Group, Inc. and its subsidiaries (collectively, the “Company” or “The Hartford”). Future developments may not be in line with management’s expectations or may have unanticipated effects. Actual results could differ materially from expectations, depending on the evolution of various factors, including those set forth in Part I, Item 1A. Risk Factors, in Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and those identified from time to time in our other filings with the Securities and Exchange Commission. These important risks and uncertainties include:

- challenges related to the Company’s current operating environment, including global political, economic and market conditions, and the effect of financial market disruptions, economic downturns or other potentially adverse macroeconomic developments on the attractiveness of our products, the returns in our investment portfolios and the hedging costs associated with our variable annuities business;
- the risks, challenges and uncertainties associated with our capital management plan, expense reduction initiatives and other actions, which may include acquisitions, divestitures or restructurings;
- financial risk related to the continued reinvestment of our investment portfolios and performance of our hedge program for our runoff annuity block;
- market risks associated with our business, including changes in interest rates, credit spreads, equity prices, market volatility and foreign exchange rates, commodities prices and implied volatility levels, as well as continuing uncertainty in key sectors such as the global real estate market;
- the possibility of unfavorable loss development including with respect to long-tailed exposures;
- the possibility of a pandemic, earthquake, or other natural or man-made disaster that may adversely affect our businesses;
- weather and other natural physical events, including the severity and frequency of storms, hail, winter storms, hurricanes and tropical storms, as well as climate change and its potential impact on weather patterns;
- risk associated with the use of analytical models in making decisions in key areas such as underwriting, capital, hedging, reserving, and catastrophe risk management;
- the uncertain effects of emerging claim and coverage issues;
- the Company’s ability to effectively price its property and casualty policies, including its ability to obtain regulatory consents to pricing actions or to non-renewal or withdrawal of certain product lines;
- the impact on our statutory capital of various factors, including many that are outside the Company’s control, which can in turn affect our credit and financial strength ratings, cost of capital, regulatory compliance and other aspects of our business and results;
- risks to our business, financial position, prospects and results associated with negative rating actions or downgrades in the Company’s financial strength and credit ratings or negative rating actions or downgrades relating to our investments;
- the impact on our investment portfolio if our investment portfolio is concentrated in any particular segment of the economy;
- volatility in our statutory and United States ("U.S.") GAAP earnings and potential material changes to our results resulting from our adjustment of our risk management program to emphasize protection of economic value;
- the potential for differing interpretations of the methodologies, estimations and assumptions that underlie the valuation of the Company’s financial instruments that could result in changes to investment valuations;
- the subjective determinations that underlie the Company’s evaluation of other-than-temporary impairments on available-for-sale securities;
- losses due to nonperformance or defaults by others, including reinsurers, sourcing partners, derivative counterparties and other third parties;
- the potential for further acceleration of deferred policy acquisition cost amortization;

- the potential for further impairments of our goodwill or the potential for changes in valuation allowances against deferred tax assets;
- the possible occurrence of terrorist attacks and the Company's ability to contain its exposure, including limitations on coverage from the federal government under applicable reinsurance terrorism laws;
- the difficulty in predicting the Company's potential exposure for asbestos and environmental claims;
- the response of reinsurance companies under reinsurance contracts and the availability, pricing and adequacy of reinsurance to protect the Company against losses;
- actions by our competitors, many of which are larger or have greater financial resources than we do;
- the Company's ability to distribute its products through distribution channels, both current and future;
- the cost and other effects of increased regulation as a result of the implementation of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, and the potential effect of other domestic and foreign regulatory developments, including those that could adversely impact the demand for the Company's products, operating costs and required capital levels;
- unfavorable judicial or legislative developments;
- regulatory limitations on the ability of the Company and certain of its subsidiaries to declare and pay dividends;
- the Company's ability to maintain the availability of its systems and safeguard the security of its data in the event of a disaster, cyber or other information security incident or other unanticipated event;
- the risk that our framework for managing operational risks may not be effective in mitigating material risk and loss to the Company;
- the potential for difficulties arising from outsourcing and similar third-party relationships;
- the impact of changes in federal or state tax laws;
- regulatory requirements that could delay, deter or prevent a takeover attempt that shareholders might consider in their best interests;
- the impact of potential changes in accounting principles and related financial reporting requirements;
- the Company's ability to protect its intellectual property and defend against claims of infringement; and
- other factors described in such forward-looking statements.

Any forward-looking statement made by the Company in this document speaks only as of the date of the filing of this Form 10-K. Factors or events that could cause the Company's actual results to differ may emerge from time to time, and it is not possible for the Company to predict all of them. The Company undertakes no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise.

PART I

Item 1. BUSINESS

(Dollar amounts in millions, except for per share data, unless otherwise stated)

General

The Hartford Financial Services Group, Inc. (together with its subsidiaries, "The Hartford", the "Company", "we", or "our") is an insurance and financial services company. The Hartford, headquartered in Connecticut, is among the largest providers of property and casualty insurance and group life and disability products to individual and business customers in the United States of America. The Hartford is also a provider of mutual funds to investors and additionally, The Hartford continues to manage life and annuity products previously sold. Hartford Fire Insurance Company, founded in 1810, is the oldest of The Hartford's subsidiaries. At December 31, 2014, total assets and total stockholders' equity of The Hartford were $245 billion and $18.7 billion, respectively.

Organization

The Hartford strives to maintain and enhance its position as a market leader within the financial services industry. The Company sells diverse and innovative products through multiple distribution channels to consumers and businesses. The Company seeks on an ongoing basis to develop and expand its distribution channels, achieving cost efficiencies through economies of scale and improved technology, and capitalizes on its brand name and The Hartford Stag Logo, one of the most recognized symbols in the financial services industry.

In 2012, The Hartford concluded an evaluation of its strategy and business portfolio. The Company is currently focusing on its Property & Casualty, Group Benefits and Mutual Fund businesses. This realignment positions the organization for higher returns on equity, reduced sensitivity to capital markets, a lower cost of capital and increased financial flexibility. As a result, the Company completed the sale of Hartford Life Insurance KK ("HLIKK") in 2014 and its Retirement Plans, Individual Life and U.K. annuity businesses in 2013. For further discussion of these transactions, see Note 2 - Business Dispositions and Note 19 - Discontinued Operations of Notes to Consolidated Financial Statements. In addition, the Company sold Woodbury Financial Services, Inc. ("Woodbury Financial Services", "WFS"), an indirect wholly-owned broker-dealer subsidiary, and placed its annuity businesses into runoff in 2012.

As a holding company that is separate and distinct from its subsidiaries, The Hartford Financial Services Group, Inc. has no significant business operations of its own. Therefore, it relies on the dividends from its insurance companies and other subsidiaries as the principal source of cash flow to meet its obligations. Additional information regarding the cash flow and liquidity needs of The Hartford Financial Services Group, Inc. may be found in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") — Capital Resources and Liquidity.

Reporting Segments

The Hartford currently conducts business principally in six reporting segments including Commercial Lines (formerly Property & Casualty Commercial), Personal Lines (formerly Consumer Markets), Property & Casualty Other Operations, Group Benefits, Mutual Funds and Talcott Resolution, as well as a Corporate category. The Hartford includes in its Corporate category the Company's debt financing and related interest expense, as well as other capital raising activities; and purchase accounting adjustments related to goodwill and other expenses not allocated to the reporting segments.

The following discussion describes the principal products and services, marketing and distribution, and competition of The Hartford's reporting segments. For further discussion of the reporting segments, including financial disclosures of revenues by product line, net income (loss), and assets for each reporting segment, see Note 4 - Segment Information of Notes to Consolidated Financial Statements.

Commercial Lines

Principal Products and Services

Commercial Lines provides businesses with workers' compensation, property, automobile, liability, umbrella, marine and livestock coverages under several different products, primarily throughout the United States, within its standard commercial lines, which consists of The Hartford's small commercial and middle market lines of business. Additionally, a variety of customized insurance products and risk management services including workers' compensation, automobile, general liability, professional liability, bond, and specialty casualty coverages are offered through the segment's specialty lines.

Standard commercial lines seeks to offer products with coverage options and customized pricing based on the policyholder's individualized risk characteristics. For small businesses, those businesses whose annual payroll is under $5 and whose revenue and property values are less than $15 each, property and liability coverages are bundled as part of a single multi-peril package policy marketed under the Spectrum name. The small commercial line of business also provides workers' compensation and automobile coverages. Medium-sized businesses, companies whose payroll, revenue and property values exceed the small business definition, are served within middle market. The middle market line of business provides workers' compensation, property, automobile, liability, umbrella, marine and livestock coverages.

Within the specialty lines, a significant portion of the specialty casualty business, including workers' compensation business, is written through large deductible programs where the insured typically provides collateral to support loss payments made within their deductible. The specialty casualty business also provides retrospectively-rated programs where the premiums are adjustable based on loss experience. The captive programs business provides tailored property and casualty programs primarily to customers with common risk characteristics and those seeking a loss sensitive solution. The bond business provides (1) contract surety bonds for general, highway/heavy, trade and specialty contractors; (2) commercial surety required in a variety of businesses and court situations; and (3) fidelity coverage for businesses, financial institutions and public entities. The financial products business provides a suite of management and professional liability insurance products including D&O (directors and officers) and E&O (errors and omissions) liability products.

Marketing and Distribution

Standard commercial lines provide insurance products and services through the Company's home office located in Hartford, Connecticut, and multiple domestic regional office locations and insurance centers. The products are marketed nationwide utilizing brokers and independent agents. The current pace of consolidation within the independent agent and broker distribution channel will likely continue such that, in the future a larger proportion of written premium will likely be concentrated among fewer agents and brokers. Additionally the Company offers insurance products to customers of payroll service providers through its relationships with major national payroll companies.

Specialty lines also provide insurance products and services through its home office located in Hartford, Connecticut and multiple domestic office locations. Specialty lines markets its products nationwide utilizing a variety of distribution networks including independent retail agents, brokers and wholesalers.

Competition

In the small commercial marketplace, The Hartford competes against a number of large national carriers, as well as regional carriers in certain territories. Competitors include other stock companies, mutual companies and other underwriting organizations. The small commercial market has become increasingly competitive as carriers seek to differentiate themselves through product expansion, price reduction, enhanced service and cutting-edge technology. Larger carriers such as The Hartford have improved their pricing sophistication and ease of doing business with agents through the use of predictive modeling tools and automation which speeds up the process of evaluating a risk and quoting new business.

Written premium growth rates in the small commercial market have slowed in recent years due to the economy and underwriting margins have been pressured by increased competition. A number of companies have sought to grow their business by increasing their underwriting appetite, appointing new agents and expanding business with existing agents. Also, carriers serving middle market-sized accounts are more aggressively competing for small commercial accounts as small commercial business has generally been less price-sensitive.

Middle market business is characterized as "high touch" and involves case-by-case underwriting and pricing decisions. The pricing of middle market accounts is prone to significant variation or cyclicality over time, with sensitivity to legislative and macro-economic forces. Additionally, various state legislative reforms in recent years designed to control workers compensation indemnity costs have led to rate reductions in many states. These factors, characterized by highly competitive pricing on new business, have resulted in more new business opportunities in the marketplace as customers shop their policies for a lower price. In the face of this competitive environment, The Hartford continues to maintain a disciplined underwriting approach. To gain a competitive advantage in this environment, carriers are improving automation with agents and brokers, increasing pricing sophistication, and enhancing their product offerings. These enhancements include industry specialization, with The Hartford and other national carriers tailoring products and services to specific industry verticals such as technology, life sciences, construction and renewable energy.

Specialty lines is comprised of a diverse group of businesses that operate independently within their specific industries. These businesses, while somewhat interrelated, have different business models and operating cycles. Specialty lines competes on an account- by-account basis due to the complex nature of each transaction. Competition in this market includes other stock companies, mutual companies, alternative risk sharing groups and other underwriting organizations. The relatively large size and underwriting capacity of The Hartford provides opportunities not available to smaller companies. Disciplined underwriting and targeted returns are the objectives of specialty lines since premium writings may fluctuate based on the segment's view of perceived market opportunity.

For specialty casualty businesses, written pricing competition continues to be significant, particularly for the larger individual accounts. Carriers are aggressively negotiating renewals with customers by initiating the renewal process well in advance of the policy renewal date, to improve retention, reducing new business opportunities within the marketplace. Within the national account business, as written pricing increases, more insureds may opt for loss-sensitive products in lieu of guaranteed cost policies.

In the bond business, favorable underwriting results over the past couple of years have led to increased competition for market share, setting the stage for potential written price decreases. New public construction activity is slowly rebounding from the historically low levels, resulting in slightly higher demand for contract surety business as compared to previous years.

Carriers writing professional liability business are increasingly focused on profitable private, middle market companies. This trend has continued as the downturn in the economy has led to a significant drop in the number of initial public offerings, and volatility for all public companies. Also, carriers' new business opportunities in the marketplace for directors & officers and errors & omissions insurance have been significantly influenced by customer perceptions of financial strength, as investment portfolio losses have had a negative effect on the financial strength ratings of some insurers.

In the commercial marketplace, the weak economy has prompted carriers to offer differentiated products and services as a means of gaining a competitive advantage. In addition to the initiatives specific to each of The Hartford's commercial lines of business noted above, the Company is leveraging its diverse product, service and distribution capabilities to deliver differentiated value in the market, while simultaneously increasing its ability to access its own diverse customer base for new product sales.

Personal Lines

Principal Products and Services

Personal Lines provides automobile, homeowners and personal umbrella coverages to individuals across the United States, including a special program designed exclusively for members of AARP ("AARP Program"). The Hartford's auto and homeowners products provide coverage options and customized pricing tailored to a customer's individual risk. The Hartford has individual customer relationships with AARP Program policyholders and, as a group, these customers represent a significant portion of the total Personal Lines' business. Business sold to AARP members, either direct or through independent agents, amounted to earned premiums of $3.0 billion, $2.9 billion and $2.8 billion in 2014, 2013 and 2012, respectively.

During 2014, Personal Lines rolled out its new auto product, *Open Road*, in 37 states, increasing pricing flexibility and market responsiveness. In addition, Personal Lines continued to roll out its telematics device, *TrueLane*, to more states, and the device is currently available in 40 states to both direct and independent agent customers. The *TrueLane* device records the driving data of Personal Lines' customers, who receive a discount of up to 10% for the initial policy term with the potential for additional discounts upon renewal.

Marketing and Distribution

Personal Lines reaches diverse customers through multiple distribution channels including direct sales to the consumer, brokers and independent agents. In direct sales to the consumer, Personal Lines markets its products through a mix of media, including direct mail, digital marketing, television and advertising, both digitally and in publications. More recently, Personal Lines has begun marketing to consumers through online distribution partners who generate leads for the Company. Through the agency channel, Personal Lines provides products and services to customers through a network of independent agents in the standard personal lines market. These independent agents are not employees of the Company.

Most of Personal Lines' sales are associated with its exclusive licensing arrangement with AARP, with the current agreement in place through January 1, 2023, to provide automobile, homeowners and and personal umbrella coverages to AARP's nearly 37 million members, either direct or through independent agents. This agreement provides Personal Lines with an important competitive advantage given the number of "baby boomers" over age 50, many of whom become AARP members. During 2014, the Company expanded its relationship with AARP to provide its industry-leading small business products offered by Commercial Lines to AARP members who are small business owners.

In addition to selling product through its relationship with AARP and through independent agents, Personal Lines markets direct to the consumer within select underwriting markets and where we believe we have a competitive advantage.

Competition

The personal lines automobile and homeowners businesses are highly competitive. Personal lines insurance is written by insurance companies of varying sizes that compete on the basis of price, product, service (including claims handling), stability of the insurer and brand recognition. Companies with recognized brands, direct sales capability and economies of scale will have a competitive advantage. In recent years, a number of carriers have increased their advertising in an effort to gain new business and retain profitable business. This has been particularly true of carriers that sell directly to the consumer. Industry sales of personal lines insurance direct to the consumer have been growing faster than sales through agents, particularly for auto insurance.

Carriers that distribute products mainly through agents compete by offering agents commissions and additional incentives to attract new business. To distinguish themselves in the marketplace, top tier carriers are offering online and self service capabilities to agents and consumers. A large majority of agents have been using "comparative rater" tools that allow the agent to compare premium quotes among several insurance companies. The use of comparative rater tools increases price competition. Carriers with more efficient cost structures will have an advantage in competing for new business through price.

The use of data mining and predictive modeling is used by more and more carriers to target the most profitable business and carriers have further segmented their pricing plans to expand market share in what they believe to be the most profitable segments. Some companies, including The Hartford, have written a greater percentage of their new business in preferred market segments which tend to have better loss experience but also lower average premiums. In addition, a number of companies have invested in telematics — the use of devices in insured vehicles to transmit information about driving behavior such as miles driven, speed, acceleration, deceleration — and are using that information to price the risk and drive favorable risk selection. Also, new auto technology advancements — including lane departure warnings, backup cameras, active collision alerts — are being deployed rapidly and are expected to improve driver safety and reduce the likelihood of vehicle collisions. Such advancements could reduce loss frequency and therefore average premiums resulting in lower industry premiums and increased competition. Companies that are the first to recognize these trends by, for example, introducing vehicle safety discounts or otherwise reflecting these trends in pricing, may enjoy a competitive advantage.

Group Benefits

Principal Products and Services

Group Benefits provides group life, accident and disability coverage, group retiree health and voluntary benefits to individual members of employer groups, associations, affinity groups and financial institutions. Group Benefits also offers disability underwriting, administration, claims processing and reinsurance to other insurers and self-funded employer plans. In addition, Group Benefits offers a single-company leave management solution, *The Hartford Productivity Advantage*, which integrates work absence data from the insurer's short-term and long-term group disability and workers' compensation insurance with its leave management administration services.

Group Benefits generally offers term insurance policies, allowing for the adjustment of rates or policy terms in order to minimize the adverse effect of market trends, declining interest rates, and other factors. Policies are typically sold with one, two or three-year rate guarantees depending upon the product and market segment.

Marketing and Distribution

The Group Benefits distribution network is managed through a regional sales office system, to distribute its group insurance products and services through a variety of distribution outlets including brokers, consultants, third-party administrators and trade associations.

Competition

Group Benefits competes with numerous other insurance companies and other financial intermediaries marketing insurance products. This line of business focuses on both its risk management expertise and economies of scale to derive a competitive advantage. Competitive factors affecting Group Benefits include the variety and quality of products and services offered, the price quoted for coverage and services, the Company's relationships with its third-party distributors and private exchanges, and the quality of customer service. In addition, active price competition continues in the marketplace resulting in multi-year rate guarantees being offered to customers. Top tier carriers in the marketplace also offer on-line and self service capabilities to agents and consumers. The relatively large size and underwriting capacity of the Group Benefits business provides opportunities not available to smaller companies.

Mutual Funds

Principal Products and Services

Mutual Funds provides investment management, administration, distribution and related services to investors through investment products in both domestic and international markets, and is separated into two distinct asset categories referred to as Mutual Fund funds and Talcott funds. Mutual Fund funds includes equity, fixed income, alternative and asset allocation investment products that are actively sold primarily through retail, bank trust and registered investment advisor channels. Talcott funds represents those assets held in separate accounts supporting legacy runoff Hartford variable insurance products. Wellington Management Company, LLP ("Wellington Management") serves as sole sub-advisor for Mutual Funds.

Marketing and Distribution

The Mutual Funds distribution team is organized to sell across a variety of channels including national and regional broker-dealer organizations, independent financial advisors, defined contribution plans, consultants, record keepers, bank trust groups, and registered investment advisors.

Competition

Mutual Funds competes with other mutual fund companies and investment brokerage companies and differentiates itself through fund performance, product innovation and solutions, and service.

Talcott Resolution

Talcott Resolution is comprised of the runoff of the Company's U.S. annuity and institutional and private-placement life insurance businesses, and the retained Japan fixed payout annuity liabilities. Talcott Resolution's mission is to pursue opportunities to reduce the size and risk of the annuity book of business while honoring the Company's obligations to its annuity contractholders. Talcott Resolution manages approximately 930 thousand annuity contracts with account value of approximately $77 billion and private placement life insurance with account value of approximately $40 billion as of December 31, 2014.

In 2014, the Company completed the sale of its Japan annuity business. The Talcott Resolution business segment includes our Retirement Plans and Individual Life businesses sold in 2013 through reinsurance agreements with the respective buyers. In addition, the Company completed the sale of its U.K. annuity business in 2013. For further discussion of these transactions, see Note 2 - Business Dispositions and Note 19 - Discontinued Operations of Notes to Consolidated Financial Statements.

Reserves

The Hartford establishes and carries as liabilities reserves for its insurance products to estimate for the following:

- a liability for unpaid losses, including those that have been incurred but not yet reported, as well as estimates of all expenses associated with processing and settling these claims;
- a liability equal to the balance that accrues to the benefit of the life insurance policyholder as of the consolidated financial statement date, otherwise known as the account value;
- a liability for future policy benefits, representing the present value of future benefits to be paid to or on behalf of policyholders less the present value of future net premiums;
- fair value reserves for living benefits embedded derivative guarantees; and
- death and living benefit reserves which are computed based on a percentage of revenues less actual claim costs.

Further discussion of The Hartford’s property and casualty insurance product reserves, including asbestos and environmental claims reserves, may be found in Part II, Item 7, MD&A — Critical Accounting Estimates — Property and Casualty Insurance Product Reserves, Net of Reinsurance. Additional discussion may be found in the Company’s accounting policies for insurance product reserves within Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Consolidated Financial Statements.

Reinsurance

The Hartford cedes insurance to affiliated and unaffiliated insurers for both its property and casualty and life insurance products. Such arrangements do not relieve The Hartford of its primary liability to policyholders. Failure of reinsurers to honor their obligations could result in losses to The Hartford. For further discussion of reinsurance, see Part II, Item 7, MD&A — Enterprise Risk Management and Note 7 - Reinsurance of Notes to Consolidated Financial Statements.

For property and casualty insurance products, reinsurance arrangements are intended to provide greater diversification of business and limit The Hartford’s maximum net loss arising from large risks or catastrophes. A major portion of The Hartford’s property and casualty insurance product reinsurance is effected under general reinsurance contracts known as treaties, or, in some instances, is negotiated on an individual risk basis, known as facultative reinsurance. The Hartford also has in-force excess of loss contracts with reinsurers that protect it against a specified part or all of a layer of losses over stipulated amounts.

For life insurance products, The Hartford is involved in both the cession and assumption of insurance with other insurance and reinsurance companies. The Company has ceded reinsurance in connection with the sales of its Retirement Plans and Individual Life businesses in 2013. For further discussion of these transactions, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements. In addition, the Company has reinsured to third parties a portion of the risk associated with U.S. individual variable annuities and the associated guaranteed minimum death benefit (“GMDB”) and guaranteed minimum withdrawal benefit (“GMWB”) riders.

Investment Operations

The majority of the Company's investment portfolios are managed by Hartford Investment Management Company ("HIMCO"). HIMCO manages the portfolios to maximize economic value, and generate the income necessary to support the Company's various product obligations, within internally established objectives, guidelines and risk tolerances. The portfolio objectives and guidelines are developed based upon the asset/liability profile, including duration, convexity and other characteristics within specified risk tolerances. The risk tolerances considered include, for example, asset sector, credit issuer allocation limits, maximum portfolio limits for below investment grade holdings and foreign currency exposure limits. The Company attempts to minimize adverse impacts to the portfolio and the Company's results of operations from changes in economic conditions through asset diversification, asset allocation limits, asset/liability duration matching and through the use of derivatives. For further discussion of HIMCO's portfolio management approach, see Part II, Item 7, MD&A — Enterprise Risk Management.

In addition to managing the general account assets of the Company, HIMCO is also a SEC registered investment adviser for a variable insurance trust and third party institutional clients, a sub-advisor for certain mutual funds and serves as the sponsor and collateral manager for capital markets transactions. HIMCO specializes in investment management that incorporates proprietary research and active portfolio management within a disciplined risk framework that seeks to provide value added returns versus peers and benchmarks. As of December 31, 2014 and 2013, the fair value of HIMCO's total assets under management was approximately $109.5 billion and $112.6 billion, respectively, of which $6.2 billion and $6.1 billion, respectively, were held in HIMCO managed third party accounts.

Enterprise Risk Management

The Company has an enterprise risk management function ("ERM") that is charged with providing analysis of the Company's risks on an individual and aggregated basis and with ensuring that the Company's risks remain within its risk appetite and tolerances. ERM plays an integral role at The Hartford by fostering a strong risk management culture and discipline. The mission of ERM is to support the Company in achieving its strategic priorities by:

- Providing a comprehensive view of the risks facing the Company, including risk concentrations and correlations;
- Helping management define the Company's overall capacity and appetite for risk by evaluating the risk/return profile of the business relative to the Company's strategic intent and financial underpinning;
- Assisting management in setting specific risk tolerances and limits that are measurable, actionable, and comply with the Company's overall risk philosophy;
- Communicating and monitoring the Company's risk exposures relative to set limits and recommending, or implementing as appropriate, mitigating strategies; and
- Providing insight to assist leaders in growing the businesses and achieving optimal risk-adjusted returns within established guidelines.

Enterprise Risk Management Structure and Governance

At The Hartford, the Board of Directors ("the Board") has ultimate responsibility for risk oversight. It exercises its oversight function through its standing committees, each of which has primary risk oversight responsibility with respect to all matters within the scope of its duties as contemplated by its charter. In addition, the Finance, Investment and Risk Management Committee ("FIRMCo"), which is comprised of all members of the Board, has responsibility for the oversight of the investment, financial, and risk management activities of the Company, except as otherwise provided in the Company Governance Guidelines. The oversight of all risk exposures includes, but is not limited to:

- Market risk, including credit, interest rate, equity market, and foreign exchange;
- Liquidity and capital requirements of the Company;
- Insurance risks, including those arising out of catastrophes and acts of terrorism;
- Cybersecurity risk; and
- Any other risk that poses a material threat to the strategic viability of the Company.

The Audit Committee is responsible for, among other things, discussing with management policies with respect to risk assessment and risk management.

At the corporate level, the Company's Enterprise Chief Risk Officer ("Chief Risk Officer") leads ERM. The Chief Risk Officer reports directly to the Company's Chief Executive Officer ("CEO"). The Company has established the Enterprise Risk and Capital Committee ("ERCC") that includes the Company's CEO, President, Chief Financial Officer, Chief Investment Officer, Chief Risk Officer, General Counsel and others as deemed necessary by the committee chair. The ERCC oversees the risk profile and risk management practices of the Company. The ERCC also oversees capital management and the allocation of capital to the lines of business. The ERCC is responsible for significant company-wide risk exposures including, but not limited to, financial risk, liquidity and capital requirements, insurance risk, operational risks, and any other risk deemed significant. The ERCC reports to the Board primarily through the FIRMCo and through interactions with the Audit Committee.

The Company also has committees that manage specific risks and recommend risk mitigation strategies to the ERCC. These committees include, but are not limited to, Asset Liability Committees, Catastrophe Risk Committee, Emerging Risk Committees, Model Oversight Committees and Operational Risk Committee.

Risk Management Framework

At the Company, risk is managed at multiple levels. The Hartford utilizes three lines of defense in risk management to integrate its risk management strategy and appetite into all areas of the Company. The first line of defense in risk management is generally the responsibility of the lines of business. Senior business leaders are responsible for managing risks specific to their business objectives and business environment. The second line of defense in risk management is generally owned by ERM. ERM has the responsibility to ensure that the Company has insight into its aggregate risk and that risks are managed within the Company's overall risk appetite. Legal and Compliance also commonly act as a second line of defense in risk management. The third line of defense in risk management is owned by Internal Audit. Internal Audit provides independent assurance that each business unit's controls are present, compliant, and effective, informs the risk identification process and provides audit and consultative support to the Company.

The Company's Risk Management Framework consists of five core elements:

1. Risk Culture and Governance: The Company has established policies for its major risks and a formal governance structure with leadership oversight and an assignment of accountability and authority. The governance structure starts at the Board and cascades to the ERCC and then to individual risk committees across the Company. In addition, the Company promotes a strong risk management culture and high expectations around ethical behavior.
2. Risk Identification and Assessment: Through its ERM organization, the Company has developed processes for the identification, assessment, and, when appropriate, response to internal and external risks to the Company's operations and business objectives. Risk identification and prioritization has been established within each area, including processes around emerging risks.
3. Risk Appetite, Tolerances, and Limits: The Company has a formal enterprise risk appetite framework that is approved by the ERCC and reviewed by the Board. The risk appetite framework includes an enterprise risk appetite statement, risk preferences, risk tolerances and enterprise risk limits. Enterprise risk limits which quantify tolerances into specific limits by risk category are defined in underlying enterprise risk policies.
4. Risk Management and Controls: While the Company utilizes the committee structure to elevate risk discussions and decision-making, there are a variety of working groups that provide decisioning and management of risk within determined tolerances and limits. ERM and the appropriate governing risk committees regularly monitor the Company's risk exposure as compared to defined limits and tolerances and provides regular reporting to the ERCC.
5. Risk Reporting and Communication: The Company monitors its major risks at the enterprise level through a number of enterprise reports, including but not limited to, a monthly risk dashboard, and regular stress testing. ERM communicates the Company's risk exposures to senior and executive management and the Board, and reviews key business performance metrics, risk indicators, audit reports, risk/control self-assessments and risk event data.

Risk Exposures and Quantification

The Company quantifies its enterprise insurance and financial risk exposures using multiple lenses including statutory, economic and, where appropriate, U.S. GAAP. ERM leverages various modeling techniques and metrics to provide a view of the Company's risk exposure in both normal and stressed environments.

In order to quantify group capital levels the Company uses an Economic Capital Model ("ECM") to quantify the value of risk management across the business lines and to advance its risk-based decision-making and optimization across risk and business. The Company also uses the ECM to inform capital attribution. The Company categorizes its main risks as follows in order to achieve a consistent and disciplined approach to quantifying, evaluating, and managing risk:

- Insurance Risk
- Operational Risk
- Financial Risk

Additionally, the Company manages its legal and management risks, across the enterprise. Management risk includes strategic risk, the risk of ineffective or inefficient execution of the Company's strategy, as well as tax risk and reputational risk.

Insurance Risk

The Company defines insurance risk as its exposure to loss due to property, liability, mortality, morbidity, disability, longevity and other perils and risks covered under its policies, including adverse development on loss reserves supporting its products and geographic accumulations of loss over time due to property or casualty catastrophes.

Operational Risk

The Company defines operational risk as the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events.

Financial Risk

Financial risk is broadly defined by the Company to include liquidity, interest rate, equity, foreign exchange, and credit risks, all of which have the potential to materially impact the Company's financial condition. Financial risk also includes exposure to events that may cause correlated movement in the above risk factors.

For further discussion on risk management, see Part II, Item 7, MD&A - Enterprise Risk Management.

Regulation

Insurance companies are subject to comprehensive and detailed regulation and supervision throughout the United States. The extent of such regulation varies, but generally has its source in statutes which delegate regulatory, supervisory and administrative powers to state insurance departments. Such powers relate to, among other things, the standards of solvency that must be met and maintained; the licensing of insurers and their agents; the nature of and limitations on investments; establishing premium rates; claim handling and trade practices; restrictions on the size of risks which may be insured under a single policy; deposits of securities for the benefit of policyholders; approval of policy forms; periodic examinations of the affairs of companies; annual and other reports required to be filed on the financial condition of companies or for other purposes; and minimum rates for accumulation of surrender values; and the adequacy of reserves and other necessary provisions for unearned premiums, unpaid losses and loss adjustment expenses and other liabilities, both reported and unreported.

Most states have enacted legislation that regulates insurance holding company systems such as The Hartford. This legislation provides that each insurance company in the system is required to register with the insurance department of its state of domicile and furnish information concerning the operations of companies within the holding company system that may materially affect the operations, management or financial condition of the insurers within the system. All transactions within a holding company system affecting insurers must be fair and equitable. Notice to the insurance departments is required prior to the consummation of transactions affecting the ownership or control of an insurer and of certain material transactions between an insurer and any entity in its holding company system. In addition, certain of such transactions cannot be consummated without the applicable insurance department's prior approval. In the jurisdictions in which the Company's insurance company subsidiaries are domiciled, the acquisition of more than 10% of The Hartford's outstanding common stock would require the acquiring party to make various regulatory filings.

Certain of the Company's life insurance subsidiaries sold variable life insurance, variable annuity, and some fixed guaranteed products that are "securities" registered with the SEC under the Securities Act of 1933, as amended. Some of the products have separate accounts that are registered as investment companies under the Investment Company Act of 1940, as amended (the "1940 Act"), and/or are regulated by state law. Separate account investment products are also subject to state insurance regulation. Moreover, each separate account is generally divided into sub-accounts, each of which invests in an underlying mutual fund that is also registered as an investment company under the 1940 Act ("Underlying Funds"). The Company offers these Underlying Funds and retail mutual funds that are registered with and regulated by the SEC.

In addition, other subsidiaries of the Company sold and distributed the Company's variable insurance products, Underlying Funds and retail mutual funds as broker-dealers and are subject to regulation promulgated and enforced by the Financial Industry Regulatory Authority ("FINRA"), the SEC and/or in, some instances, state securities administrators. Other entities operate as investment advisers registered with the SEC under the Investment Advisers Act of 1940 and are registered as investment advisers under certain state laws, as applicable. Because federal and state laws and regulations are primarily intended to protect investors in securities markets, they generally grant regulators broad rulemaking and enforcement authority. Some of these regulations include, among other things, regulations impacting sales methods, trading practices, suitability of investments, use and safekeeping of customers' funds, corporate governance, capital, record keeping, and reporting requirements.

The extent of insurance regulation on business outside the United States varies significantly among the countries in which The Hartford operates. Some countries have minimal regulatory requirements, while others regulate insurers extensively. Foreign insurers in certain countries are faced with greater restrictions than domestic competitors domiciled in that particular jurisdiction. The Hartford's international operations are comprised of insurers licensed in their respective countries.

In addition, as described under "Legislative Developments," we are subject to a number of Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act") provisions. Failure to comply with federal and state laws and regulations may result in censure, fines, the issuance of cease-and-desist orders or suspension, termination or limitation of the activities of our operations and/or our employees. We cannot predict the impact of these actions on our businesses, results of operations or financial condition.

Intellectual Property

We rely on a combination of contractual rights and copyright, trademark, patent and trade secret laws to establish and protect our intellectual property.

We have a trademark portfolio that we consider important in the marketing of our products and services, including, among others, the trademarks of The Hartford name, the Stag Logo and the combination of these two marks. The duration of trademark registrations may be renewed indefinitely subject to country-specific use and registration requirements. We regard our trademarks as extremely valuable assets in marketing our products and services and vigorously seek to protect them against infringement. In addition, we own a number of patents and patent applications relating to on-line quoting, insurance related processing, insurance telematics, proprietary interface platforms, and other matters, some of which may be important to our business operations. Patents are of varying duration depending on filing date, and will typically expire at the end of their natural term.

Employees

The Hartford has approximately 17,500 employees as of December 31, 2014.

Available Information

The Company's Internet address is www.thehartford.com. Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports are available, without charge, on the investor relations section of our website, http://ir.thehartford.com, as soon as reasonably practicable after they are filed electronically with the SEC. Reports filed with the SEC may be viewed at www.sec.gov or obtained at the SEC's Public Reference Room at 100 F Street, N.E., Washington D.C. Information regarding the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. References in this report to our website address are provided only as a convenience and do not constitute, and should not be viewed as, an incorporation by reference of the information contained on, or available through, the website. Therefore, such information should not be considered part of this report.

Item 1A. RISK FACTORS

Investing in The Hartford involves risk. In deciding whether to invest in The Hartford, you should carefully consider the following risk factors, any of which could have an adverse effect on the business, financial condition, results of operations, or liquidity of The Hartford and could also impact the trading price of our securities. The Hartford may also be subject to other risks and uncertainties that are not specifically described below, which may have an adverse effect on the business, financial condition, results of operations, or liquidity of The Hartford. This information should be considered carefully together with the other information contained in this report and the other reports and materials filed by The Hartford with the Securities and Exchange Commission ("SEC"). The following risk factors have been organized by category for ease of use, however many of the risks may have impacts in more than one category. These categories, therefore, should be viewed as a starting point for understanding the significant risks facing us and not as a limitation on the potential impact of the matters discussed. Risk factors are not necessarily listed in order of importance.

Risks Relating to Economic, Market and Political Conditions

Unfavorable conditions in our operating environment, including general economic and global capital market conditions, including financial and capital markets risks, such as changes in interest rates, credit spreads, equity prices, market volatility, foreign exchange rates, commodities prices and real estate market deterioration, may have a material adverse effect on our business, financial condition, results of operations, and liquidity.

The Company's investment portfolio and insurance liabilities are sensitive to changes in global capital market conditions. Stressed conditions or disruptions in global capital markets can directly impact our business, financial condition, results of operations, and liquidity as well as impact the economic environment. Weak economic conditions, such as high unemployment, low labor force participation, lower family income, higher tax rates, lower business investment and lower consumer spending may have adversely affected or may in the future adversely affect the demand for insurance and financial products, as well as their profitability in some cases. Weak economic conditions are also likely to result in the persistence of a low interest rate environment as well as volatility in other global capital market conditions, which will continue to pressure our investment results.

One important exposure to equity risk relates to the potential for lower earnings associated with our operations in Mutual Funds and Talcott Resolution, such as U.S. variable annuities, where fee income is earned based upon the fair value of the assets under management. Should equity markets decline from current levels, assets under management and related fee income will be reduced. Certain of our products have guaranteed benefits that increase our potential obligation and statutory capital exposure when equity markets decline. Sustained declines in equity markets may result in the need to utilize significant additional capital to support these products and adversely affect our ability to support our other businesses.

A sustained low interest rate environment would pressure our net investment income and could result in lower margins and lower estimated gross profits on certain products. New and renewal business for our property and casualty and group benefits products is priced based on prevailing interest rates. As interest rates decline, pricing targets will tend to increase to offset the lower anticipated investment income earned on invested premiums. Conversely, as interest rates rise, pricing targets will tend to decrease to reflect higher anticipated investment income. Such changes in pricing may affect our competitiveness in the marketplace, and in turn, written premium and earnings margin achieved. In addition, due to the long-term nature of the liabilities within our Group Benefits and Talcott Resolution operations, such as structured settlements and guaranteed benefits on variable annuities, sustained declines in long-term interest rates subjects us to reinvestment risks, increased hedging costs, spread compression and capital volatility. A rise in interest rates, in the absence of other countervailing changes, will reduce the market value of our investment portfolio and, if long-term interest rates were to rise dramatically certain products within our Talcott Resolution segment might be exposed to disintermediation risk. Disintermediation risk refers to the risk that our policyholders may surrender their contracts in a rising interest rate environment, requiring us to liquidate assets in an unrealized loss position. An increase in interest rates can also impact our tax planning strategies and, in particular, our ability to utilize tax benefits to offset certain previously recognized realized capital losses.

Our exposure to credit spreads primarily relates to changes in market price of fixed income instruments associated with changes in credit spreads. If issuer credit spreads widen significantly and retain wide levels over an extended period of time, other-than-temporary impairments and decreases in the market value of our investment portfolio will likely result. In addition, losses may also occur due to volatility in credit spreads. When credit spreads widen, we incur losses associated with credit derivatives where the Company assumes exposure. When credit spreads tighten, we incur losses associated with derivatives where the Company has purchased credit protection. If credit spreads tighten significantly, the Company's net investment income associated with new purchases of fixed maturities may be reduced. In addition, a reduction in market liquidity can make it difficult to value certain of our securities when trading becomes less frequent. As such, valuations may include assumptions or estimates that may be more susceptible to significant period-to-period changes, which could have a material adverse effect on our business, financial condition, results of operations or liquidity.

Our exposure to commodity prices primarily relates to our investment portfolio. Our investment portfolio includes fixed maturities and equity securities issued by companies and sovereigns that derive a portion of their revenues from commodities, including oil, coal, natural gas, precious and non-precious metals. In periods in which the prices of these and other commodities fall, absent other countervailing changes, decreases in the market value of our investment portfolio will likely result. If these declines in commodities prices are severe and persist over an extended period of time, other-than-temporary impairments may result. Our statutory surplus is also affected by widening credit spreads as a result of the accounting for the assets and liabilities on our fixed market value adjusted ("MVA") annuities. Statutory separate account assets supporting the fixed MVA annuities are recorded at fair value. In determining the statutory reserve for the fixed MVA annuities we are required to use current crediting rates in the U.S. In many capital market scenarios, current crediting rates in the U.S. are highly correlated with market rates implicit in the fair value of statutory separate account assets. As a result, the change in the statutory reserve from period to period will likely substantially offset the change in the fair value of the statutory separate account assets. However, in periods of volatile credit markets, actual credit spreads on investment assets may increase sharply for certain sub-sectors of the overall credit market, resulting in statutory separate account asset market value losses. As actual credit spreads are not fully reflected in current crediting rates in the U.S., the calculation of statutory reserves will not substantially offset the change in fair value of the statutory separate account assets, resulting in reductions in statutory surplus. This has resulted in the past and may result in the future in the need to devote significant additional capital to support the fixed MVA product.

Our real estate market exposure includes investments in commercial mortgage-backed securities, residential mortgage-backed securities, commercial real estate collateralized debt obligations, mortgage and real estate partnerships, and mortgage loans. Deterioration in the real estate market has adversely affected our business, financial condition, results of operations and liquidity in the past. While the real estate market has shown signs of improvement, deteriorating fundamentals (including increases in property vacancy rates, delinquencies and foreclosures) could cause a decline in market values, which would have a negative impact on sources of refinancing, resulting in reduced market liquidity and higher risk premiums. This could result in reductions in market value and impairments of real estate-backed securities, a reduction in net investment income associated with real estate partnerships, and increases in our valuation allowance for mortgage loans.

Significant declines in equity prices, changes in U.S. interest rates, changes in credit spreads, inflation, the strengthening or weakening of foreign currencies against the U.S. dollar or real estate market deterioration, individually or in combination, could have a material adverse effect on our business, financial condition, results of operations or liquidity. Our hedging assets seek to reduce the net economic sensitivity of our potential obligations from guaranteed benefits to equity market and interest rate fluctuations. Because of the accounting asymmetries between our hedging targets and statutory and GAAP accounting principles for our guaranteed benefits, rising equity markets and/or rising interest rates may result in statutory or GAAP losses.

Concentration of our investment portfolio in any particular segment of the economy may have adverse effects on our business, financial condition, results of operations and liquidity

The concentration of our investment portfolios in any particular industry, collateral type, group of related industries or geographic sector could have an adverse effect on our investment portfolios and consequently on our business, financial condition, results of operations and liquidity. Events or developments that have a negative impact on any particular industry, group of related industries or geographic region may have a greater adverse effect on our investment portfolio to the extent that the portfolio is concentrated rather than diversified.

Risks Relating to Estimates, Assumptions and Valuations

Actual results could materially differ from the analytical models we use to assist our decision making in key areas such as underwriting, capital, hedging, reserving, and catastrophe risks, which could have a material adverse effect on our business, financial condition, results of operations or liquidity.

We employ various modeling techniques (e.g., scenarios, predictive, stochastic and/or forecasting) to analyze and estimate exposures, loss trends and other risks associated with our assets and liabilities. We use the modeled outputs and related analyses to assist us in decision-making related to underwriting, pricing, capital allocation, reserving, hedging, reinsurance, and catastrophe risk. Both proprietary and third party models we use incorporate numerous assumptions and forecasts about the future level and variability of interest rates, capital requirements, loss frequency and severity, currency exchange rates, policyholder behavior, equity markets and inflation, among others. The modeled outputs and related analyses are subject to the inherent limitations of any statistical analysis, including the use of historical internal and industry data and assumptions, which may be stale, incomplete or erroneous. Consequently, actual results may differ materially from our modeled results. The profitability and financial condition of the Company substantially depends on the extent to which our actual experience is consistent with assumptions we use in our models and ultimate model outputs. If, based upon these models or other factors, we misprice our products or our estimates of the risks we are exposed to prove to be materially inaccurate, our business, financial condition, results of operations or liquidity may be adversely affected.

Our valuations of many of our financial instruments include methodologies, estimations and assumptions that are subject to differing interpretations and could result in changes to investment valuations that may materially adversely affect our business, results of operations, financial condition and liquidity.

The following financial instruments are carried at fair value in the Company's consolidated financial statements: fixed maturities, equity securities, freestanding and embedded derivatives, certain hedge fund investments, and separate account assets. The determination of fair values is made at a specific point in time, based on available market information and judgments about financial instruments, including estimates of the timing and amounts of expected future cash flows and the credit standing of the issuer or counterparty. The use of different methodologies and assumptions may have a material effect on the estimated fair value amounts.

During periods of market disruption, including periods of significantly increasing/decreasing interest rates, rapidly widening/narrowing credit spreads or illiquidity, it may be difficult to value certain of our securities if trading becomes less frequent and/or market data becomes less observable. There may be certain asset classes that were in active markets with significant observable data that become illiquid due to the financial environment. In such cases, securities may require more subjectivity and management judgment in determining their fair values and those fair values may differ materially from the value at which the investments may be ultimately sold. Further, rapidly changing or unprecedented credit and equity market conditions could materially impact the valuation of securities and the period-to-period changes in value could vary significantly. Decreases in value could have a material adverse effect on our business, results of operations, financial condition and liquidity.

Evaluation of available-for-sale securities for other-than-temporary impairment involves subjective determinations and could materially impact our business, financial condition, results of operations and liquidity.

The evaluation of impairments is a quantitative and qualitative process, which is subject to risks and uncertainties and is intended to determine whether a credit and/or non-credit impairment exists and whether an impairment should be recognized in current period earnings or in other comprehensive income. The risks and uncertainties include changes in general economic conditions, the issuer's financial condition or future recovery prospects, the effects of changes in interest rates or credit spreads and the expected recovery period. For securitized financial assets with contractual cash flows, the Company uses its best estimate of cash flows over the life of the security to determine if a security is other-than-temporarily-impaired. In addition, estimating future cash flows involves incorporating information received from third-party sources and making internal assumptions and judgments regarding the future performance of the underlying collateral and assessing the probability that an adverse change in future cash flows has occurred. The determination of the amount of other-than-temporary impairments is based upon our quarterly evaluation and assessment of known and inherent risks associated with the respective asset class. Such evaluations and assessments are revised as conditions change and new information becomes available.

Additionally, our management considers a wide range of factors about the security issuer and uses their best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for recovery. Inherent in management's evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Impairment losses in earnings could materially adversely affect our results of operations and financial condition.

If assumptions used in estimating future gross profits differ from actual experience, we may be required to accelerate the amortization of DAC and increase reserves for guaranteed minimum death and income benefits, which could have a material adverse effect on our results of operations and financial condition.

The Company deferred acquisition costs associated with the prior sales of its variable annuity products. Deferred acquisition costs for the U.S. variable annuity products are amortized over the expected life of the contracts. The remaining deferred but not yet amortized cost is referred to as the Deferred Acquisition Cost (“DAC”) asset. We amortize these costs in proportion to the present value of estimated gross profits (“EGPs”). The Company evaluates the EGPs compared to the DAC asset to determine if an impairment exists. The Company also establishes reserves for GMDB and the life contingent portion of guaranteed minimum withdrawal benefits ("GMWB") using components of EGPs. The projection of EGPs, or components of EGPs, requires the use of certain assumptions, principally related to separate account fund returns, surrender and lapse rates, interest margin (including impairments), mortality, benefit utilization, annuitization and hedging costs. Of these factors, we anticipate that changes in separate account fund returns are most likely to impact the EGP, along with the rate of amortization of such costs. However, other factors such as those the Company might employ to reduce risk, such as the cost of hedging or other risk mitigating techniques, as well as the effect of increased surrenders, could also significantly reduce estimates of future gross profits. Estimating future gross profits is a complex process requiring considerable judgment and the forecasting of events well into the future. If our assumptions regarding policyholder behavior, including lapse rates, benefit utilization, surrenders, and annuitization, hedging costs or costs to employ other risk mitigating techniques prove to be inaccurate or if significant or sustained equity market declines occur, we could be required to accelerate the amortization of DAC related to variable annuity contracts, and increase reserves for GMDB which would result in a charge to net income. Such adjustments could have a material adverse effect on our results of operations and financial condition.

If our businesses do not perform well, we may be required to establish a valuation allowance against the deferred income tax asset or to recognize an impairment of our goodwill, which could have a material adverse effect on our results of operations and financial condition.

Deferred income tax represents the tax effect of the differences between the book and tax basis of assets and liabilities. Deferred tax assets are assessed periodically by management to determine if they are realizable. Factors in management's determination include the performance of the business, including the ability to generate capital gains to offset previously recognized capital losses, from a variety of sources and tax planning strategies. If based on available information, it is more likely than not that we are unable to recognize a full tax benefit on deferred tax assets, then a valuation allowance will be established with a corresponding charge to net income (loss). Charges to increase our valuation allowance could have a material adverse effect on our results of operations and financial condition.

Goodwill represents the excess of the amounts we paid to acquire subsidiaries and other businesses over the fair value of their net assets at the date of acquisition. We test goodwill at least annually for impairment. Impairment testing is performed based upon estimates of the fair value of the "reporting unit" to which the goodwill relates. The reporting unit is the operating segment or a business one level below that operating segment if discrete financial information is prepared and regularly reviewed by management at that level. The fair value of the reporting unit is impacted by the performance of the business and could be adversely impacted by any efforts made by the Company to limit risk. If it is determined that the goodwill has been impaired, the Company must write down the goodwill by the amount of the impairment, with a corresponding charge to net income (loss). These write downs could have a material adverse effect on our results of operations or financial condition.

It is difficult for us to predict our potential exposure for asbestos and environmental claims, and our ultimate liability may exceed our currently recorded reserves, which may have a material adverse effect on our business, financial condition, results of operations and liquidity.

We continue to receive asbestos and environmental claims. Significant uncertainty limits the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid losses and related expenses for both environmental and particularly asbestos claims. For some asbestos and environmental claims, we believe that the actuarial tools and other techniques we employ to estimate the ultimate cost of claims for more traditional kinds of insurance exposure are less precise in estimating reserves for our asbestos and environmental exposures. Accordingly, the degree of variability of reserve estimates for these longer-tailed exposures is significantly greater than for other more traditional exposures. It is also not possible to predict changes in the legal and legislative environment and their effect on the future development of asbestos and environmental claims. Because of the significant uncertainties that limit the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid losses and related expenses for both environmental and particularly asbestos claims, the ultimate liabilities may exceed the currently recorded reserves. Increases in reserves would be recognized as an expense during the periods in which these determinations are made, thereby adversely affecting our results of operations for the related periods. Depending on the scale of any changes in these estimated losses, such determinations could have a material adverse effect on our business, financial condition, results of operations and liquidity.

Financial Strength, Credit and Counterparty Risks

The amount of statutory capital that we have, and the amount of statutory capital that we must hold to maintain our financial strength and credit ratings and meet other requirements, can vary significantly from time to time and is sensitive to a number of factors outside of our control, including equity market, credit market and interest rate conditions, changes in policyholder behavior, changes in rating agency models, and changes in regulations.

We conduct the vast majority of our business through licensed insurance company subsidiaries. Accounting standards and statutory capital and reserve requirements for these entities are prescribed by the applicable insurance regulators and the National Association of Insurance Commissioners ("NAIC"). Insurance regulators have established regulations that provide minimum capitalization requirements based on risk-based capital ("RBC") formulas for both life and property and casualty companies. The RBC formula for life companies establishes capital requirements relating to insurance, business, asset and interest rate risks, including equity, interest rate and expense recovery risks associated with variable annuities and group annuities that contain death benefits or certain living benefits. The RBC formula for property and casualty companies adjusts statutory surplus levels for certain underwriting, asset, credit and off-balance sheet risks.

In any particular year, statutory surplus amounts and RBC ratios may increase or decrease depending on a variety of factors, including the amount of statutory income or losses generated by our insurance subsidiaries (which itself is sensitive to equity market and credit market conditions), the amount of additional capital our insurance subsidiaries must hold to support business growth, changes in equity market levels, the value of certain fixed-income and equity securities in our investment portfolio, the value of certain derivative instruments, changes in interest rates, the impact of internal reinsurance arrangements, admissibility of deferred tax assets and changes to the NAIC RBC formulas. Most of these factors are outside of the Company's control. The Company's financial strength and credit ratings are significantly influenced by the statutory surplus amounts and RBC ratios of our insurance company subsidiaries. In addition, rating agencies may implement changes to their internal models that have the effect of increasing the amount of statutory capital we must hold in order to maintain our current ratings. Also, in extreme scenarios of equity market declines and other capital market volatility, the amount of additional statutory reserves that we are required to hold for our variable annuity guarantees increases at a greater than linear rate. This reduces the statutory surplus used in calculating our RBC ratios. When equity markets increase, surplus levels and RBC ratios would generally be expected to increase. However, as a result of a number of factors and market conditions, including the level of hedging costs and other risk transfer activities, reserve requirements for death and living benefit guarantees and increases in RBC requirements, surplus and RBC ratios may not increase when equity markets increase. Due to these factors, projecting statutory capital and the related RBC ratios is complex. If our statutory capital resources are insufficient to maintain a particular rating by one or more rating agencies, we may seek to raise capital through public or private equity or debt financing. If we were not to raise additional capital, either at our discretion or because we were unable to do so, our financial strength and credit ratings might be downgraded by one or more rating agencies.

Downgrades in our financial strength or credit ratings, which may make our products less attractive, could increase our cost of capital and inhibit our ability to refinance our debt, which would have a material adverse effect on our business, financial condition, results of operations and liquidity.

Financial strength and credit ratings are important in establishing the competitive position of insurance companies. Rating agencies assign ratings based upon several factors. While most of the factors relate to the rated company, some of the factors relate to the views of the rating agency (including its assessment of the strategic importance of the rated company to the insurance group), general economic conditions, and circumstances outside the rated company's control. In addition, rating agencies may employ different models and formulas to assess the financial strength of a rated company, and from time to time rating agencies have altered these models. Changes to the models, general economic conditions, or other circumstances outside our control could impact a rating agency's judgment of its internal rating and the publicly issued rating it assigns us**.** We cannot predict what actions rating agencies may take, or what actions we may take in response to the actions of rating agencies, which may adversely affect us.

Our financial strength ratings, which are intended to measure our ability to meet policyholder obligations, are an important factor affecting public confidence in most of our products and, as a result, our competitiveness. A downgrade or a potential downgrade in the rating of our financial strength or of one of our principal insurance subsidiaries could affect our competitive position and reduce future sales of our products.

Our credit ratings also affect our cost of capital. A downgrade or a potential downgrade of our credit ratings could make it more difficult or costly to refinance maturing debt obligations, to support business growth at our insurance subsidiaries and to maintain or improve the financial strength ratings of our principal insurance subsidiaries. Downgrades could begin to trigger potentially material collateral calls on certain of our derivative instruments and counterparty rights to terminate derivative relationships, both of which could limit our ability to purchase additional derivative instruments. These events could materially adversely affect our business, financial condition, results of operations and liquidity. For a further discussion of potential impacts of ratings downgrades on derivative instruments, including potential collateral calls, see the "Capital Resources and Liquidity - Derivative Commitments" section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Losses due to nonperformance or defaults by others, including issuers of investment securities, mortgage loans or reinsurance and derivative instrument counterparties, could have a material adverse effect on the value of our investments, business, financial condition, results of operations and liquidity.

Issuers or borrowers whose securities or loans we hold, customers, trading counterparties, counterparties under swaps and other derivative contracts, reinsurers, clearing agents, exchanges, clearing houses and other financial intermediaries and guarantors may default on their obligations to us due to bankruptcy, insolvency, lack of liquidity, adverse economic conditions, operational failure, fraud, government intervention or other reasons. Such defaults could have a material adverse effect on the value of our investments, business, financial condition, results of operations and liquidity. Additionally, the underlying assets supporting our structured securities or loans may deteriorate causing these securities or loans to incur losses.

Our investment portfolio includes securities backed by real estate assets, the value of which may be adversely impacted if conditions in the real estate market significantly deteriorate, including declines in property values and increases in vacancy rates, delinquencies and foreclosures, ultimately resulting in a reduction in expected future cash flows for certain securities.

The Company also has exposure to foreign-based issuers of securities and providers of reinsurance. These foreign issuers include European and certain emerging market issuers. Despite stabilization in the European market, there are still fundamental structural issues that remain and may result in the re-emergence of fiscal and economic issues. In addition, there has been recent volatility within certain emerging market countries spurred by concerns over the potential for rising U.S. interest rates, slowing global growth, lower prices for oil and other commodities, and the devaluation of certain currencies. Further details of the European and certain emerging market private and sovereign issuers held within the investment portfolio can be found in Part II, Item 7, MD&A - Enterprise Risk Management - Investment Portfolio Risks and Risk Management. The Company's European based reinsurance arrangements are further described in Part II, Item 7, MD&A - Enterprise Risk Management - Investment Portfolio Risks and Risk Management.

Property value declines and loss rates that exceed our current estimates, as outlined in Part II, Item 7, MD&A - Enterprise Risk Management - Other-Than-Temporary Impairments, or a worsening of global economic conditions could have a material adverse effect on our business, financial condition, results of operations and liquidity.

To the extent the investment portfolio is not adequately diversified, concentrations of credit risk may exist which could negatively impact the Company if significant adverse events or developments occur in any particular industry, group of related industries or geographic regions. The Company's investment portfolio is not exposed to any credit concentration risk of a single issuer greater than 10% of the Company's stockholders' equity other than U.S. government and U.S. government agencies backed by the full faith and credit of the U.S. government. However, if issuers of securities or loans we hold are acquired, merge or otherwise consolidate with other issuers of securities or loans held by the Company, our investment portfolio's credit concentration risk to issuers could increase above the 10% threshold, for a period of time, until the Company is able to sell securities to get back in compliance with the established investment credit policies. For discussion of the Company's exposure to credit concentration risk of reinsurers, see the risk factor, "We may incur losses due to our reinsurers' unwillingness or inability to meet their obligations under reinsurance contracts and the availability, pricing and adequacy of reinsurance may not be sufficient to protect us against losses."

We may incur losses due to our reinsurers' unwillingness or inability to meet their obligations under reinsurance contracts and the availability, pricing and adequacy of reinsurance may not be sufficient to protect us against losses.

As an insurer, we frequently use reinsurance to reduce the effect of losses that may arise from catastrophes, transfer other risks that can cause unfavorable results of operations, or effect the sale of one line of business to an independent company. Under these reinsurance arrangements, other insurers assume a portion of our losses and related expenses; however, we remain liable as the direct insurer on all risks reinsured. Consequently, ceded reinsurance arrangements do not eliminate our obligation to pay claims, and we are subject to our reinsurers' credit risk with respect to our ability to recover amounts due from them. Although we regularly evaluate the financial condition of our reinsurers to minimize our exposure to significant losses from reinsurer insolvencies, our reinsurers may become financially unsound or dispute their contractual obligations. The inability or unwillingness of any reinsurer to meet its financial obligations to us could have a material adverse effect on our results of operations. This risk may be magnified by a concentration of reinsurance-related credit risk resulting from the sale of the Company's Individual Life business. Further details of such concentration can be found in Part II, Item 7, MD&A - Reinsurance as a Risk Management Strategy - Life Insurance Product Reinsurance Recoverable.

In addition, market conditions beyond our control determine the availability and cost of the reinsurance we are able to purchase. Reinsurance pricing changes significantly over time, and no assurances can be made that reinsurance will remain continuously available to us to the same extent and on the same terms as are currently available. If we were unable to maintain our current level of reinsurance or purchase new reinsurance protection in amounts that we consider sufficient and at prices that we consider acceptable, we would have to either accept an increase in our net liability exposure, reduce the amount of business we write, or develop to the extent possible other alternatives to reinsurance. Further, due to the inherent uncertainties as to collection and the length of time before reinsurance recoverables will be due, it is possible that future adjustments to the Company's reinsurance recoverables, net of the allowance, could be required, which could have a material adverse effect on the Company's consolidated results of operations or cash flows in a particular quarterly or annual period.

Our ability to declare and pay dividends is subject to limitations.

The payment of future dividends on our capital stock is subject to the discretion of our board of directors, which considers, among other factors, our operating results, overall financial condition, credit-risk considerations and capital requirements, as well as general business and market conditions.

Moreover, as a holding company that is separate and distinct from our insurance subsidiaries, we have no significant business operations of our own. Therefore, we rely on dividends from our insurance company subsidiaries and other subsidiaries as the principal source of cash flow to meet our obligations. These obligations include payments on our debt securities and the payment of dividends on our capital stock. The Connecticut insurance holding company laws limit the payment of dividends by Connecticut-domiciled insurers and require notice to and approval by the state insurance commissioner for the declaration or payment of dividends above certain levels. The insurance holding company laws of the other jurisdictions in which our insurance subsidiaries are incorporated, or deemed commercially domiciled, generally contain similar, and in some instances more restrictive, limitations on the payment of dividends. Dividends paid to us by our insurance subsidiaries are further dependent on their cash requirements. For further discussion on dividends from insurance subsidiaries, see Part II, Item 7, MD&A - Capital Resources & Liquidity.

Our rights to participate in any distribution of the assets of any of our subsidiaries, for example, upon their liquidation or reorganization, and the ability of holders of our common stock to benefit indirectly from a distribution, are subject to the prior claims of creditors of the applicable subsidiary, except to the extent that we may be a creditor of that subsidiary. Holders of our capital stock are only entitled to receive such dividends as our board of directors may declare out of funds legally available for such payments. Moreover, our common stockholders are subject to the prior dividend rights of any holders of our preferred stock or depositary shares representing such preferred stock then outstanding. The terms of our outstanding junior subordinated debt securities prohibit us from declaring or paying any dividends or distributions on our capital stock or purchasing, acquiring, or making a liquidation payment on such stock, if we have given notice of our election to defer interest payments but the related deferral period has not yet commenced or a deferral period is continuing.

Insurance and Product-Related Risks

Our business, financial condition, results of operations and liquidity may be materially adversely affected by unfavorable loss development.

Our success, in part, depends upon our ability to accurately assess the risks associated with the coverage provided to policyholders that we insure. We establish loss reserves to cover our estimated liability for the payment of all unpaid losses and loss expenses incurred with respect to premiums earned on the policies that we write. Loss reserves do not represent an exact calculation of liability. Rather, loss reserves are estimates of what we expect the ultimate settlement and administration of claims will cost, less what has been paid to date. These estimates are based upon actuarial and statistical projections and on our assessment of currently available data, as well as estimates of claims severity and frequency, legal theories of liability and other factors. Loss reserve estimates are refined periodically as experience develops and claims are reported and settled. Establishing an appropriate level of loss reserves is an inherently uncertain process. Because of this uncertainty, it is possible that our reserves at any given time will prove inadequate. Furthermore, since estimates of aggregate loss costs for prior accident years are used in pricing our insurance products, we could later determine that our products were not priced adequately to cover actual losses and related loss expenses in order to generate a profit. To the extent we determine that losses and related loss expenses are emerging unfavorably to our initial expectations, we will be required to increase reserves. Increases in reserves would be recognized as an expense during the period or periods in which these determinations are made, thereby adversely affecting our results of operations for the related period or periods. Depending on any changes in these estimated losses, such determinations could have a material adverse effect on our business, financial condition, results of operations or liquidity.

We are particularly vulnerable to losses from catastrophes, both natural and man-made, which could materially and adversely affect our business, financial condition, results of operations and liquidity.

Our insurance operations expose us to claims arising out of catastrophes. Catastrophes can be caused by various unpredictable natural events, including, among others, earthquakes, hurricanes, hailstorms, severe winter weather, wind storms, fires, tornadoes, and pandemics. Catastrophes can also be man-made, such as terrorist attacks, cyber-attacks, explosions or infrastructure failures.

The geographic distribution of our business subjects us to catastrophe exposure for events occurring in a number of areas, including, but not limited to, hurricanes in Florida, the Gulf Coast, the Northeast and the Atlantic coast regions of the United States, tornadoes in the Midwest and Southeast, earthquakes in California and the New Madrid region of the United States, and the spread of disease. We expect that increases in the values and concentrations of insured employees and property in these areas will continue to increase the severity of catastrophic events in the future. In addition, changing climate conditions across longer time scales, including the potential risk of broader climate change, may be increasing, or may in the future increase, the severity of certain natural catastrophe losses across various geographic regions.Potential examples of the impact of climate change on catastrophe exposure include, but are not limited to the following: an increase in the frequency or severity of wind and thunderstorm and tornado/hailstorm events due to increased convection in the atmosphere, more frequent brush fires in certain geographies due to prolonged periods of drought, higher incidence of deluge flooding, and the potential for an increase in severity of the largest hurricane events due to higher sea surface temperatures. In addition, our businesses have exposure to global or nationally occurring pandemics caused by highly infectious and potentially fatal diseases, and are spread through human, animal or plant populations. Additionally, due to such catastrophes, caused by natural or man-made events, policyholders may be unable to meet their obligations to pay premiums on our insurance policies.

Our liquidity could be constrained by a catastrophe, or multiple catastrophes, which could result in extraordinary losses. In addition, in part because accounting rules do not permit insurers to reserve for such catastrophic events until they occur, claims from catastrophic events could have a material adverse effect on our business, financial condition, results of operations or liquidity. To the extent that loss experience unfolds or models improve, we will seek to reflect any of these changes in the design and pricing of our products. However, the Company may be exposed to regulatory or legislative actions that prevent a full accounting of loss expectations in the design or pricing of our products or result in additional risk-shifting to the insurance industry.

The occurrence of one or more terrorist attacks in the geographic areas we serve or the threat of terrorism in general may have a material adverse effect on our business, financial condition, results of operations and liquidity.

The occurrence of one or more terrorist attacks in the geographic areas we serve could result in substantially higher claims under our insurance policies than we have anticipated. Private sector catastrophe reinsurance is extremely limited and generally unavailable for terrorism losses caused by attacks with nuclear, biological, chemical or radiological weapons. Reinsurance coverage from the federal government under the Terrorism Risk Insurance Program Reauthorization Act of 2015 ("TRIPRA") is also limited. Although TRIPRA provides benefits for certified acts of terrorism that exceed a certain threshold of industry losses ($100 in 2015, increasing to $200 by 2020), those benefits are subject to a deductible and other limitations. Under TRIPRA, once our losses exceed 20% of our subject commercial property and casualty insurance premium for the preceding calendar year, the federal government will reimburse us a percentage of our losses (85% in 2015, decreasing 1% annually until 2020) attributable to certain acts of terrorism which exceed this deductible up to a total industry program cap of $100 billion. Our estimated deductible under the program is $1.19 billion for 2015. In addition, because the interpretation of this law is untested, there is substantial uncertainty as to how it will be applied to specific circumstances.

Accordingly, the effects of a terrorist attack in the geographic areas we serve may result in claims and related losses for which we do not have adequate reinsurance. This would likely cause us to increase our reserves, adversely affect our results during the period or periods affected and, could adversely affect our business, financial condition, results of operations and liquidity. Further, the continued threat of terrorism and the occurrence of terrorist attacks, as well as heightened security measures and military action in response to these threats and attacks or other geopolitical or military crises, may cause significant volatility in global financial markets, disruptions to commerce and reduced economic activity. These consequences could have an adverse effect on the value of the assets in our investment portfolio as well as those in our separate accounts. Terrorist attacks also could disrupt our operations centers in the U.S. or abroad. As a result, it is possible that any, or a combination of all, of these factors may have a material adverse effect on our business, financial condition, results of operations and liquidity.

Our business, financial condition, results of operations and liquidity may be adversely affected by the emergence of unexpected and unintended claim and coverage issues.

As industry practices and legal, judicial, social and other environmental conditions change, unexpected and unintended issues related to claims and coverage may emerge. These issues may either extend coverage beyond our underwriting intent or increase the frequency or severity of claims. In some instances, these changes may not become apparent until some time after we have issued insurance contracts that are affected by the changes. As a result, the full extent of liability under our insurance contracts may not be known for many years after a contract is issued, and this liability may have a material adverse effect on our business, financial condition, results of operations and liquidity at the time it becomes known

As a property and casualty insurer, the premium rates we are able to charge and the profits we are able to obtain are affected by the actions of state insurance departments that regulate our business, the cyclical nature of the business in which we compete and our ability to adequately price the risks we underwrite, which may have a material adverse effect on our business, financial condition, results of operations and liquidity.

Pricing adequacy depends on a number of factors, including the ability to obtain regulatory approval for rate changes, proper evaluation of underwriting risks, the ability to project future loss cost frequency and severity, our response to rate actions taken by competitors, and expectations about regulatory and legal developments and expense levels. We seek to price our property and casualty insurance policies such that insurance premiums and future net investment income earned on premiums received will provide for an acceptable profit in excess of underwriting expenses and the cost of paying claims.

State insurance departments that regulate us often propose premium rate changes for the benefit of the consumer at the expense of the insurer and may not allow us to reach targeted levels of profitability. In addition to regulating rates, certain states have enacted laws that require a property and casualty insurer conducting business in that state to participate in assigned risk plans, reinsurance facilities, joint underwriting associations and other residual market plans, or to offer coverage to all consumers and often restrict an insurer's ability to charge the price it might otherwise charge or restrict an insurer's ability to offer or enforce specific policy deductibles. In these markets, we may be compelled to underwrite significant amounts of business at lower than desired rates or accept additional risk not contemplated in our existing rates, participate in the operating losses of residual market plans or pay assessments to fund operating deficits of state-sponsored funds, possibly leading to unacceptable returns on equity. The laws and regulations of many states also limit an insurer's ability to withdraw from one or more lines of insurance in the state, except pursuant to a plan that is approved by the state's insurance department. Additionally, certain states require insurers to participate in guaranty funds for impaired or insolvent insurance companies. These funds periodically assess losses against all insurance companies doing business in the state. Any of these factors could have a material adverse effect on our business, financial condition, results of operations or liquidity.

Additionally, the property and casualty insurance market is historically cyclical, experiencing periods characterized by relatively high levels of price competition, less restrictive underwriting standards, more expansive coverage offerings and relatively low premium rates, followed by periods of relatively low levels of competition, more selective underwriting standards, more coverage restrictions and relatively high premium rates. Prices tend to increase for a particular line of business when insurance carriers have incurred significant losses in that line of business in the recent past or when the industry as a whole commits less of its capital to writing exposures in that line of business. Prices tend to decrease when recent loss experience has been favorable or when competition among insurance carriers increases. In all of our property and casualty insurance product lines and states, there is a risk that the premium we charge may ultimately prove to be inadequate as reported losses emerge. In addition, there is a risk that regulatory constraints, price competition or incorrect pricing assumptions could prevent us from achieving targeted returns. Inadequate pricing could have a material adverse effect on our results of operations and financial condition.

Adjustments to our risk management program relating to products we offered with guaranteed benefits to emphasize protection of economic value may result in statutory and U.S. GAAP volatility in our earnings and potentially material charges to net income (loss).

Some of the in-force business within our Talcott Resolution operations, especially variable annuities, offer guaranteed benefits, including GMWB and GMDB which, in the event of a decline in equity markets, would not only result in lower earnings, but will also increase our exposure to liability for benefit claims. We use reinsurance structures and have modified benefit features to mitigate the exposure associated with GMDB. We also use reinsurance in combination with a modification of benefit features and derivative instruments to attempt to minimize the claim exposure and to reduce the volatility of net income associated with the GMWB liability. Adjustments to our risk management program may result in greater statutory and U.S. GAAP earnings volatility and, based upon the types of hedging instruments used, can result in potentially material charges to net income (loss) in periods of rising equity market pricing levels, higher interest rates and declines in volatility. While we believe that these actions would improve the efficiency of our risk management related to these benefits, we remain liable for the guaranteed benefits in the event that reinsurers or derivative counterparties are unable or unwilling to pay and, in turn, may need additional capital to support in-force business. We are also subject to the risk that these management procedures prove ineffective or that unanticipated policyholder behavior, combined with adverse market events, produces economic losses beyond the scope of the risk management techniques employed, which individually or collectively may have a material adverse effect on our business, financial condition, results of operations and liquidity.

Regulatory and Legal Risks

The impact of regulatory initiatives and legislative developments, including the implementation of the Dodd-Frank Act of 2010, could have a material adverse impact on our business, financial condition, results of operations and liquidity.

Regulatory initiatives and legislative developments may significantly affect our operations and prospects in ways that we cannot predict. U.S. and overseas governmental and regulatory authorities, including the SEC, the Board of Governors of the Federal Reserve System (the "Federal Reserve"), the Federal Deposit Insurance Corporation (“FDIC”), the NYSE and the Financial Industry Regulatory Authority, Inc. (“FINRA”) are considering enhanced or new regulatory requirements intended to prevent future financial crises or otherwise stabilize the institutions under their supervision. Such measures are likely to lead to stricter regulation of financial institutions generally, and heightened prudential requirements for systemically important companies in particular. Such measures could include taxation of financial transactions and restrictions on employee compensation.

The Dodd-Frank Act was enacted on July 21, 2010, mandating changes to the regulation of the financial services industry. Implementation of the Dodd-Frank Act is ongoing and may affect our operations and governance in ways that could adversely affect our financial condition and results of operations. The Dodd-Frank Act requires central clearing of, and imposes new margin requirements on, certain derivatives transactions, which increases the costs of our hedging program. Other provisions in the Dodd-Frank Act that may impact us include: the new "Federal Insurance Office" within Treasury; the possible adverse impact on the pricing and liquidity of the securities in which we invest resulting from the proprietary trading and market making limitation of the Volcker Rule; the possible adverse impact on the market for insurance-linked securities, including catastrophe bonds, resulting from the limitations of banking entity involvement in and ownership of certain asset-backed securities transactions; and enhancements to corporate governance, especially regarding risk management.

The Dodd-Frank Act vests the Financial Stability Oversight Council ("FSOC") with the power to designate "systemically important" institutions, which will be subject to special regulatory supervision and other provisions intended to prevent, or mitigate the impact of, future disruptions in the U.S. financial system. Based on its most current financial data, The Hartford is below the quantitative thresholds used by the FSOC to determine which nonbank companies merit consideration. However, the FSOC has indicted it will review on a quarterly basis whether nonbank financial institutions meet the metrics for further review. If we were to be designated as a systemically important institution, we could be subject to heightened regulation under the Federal Reserve, which could impact requirements regarding our capital, liquidity and leverage as well as our business and investment conduct. In addition, we could be subject to assessments to pay for the orderly liquidation of other systemically important financial institutions that have become insolvent. As a result of these requirements, we could incur substantial costs and suffer other negative consequences, all of which may have a material adverse effect on our business, financial condition, results of operations and liquidity.

We may experience unfavorable judicial or legislative developments involving claim litigation that could have a material adverse effect on our business, financial condition, results of operations and liquidity.

The Hartford is involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending or providing indemnity for third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Hartford accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. The Company is also involved in legal actions that do not arise in the ordinary course of business, some of which assert claims for substantial amounts. Pervasive or significant changes in the judicial environment relating to matters such as trends in the size of jury awards, developments in the law relating to the liability of insurers or tort defendants, and rulings concerning the availability or amount of certain types of damages could cause our ultimate liabilities to change from our current expectations. Changes in federal or state tort litigation laws or other applicable law could have a similar effect. It is not possible to predict changes in the judicial and legislative environment and their impact on the future development of the adequacy of our loss reserves, particularly reserves for longer-tailed lines of business, including asbestos and environmental reserves, and how those changes might adversely affect our ability to price our products appropriately. Our business, financial condition, results of operations and liquidity could also be adversely affected if judicial or legislative developments cause our ultimate liabilities to increase from current expectations.

Potential changes in regulation may increase our business costs and required capital levels, which could have a material adverse effect on our business, financial condition, results of operations and liquidity.

We are subject to extensive laws and regulations that are complex, subject to change and often conflicting in their approach or intended outcomes. Compliance with these laws and regulations is costly and can affect our strategy, as well as the demand for and profitability of the products we offer.

State insurance laws regulate most aspects of our insurance businesses, and our insurance subsidiaries are regulated by the insurance departments of the states in which they are domiciled, licensed or authorized to conduct business. These regulatory regimes are generally designed to protect the interests of policyholders rather than insurers, their shareholders and other investors. U.S. state laws grant insurance regulatory authorities broad administrative powers with respect to, among other things, licensing and authorization for lines of business, statutory capital and reserve requirements, limitations on the types and amounts of certain investments, underwriting limitations, transactions with affiliates, dividend limitations, changes in control, premium rates and a variety of other financial and non-financial components of an insurer's business.

In addition, future regulatory initiatives could be adopted at the federal or state level that could impact the profitability of our businesses. For example, the NAIC and state insurance regulators are continually reexamining existing laws and regulations, specifically focusing on modifications to statutory accounting principles, interpretations of existing laws and the development of new laws and regulations. The NAIC has undertaken a Solvency Modernization Initiative focused on updating the U.S. insurance solvency regulation framework, including capital requirements, governance and risk management, group supervision, accounting and financial reporting and reinsurance. Any proposed or future legislation or NAIC initiatives, if adopted, may be more restrictive on our ability to conduct business than current regulatory requirements or may result in higher costs or increased statutory capital and reserve requirements.

Further, because these laws and regulations are complex and sometimes inexact, there is also a risk that our business may not fully comply with a particular regulator's or enforcement authority's interpretation of a legal, accounting, or reserving issue or that such regulator's or enforcement authority's interpretation may change over time to our detriment, or expose us to different or additional regulatory risks. The application of these regulations and guidelines by insurers involves interpretations and judgments that may not be consistent with the opinion of state insurance departments. We cannot provide assurance that such differences of opinion will not result in regulatory, tax or other challenges to the actions we have taken to date. The result of those potential challenges could require us to increase levels of statutory capital and reserves or incur higher operating and/or tax costs.

In addition, our international operations are subject to regulation in the relevant jurisdictions in which they operate which in many ways is similar to the state regulation outlined above, with similar related restrictions and obligations. Our asset management businesses are also subject to extensive regulation in the various jurisdictions where they operate.

These laws and regulations are primarily intended to protect investors in the securities markets or investment advisory clients and generally grant supervisory authorities broad administrative powers. Compliance with these laws and regulations is costly, time consuming and personnel intensive, and may have an adverse effect on our business, financial condition, results of operations and liquidity. See the risk factor, "The impact of regulatory initiatives, including the enactment of The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, could have a material adverse impact on our business, financial condition, results of operations and liquidity."

Changes in federal or state tax laws could adversely affect our business, financial condition, results of operations and liquidity.

Changes in federal or state tax laws could have a material adverse effect on our profitability and financial condition, and could result in our incurring materially higher corporate taxes. Higher tax rates may cause small businesses to hire fewer workers and decrease investment in their businesses, including purchasing vehicles, property and equipment, which could adversely affect our business, financial condition, results of operations and liquidity. Conversely, if income tax rates decline it could adversely affect the Company's ability to realize the benefits of its deferred tax assets.

In addition, the Company's tax return reflects certain items, including but not limited to, tax-exempt bond interest, dividends received deductions, tax credits (such as foreign tax credits), and insurance reserve deductions. There is an increasing risk that, in the context of deficit reduction or overall tax reform, federal and/or state tax legislation could modify or eliminate these items, impacting the Company, its investments, investment strategies, and/or its policyholders. Although the specific form of any such legislation is uncertain, changes to the taxation of municipal bond interest could materially and adversely impact the value of those bonds, limit our investment choices and depress portfolio yield. Elimination of the dividends received deduction or changes to the taxation of reserving methodologies for P&C companies could increase the Company's actual tax rate, thereby reducing earnings. Moreover, many of the products that the Company previously sold benefit from one or more forms of tax-favored status under current federal and state income tax regimes. For example, the Company previously sold annuity contracts that allowed policyholders to defer the recognition of taxable income earned within the contract. Because the Company no longer sells these products, changes in the future taxation of life insurance and/or annuity contracts will not adversely impact future sales. If, however, the treatment of earnings accrued inside an annuity contract was changed prospectively, and the tax-favored status of existing contracts was grandfathered, holders of existing contracts would be less likely to surrender, which would make running off our existing annuity business more difficult.

Regulatory requirements could delay, deter or prevent a takeover attempt that shareholders might consider in their best interests.

Before a person can acquire control of a U.S. insurance company, prior written approval must be obtained from the insurance commissioner of the state where the domestic insurer is domiciled. Prior to granting approval of an application to acquire control of a domestic insurer, the state insurance commissioner will consider such factors as the financial strength of the applicant, the acquirer's plans for the future operations of the domestic insurer, and any such additional information as the insurance commissioner may deem necessary or appropriate for the protection of policyholders or in the public interest. Generally, state statutes provide that control over a domestic insurer is presumed to exist if any person, directly or indirectly, owns, controls, holds with the power to vote, or holds proxies representing 10 percent or more of the voting securities of the domestic insurer or its parent company. Because a person acquiring 10 percent or more of our Common Stock would indirectly control the same percentage of the stock of our U.S. insurance subsidiaries, the insurance change of control laws of various U.S. jurisdictions would likely apply to such a transaction. Other laws or required approvals pertaining to one or more of our existing subsidiaries, or a future subsidiary, may contain similar or additional restrictions on the acquisition of control of the Company. These laws may discourage potential acquisition proposals and may delay, deter, or prevent a change of control, including transactions that our Board of Directors and some or all of our shareholders might consider to be desirable.

Changes in accounting principles and financial reporting requirements could result in material changes to our reported results of operations and financial condition.

U.S. GAAP and related financial reporting requirements are complex, continually evolving and may be subject to varied interpretation by the relevant authoritative bodies. Such varied interpretations could result from differing views related to specific facts and circumstances. Changes in U.S. GAAP and financial reporting requirements, or in the interpretation of U.S. GAAP or those requirements, could result in material changes to our reported results and financial condition. Moreover, the SEC is currently evaluating International Financial Reporting Standards ("IFRS") to determine whether IFRS should be incorporated into the financial reporting system for U.S. issuers. Certain of these standards could result in material changes to our reported results of operations.

Other Operational Risks

The ability to execute on our capital management plan, expense reduction initiatives and other actions, which may include acquisitions, divestitures or restructurings, is subject to material challenges, uncertainties and risks which could adversely affect our business, financial condition, results of operations and liquidity.

The ability to execute on our capital management plan remains subject to material challenges, uncertainties and risks. We may not achieve all of the benefits we expect to derive from our plan to repurchase our equity and reduce our debt. Our capital management plan is subject to execution risks, including, among others, risks related to market fluctuations and investor interest and potential legal constraints that could delay execution at an otherwise optimal time. There can be no assurance that we will in fact complete our capital management plan over the planned time frame or at all. Initiatives to reduce expenses so that our ongoing businesses remain or become cost efficient may not be successful and we may not be able to reduce corporate and shared services expenses in the manner and on the schedule we currently anticipate. We may take further actions beyond the capital management plan, which may include acquisitions, divestitures or restructurings, that may involve additional uncertainties and risks that negatively impact our business, financial condition, results of operations and liquidity.

Competitive activity may adversely affect our market share and financial results, which could have a material adverse effect on our business and results of operations.

The industries in which we operate are highly competitive. Our principal competitors are other property and casualty insurers, group benefits providers and other mutual fund companies. Larger competitors may have lower operating costs and an ability to absorb greater risk while maintaining their financial strength ratings, thereby allowing them to price their products more competitively. These highly competitive pressures could result in increased pricing pressures on a number of our products and services and may harm our ability to maintain or increase our profitability. Because of the highly competitive nature of these industries, there can be no assurance that we will continue to compete effectively with our industry rivals, or that competitive pressure will not have a material adverse effect on our business and results of operations.

We may experience difficulty in marketing, distributing and providing investment advisory services in relation to our products through current and future distribution channels and advisory firms.

We distribute our insurance products and mutual funds through a variety of distribution channels, including brokers, independent agents, broker-dealers, banks, affinity partners, our own internal sales force and other third-party organizations. In some areas of our business, we generate a significant portion of our business through or in connection with individual third-party arrangements. For example, we market personal lines products in large part through an exclusive licensing arrangement with AARP that continues through January 1, 2023. Our ability to distribute products through affinity partners may be adversely impacted by membership levels and the pace of membership growth. We periodically negotiate provisions and renewals of these relationships, and there can be no assurance that such terms will remain acceptable to us or such third parties. An interruption in our continuing relationship with certain of these third parties, including potentially as a result of a strategic transaction or other Company initiatives, could materially affect our ability to market our products and could have a material adverse effect on our business, financial condition, results of operations and liquidity.

If we are unable to maintain the availability of our systems and safeguard the security of our data due to the occurrence of disasters or a cyber or other information security incident, our ability to conduct business may be compromised, we may incur substantial costs and suffer other negative consequences, all of which may have a material adverse effect on our business, reputation, financial condition, results of operations and liquidity.

We use computer systems to process, store, retrieve, evaluate and utilize customer and company data and information. Our computer, information technology and telecommunications systems, in turn, interface with and rely upon third-party systems or maintenance. Our business is highly dependent on our ability, and the ability of certain third parties, to access our systems to perform necessary business functions, including, without limitation, conducting our financial reporting and analysis, providing insurance quotes, processing premium payments, making changes to existing policies, filing and paying claims, administering variable annuity products and mutual funds, providing customer support and managing our investment portfolios and hedging programs.

Systems failures or outages could compromise our ability to perform our business functions in a timely manner, which could harm our ability to conduct business and hurt our relationships with our business partners and customers. In the event of a disaster such as a natural catastrophe, a pandemic, an industrial accident, a blackout, a terrorist attack (including conventional, nuclear, biological, chemical or radiological) or war, systems upon which we rely may be inaccessible to our employees, customers or business partners for an extended period of time. Even if our employees and business partners are able to report to work, they may be unable to perform their duties for an extended period of time if our data or systems used to conduct our business are disabled or destroyed.

Moreover, our computer systems have been, and will likely continue to be, subject to computer viruses or other malicious codes, unauthorized access, cyber-attacks or other computer related penetrations. The frequency and sophistication of such threats continue to increase as well. While, to date, The Hartford is not aware of having experienced a material breach of our cybersecurity systems, administrative and technical controls as well as other preventive actions we take to reduce the risk of cyber incidents and protect our information technology may be insufficient to prevent physical and electronic break-ins, denial of service, cyber-attacks or other security breaches to our computer systems or those of third parties with whom we do business. Such an event could compromise our confidential information as well as that of our clients and third parties, with whom we interact, impede or interrupt our business operations and may result in other negative consequences, including remediation costs, loss of revenue, additional regulatory scrutiny and litigation and reputational damage. In addition, we routinely transmit, to third parties personal, confidential and proprietary information, which may be related to employees and customers, by email and other electronic means, along with receiving and storing such information on our systems. Although we attempt to keep such information confidential, we may be unable to utilize such capabilities in all events, especially with clients, vendors, service providers, counterparties and other third parties who may not have or use appropriate controls to protect confidential information.

Furthermore, certain of our businesses are subject to compliance with regulations enacted by U.S. federal and state governments, the European Union, Japan or other jurisdictions or enacted by various regulatory organizations or exchanges relating to the privacy of the information of clients, employees or others. A misuse or mishandling of confidential or proprietary information being sent to or received from an employee or third party could result in legal liability, regulatory action and reputational harm.

Third parties to whom we outsource certain of our functions, including but not limited to third party administrators, are also subject to cyber-breaches of confidential information, along with the other risks outlined above, any one of which may result in our incurring substantial costs and other negative consequences, including a material adverse effect on our business, reputation, financial condition, results of operations and liquidity. While we maintain cyber liability insurance that provides both third party liability and first party insurance coverages, our insurance may not be sufficient to protect against all loss.

Our framework for managing operational risks may not be effective in mitigating risk and loss to us that could adversely affect our businesses.

Our business performance is highly dependent on our ability to manage operational risks that arise from a large number of day-to-day business activities, including insurance underwriting, claims processing, servicing, investment, financial and tax reporting, compliance with regulatory requirements and other activities, many of which are very complex and for some of which we rely on third parties. In addition, information technology investments we have made or plan to make in order to improve our operations are subject to material challenges, uncertainties and risks which may adversely impact our ability to achieve the anticipated business growth, expense reduction and operational efficiencies. We seek to monitor and control our exposure to risks arising out of these activities through a risk control framework encompassing a variety of reporting systems, internal controls, management review processes and other mechanisms. We cannot be completely confident that these processes and procedures will effectively control all known risks or effectively identify unforeseen risks, or that our employees and third-party agents will effectively implement them. Management of operational risks can fail for a number of reasons, including design failure, systems failure, failures to perform, cyber security attacks, human error, or unlawful activities on the part of employees or third parties. In the event that our controls are not effective or not properly implemented, we could suffer financial or other loss, disruption of our businesses, regulatory sanctions or damage to our reputation. Losses resulting from these failures can vary significantly in size, scope and scale and may have material adverse effects on our financial condition or results of operations.

If we experience difficulties arising from outsourcing and similar third-party relationships, our ability to conduct business may be compromised, which may have an adverse effect on our business and results of operations.

We outsource certain business and administrative functions and rely on third-party vendors to provide certain services on our behalf. As we continue to focus on reducing the expense necessary to support our operations, we have become increasingly committed to outsourcing strategies for certain technology and business functions. We have also taken action to reduce coordination costs and take advantage of economies of scale by transitioning multiple functions and services to a small number of third-party providers. We periodically negotiate provisions and renewals of these relationships, and there can be no assurance that such terms will remain acceptable to us or such third parties. If our continuing relationship with certain third-party providers, particularly those on which we rely for multiple functions or services, is interrupted, or if such third-party providers experience disruptions or do not perform as anticipated, or we experience problems with a transition, we may experience operational difficulties, an inability to meet obligations (including, but not limited to, policyholder obligations), increased costs and a loss of business that may have a material adverse effect on our business and results of operations. For other risks associated with our outsourcing of certain functions, see the risk factor, "If we are unable to maintain the availability of our systems and safeguard the security of our data due to the occurrence of disasters or a cyber or other information security incident, our ability to conduct business may be compromised, we may incur substantial costs and suffer other negative consequences, all of which may have a material adverse effect on our business, financial condition, results of operations and liquidity."

We may not be able to protect our intellectual property and may be subject to infringement claims.

We rely on a combination of contractual rights and copyright, trademark, patent and trade secret laws to establish and protect our intellectual property. Although we use a broad range of measures to protect our intellectual property rights, third parties may infringe or misappropriate our intellectual property. We may have to litigate to enforce and protect our copyrights, trademarks, patents, trade secrets and know-how or to determine their scope, validity or enforceability, which represents a diversion of resources that may be significant in amount and may not prove successful. The loss of intellectual property protection or the inability to secure or enforce the protection of our intellectual property assets could have a material adverse effect on our business and our ability to compete. We also may be subject to costly litigation in the event that another party alleges our operations or activities infringe upon their intellectual property rights. Third parties may have, or may eventually be issued, patents that could be infringed by our products, systems, methods, processes or services. Any party that holds such a patent could make a claim of infringement against us. We may be subject to patent claims from certain individuals and companies who have acquired patent portfolios for the sole purpose of asserting such claims against other companies. We may also be subject to claims by third parties for breach of copyright, trademark, trade secret or license usage rights. Any such claims and any resulting litigation could result in significant liability for damages. If we were found to have infringed a third-party patent or other intellectual property rights, we could incur substantial liability, and in some circumstances could be enjoined from providing certain products or services to our customers or utilizing and benefiting from certain methods, processes, systems, copyrights, trademarks, trade secrets or licenses, or alternatively could be required to enter into costly licensing arrangements with third parties, all of which could have a material adverse effect on our business, results of operations and financial condition.

Item 1B. UNRESOLVED STAFF COMMENTS

None.

Item 2. PROPERTIES

As of December 31, 2014, The Hartford owned building space of approximately 2.4 million square feet which comprised its Hartford, Connecticut location and other properties within the greater Hartford, Connecticut area. In addition, as of December 31, 2014, The Hartford leased approximately 1.8 million square feet, throughout the United States of America, and approximately 37 thousand square feet, in other countries. All of the properties owned or leased are used by one or more of all six reporting segments, depending on the location. For more information on reporting segments, see Part I, Item 1, Business — Reporting Segments. The Company believes its properties and facilities are suitable and adequate for current operations.

Item 3. LEGAL PROCEEDINGS

Litigation

The Hartford is involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending or providing indemnity for third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Hartford accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. Subject to the uncertainties discussed below under the caption "Asbestos and Environmental Claims," management expects that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to the consolidated financial condition, results of operations or cash flows of The Hartford.

The Hartford is also involved in other kinds of legal actions, some of which assert claims for substantial amounts. These actions include, among others, and in addition to the matters described below, putative state and federal class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, underpayment of claims or improper underwriting practices in connection with various kinds of insurance policies, such as personal and commercial automobile, property, life and inland marine; improper sales practices in connection with the sale of life insurance and other investment products; and improper fee arrangements in connection with investment products. The Hartford also is involved in individual actions in which punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims. Like many other insurers, The Hartford also has been joined in actions by asbestos plaintiffs asserting, among other things, that insurers had a duty to protect the public from the dangers of asbestos and that insurers committed unfair trade practices by asserting defenses on behalf of their policyholders in the underlying asbestos cases. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to the consolidated financial condition of The Hartford. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, the outcome in certain matters could, from time to time, have a material adverse effect on the Company's results of operations or cash flows in particular quarterly or annual periods.

In addition to the inherent difficulty of predicting litigation outcomes, the Mutual Funds Litigation identified below purports to seek substantial damages for unsubstantiated conduct spanning a multi-year period based on novel applications of complex legal theories. The alleged damages are not quantified or factually supported in the complaint, and, in any event, the Company's experience shows that demands for damages often bear little relation to a reasonable estimate of potential loss. The court has made no substantive legal decisions defining the scope of the claims or the potentially available damages, and no legal precedent has been identified that would aid in determining a reasonable estimate of potential loss. Accordingly, management cannot reasonably estimate the possible loss or range of loss, if any.

Mutual Funds Litigation - In February 2011, a derivative action was brought on behalf of six Hartford retail mutual funds in the United States District Court for the District of New Jersey, alleging that Hartford Investment Financial Services, LLC ("HIFSCO"), an indirect subsidiary of the Company, received excessive advisory and distribution fees in violation of its statutory fiduciary duty under Section 36(b) of the Investment Company Act of 1940. HIFSCO moved to dismiss and, in September 2011, the motion was granted in part and denied in part, with leave to amend the complaint. In November 2011, plaintiffs filed an amended complaint on behalf of The Hartford Global Health Fund, The Hartford Conservative Allocation Fund, The Hartford Growth Opportunities Fund, The Hartford Inflation Plus Fund, The Hartford Advisors Fund, and The Hartford Capital Appreciation Fund. Plaintiffs seek to rescind the investment management agreements and distribution plans between HIFSCO and these funds to recover the total fees charged thereunder or, in the alternative, to recover any improper compensation HIFSCO received, in addition to lost earnings. HIFSCO filed a partial motion to dismiss the amended complaint and, in December 2012, the court dismissed without prejudice the claims regarding distribution fees and denied the motion with respect to the advisory fees claims. In March 2014, the plaintiffs filed a new complaint that, among other things, added as new plaintiffs The Hartford Floating Rate Fund and The Hartford Small Company Fund and named as a defendant Hartford Funds Management Company, LLC ("HFMC"), an indirect subsidiary of the Company which assumed the role as advisor to the funds as of January 2013. Discovery is ongoing. HFMC and HIFSCO dispute the allegations and expect to file a motion for summary judgment in the second quarter of 2015.

Asbestos and Environmental Claims - As discussed in Part II, Item 7, MD&A - Critical Accounting Estimates - Property and Casualty Insurance Product Reserves, Net of Reinsurance - Reserving for Asbestos and Environmental Claims within Property & Casualty Other Operations, The Hartford continues to receive asbestos and environmental claims that involve significant uncertainty regarding policy coverage issues. Regarding these claims, The Hartford continually reviews its overall reserve levels and reinsurance coverages, as well as the methodologies it uses to estimate its exposures. Because of the significant uncertainties that limit the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid losses and related expenses, particularly those related to asbestos, the ultimate liabilities may exceed the currently recorded reserves. Any such additional liability cannot be reasonably estimated now but could be material to The Hartford's consolidated operating results and liquidity.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

Item 5. MARKET FOR THE HARTFORD'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Hartford's common stock is traded on the New York Stock Exchange ("NYSE") under the trading symbol "HIG".

The following table presents the high and low closing prices for the common stock of The Hartford on the NYSE for the periods indicated, and the quarterly dividends declared per share.

	1st Qtr.	2nd Qtr.	3rd Qtr.	4th Qtr.
2014				
Common Stock Price				
High	$ 36.14	$ 36.37	$ 37.80	$ 42.27
Low	$ 32.18	$ 33.30	$ 33.85	$ 35.47
Dividends Declared	$ 0.15	$ 0.15	$ 0.18	$ 0.18
2013				
Common Stock Price				
High	$ 26.46	$ 31.43	$ 32.30	$ 36.62
Low	$ 23.05	$ 24.82	$ 29.60	$ 30.68
Dividends Declared	$ 0.10	$ 0.10	$ 0.15	$ 0.15

On February 26, 2015, The Hartford's Board of Directors declared a quarterly dividend of $0.18 per common share payable on April 1, 2015 to common shareholders of record as of March 9, 2015. As of February 24, 2015, the Company had approximately 14,421 holders of record of the Company's common stock. A substantially greater number of holders of our common stock are "street name" holders or beneficial holders, whose shares are held of record by banks, brokers and other financial institutions. The closing price of The Hartford's common stock on the NYSE on February 24, 2015 was $41.32.

On June 16, 2014, the Company's Chief Executive Officer has certified to the NYSE that he is not aware of any violation by the Company of NYSE corporate governance listing standards, as required by Section 303A.12(a) of the NYSE's Listed Company Manual.

There are also various legal and regulatory limitations governing the extent to which The Hartford's insurance subsidiaries may extend credit, pay dividends or otherwise provide funds to The Hartford Financial Services Group, Inc. as discussed in Part II, Item 7, MD&A — Capital Resources and Liquidity — Liquidity Requirements and Sources of Capital.

For information related to securities authorized for issuance under equity compensation plans, see Part III, Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters,

Purchases of Equity Securities by the Issuer

The following table summarizes the Company's repurchases of its common stock for the three months ended December 31, 2014:

Period	Total Number of Shares Purchased [2]	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs [2]	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs [1]
				(in millions)
October 1, 2014 – October 31, 2014	3,200,500	$ 36.99	3,200,500	$ 1,162
November 1, 2014 – November 30, 2014	2,390,749	$ 40.40	2,344,500	$ 1,067
December 1, 2014 – December 31, 2014	4,906,717	$ 39.20	4,906,717	$ 979
Total	**10,497,966**	**$ 38.80**	**10,451,717**	

[1] In July 2014, the Board of Directors approved an increase in the Company's authorized equity repurchase program that provides the Company with the ability to repurchase $2.775 billion in equity during the period commencing on January 1, 2014 and ending on December 31, 2015. The Company's repurchase authorization, which expires on December 31, 2015, permits purchases of common stock, as well as warrants or other derivative securities. Repurchases may be made in the open market, through derivative, accelerated share repurchase and other privately negotiated transactions, and through plans designed to comply with Rule 10b5-1(c) under the Securities Exchange Act of 1934, as amended. The timing of any future repurchases will be dependent upon several factors, including the market price of the Company's securities, the Company's capital position, consideration of the effect of any repurchases on the Company's financial strength or credit ratings, and other corporate considerations. The repurchase program may be modified, extended or terminated by the Board of Directors at any time.

[2] Includes 2.7 million common shares received upon settlement of an accelerated share repurchase ("ASR") agreement with a major financial institution in December 2014. Under the terms of the agreement, the Company paid $525 and received initial delivery of 11.2 million common shares in July 2014. A total of 13.9 million common shares were repurchased by the Company under the ASR at a price of $37.64 per common share.

Total Return to Shareholders

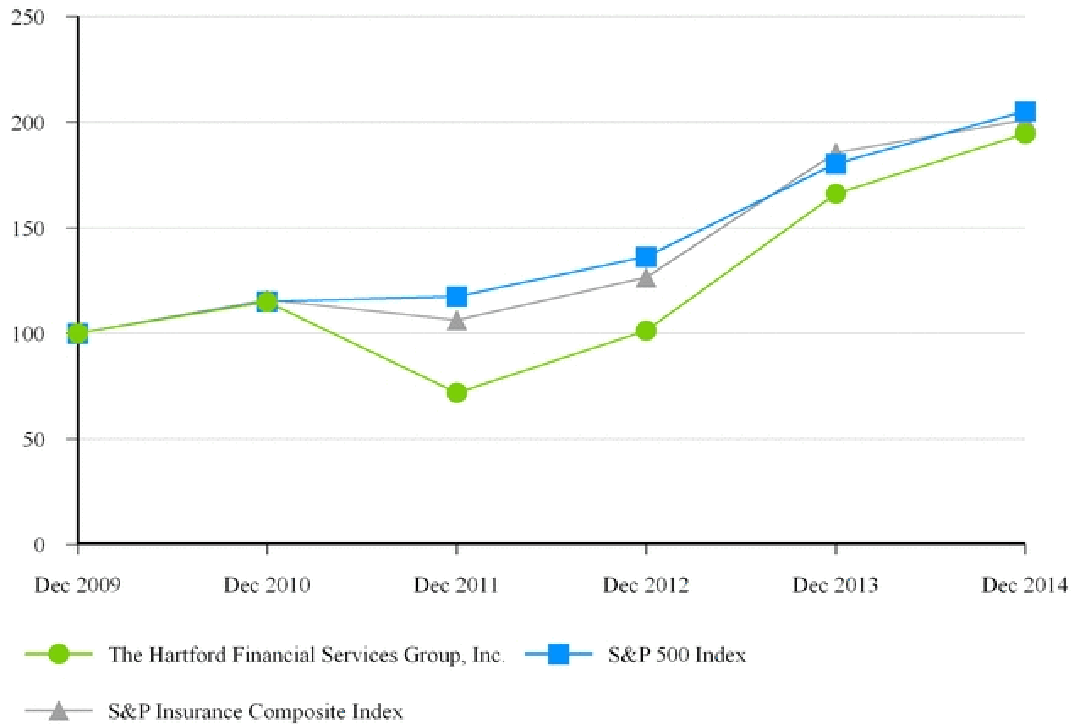
The following tables present The Hartford's annual percentage return and five-year total return on its common stock including reinvestment of dividends in comparison to the S&P 500 and the S&P Insurance Composite Index.

Annual Return Percentage

	For the years ended				
Company/Index	**2010**	**2011**	**2012**	**2013**	**2014**
The Hartford Financial Services Group, Inc.	14.89%	(37.55)%	41.01%	64.12%	17.13%
S&P 500 Index	15.06%	2.11 %	16.00%	32.39%	13.69%
S&P Insurance Composite Index	15.80%	(8.28)%	19.09%	46.71%	8.29%

Cumulative Five-Year Total Return

	Base Period	For the years ended				
Company/Index	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
The Hartford Financial Services Group, Inc.	$ 100	114.89	71.75	101.18	166.06	194.51
S&P 500 Index	$ 100	115.06	117.49	136.30	180.44	205.14
S&P Insurance Composite Index	$ 100	115.80	106.21	126.49	185.56	200.94



Item 6. SELECTED FINANCIAL DATA

(Dollar amounts in millions, except for per share data)

The following table sets forth the Company's selected consolidated financial data at the dates and for the periods indicated below. The selected financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") presented in Item 7 and the Company's Consolidated Financial Statements and the related Notes beginning on page F-1.

	2014	2013	2012	2011	2010
Income Statement Data					
Total revenues	**$ 18,614**	$ 20,673	$ 22,086	$ 21,667	$ 22,158
Income (loss) from continuing operations before income taxes	**1,699**	1,471	(89)	(293)	2,189
Income from continuing operations, net of tax	**1,349**	1,225	220	256	1,642

Total stockholders' equity	**$ 18,720**	$ 18,905	$ 22,447	$ 21,486	$ 18,754
Net income (loss) available to common shareholders per common share					
Basic	**$ 1.81**	$ 0.37	$ (0.18)	$ 1.51	$ 2.60
Diluted	**$ 1.73**	$ 0.36	$ (0.17)	$ 1.40	$ 2.40
Cash dividends declared per common share	**$ 0.66**	$ 0.50	$ 0.40	$ 0.40	$ 0.20

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Dollar amounts in millions, except for per share data, unless otherwise stated)

The Hartford provides projections and other forward-looking information in the following discussions, which contain many forward-looking statements, particularly relating to the Company's future financial performance. These forward-looking statements are estimates based on information currently available to the Company, are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and are subject to the cautionary statements set forth on pages 3 and 4 of this Form 10-K. Actual results are likely to differ, and in the past have differed, materially from those forecast by the Company, depending on the outcome of various factors, including, but not limited to, those set forth in each discussion below and in Part I, Item 1A, Risk Factors. The Hartford undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future developments or otherwise.

Certain reclassifications have been made to prior year financial information presented in Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") to conform to the current year presentation. In 2014, the Company refined the definition of underwriting expenses by including certain centralized services and bad debt expenses in the determination of underwriting results for the Commercial Lines, Personal Lines and Property & Casualty Other Operations reporting segments. The reclassification of certain centralized services and bad debt expenses from other income (expenses) did not impact previously reported net income.

The Hartford defines increases or decreases greater than or equal to 200% as "NM" or not meaningful.

THE HARTFORD'S OPERATIONS

Overview

The Hartford is a financial holding company for a group of subsidiaries that provide property and casualty, group benefits and investment products to both individual and business customers in the United States and continues to administer life and annuity products previously sold.

The Hartford currently conducts business principally in six reporting segments including Commercial Lines, Personal Lines, Property & Casualty Other Operations, Group Benefits, Mutual Funds and Talcott Resolution, as well as a Corporate category. The Hartford includes in its Corporate category the Company's debt financing and related interest expense, as well as other capital raising activities; and purchase accounting adjustments related to goodwill and other expenses not allocated to the reporting segments.

On June 30, 2014, the Company completed the sale of all of the issued and outstanding equity of HLIKK to ORIX Life Insurance Corporation, a subsidiary of ORIX Corporation, a Japanese company. HLIKK sold variable and fixed annuity policies in Japan from 2001 to 2009 and had been in runoff since 2009.

On December 12, 2013, the Company completed the sale of Hartford Life International Limited ("HLIL"), which comprised the Company's U.K. variable annuity business, to Columbia Insurance Company, a Berkshire Hathaway company. On January 1, 2013, the Company completed the sale of its Retirement Plans business to Massachusetts Mutual Life Insurance Company ("MassMutual") and on January 2, 2013, the Company completed the sale of its Individual Life insurance business to The Prudential Insurance Company of America ("Prudential"), a subsidiary of Prudential Financial, Inc.

For further discussion of these transactions, see Note 2 - Business Dispositions, Note 7 - Reinsurance and Note 19 - Discontinued Operations of Notes to Consolidated Financial Statements. These businesses are included in the Talcott Resolution reporting segment.

The Company derives its revenues principally from: (a) premiums earned for insurance coverages provided to insureds; (b) fee income, including asset management fees, on separate account and mutual fund assets and mortality and expense fees, as well as cost of insurance charges; (c) net investment income; (d) fees earned for services provided to third parties; and (e) net realized capital gains and losses. Premiums charged for insurance coverages are earned principally on a pro rata basis over the terms of the related policies in-force. Asset management fees and mortality and expense fees are primarily generated from separate account assets. Cost of insurance charges are assessed on the net amount at risk for investment-oriented life insurance products.

The profitability of the Company's property and casualty insurance businesses over time is greatly influenced by the Company's underwriting discipline, which seeks to manage exposure to loss through favorable risk selection and diversification, its management of claims, its use of reinsurance, the size of its in force block, actual mortality and morbidity experience, and its ability to manage its expense ratio which it accomplishes through economies of scale and its management of acquisition costs and other underwriting expenses. Pricing adequacy depends on a number of factors, including the ability to obtain regulatory approval for rate changes, proper evaluation of underwriting risks, the ability to project future loss cost frequency and severity based on historical loss experience adjusted for known trends, the Company's response to rate actions taken by competitors, and expectations about regulatory and legal developments and expense levels. The Company seeks to price its insurance policies such that insurance premiums and future net investment income earned on premiums received will cover underwriting expenses and the ultimate cost of paying claims reported on the policies and provide for a profit margin. For many of its insurance products, the Company is required to obtain approval for its premium rates from state insurance departments.

The financial results in the Company's mutual fund and variable annuity businesses depend largely on the amount of the contract holder or shareholder account value or assets under management on which it earns fees and the level of fees charged. Changes in account value or assets under management are driven by two main factors: net flows, and the market return of the funds, which is heavily influenced by the return realized in the equity markets. Net flows are comprised of deposits less surrenders, death benefits, policy charges and annuitizations of investment type contracts, such as variable annuity contracts. In the mutual fund business, net flows are known as net sales. Net sales are comprised of new sales less redemptions by mutual fund customers. The Company uses the average daily value of the S&P 500 Index as an indicator for evaluating market returns of the underlying account portfolios in the United States. Financial results of variable products are highly correlated to the growth in account values or assets under management since these products generally earn fee income on a daily basis. Equity market movements could also result in benefits for or charges against deferred acquisition costs.

The profitability of fixed annuities and other "spread-based" products depends largely on the Company's ability to earn target spreads between earned investment rates on its general account assets and interest credited to policyholders.

The investment return, or yield, on invested assets is an important element of the Company's earnings since insurance products are priced with the assumption that premiums received can be invested for a period of time before benefits, loss and loss adjustment expenses are paid. Due to the need to maintain sufficient liquidity to satisfy claim obligations, the majority of the Company's invested assets have been held in available-for-sale securities, including, among other asset classes, corporate bonds, municipal bonds, government debt, short-term debt, mortgage-backed securities and asset-backed securities.

The primary investment objective for the Company is to maximize economic value, consistent with acceptable risk parameters, including the management of credit risk and interest rate sensitivity of invested assets, while generating sufficient after-tax income to meet policyholder and corporate obligations. Investment strategies are developed based on a variety of factors including business needs, regulatory requirements and tax considerations.

For more information on the Company's reporting segments, refer to Part I, Item 1, Business — Reporting Segments.

Financial Highlights for the Year Ended December 31, 2014

- Net income of $798, or $1.73 per diluted share, compared with net income of $176, or $0.36 per diluted share, for the prior year.
- Amounts paid for share repurchases totaled approximately $1.8 billion for the year.
- Book value per diluted common share (excluding AOCI) increased to $40.71 from $39.30 as of the prior year end due to the effect of net income less dividends and the effect of share repurchases for the year.
- Net investment income decreased 3.4% to $3,154 compared to the prior year primarily due to a decrease in income from fixed maturities as a result of a decline in asset levels, primarily in Talcott Resolution, lower income from repurchase agreements, and the impact of reinvesting at lower interest rates.
- While the annualized investment yield after-tax of 3.0% decreased 10 basis points compared to the prior year, new money yields decreased from 3.8% to 3.6% driven by lower interest rates, tighter credit spreads and the effect of reinvesting Japan sales proceeds into short-duration assets pending use for share repurchases.
- Higher short term interest rates and wider credit spreads increased the after-tax net unrealized gains in the investment portfolio by approximately $1.4 billion for the year.
- Property & Casualty written premium increased 3% over the prior year, comprised of 3% growth in Commercial Lines and 4% in Personal Lines.
- Property & Casualty combined ratio, before catastrophes and prior year development, improved to 91.5 from 94.4 in the prior year.
- Catastrophe losses of $341, before tax, increased from catastrophe losses of $312, before tax, in the prior year.
- Unfavorable prior year development totaled $228, before tax, primarily driven by strengthening of net asbestos and environmental reserves.
- Group Benefits after-tax core earnings margin, excluding buyouts, increased to 5.2% from 4.3% in the prior year.
- Talcott Resolution after-tax income from continuing operations was $370, down from $414 in the prior year.

CONSOLIDATED RESULTS OF OPERATIONS

The Consolidated Results of Operations should be read in conjunction with the Company's Consolidated Financial Statements and the related Notes beginning on page F-1.

	2014	2013	2012	Increase (Decrease) From 2013 to 2014	Increase (Decrease) From 2012 to 2013
Earned premiums	**$ 13,336**	$ 13,231	$ 13,637	$105	$(406)

Net income (loss)	**$ 798**	$ 176	$ (38)	$622	$214

[1] Includes net realized capital gains in 2013 of $1,575 on investments transferred at fair value in business disposition by reinsurance.

Year ended December 31, 2014 compared to the year ended December 31, 2013

The increase in net income from 2013 to 2014 was primarily due to the net effect of the following items:

- A decrease in the loss from discontinued operations to $551, net of tax, compared to $1,049, net of tax, in 2013. The loss from discontinued operations in 2014 includes the results of operations of the Japan business and the realized capital loss on the sale of HLIKK. The loss from discontinued operations in 2013 includes the results of operations of the Japan and U.K. annuity businesses and the realized capital loss on the sale of HLIL. The results of operations for the Japan annuity business in 2013 include the write-off of DAC and higher hedging losses. For further discussion of the sale of these businesses, see Note 2 - Business Dispositions and Note 19 - Discontinued Operations of Notes to Consolidated Financial Statements.
- A $299 before tax improvement in current accident year underwriting results before catastrophes in Property & Casualty resulting in a 2.9 point decrease in the combined ratio before catastrophes and prior year development. Also contributing to the improvement in underwriting results was an increase in earned premiums of 2% or $232, before tax, in 2014, compared to 2013, reflecting earned premium growth of 1% in Commercial Lines and 4% in Personal Lines. For a discussion of the Company's operating results by segment, see the segment sections of MD&A.
- A loss on extinguishment of debt of $213, before tax, in 2013 related to the repurchase of approximately $800 of senior notes at a premium to the face amount of the then outstanding debt. The resulting loss on extinguishment of debt consists of the repurchase premium, the write-off of the unamortized discount and debt issuance and other costs related to the repurchase transaction.
- Pension settlement charge of $128, before tax, in 2014, in insurance operating costs and other expenses, related to voluntary lump-sum settlements with vested participants in the Company's defined benefit pension plan who had separated from service, but who had not yet commenced annuity benefits. For additional information, see MD&A - Capital Resources and Liquidity, Pension Plans and Other Postretirement Benefits.

- Net investment income of $3,154, before tax, in 2014 decreased from $3,264, before tax, in 2013. The decrease in net investment income is primarily due to lower income from fixed maturities, as a result of a decline in asset levels, primarily in Talcott Resolution, lower income from repurchase agreements, and the impact of reinvesting at lower interest rates. For further discussion of investment results, see MD&A - Investment Results, Net Investment Income (Loss).
- Current accident year catastrophe losses in Property & Casualty of $341, before tax, in 2014, compared to $312, before tax, in 2013. The increase in current accident year catastrophe losses was primarily due to increased frequency and severity from wind and hail events across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.
- Prior accident year reserve strengthening in Property & Casualty of $228, before tax, in 2014, compared to reserve strengthening of $192, before tax, in 2013. Reserve strengthenings in 2014 were primarily related to an increase in reserves for asbestos and environmental claims, primarily due to a higher than previously estimated number of mesothelioma claim filings and an increase in costs associated with asbestos litigation. Reserve strengthenings in 2013 were primarily related to increased net asbestos reserves due to higher claim frequency and severity as well as costs and expenses associated with litigating asbestos coverage matters.
- Differences between the Company's effective income tax rate and the U.S. statutory rate of 35% are due primarily to tax-exempt interest earned on invested assets and the dividends received deduction ("DRD"). The $104 increase in income tax expense in 2014 compared with 2013 was primarily due to the $228 increase in income from continuing operations, before tax. Income tax expense of $350 and $246 in 2014 and 2013, respectively, includes separate account DRD benefits of $114 and $139, respectively.

Year ended December 31, 2013 compared to the year ended December 31, 2012

The increase in net income from 2012 to 2013 was primarily due to the net effect of the following items:

- An increase in the loss from discontinued operations to $1,049, net of tax, compared to $258, net of tax, in 2013. The loss from discontinued operations in 2013 includes the results of operations of the Japan and U.K. annuity businesses and the realized capital loss on the sale of HLIL. The loss from discontinued operations in 2012 includes the results of operations of the Japan and U.K. annuity businesses.
- Reinsurance loss on disposition of $533, before tax, in 2012 consisting of an impairment of goodwill and a loss accrual for premium deficiency related to the disposition of the Individual Life business, and losses in 2012 from the operations of the Retirement Plans and Individual Life businesses sold in 2013.
- A loss on extinguishment of debt of $213, before tax, in 2013, compared to $910, before tax in 2012. The loss in 2013 related to the repurchase of approximately $800 of senior notes and the loss in 2012 related to the repurchase of all outstanding 10% fixed-to-floating rate junior subordinated debentures due 2068 with a $1.75 billion aggregate principal amount all held by Allianz.
- Current accident year catastrophe losses in Property & Casualty of $312, before tax, in 2013, compared to $706, before tax, in 2012. Losses in 2013 were primarily due to multiple thunderstorm, hail, and tornado events across various U.S. geographic regions. Losses in 2012 were primarily driven by $350 related to Storm Sandy and multiple thunderstorm, hail, and tornado events across various U.S. geographic regions.
- Current accident year losses and loss adjustment expenses before catastrophes in Property & Casualty of $6.3 billion, before tax, in 2013 decreased from $6.6 billion, before tax, in 2012. The decrease was primarily driven by lower loss and loss adjustment expenses in Commercial Lines workers' compensation business due to favorable severity and frequency.
- Net investment income of $3,264, before tax, in 2013 decreased from $4,127, before tax, in 2012. The decrease in net investment income is primarily due to lower asset levels as a result of the sale of the Retirement Plans and Individual Life businesses in 2013, and a decline in yield.
- Net asbestos reserve strengthening of $130, before tax, in 2013 compared to $48, before tax, in 2012 resulting from the Company's annual review of its asbestos liabilities. For further information, see MD&A - Critical Accounting Estimates, Property & Casualty Other Operations Claims with the Property and Casualty Insurance Product Reserves, Net of Reinsurance.
- Differences between the Company's effective income tax rate and the U.S. statutory rate of 35% are due primarily to tax-exempt interest earned on invested assets and the dividends received deduction ("DRD"). The $555 increase in income tax expense in 2013 compared to an income tax benefit in 2012 was primarily due to the $1.0 billion increase in income from continuing operations, before tax. Income tax expense of $246 in 2013 and income tax benefit of $309 in 2012, includes separate account DRD benefits of $139 and $145, respectively.

The following table presents net income (loss) for each reporting segment, as well as the Corporate category. For a discussion of the Company's operating results by segment, see the segment sections of MD&A.

Net income (loss) by segment	2014	2013	2012	Increase (Decrease) From 2013 to 2014	Increase (Decrease) From 2012 to 2013
Commercial Lines	**$ 983**	$ 870	$ 547	$ 113	$ 323
Personal Lines	**207**	229	166	(22)	63
Property & Casualty Other Operations	**(108)**	(2)	57	(106)	(59)
Group Benefits	**191**	192	129	(1)	63
Mutual Funds	**87**	76	71	11	5

Corporate	**(375)**	(555)	(1,009)	180	454
Net income (loss)	**$ 798**	**$ 176**	**$ (38)**	**$ 622**	**$ 214**

Investment Results

Composition of Invested Assets

	December 31, 2014		December 31, 2013	
	Amount	Percent	Amount	Percent
Fixed maturities, available-for-sale ("AFS"), at fair value	$ 59,384	77.9%	$ 62,357	79.2%
Fixed maturities, at fair value using the fair value option ("FVO")	488	0.6%	844	1.1%
Equity securities, AFS, at fair value [1]	1,047	1.4%	868	1.1%
Mortgage loans	5,556	7.3%	5,598	7.1%
Policy loans, at outstanding balance	1,431	1.9%	1,420	1.8%
Limited partnerships and other alternative investments	2,942	3.9%	3,040	3.9%
Other investments [2]	536	0.7%	521	0.7%
Short-term investments	4,883	6.4%	4,008	5.1%
Total investments excluding equity securities, trading	**76,267**	**100%**	**78,656**	**100%**
Equity securities, trading, at fair value [3]	11		19,745	
Total investments	**$ 76,278**		**$ 98,401**	

[1] Includes equity securities at fair value using the FVO of $348 and $0 as of December 31, 2014 and December 31, 2013, respectively.

[2] Primarily relates to derivative instruments.

[3] As of December 31, 2013, approximately $19.7 billion of equity securities, trading, supported Japan variable annuities. Those equity securities, trading, were invested in mutual funds, which, in turn, invested in the following asset classes as of December 31, 2013: Japan equity 22%, Japan fixed income (primarily government securities) 15%, global equity 22%, global government bonds 40%, and cash and other 1%.

Total investments decreased since December 31, 2013, primarily as a result of a decline in equity securities, trading and fixed maturities, AFS, partially offset by an increase in short-term investments. The decrease in equity securities, trading and fixed maturities, AFS is largely due to the sale of the Japan variable and fixed annuity business as well as the continued runoff of the remaining Talcott Resolution business. For further discussion on the Japan sale, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements. This decline was partially offset by an increase in the valuation of fixed maturities, AFS due to a decrease in interest rates. Short-term investments increased primarily due to the investment of proceeds from the sale of the Japan variable and fixed annuity business.

Net Investment Income (Loss)

	For the years ended December 31,					
	2014		2013		2012	
(Before tax)	**Amount**	**Yield [1]**	**Amount**	**Yield [1]**	**Amount**	**Yield [1]**
Fixed maturities [2]	$ 2,420	4.2%	$ 2,552	4.3%	$ 3,299	4.4%
Equity securities, AFS	38	4.8%	30	3.6%	36	4.3%
Mortgage loans	265	4.7%	260	4.9%	334	5.2%
Policy loans	80	5.6%	83	5.9%	119	6.0%
Limited partnerships and other alternative investments	294	10.4%	287	9.5%	196	7.1%
Other investments [3]	179		167		248	
Investment expense	(122)		(115)		(105)	
Total net investment income (loss)	**$ 3,154**	**4.4%**	**$ 3,264**	**4.4%**	**$ 4,127**	**4.5%**
Total net investment income excluding limited partnerships and other alternative investments	**2,860**	**4.1%**	**2,977**	**4.2%**	**3,931**	**4.5%**

[1] Yields calculated using annualized net investment income divided by the monthly average invested assets at cost, amortized cost, or adjusted carrying value, as applicable, excluding repurchase agreement collateral, if any, and derivatives book value. Yield calculations for each period exclude assets associated with the dispositions of the Japan variable and fixed annuity business, the Retirement Plans and Individual Life businesses, and the Hartford Life International Limited business, as applicable.

[2] Includes net investment income on short-term investments.

[3] Primarily includes income from derivatives that qualify for hedge accounting and hedge fixed maturities.

Year ended December 31, 2014 compared to the year ended December 31, 2013

Total net investment income decreased primarily due to a decrease in income from fixed maturities as a result of a decline in asset levels, primarily in Talcott Resolution, lower income from repurchase agreements, and the impact of reinvesting at lower interest rates.

The annualized net investment income yield, excluding limited partnerships and other alternative investments, has declined to 4.1% in 2014 versus 4.2% in 2013. The decline was primarily attributable to lower income from repurchase agreements and lower reinvestment rates. For further discussion of repurchase agreements, see Note 6 - Investments and Derivative Instruments of Notes to Consolidated Financial Statements. The average reinvestment rate, excluding certain U.S. Treasury securities and cash equivalent securities, for the year ended December 31, 2014 was approximately 3.6% which was below the average yield of sales and maturities of 3.9% for the same period due to the current interest rate environment. In addition, the reinvestment rate was impacted by the investment of proceeds from the sale of the Japan variable and fixed annuity business into short duration, high quality corporates and ABS. For the year ended December 31, 2014, the new money yield of 3.6% decreased from 3.8% in 2013 driven by lower interest rates, tighter credit spreads on average and the effect of reinvesting Japan sales proceeds into short-duration assets pending use for share repurchases.

Based upon current reinvestment rates, we expect the annualized net investment income yield, excluding limited partnerships and other alternative investments, for 2015, to decline slightly compared to the 2014 net investment income yield. The estimated impact on net investment income is subject to change as the composition of the portfolio changes through normal portfolio management and trading activities and changes in market conditions.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Total net investment income decreased primarily due to a decrease in income due to lower asset levels as a result of the sale of the Retirement Plans and Individual Life businesses in 2013, and a decline in yield. The decline was partially offset by an increase in income from limited partnerships, due to real estate and private equity funds selling underlying investments and continued valuation improvements. The annualized net investment income yield, excluding limited partnerships and other alternative investments, declined to 4.2% in 2013 versus 4.5% in 2012. The decline was primarily attributable to the divestiture of Individual Life and Retirement Plans businesses.

Net Realized Capital Gains (Losses)

(Before tax)	For the years ended December 31,		
	2014	**2013**	**2012**
Gross gains on sales [1]	$ 527	$ 2,313	$ 801
Gross losses on sales	(250)	(659)	(420)
Net OTTI losses recognized in earnings [2]	(59)	(73)	(349)
Valuation allowances on mortgage loans	(4)	(1)	14
Periodic net coupon settlements on credit derivatives	1	(8)	(18)
Results of variable annuity hedge program			
GMWB derivatives, net	5	262	519
Macro hedge program	(11)	(234)	(340)
Total results of variable annuity hedge program	(6)	28	179
Other, net [3]	(193)	198	290
Net realized capital gains (losses)	**$ 16**	**$ 1,798**	**$ 497**

[1] Includes $1.5 billion of gains relating to the sales of the Retirement Plans and Individual Life businesses in the year ended December 31, 2013.
[2] Includes $177 of intent-to-sell impairments for the year ended December 31, 2012, relating to the sales of the Retirement Plans and Individual Life businesses in 2013.
[3] Primarily consists of changes in value of non-qualifying derivatives, including interest rate derivatives used to manage duration, and the Japan fixed payout annuity hedge.

Details on the Company’s net realized capital gains and losses are as follows:

Gross gains and losses on sales

- Gross gains on sales for the year ended December 31, 2014 were primarily due to gains on the sale of corporate securities, CMBS, RMBS, and municipal securities. Gross losses on sales for the year ended December 31, 2014 were primarily the result of losses on the sale of corporate and foreign government and government agency securities, which included sales resulting from a reduction in our exposure to the emerging market and energy sector securities as well as other portfolio management activities. The sales were primarily a result of duration, liquidity and credit management, as well as tactical changes to the portfolio as a result of changing market conditions.
- Gross gains on sales for the year ended December 31, 2013 were predominately from the sale of the Retirement Plans and Individual Life businesses resulting in a gain of $1.5 billion. The remaining gains on sales were primarily due to the sales of corporate securities and tax-exempt municipals. Gross losses on sales were primarily the result of the sales of U.S. Treasuries and mortgage backed securities, predominantly due to duration, liquidity and credit management as well as progress towards sector allocation objectives.
- Gross gains and losses on sales for the year ended December 31, 2012 were predominately from investment grade corporate securities, municipal bonds, mortgage backed securities and U.S. Treasuries. These sales were the result of tactical portfolio management as well as to maintain duration targets.

Net OTTI losses

- See Other-Than-Temporary Impairments within the Investment Portfolio Risks and Risk Management section of the MD&A.

Valuation allowances on mortgage loans

- See Valuation Allowances on Mortgage Loans within the Investment Portfolio Risks and Risk Management section of the MD&A.

Variable annuity hedge program

- For the year ended December 31, 2014, the gain related to the combined GMWB derivatives, net, which include the GMWB product, reinsurance, and hedging derivatives, was primarily driven by gains of $25 on liability/model assumption updates and gains of $15 due to increased volatility, partially offset by a loss of $26 resulting from policyholder behavior primarily related to increased surrenders. The loss on the macro hedge program for the year ended December 31, 2014 was primarily due to a loss of $25 driven by an improvement in the domestic equity markets, partially offset by a gain of $17 related to a decrease in interest rates.

- For the year ended December 31, 2013 the gain on GMWB related derivatives, net, was primarily related to gains of $203 from revaluing the liability for living benefits largely driven by favorable policyholder behavior related to increased surrenders and gains of $38 due to liability assumption updates for lapses and withdrawal rates. The loss on the macro hedge program for the year ended December 31, 2013 was primarily driven by losses of $114 due to an improvement in domestic equity markets, losses of $56 related to an increase in interest rates, and losses of $31 related to a decrease in equity market volatility.
- For the year ended December 31, 2012 the gain on GMWB related derivatives, net, was primarily driven by gains due to liability model assumption updates of $274, largely related to a reduction in the reset assumptions to better align with actual experience, gains of $106 related to outperformance of the underlying actively managed funds compared to their respective indices, and gains of $83 driven by a decline in equity market volatility. The loss on the macro hedge program for the year ended December 31, 2013 was primarily driven by losses of $167 related to the passage of time, losses of $118 due to an improvement in domestic equity markets, and losses of $60 related to a decrease in equity market volatility.

Other, net

- Other, net loss for the year ended December 31, 2014 was primarily related to a loss of $172 on interest rate derivatives used to manage the risk of a rise in interest rates and manage duration, driven by a decline in U.S. interest rates.
- Other, net gain for the year ended December 31, 2013 was primarily related to gains of $71 on interest rate derivatives primarily associated with fixed rate bonds sold as part of the Individual Life and Retirement Plan business dispositions. For further information on the business dispositions, see Note 2 of Notes to the Consolidated Financial Statements. Additional gains included $69 on interest rate derivatives primarily due to an increase in U.S. interest rates and $42 of gains on credit derivatives due to credit spreads tightening.
- Other, net gain for the year ended December 31, 2012 was primarily related to gains of $313 on credit derivatives due to credit spreads tightening, and gains of $96 on interest derivatives largely driven by the de-designation of the cash flow hedges associated with bonds included in the sale of Individual Life and Retirement Plans businesses. For further information on the business dispositions, see Note 2 of Notes to the Consolidated Financial Statements. These gains were partially offset by losses of $111 related to Japan fixed payout annuity hedges primarily driven by the strengthening of the currency basis swap spread between the U.S. dollar and Japanese yen and the decline in U.S. interest rates.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements, in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"), requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ, and in the past have differed, from those estimates.

The Company has identified the following estimates as critical in that they involve a higher degree of judgment and are subject to a significant degree of variability:

- property and casualty insurance product reserves, net of reinsurance;
- estimated gross profits used in the valuation and amortization of assets and liabilities associated with variable annuity and other universal life-type contracts;
- evaluation of other-than-temporary impairments on available-for-sale securities and valuation allowances on mortgage loans;
- living benefits required to be fair valued (in other policyholder funds and benefits payable);
- goodwill impairment;
- valuation of investments and derivative instruments;
- valuation allowance on deferred tax assets; and
- contingencies relating to corporate litigation and regulatory matters.

Certain of these estimates are particularly sensitive to market conditions, and deterioration and/or volatility in the worldwide debt or equity markets could have a material impact on the Consolidated Financial Statements. In developing these estimates management makes subjective and complex judgments that are inherently uncertain and subject to material change as facts and circumstances develop. Although variability is inherent in these estimates, management believes the amounts provided are appropriate based upon the facts available upon compilation of the financial statements.

Property and Casualty Insurance Product Reserves, Net of Reinsurance

The Hartford establishes reserves on its property and casualty insurance products to provide for the estimated costs of paying claims under insurance policies written by the Company. These reserves include estimates for both claims that have been reported and those that have not yet been reported, and include estimates of all expenses associated with processing and settling these claims. Incurred but not reported ("IBNR") reserves represent the difference between the estimated ultimate cost of all claims and the actual reported loss and loss adjustment expenses ("reported losses"). Reported losses represent cumulative loss and loss adjustment expenses paid plus case reserves for outstanding reported claims. Company actuaries evaluate the total reserves (IBNR and case reserves) on an accident year basis. An accident year is the calendar year in which a loss is incurred, or, in the case of claims-made policies, the calendar year in which a loss is reported.

Reserve estimates can change over time because of unexpected changes in the external environment. Potential external factors include (1) changes in the inflation rate for goods and services related to covered damages such as medical care, hospital care, auto parts, wages and home repair; (2) changes in the general economic environment that could cause unanticipated changes in the claim frequency per unit insured; (3) changes in the litigation environment as evidenced by changes in claimant attorney representation in the claims negotiation and settlement process; (4) changes in the judicial environment regarding the interpretation of policy provisions relating to the determination of coverage and/or the amount of damages awarded for certain types of damages; (5) changes in the social environment regarding the general attitude of juries in the determination of liability and damages; (6) changes in the legislative environment regarding the definition of damages; and (7) new types of injuries caused by new types of injurious exposure: past examples include lead paint, construction defects and tainted Chinese-made drywall.

Reserve estimates can also change over time because of changes in internal Company operations. Potential internal factors include (1) periodic changes in claims handling procedures; (2) growth in new lines of business where exposure and loss development patterns are not well established; (3) changes in the quality of risk selection in the underwriting process; (4) changes in the geographic mix of business; (5) changes in the mix of business by industry; (6) changes in policy language; or (7) changes in the mix of business by policy limit or deductible.

In the case of assumed reinsurance, all of the above risks apply. In addition, changes in ceding company case reserving and reporting patterns can create additional factors that need to be considered in estimating the reserves. Due to the inherent complexity of the assumptions used, final claim settlements may vary significantly from the present estimates, particularly when those settlements may not occur until well into the future.

Through both facultative and treaty reinsurance agreements, the Company cedes a share of the risks it has underwritten to other insurance companies. The Company's net reserves for loss and loss adjustment expenses include anticipated recovery from reinsurers on unpaid claims. The estimated amount of the anticipated recovery, or reinsurance recoverable, is net of an allowance for uncollectible reinsurance.

Reinsurance recoverables include an estimate of the amount of gross loss and loss adjustment expense reserves that may be ceded under the terms of the reinsurance agreements, including IBNR unpaid losses. The Company calculates its ceded reinsurance projection based on the terms of any applicable facultative and treaty reinsurance, often including an estimate by reinsurance agreement of how IBNR losses will ultimately be ceded.

The Company provides an allowance for uncollectible reinsurance, reflecting management's best estimate of reinsurance cessions that may be uncollectible in the future due to reinsurers' unwillingness or inability to pay. The Company analyzes recent developments in commutation activity between reinsurers and cedants, recent trends in arbitration and litigation outcomes in disputes between reinsurers and cedants and the overall credit quality of the Company's reinsurers. Where its contracts permit, the Company secures funding of future claim obligations with various forms of collateral, including irrevocable letters of credit, secured trusts, funds held accounts and group-wide offsets. The allowance for uncollectible reinsurance was $271 as of December 31, 2014, comprised of $46 related to Commercial Lines and $225 related to Property & Casualty Other Operations.

The Company's estimate of reinsurance recoverables, net of an allowance for uncollectible reinsurance, is subject to similar risks and uncertainties as the estimate of the gross reserve for unpaid losses and loss adjustment expenses.

The Hartford, like other insurance companies, categorizes and tracks its insurance reserves for its segments by "line of business". Furthermore, The Hartford regularly reviews the appropriateness of reserve levels at the line of business level, taking into consideration the variety of trends that impact the ultimate settlement of claims for the subsets of claims in each particular line of business. In addition, Property & Casualty Other Operations categorizes reserves as asbestos and environmental ("A&E"), whereby the Company reviews these reserve levels by type of event, rather than by line of business. Adjustments to previously established reserves, which may be material, are reflected in the operating results of the period in which the adjustment is determined to be necessary. In the judgment of management, information currently available has been properly considered in the reserves established for losses and loss adjustment expenses.

Loss and loss adjustment expense reserves by line of business as of December 31, 2014, net of reinsurance are as follows:

	Commercial Lines	Personal Lines	Property & Casualty Other Operations	Total Property & Casualty
Auto liability	$ 689	$ 1,401	$ —	$ 2,090
Auto physical damage	21	31	—	52
Homeowners'	—	396	—	396
Professional liability	593	—	—	593
Package business	1,232	—	—	1,232
General liability	2,459	27	—	2,486
Bond	196	—	—	196
Commercial property	152	—	—	152
A&E	21	1	1,951	1,973
Workers' compensation	8,678	—	—	8,678
Assumed reinsurance	—	—	237	237
All other non-A&E	—	—	680	680
Total reserves-net	**14,041**	**1,856**	**2,868**	**18,765**
Reinsurance and other recoverables	2,464	18	559	3,041
Total reserves-gross	**$ 16,505**	**$ 1,874**	**$ 3,427**	**$ 21,806**

Reserving Methodology

(See Reserving for Asbestos and Environmental Claims within Property & Casualty Other Operations for a discussion of how A&E reserves are set)

How reserves are set

Reserves are set by line of business within the various segments. A single line of business may be written in more than one segment. Case reserves are established by a claims handler on each individual claim and are adjusted as new information becomes known during the course of handling the claim. Lines of business for which loss data (e.g., paid losses and case reserves) emerge (i.e., is reported) over a long period of time are referred to as long-tail lines of business. Lines of business for which loss data emerge more quickly are referred to as short-tail lines of business. The Company's shortest-tail lines of business are property and auto physical damage. The longest tail lines of business include workers' compensation, general liability, professional liability and assumed reinsurance. For short-tail lines of business, emergence of paid loss and case reserves is credible and likely indicative of ultimate losses. For long-tail lines of business, emergence of paid losses and case reserves is less credible in the early periods and, accordingly, may not be indicative of ultimate losses.

The Company's reserving actuaries, who are independent of the business units, regularly review reserves for both current and prior accident years using the most current claim data. For most lines of business, these reserve reviews incorporate a variety of actuarial methods and judgments and involve rigorous analysis. These selections incorporate input, as judged by the reserving actuaries to be appropriate, from claims personnel, pricing actuaries and operating management on reported loss cost trends and other factors that could affect the reserve estimates. Most reserves are reviewed fully each quarter, including loss and loss adjustment expense reserves for property, auto physical damage, auto liability, package business, workers' compensation, most general liability, professional liability and bond. Other reserves are reviewed semi-annually (twice per year) or annually. These include, but are not limited to, reserves for losses incurred in accident years older than twelve and twenty years, for Personal and Commercial Lines, respectively, assumed reinsurance, latent exposures, such as construction defects, and unallocated loss adjustment expense. For reserves that are reviewed semi-annually or annually, management monitors the emergence of paid and reported losses in the intervening quarters to either confirm that the estimate of ultimate losses should not change or, if necessary, perform a reserve review to determine whether the reserve estimate should change.

An expected loss ratio is used in initially recording the reserves for both short-tail and long-tail lines of business. This expected loss ratio is determined through a review of prior accident years' loss ratios and expected changes to earned pricing, loss costs, mix of business, ceded reinsurance and other factors that are expected to impact the loss ratio for the current accident year. For short-tail lines, IBNR for the current accident year is initially recorded as the product of the expected loss ratio for the period, earned premium for the period and the proportion of losses expected to be reported in future calendar periods for the current accident period. For long-tailed lines, IBNR reserves for the current accident year are initially recorded as the product of the expected loss ratio for the period and the earned premium for the period, less reported losses for the period.

In addition to the expected loss ratio, the actuarial techniques or methods used primarily include paid and reported loss development and frequency / severity techniques as well as the Bornhuetter-Ferguson method (a combination of the expected loss ratio and paid development or reported development method). Within any one line of business, the methods that are given more influence vary based primarily on the maturity of the accident year, the mix of business and the particular internal and external influences impacting the claims experience or the methods. The output of the reserve reviews are reserve estimates that are referred to herein as the "actuarial indication".

Most of the Company's property and casualty insurance product reserves are not discounted. However, the Company has discounted liabilities funded through structured settlements and has discounted certain reserves for indemnity payments due to permanently disabled claimants under workers' compensation policies. For further discussion of these discounted liabilities, see Note 11 - Reserves for Future Policy Benefits and Unpaid Losses and Loss Adjustment Expenses of Notes to Consolidated Financial Statements.

As of December 31, 2014 and 2013, net U.S. property and casualty insurance product reserves for losses and loss adjustment expenses reported under accounting principles generally accepted in the United States of America ("U.S. GAAP") were approximately equal to net reserves reported on a statutory basis. Under U.S. GAAP, liabilities for unpaid losses for permanently disabled workers' compensation claimants are discounted at rates that are no higher than risk-free interest rates in effect at the time the claims are incurred and which can vary from the statutory discount rates set by regulators. Largely offsetting/augmenting the effect of the difference in discounting is that a portion of the U.S. GAAP provision for uncollectible reinsurance is not recognized under statutory accounting.

Provided below is a general discussion of which methods are preferred by line of business. Because the actuarial estimates are generated at a much finer level of detail than line of business (e.g., by distribution channel, coverage, accident period), this description should not be assumed to apply to each coverage and accident year within a line of business. Also, as circumstances change, the methods that are given more influence will change.

Property and Auto Physical Damage. These lines are fast-developing and paid and reported development techniques are used as these methods use historical data to develop paid and reported loss development patterns, which are then applied to current paid and reported losses by accident period to estimate ultimate losses. The Company relies primarily on reported development techniques although a review of frequency and severity and the initial loss expectation based on the expected loss ratio is used for the most immature accident months. The advantage of frequency / severity techniques is that frequency estimates are generally easier to predict and external information can be used to supplement internal data in making severity estimates.

Personal Auto Liability. For auto liability, and bodily injury in particular, the Company performs a greater number of techniques than it does for property and auto physical damage. In addition to traditional paid and reported development methods, the Company relies on frequency/severity techniques and Berquist-Sherman techniques. Because the paid development technique is affected by changes in claim closure patterns and the reported development method is affected by changes in case reserving practices, the Company uses Berquist-Sherman techniques which adjust these patterns to reflect current settlement rates and case reserving techniques. The Company generally uses the reported development method for older accident years as a higher percentage of ultimate losses are reflected in reported losses than in cumulative paid losses and a combination of reported development, frequency/severity and Berquist-Sherman methods for more recent accident years. Recent periods can be influenced by changes in case reserve practices and changing disposal rates; the frequency/severity techniques are not affected as much by these changes and the Berquist-Sherman techniques specifically adjust for these changes.

Auto Liability for Commercial Lines and Short-Tailed General Liability. The Company performs a variety of techniques, including the paid and reported development methods and frequency / severity techniques. For older, more mature accident years, the Company finds that reported development techniques are best. For more recent accident years, the Company typically prefers frequency / severity techniques that make separate assumptions about loss activity above and below a selected capping level.

Long-Tailed General Liability, Bond and Large Deductible Workers' Compensation. For these long-tailed lines of business, the Company generally relies on the expected loss ratio and reported development techniques. The Company generally weights these techniques together, relying more heavily on the expected loss ratio method at early ages of development and more on the reported development method as an accident year matures.

Workers' Compensation. Workers' compensation is the Company's single largest reserve line of business so a wide range of methods are reviewed in the reserve analysis. Methods performed include paid and reported development, variations on expected loss ratio methods, and an in-depth analysis on the largest states. Historically, paid development patterns in the Company's workers' compensation business have been stable, so paid techniques are preferred. Although paid techniques may be less predictive of the ultimate liability when a low percentage of ultimate losses are paid as in early periods of development, given changes in the frequency of workers' compensation claims over time, the Company places greater reliance on paid methods with continued consideration of the state-by-state analysis and the expected loss ratio approach.

Professional Liability. Reported and paid loss developments patterns for this line tend to be volatile. Therefore, the Company typically relies on frequency and severity techniques.

Assumed Reinsurance and All Other. For these lines, the Company tends to rely on the reported development techniques. In assumed reinsurance, assumptions are influenced by information gained from claim and underwriting audits.

Allocated Loss Adjustment Expenses (ALAE). For some lines of business (e.g., professional liability and assumed reinsurance), ALAE and losses are analyzed together. For most lines of business, however, ALAE is analyzed separately, using paid development techniques and an analysis of the relationship between ALAE and loss payments.

Unallocated Loss Adjustment Expense (ULAE). ULAE is analyzed separately from loss and ALAE. For most lines of business, incurred ULAE costs to be paid in the future are projected based on an expected cost per claim year and the anticipated claim closure pattern and the ratio of paid ULAE to paid loss.

The final step in the reserve review process involves a comprehensive review by senior reserving actuaries who apply their judgment and, in concert with senior management, determine the appropriate level of reserves based on the information that has been accumulated. Numerous factors are considered in this process including, but not limited to, the assessed reliability of key loss trends and assumptions that may be significantly influencing the current actuarial indications, pertinent trends observed over the recent past, the level of volatility within a particular line of business, and the improvement or deterioration of actuarial indications in the current period as compared to the prior periods. Total recorded net reserves, excluding asbestos and environmental, were 3.5% higher than the actuarial indication of the reserves as of December 31, 2014.

For a discussion of changes to reserve estimates recorded in 2014, see Reserve Roll-forwards and Development included below in this section.

Current trends contributing to reserve uncertainty

The Hartford is a multi-line company in the property and casualty insurance business. The Hartford is therefore subject to reserve uncertainty stemming from a number of conditions, including but not limited to those noted above, any of which could be material at any point in time. Certain issues may become more or less important over time as conditions change. As various market conditions develop, management must assess whether those conditions constitute a long-term trend that should result in a reserving action (i.e., increasing or decreasing the reserve).

Within Commercial Lines and Property & Casualty Other Operations, the Company has exposure to claims asserted for bodily injury as a result of long-term or continuous exposure to harmful products or substances. Examples include, but are not limited to, pharmaceutical products, silica and lead paint. The Company also has exposure to claims from construction defects, where property damage or bodily injury from negligent construction is alleged. In addition, the Company has exposure to claims asserted against religious institutions and other organizations relating to molestation or abuse. Such exposures may involve potentially long latency periods and may implicate coverage in multiple policy periods. These factors make reserves for such claims more uncertain than other bodily injury or property damage claims. With regard to these exposures, the Company is monitoring trends in litigation, the external environment, the similarities to other mass torts and the potential impact on the Company's reserves.

In Personal Lines, reserving estimates are generally less variable than for the Company's other property and casualty segments because of the coverages having relatively shorter periods of loss emergence. Estimates, however, can still vary due to a number of factors, including interpretations of frequency and severity trends and their impact on recorded reserve levels. Severity trends can be impacted by changes in internal claim handling and case reserving practices in addition to changes in the external environment. These changes in claim practices increase the uncertainty in the interpretation of case reserve data, which increases the uncertainty in recorded reserve levels. In addition, the introduction of new products and class plans has led to a different mix of business by type of insured than the Company experienced in the past. Such changes in mix increase the uncertainty of the reserve projections, since historical data and reporting patterns may not be applicable to the new business.

In standard commercial lines, workers' compensation is the Company's single biggest line of business and the line of business with the longest pattern of loss emergence. Medical costs make up more than 50% of workers' compensation payments. To the extent that payment patterns are impacted by increases or decreases in the frequency of settlement payments, historical patterns would be less reliable, increasing the uncertainty around reserve estimates. As such, reserve estimates for workers' compensation are particularly sensitive to changes in medical inflation, the changing use of medical care procedures and changes in state legislative and regulatory environments. In addition, a changing economic environment can affect the ability of an injured worker to return to work and the length of time a worker receives disability benefits.

In specialty lines, many lines of insurance are "long-tail", including large deductible workers' compensation insurance; as such, reserve estimates for these lines are more difficult to determine than reserve estimates for shorter-tail lines of insurance. Estimating required reserve levels for large deductible workers' compensation insurance is further complicated by the uncertainty of whether losses that are attributable to the deductible amount will be paid by the insured; if such losses are not paid by the insured due to financial difficulties, the Company would be contractually liable. Auto severity trends can be impacted by changes in internal claim handling and case reserving practices in addition to changes in the external environment. These changes in claim practices increase the uncertainty in the interpretation of case reserve data, which increases the uncertainty in recorded reserve levels. Another example of reserve variability relates to reserves for directors' and officers' insurance. There is potential volatility in the required level of reserves due to the continued uncertainty regarding the number and severity of class action suits. Additionally, the Company's exposure to losses under directors' and officers' insurance policies is primarily in excess layers, making estimates of loss more complex.

Impact of changes in key assumptions on reserve volatility

As stated above, the Company's practice is to estimate reserves using a variety of methods, assumptions and data elements. Within its reserve estimation process for reserves other than asbestos and environmental, the Company does not consistently use statistical loss distributions or confidence levels around its reserve estimate and, as a result, does not disclose reserve ranges.

The reserve estimation process includes assumptions about a number of factors in the internal and external environment. Across most lines of business, the most important assumptions are future loss development factors applied to paid or reported losses to date. The trend in loss costs is also a key assumption, particularly in the most recent accident years, where loss development factors are less credible.

The following discussion includes disclosure of possible variation from current estimates of loss reserves due to a change in certain key indicators of potential losses. Each of the impacts described below is estimated individually, without consideration for any correlation among key indicators or among lines of business. Therefore, it would be inappropriate to take each of the amounts described below and add them together in an attempt to estimate volatility for the Company's reserves in total. The estimated variation in reserves due to changes in key indicators is a reasonable estimate of possible variation that may occur in the future, likely over a period of several calendar years. It is important to note that the variation discussed is not meant to be a worst-case scenario, and therefore, it is possible that future variation may be more than the amounts discussed below.

Recorded reserves for auto liability, net of reinsurance, are approximately $2.1 billion across all lines, $1.4 billion of which is in Personal Lines. Personal auto liability reserves are shorter-tailed than other lines of business (such as workers' compensation) and, therefore, less volatile. However, the size of the reserve base means that future changes in estimates could be material to the Company's results of operations in any given period. The key indicator for Personal Lines auto liability is the annual loss cost trend, particularly the severity trend component of loss costs. A 2.5 point change in annual severity for the two most recent accident years would change the estimated net reserve need by $80, in either direction. A 2.5 point change in annual severity is within the Company's historical variation.

Recorded reserves for workers' compensation, net of reinsurance, are approximately $8.7 billion. Loss development patterns are a key indicator for this line of business, particularly for more mature accident years. Historically, loss development patterns have been impacted by, among other things, medical cost inflation and other changes in loss cost trends. The Company has reviewed the historical variation in paid loss development patterns. If the paid loss development patterns change by 2%, the estimated net reserve need would change by $400, in either direction. A 2% change in paid loss development patterns is within the Company's historical variation, as measured by the variation around the average development factors as reported in statutory accident year reports.

Recorded reserves for general liability, net of reinsurance, are approximately $2.5 billion. Loss development patterns are a key indicator for this line of business, particularly for more mature accident years. Historically, loss development patterns have been impacted by, among other things, emergence of new types of claims (e.g., construction defect claims) or a shift in the mixture between smaller, more routine claims and larger, more complex claims. The Company has reviewed the historical variation in reported loss development patterns. If the reported loss development patterns change by 10%, the estimated net reserve need would change by $200, in either direction. A 10% change in reported loss development patterns is within the Company's historical variation, as measured by the variation around the average development factors as reported in statutory accident year reports.

Reserving for Asbestos and Environmental Claims within Property & Casualty Other Operations

How A&E reserves are set

In establishing reserves for asbestos claims, the Company evaluates its insureds' estimated liabilities for such claims using a ground-up approach. The Company considers a variety of factors, including the jurisdictions where underlying claims have been brought, past, pending and anticipated future claim activity, disease mix, past settlement values of similar claims, dismissal rates, allocated loss adjustment expense, and potential bankruptcy impact.

Similarly, a ground-up exposure review approach is used to establish environmental reserves. The Company's evaluation of its insureds' estimated liabilities for environmental claims involves consideration of several factors, including historical values of similar claims, the number of sites involved, the insureds' alleged activities at each site, the alleged environmental damage at each site, the respective shares of liability of potentially responsible parties at each site, the appropriateness and cost of remediation at each site, the nature of governmental enforcement activities at each site, and potential bankruptcy impact.

Having evaluated its insureds' probable liabilities for asbestos and/or environmental claims, the Company then evaluates its insureds' insurance coverage programs for such claims. The Company considers its insureds' total available insurance coverage, including the coverage issued by the Company. The Company also considers relevant judicial interpretations of policy language and applicable coverage defenses or determinations, if any.

Evaluation of both the insureds' estimated liabilities and the Company's exposure to the insureds depends heavily on an analysis of the relevant legal issues and litigation environment. This analysis is conducted by the Company's lawyers and is subject to applicable privileges.

For both asbestos and environmental reserves, the Company also compares its historical direct net loss and expense paid and reported experience, and net loss and expense paid and reported experience year by year, to assess any emerging trends, fluctuations or characteristics suggested by the aggregate paid and reported activity.

Once the gross ultimate exposure for indemnity and allocated loss adjustment expense is determined for its insureds by each policy year, the Company calculates its ceded reinsurance projection based on any applicable facultative and treaty reinsurance and the Company's experience with reinsurance collections.

Uncertainties Regarding Adequacy of Asbestos and Environmental Reserves

A number of factors affect the variability of estimates for asbestos and environmental reserves including assumptions with respect to the frequency of claims, the average severity of those claims settled with payment, the dismissal rate of claims with no payment and the expense to indemnity ratio. The uncertainty with respect to the underlying reserve assumptions for asbestos and environmental adds a greater degree of variability to these reserve estimates than reserve estimates for more traditional exposures. While this variability is reflected in part in the size of the range of reserves developed by the Company, that range may still not be indicative of the potential variance between the ultimate outcome and the recorded reserves. The recorded net reserves as of December 31, 2014 of approximately$2.0 billion ($1.7 billion and $0.3 billion for asbestos and environmental, respectively) are within an estimated range, unadjusted for covariance, of $1.6 billion to $2.3 billion. The process of estimating asbestos and environmental reserves remains subject to a wide variety of uncertainties, which are detailed in Note 14 - Commitments and Contingencies of Notes to Consolidated Financial Statements. The Company believes that its current asbestos and environmental reserves are appropriate. However, analyses of future developments could cause the Company to change its estimates and ranges of its asbestos and environmental reserves, and the effect of these changes could be material to the Company's consolidated operating results or cash flows. Consistent with the Company's long-standing reserve practices, the Company will continue to review and monitor its reserves in Property & Casualty Other Operations regularly, including its annual reviews of asbestos liabilities, reinsurance recoverables and the allowance for uncollectible reinsurance, and environmental liabilities, and where future developments indicate, make appropriate adjustments to the reserves.

Reserve Roll-forwards and Development

Based on the results of the quarterly reserve review process, the Company determines the appropriate reserve adjustments, if any, to record. Recorded reserve estimates are changed after consideration of numerous factors, including but not limited to, the magnitude of the difference between the actuarial indication and the recorded reserves, improvement or deterioration of actuarial indications in the period, the maturity of the accident year, trends observed over the recent past and the level of volatility within a particular line of business. In general, adjustments are made more quickly to more mature accident years and less volatile lines of business. Such adjustments of reserves are referred to as “reserve development”. Reserve development that increases previous estimates of ultimate cost is called “reserve strengthening”. Reserve development that decreases previous estimates of ultimate cost is called “reserve releases”. Reserve development can influence the comparability of year over year underwriting results and is set forth in the paragraphs and tables that follow.

Total Property and Casualty Insurance Product Reserves, Net of Reinsurance, Results

In the opinion of management, based upon the known facts and current law, the reserves recorded for the Company’s property and casualty insurance products at December 31, 2014 represent the Company’s best estimate of its ultimate liability for losses and loss adjustment expenses related to losses covered by policies written by the Company. However, because of the significant uncertainties surrounding reserves, and particularly asbestos and environmental exposures, it is possible that management’s estimate of the ultimate liabilities for these claims may change and that the required adjustment to recorded reserves could exceed the currently recorded reserves by an amount that could be material to the Company’s results of operations or cash flows.

A roll-forward of property and casualty insurance product liabilities for unpaid losses and loss adjustment expenses follows:

For the year ended December 31, 2014

	Commercial Lines	Personal Lines	Property & Casualty Other Operations	Total Property & Casualty
Beginning liabilities for unpaid losses and loss adjustment expenses, gross	**$ 16,293**	**$ 1,864**	**$ 3,547**	**$ 21,704**
Reinsurance and other recoverables	2,442	13	573	3,028
Beginning liabilities for unpaid losses and loss adjustment expenses, net	**13,851**	**1,851**	**2,974**	**18,676**
Provision for unpaid losses and loss adjustment expenses				
Current accident year before catastrophes	3,733	2,498	—	6,231
Current accident year catastrophes [3]	109	232	—	341
Prior accident years strengthening (release)	13	(46)	261	228
Total provision for unpaid losses and loss adjustment expenses	**3,855**	**2,684**	**261**	**6,800**
Less: Payments	3,665	2,679	367	6,711
Ending liabilities for unpaid losses and loss adjustment expenses, net	**14,041**	**1,856**	**2,868**	**18,765**
Reinsurance and other recoverables	2,464	18	559	3,041
Ending liabilities for unpaid losses and loss adjustment expenses, gross	**$ 16,505**	**$ 1,874**	**$ 3,427**	**$ 21,806**
Earned premiums	$ 6,289	$ 3,806		
Loss and loss expense paid ratio [1]	58.3	70.4		
Loss and loss expense incurred ratio	61.3	70.5		
Prior accident years development (pts) [2]	0.2	(1.2)		

[1] The "loss and loss expense paid ratio" represents the ratio of paid losses and loss adjustment expenses to earned premiums.
[2] "Prior accident years development (pts)" represents the ratio of prior accident years development to earned premiums.
[3] Contributing to the current accident year catastrophes losses were the following events:

For the year ended December 31, 2014

Category	Commercial Lines	Personal Lines	Total Property and Casualty Insurance
Wind and hail [1]	$ 45	$ 196	$ 241
Winter storms [1]	54	19	73
Other [2]	10	17	27
Total	**$ 109**	**$ 232**	**$ 341**

[1] These amounts represent an aggregation of multiple catastrophes.
[2] Includes tornadoes, earthquakes and flooding.

Prior accident years development recorded in 2014

Included within prior accident years development were the following loss and loss adjustment expense reserve strengthenings (releases):

For the year ended December 31, 2014				
	Commercial Lines	**Personal Lines**	**Property & Casualty Other Operations**	**Total Property & Casualty Insurance**
Auto liability	$ 23	$ 2	$ —	$ 25
Homeowners	—	(7)	—	(7)
Professional liability	(17)	—	—	(17)
Package business	3	—	—	3
General liability	(25)	—	—	(25)
Bond	8	—	—	8
Commercial property	2	—	—	2
Net asbestos reserves	—	—	212	212
Net environmental reserves	—	—	30	30
Workers' compensation	(7)	—	—	(7)
Change in workers' compensation discount, including accretion	30	—	—	30
Catastrophes	(14)	(31)	—	(45)
Other reserve re-estimates, net	10	(10)	19	19
Total prior accident years development	**$ 13**	**$ (46)**	**$ 261**	**$ 228**

During 2014, the Company's re-estimates of prior accident years reserves included the following significant reserve changes:

- Strengthened reserves in commercial auto liability due to an increased frequency of severe claims spread across several accident years.
- Homeowners reserves emerged favorably for accident year 2013, primarily related to favorable development on fire and water-related claims.
- Released reserves in professional liability for accident years 2013, 2012 and 2010 due to lower frequency of reported claims.
- Released reserves in general liability due to lower frequency in late emerging claims.
- Bond reserves emerged favorably for accident years 2008 to 2013, offset by adverse emergence on reserves for accident years 2007 and prior.
- Released reserves primarily for accident year 2013 catastrophes as fourth quarter 2013 catastrophes have developed favorably.
- Released reserves in workers' compensation for recent accident years due to improved frequency and lower estimated claim handling costs.
- Refer to the Property & Casualty Other Operations Claims section for discussion of the increase to net asbestos reserves, net environmental reserves and other reserve re-estimates, net.

A roll-forward of property and casualty insurance product liabilities for unpaid losses and loss adjustment expenses follows:

For the year ended December 31, 2013

	Commercial Lines	Personal Lines	Property & Casualty Other Operations	Total Property & Casualty Insurance

Other reserve re-estimates, net	—	3	6	9
Total prior accident years development	**$ 83**	**$ (39)**	**$ 148**	**$ 192**

During 2013, the Company's re-estimates of prior accident years reserves included the following significant reserve changes:

- Strengthened reserves in commercial auto liability, primarily related to specialty lines claims, arising from a higher frequency of large loss bodily injury claims in accident years 2010 through 2012.
- Released reserves in professional liability for accident years 2008 through 2012 due to lower than expected claim severity, primarily for large-sized accounts.
- Released reserves in general liability in accident years 2006 through 2011. The emergence of claim severity as well as the frequency of late reported claims for these years was lower than expected and management has placed more weight on the emerged experience.
- The Company reviewed its allowance for uncollectible reinsurance in the second quarter of 2013 and reduced its allowance as a result of favorable collections compared to expectations.
- Release in workers' compensation is the net of releases for accident year 2009 and prior reflecting favorable development in average severity, the result of a speed up in settlements and the result of moving to an enhanced state-level analysis of loss experience, offset by strengthening workers' compensation for accident years 2010 through 2012 reflecting the emergence of a higher mix of more severe claims.
- Reserve strengthening related to the closing of the New York Section 25A Fund for Reopened Cases (the "Fund"). These claims were previously funded through assessments and paid by the Fund. The claims will become payable by the Company effective January 1, 2014.
- Released reserves for catastrophes primarily related to Storm Sandy.
- Other reserve re-estimates, net includes an $18 recovery related to a class action settlement with American International Group involving prior accident years involuntary workers compensation pool loss and loss adjustment expense.
- Refer to the Property & Casualty Other Operations Claims section for further discussion of the increase to net asbestos and net environmental reserves.

A roll-forward of property and casualty insurance product liabilities for unpaid losses and loss adjustment expenses follows:

For the year ended December 31, 2012				
	Commercial Lines	Personal Lines	Property & Casualty Other Operations	Total Property & Casualty Insurance
Beginning liabilities for unpaid losses and loss adjustment expenses, gross	**$ 15,437**	**$ 2,061**	**$ 4,052**	**$ 21,550**
Reinsurance and other recoverables	2,343	9	681	3,033
Beginning liabilities for unpaid losses and loss adjustment expenses, net	**13,094**	**2,052**	**3,371**	**18,517**
Provision for unpaid losses and loss adjustment expenses				
Current accident year before catastrophes	4,178	2,390	—	6,568
Current accident year catastrophes [3]	325	381	—	706
Prior accident years strengthening (release)	72	(141)	65	(4)
Total provision for unpaid losses and loss adjustment expenses	**4,575**	**2,630**	**65**	**7,270**
Less: Payments	4,014	2,772	312	7,098
Ending liabilities for unpaid losses and loss adjustment expenses, net	**13,655**	**1,910**	**3,124**	**18,689**
Reinsurance and other recoverables	2,365	16	646	3,027
Ending liabilities for unpaid losses and loss adjustment expenses, gross	**$ 16,020**	**$ 1,926**	**$ 3,770**	**$ 21,716**
Earned premiums	$ 6,259	$ 3,636		
Loss and loss expense paid ratio [1]	64.1	76.2		
Loss and loss expense incurred ratio	73.1	72.3		
Prior accident years development (pts) [2]	1.2	(3.9)		

[1] The "loss and loss expense paid ratio" represents the ratio of paid losses and loss adjustment expenses to earned premiums.
[2] "Prior accident years development (pts)" represents the ratio of prior accident years development to earned premiums.
[3] Contributing to the current accident year catastrophes losses were the following events:

For the year ended December 31, 2012			
Category	Commercial Lines	Personal Lines	Total Property and Casualty Insurance
Wind and hail [1]	$ 84	$ 172	$ 256
Tornadoes [1]	30	40	70
Storm Sandy	207	143	350
Other [1][2]	4	26	30
Total	**$ 325**	**$ 381**	**$ 706**

[1] Amounts represent an aggregation of multiple catastrophes.
[2] Primarily includes wildfire.

Prior accident years development recorded in 2012

Included within prior accident years development were the following loss and loss adjustment expense reserve strengthenings (releases):

For the year ended December 31, 2012				
	Commercial Lines	Personal Lines	Property & Casualty Other Operations	Total Property & Casualty Insurance
Auto liability	$ 56	$ (81)	$ —	$ (25)
Homeowners	—	(32)	—	(32)
Professional liability	40	—	—	40
Package business	(20)	—	—	(20)
General liability	(87)	—	—	(87)
Bond	(9)	—	—	(9)

Other reserve re-estimates, net	7	1	7	15
Total prior accident years development	**$ 72**	**$ (141)**	**$ 65**	**$ (4)**

During 2012, the Company's re-estimates of prior accident years reserves included the following significant reserve changes:

- Released reserves for personal auto liability claims, primarily for accident years 2008 through 2011. As these accident years matured, favorable bodily injury severity trends were observed and management placed more weight on the emerged experience. Management has adjusted trend assumptions accordingly.
- Released reserves for homeowners claims, primarily for accident year 2011 as a result of favorable large loss frequency and lower than expected severity.
- Strengthened reserves for commercial auto liability claims, primarily for accident year 2010 and 2011. Higher than expected bodily injury severity, driven by large loss activity, has been observed for these accident years.
- Strengthened reserves for professional liability directors and officers claims for accident years 2011 and prior as a result of higher severity, primarily for mid- and large-sized accounts.
- Released reserves in package business liability coverages and general liability, primarily for accident years 2006 through 2011. Claim severity emergence for these years was lower than expected and management has placed more weight on the emerged experience. In addition, older years have improved due to favorable emergence of larger claims.
- Strengthened reserves in workers' compensation primarily due to the emergence of lost time claims from 2011.
- The change in workers' compensation discount, including accretion, primarily reflects a decrease in the number of tabular claims, and to a lesser extent, the decrease in interest rates.
- Reserve releases on certain prior year catastrophes, primarily related to 2001 World Trade Center worker's compensation claims.
- Refer to the Property & Casualty Other Operations Claims section for further discussion of the increase to net asbestos and net environmental reserves.

Property & Casualty Other Operations Claims

Reserve Activity

Reserves and reserve activity in Property & Casualty Other Operations are categorized and reported as asbestos, environmental, or "all other". The "all other" category of reserves covers a wide range of insurance and assumed reinsurance coverages, including, but not limited to, potential liability for construction defects, lead paint, silica, pharmaceutical products, molestation and other long-tail liabilities.

The following table presents reserve activity, inclusive of estimates for both reported and incurred but not reported claims, net of reinsurance, for Property & Casualty Other Operations, categorized by asbestos, environmental and all other claims, for the years ended December 31, 2014, 2013 and 2012.

Property & Casualty Other Operations Losses and Loss Adjustment Expenses

	Asbestos	Environmental	All Other [1]	Total
2014				
Beginning liability — net [2] [3]	**$ 1,714**	**$ 270**	**$ 990**	**$ 2,974**
Losses and loss adjustment expenses incurred	212	30	19	261
Less: Losses and loss adjustment expenses paid	216	59	92	367
Ending liability — net [2] [3]	**$ 1,710** [4]	**$ 241**	**$ 917**	**$ 2,868**
2013				
Beginning liability — net [2] [3]	**$ 1,776**	**$ 290**	**$ 1,058**	**$ 3,124**
Losses and loss adjustment expenses incurred	130	12	6	148
Less: Losses and loss adjustment expenses paid	192	32	74	298
Ending liability — net [2] [3]	**$ 1,714**	**$ 270**	**$ 990**	**$ 2,974**
2012				
Beginning liability — net [2] [3]	**$ 1,892**	**$ 320**	**$ 1,159**	**$ 3,371**
Losses and loss adjustment expenses incurred	48	10	7	65
Less: Losses and loss adjustment expenses paid	164	40	108	312
Ending liability — net [2] [3]	**$ 1,776**	**$ 290**	**$ 1,058**	**$ 3,124**

[1] "All Other" includes unallocated loss adjustment expense reserves. "All Other" also includes the Company's allowance for uncollectible reinsurance. When the Company commutes a ceded reinsurance contract or settles a ceded reinsurance dispute, the portion of the allowance for uncollectible reinsurance attributable to that commutation or settlement, if any, is reclassified to the appropriate cause of loss.

[2] Excludes amounts reported in Commercial Lines and Personal Lines reporting segments (collectively "Ongoing Operations") for asbestos and environmental net liabilities of $16 and $6 respectively, as of December 31, 2014, $18 and $5, respectively, as of December 31, 2013, and $15 and $7, respectively, as of December 31, 2012; excludes total net losses and loss adjustment expenses incurred for the years ended December 31, 2014, 2013 and 2012 of $16, $15 and $13, respectively, related to asbestos and environmental claims; and excludes total net losses and loss adjustment expenses paid for the years ended December 31, 2014, 2013 and 2012 of $17, $14 and $15, respectively, related to asbestos and environmental claims.

[3] Gross of reinsurance, asbestos and environmental reserves, including liabilities in Ongoing Operations, were $2,193 and $267, respectively, as of December 31, 2014; $2,182 and $311, respectively, as of December 31, 2013; and $2,294 and $334, respectively, as of December 31, 2012.

[4] The one year and average three year net paid amounts for asbestos claims, including Ongoing Operations, were $229 and $201, respectively, resulting in a one year net survival ratio of 7.6 and a three year net survival ratio of 8.6 . Net survival ratio is the quotient of the net carried reserves divided by the average annual payment amount and is an indication of the number of years that the net carried reserve would last (i.e., survive) if the future annual claim payments were consistent with the calculated historical average.

For paid and incurred losses and loss adjustment expenses reporting, the Company classifies its asbestos and environmental reserves into three categories: Direct, Assumed Reinsurance and London Market. Direct insurance includes primary and excess coverage. Assumed Reinsurance includes both "treaty" reinsurance (covering broad categories of claims or blocks of business) and "facultative" reinsurance (covering specific risks or individual policies of primary or excess insurance companies). London Market business includes the business written by one or more of the Company's subsidiaries in the United Kingdom, which are no longer active in the insurance or reinsurance business. Such business includes both direct insurance and assumed reinsurance.Of the three categories of claims (Direct, Assumed Reinsurance and London Market), direct policies tend to have the greatest factual development from which to estimate the Company's exposures.

Assumed reinsurance exposures are less predictable than direct insurance exposures because the Company does not generally receive notice of a reinsurance claim until the underlying direct insurance claim is mature. This causes a delay in the receipt of information at the reinsurer level and adds to the uncertainty of estimating related reserves.

London Market exposures are the most uncertain of the three categories of claims. As a participant in the London Market (comprised of both Lloyd's of London and London Market companies), certain subsidiaries of the Company wrote business on a subscription basis, with those subsidiaries' involvement being limited to a relatively small percentage of a total contract placement. Claims are reported, via a broker, to the "lead" underwriter and, once agreed to, are presented to the following markets for concurrence. This reporting and claim agreement process makes estimating liabilities for this business the most uncertain of the three categories of claims.

The following table sets forth, for the years ended December 31, 2014, 2013 and 2012, paid and incurred loss activity by the three categories of claims for asbestos and environmental.

Paid and Incurred Losses and Loss Adjustment Expenses ("LAE") Development — Asbestos and Environmental

[1] Excludes asbestos and environmental paid and incurred loss and LAE reported in Ongoing Operations. Total gross losses and LAE incurred in Ongoing Operations for the years ended December 31, 2014, 2013 and 2012 includes $19, $15 and $13, respectively, related to asbestos and environmental claims. Total gross losses and LAE paid in Ongoing Operations for the years ended December 31, 2014, 2013 and 2012 includes $21, $14 and $15, respectively, related to asbestos and environmental claims.

In the fourth quarters of 2014, 2013 and 2012, the Company completed evaluations of certain of its non-asbestos and non-environmental reserves in Property & Casualty Other Operations, including its assumed reinsurance liabilities. In 2014, the Company's prior year development was impacted by unfavorable frequency of international workers' compensation claims. The Company's prior year development on these reserves was immaterial in 2013 and 2012.

During the second quarters of 2014, 2013 and 2012, the Company completed its annual ground-up asbestos reserve evaluations. As part of these evaluations, the Company reviewed all of its open direct domestic insurance accounts exposed to asbestos liability, as well as assumed reinsurance accounts and its London Market exposures for both direct insurance and assumed reinsurance. During 2014, the Company found estimates for certain direct accounts increased, principally due to a higher than previously estimated number of mesothelioma claim filings and an increase in costs associated with asbestos litigation. The Company also experienced unfavorable development on certain of its assumed reinsurance accounts driven by a variety of account-specific factors, including those experienced by the direct policyholders. Based on this evaluation, the Company strengthened its net asbestos reserves by $212 in second quarter 2014. During 2013, the Company found estimates for individual cases changed based upon the particular circumstances in such accounts. These cases were case specific and not as a result of any underlying change in current environment. The Company experienced moderate increases in claim frequency and severity as well as expense and costs associated with litigating asbestos coverage matters, particularly against certain smaller, more peripheral insureds. The Company also experienced unfavorable development on certain of its assumed reinsurance accounts driven largely by the same factors experience by the direct policyholders. Based on this evaluation, the Company strengthened its net asbestos reserves by $130 in second quarter 2013. During 2012, the Company found estimates for individual cases changed based upon the particular circumstances of such accounts. These changes were case specific and not as a result of any underlying change in the current environment. The Company experienced moderate increases in claim severity, expense and costs associated with litigating asbestos coverage matters, particularly against certain smaller, more peripheral insureds. The Company also experienced unfavorable development on certain of its assumed reinsurance accounts driven largely by the same factors experienced by direct policy holders. Based on this evaluation, the Company strengthened its net asbestos reserves by $48 in second quarter 2012. The Company currently expects to continue to perform an evaluation of its asbestos liabilities annually.

During the second quarters of 2014, 2013 and 2012, the Company completed its annual ground-up environmental reserve evaluations. In each of these evaluations, the Company reviewed all of its open direct domestic insurance accounts exposed to environmental liability, as well as assumed reinsurance accounts and its London Market exposures for both direct and assumed reinsurance. The Company found estimates for certain individual account exposures increased based upon unfavorable litigation results and increased clean-up and expense costs. The net effect of these account-specific changes as well as quarterly actuarial evaluations of new account emergence and historical loss and expense paid experience resulted in increases of $30, $12 and $10 in net environmental reserves in 2014, 2013 and 2012, respectively. The Company currently expects to continue to perform a ground-up evaluation of its environmental liabilities annually and to regularly evaluate the Company's historical direct net loss and expense paid and reported experience by calendar and/or report year, to assess any emerging trends, fluctuations or characteristics suggested by the aggregate paid and reported activity.

The Company divides its gross asbestos and environmental exposures into Direct, Assumed Reinsurance and London Market. Direct asbestos exposures include Major Asbestos Defendants, Non-Major Accounts, and Unallocated Direct Accounts.

- Major Asbestos Defendants represent the “Top 70” accounts in Tillinghast's published Tiers 1 and 2 and Wellington accounts. Major Asbestos Defendants have the fewest number of asbestos accounts and include reserves related to PPG Industries, Inc. (“PPG”). In January 2009, the Company, along with approximately three dozen other insurers, entered into a modified agreement in principle with PPG to resolve the Company's coverage obligations for all its PPG asbestos liabilities. The agreement is contingent on the fulfillment of certain conditions. Major Asbestos Defendants gross asbestos reserves accounted for approximately 25% of the Company's total Direct gross asbestos reserves as of June 30, 2014.
- Non-Major Accounts are all other open direct asbestos accounts and largely represent smaller and more peripheral defendants. These exposures represented 1,115 accounts and contained approximately 49% of the Company's total Direct gross asbestos reserves as of June 30, 2014.
- Unallocated Direct Accounts includes an estimate of the reserves necessary for asbestos claims related to direct insureds that have not previously tendered asbestos claims to the Company and exposures related to liability claims that may not be subject to an aggregate limit under the applicable policies.

The following table displays gross asbestos and environmental reserves by category as of December 31, 2014:

Summary of Gross A&E Reserves

	Asbestos [1]	Environmental [2]	Total A&E
Gross			
Direct	$ 1,640	$ 196	$ 1,836
Assumed Reinsurance	289	22	311
London Market	264	49	313
Total	2,193	267	2,460
Ceded	**(467)**	**(20)**	**(487)**
Net	**$ 1,726**	**$ 247**	**$ 1,973**

[1] The one year gross paid amount for total asbestos claims is $304, resulting in a one year gross survival ratio of 7.2. The three year average gross paid amount for total asbestos claims is $263, resulting in a three year gross survival ratio of 8.3.

[2] The one year gross paid amount for total environmental claims is $83, resulting in a one year gross survival ratio of 3.2. The three year average gross paid amount for total environmental claims is $58, resulting in a three year gross survival ratio of 4.6.

The Company provides an allowance for uncollectible reinsurance, reflecting management's best estimate of reinsurance cessions that may be uncollectible in the future due to reinsurers' unwillingness or inability to pay. During the second quarters of 2014, 2013 and 2012, the Company completed its annual evaluations of the collectability of the reinsurance recoverables and the adequacy of the allowance for uncollectible reinsurance associated with older, long-term casualty liabilities reported in the Property & Casualty Other Operations. In conducting this evaluation, the Company used its most recent detailed evaluations of ceded liabilities reported in the segment. The Company analyzed the overall credit quality of the Company's reinsurers, recent trends in arbitration and litigation outcomes in disputes between cedants and reinsurers, and recent developments in commutation activity between reinsurers and cedants. The evaluation in the second quarters of 2014, 2013, and 2012 resulted in no adjustments to the allowance for uncollectible reinsurance. As of December 31, 2014, 2013, and 2012, the allowance for uncollectible reinsurance for Property & Casualty Other Operations totaled $225, $202, and $203. The Company currently expects to perform its regular comprehensive review of Property & Casualty Other Operations reinsurance recoverables annually. Due to the inherent uncertainties as to collection and the length of time before reinsurance recoverables become due, particularly for older, long-term casualty liabilities, it is possible that future adjustments to the Company's reinsurance recoverables, net of the allowance, could be required.

Consistent with the Company's long-standing reserving practices, the Company will continue to review and monitor its reserves in Property & Casualty Other Operations regularly, including its annual reviews of asbestos liabilities, reinsurance recoverables and allowance for uncollectible reinsurance, and environmental liabilities, and where future developments indicate, make appropriate adjustments to the reserves. The company will complete both its annual ground-up asbestos and environmental reserve studies during the second quarter of 2015.

Impact of Re-estimates

The establishment of property and casualty insurance product reserves is an estimation process, using a variety of methods, assumptions and data elements. Ultimate losses may vary materially from the current estimates. Many factors can contribute to these variations and the need to change the previous estimate of required reserve levels. Subsequent changes can generally be thought of as being the result of the emergence of additional facts that were not known or anticipated at the time of the prior reserve estimate and/or changes in interpretations of information and trends.

The table below shows the range of annual reserve re-estimates experienced by The Hartford over the past ten years. The amount of prior accident year development (as shown in the reserve rollforward) for a given calendar year is expressed as a percent of the beginning calendar year reserves, net of reinsurance. The percentage relationships presented are significantly influenced by the facts and circumstances of each particular year and by the fact that only the last ten years are included in the range. Accordingly, these percentages are not intended to be a prediction of the range of possible future variability. See "Impact of key assumptions on reserve volatility" within this section for further discussion of the potential for variability in recorded loss reserves.

	Commercial Lines	Personal Lines	Property & Casualty Other Operations	Total Property & Casualty [1]
Annual range of prior accident year unfavorable (favorable) development for the ten years ended December 31, 2014	**(3.1)% - 1.5%**	**(6.9)% - (0.2)%**	**1.9% - 9.3%**	**(1.2)% - 2.0%**

[1] Excluding the reserve strengthening for asbestos and environmental reserves, over the past ten years reserve re-estimates for total property and casualty insurance ranged from (2.5)% to 1.0%.

The potential variability of the Company's property and casualty insurance product reserves would normally be expected to vary by segment and the types of loss exposures insured by those segments. Illustrative factors influencing the potential reserve variability for each of the segments are discussed above.

A table depicting the historical development of the liabilities for unpaid losses and loss adjustment expenses, net of reinsurance, follows:

Loss Development Table
Loss And Loss Adjustment Expense Liability Development — Net of Reinsurance
For the Years Ended December 31,

Ten years later	18,565	—	—	—	—	—	—	—	—	—	
Deficiency (redundancy), net of reinsurance	**$ 2,374**	**$ 1,527**	**$ 493**	**$ (16)**	**$ 90**	**$ 198**	**$ 681**	**$ 496**	**$ 518**	**$ 228**	

The previous table shows the cumulative deficiency (redundancy) of the Company's reserves, net of reinsurance, as now estimated with the benefit of additional information. Those amounts are comprised of changes in estimates of gross losses and changes in estimates of related reinsurance recoveries.

The following table, for the periods presented, reconciles the net reserves to the gross reserves, as initially estimated and recorded, and as currently estimated and recorded, and computes the cumulative deficiency (redundancy) of the Company's reserves before reinsurance.

Loss And Loss Adjustment Expense Liability Development — Gross
For the Years Ended December 31,

	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
Net reserve, as initially estimated	**$ 16,863**	**$ 17,604**	**$ 18,231**	**$ 18,347**	**$ 18,210**	**$ 17,948**	**$ 18,517**	**$ 18,689**	**$ 18,676**	**$ 18,765**
Reinsurance and other recoverables, as initially estimated	5,403	4,387	3,922	3,586	3,441	3,077	3,033	3,027	3,028	3,041
Gross reserve, as initially estimated	**$ 22,266**	**$ 21,991**	**$ 22,153**	**$ 21,933**	**$ 21,651**	**$ 21,025**	**$ 21,550**	**$ 21,716**	**$ 21,704**	**$ 21,806**
Net re-estimated reserve	**$ 18,390**	**$ 18,097**	**$ 18,215**	**$ 18,437**	**$ 18,408**	**$ 18,629**	**$ 19,013**	**$ 19,207**	**$ 18,904**	
Re-estimated and other reinsurance recoverables	6,296	4,732	4,443	4,115	3,713	3,376	3,292	3,099	3,041	
Gross re-estimated reserve	**$ 24,686**	**$ 22,829**	**$ 22,658**	**$ 22,552**	**$ 22,121**	**$ 22,005**	**$ 22,305**	**$ 22,306**	**$ 21,945**	
Gross deficiency (redundancy)	**$ 2,420**	**$ 838**	**$ 505**	**$ 619**	**$ 470**	**$ 980**	**$ 755**	**$ 590**	**$ 241**	

The following table is derived from the Loss Development table and summarizes the effect of reserve re-estimates, net of reinsurance, on calendar year operations for the ten-year period ended December 31, 2014. The total of each column details the amount of reserve re-estimates made in the indicated calendar year and shows the accident years to which the re-estimates are applicable. The amounts in the total accident year column on the far right represent the cumulative reserve re-estimates during the ten year period ended December 31, 2014 for the indicated accident year(s).

Effect of Net Reserve Re-estimates on Calendar Year Operations

	Calendar Year										
	2005	**2006**	**2007**	**2008**	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**	**Total**
By Accident Year											
2004 & Prior	$ 248	$ 399	$ 402	$ 104	$ 226	$ 207	$ 287	$ (2)	$ 151	$ 352	$ 2,374
2005	—	(103)	(214)	(133)	(47)	(91)	(5)	6	(6)	(6)	(599)
2006	—	—	(140)	(148)	(213)	(118)	(45)	(7)	(69)	2	(738)
2007	—	—	—	(49)	(113)	(156)	(71)	(15)	(67)	10	(461)
2008	—	—	—	—	(39)	1	(31)	(1)	(37)	(13)	(120)

Total strengthening (release)	**$ 248**	**$ 296**	**$ 48**	**$ (226)**	**$ (186)**	**$ (196)**	**$ 367**	**$ (4)**	**$ 192**	**$ 228**	**$ 767**

Reserve changes for accident years 2004 & Prior

The largest impacts of net reserve re-estimates are shown in the "2004 & Prior" accident years. The reserve deterioration is driven, in part, by deterioration of reserves for asbestos, environmental, assumed casualty reinsurance, workers' compensation, and general liability claims. Numerous actuarial assumptions on assumed casualty reinsurance turned out to be low, including loss cost trends, particularly on excess of loss business, and the impact of deteriorating terms and conditions.

The reserve re-estimates in calendar years 2005 through 2006 were largely attributable to reductions in the reinsurance recoverable asset associated with older, long-term casualty liabilities, and unexpected development on mature claims in both general liability and workers' compensation. In addition, catastrophe reserves related to the 2004 hurricanes developed favorably in 2006.

During the 2007 calendar year, the Company refined its processes for allocating incurred but not reported ("IBNR") reserves by accident year, resulting in a reclassification of $347 of IBNR reserves from the 2003 to 2006 accident years to the 2002 and prior accident years. This reclassification of reserves by accident year had no effect on total recorded reserves within any segment or on total recorded reserves for any line of business within a segment.

The reserve re-estimates during calendar year 2008 were largely driven by increases in asbestos, environmental and general liability reserves. The reserve re-estimates in calendar years 2009, 2010, 2011, 2013 and 2014 were largely due to increases in asbestos and environmental reserves, resulting from the Company's annual evaluations of these liabilities. These reserve evaluations reflect deterioration in the litigation environment surrounding asbestos and environmental liabilities during this period.

Reserve changes for accident years 2005 through 2009

During calendar year 2006, favorable re-estimates occurred in both loss and allocated loss adjustment expenses for the 2005 accident year. In addition, catastrophe reserves related to the 2005 hurricanes developed favorably in 2006. During calendar years 2006 through 2008 for the 2005 through 2007 accident years, the Company recognized favorable re-estimates of both loss and allocated loss adjustment expenses on workers' compensation claims, driven, in part, by state regulatory reforms in California and Florida, underwriting actions, and expense reduction initiatives that had a greater impact in controlling costs than originally estimated. Even after considering the reclassification of IBNR reserves, accident years 2005 through 2007 show favorable development in calendar years 2006 through 2011. A portion of the release comes from short-tail lines of business, where results emerge quickly. In 2007, the Company released reserves for package business claims as reported losses emerged favorably to previous expectations. In 2007 through 2009, the Company released reserves for general liability claims due to the favorable emergence of losses for high hazard and umbrella general liability claims. Reserves for professional liability claims were released in 2008 and 2009 related to the 2005 through 2007 accident years due to a lower estimate of claim severity on both directors' and officers' insurance claims and errors and omissions insurance claims. Reserves of auto liability claims, within Personal Lines, were released in 2008 due largely to an improvement in emerged claim severity for the 2005 to 2007 accident years.

Accident year 2009 remains reasonably close to original estimates. Modest favorable reserve re-estimates during calendar periods 2009 through 2014 are primarily related to liability lines of business.

Reserve changes for accident years 2010 through 2011

Unfavorable reserve re-estimates in calendar year 2011 on accident year 2010 are largely driven by workers' compensation. Loss cost trends were higher than initially expected as an increase in frequency outpaced a moderation of severity trends. Unfavorable reserve re-estimates in calendar year 2013 on accident year 2010 and 2011 are primarily related workers' compensation and commercial auto liability. Workers' compensation loss cost trends were higher than initially expected as an increase in frequency outpaced a moderation of severity trends. Commercial auto liability was driven by higher frequency of large loss bodily injury claims.

Reserves were released in calendar year 2014 for accident year 2010 due to lower frequency of professional liability reported claims, favorable bond claim emergence, and lower frequency of late emerging liability claims.

Reserve changes for accident year 2012

Accident year 2012 remains reasonably close to the original estimate. Modest unfavorable reserve re-estimates during calendar year 2013 are primarily related to commercial auto liability driven by higher frequency of large loss bodily injury claims offset by reserve releases related to Storm Sandy.

Reserve changes for accident year 2013

Reserves were released in calendar year 2014 on accident year 2013 due to lower estimated claim handling costs for workers' compensation and lower frequency of reported claims for professional liability. Reserves were also released in calendar year 2014 for accident year 2013 due to favorable development of fourth quarter catastrophes and favorable emergence of losses for property lines of business.

Estimated Gross Profits Used in the Valuation and Amortization of Assets and Liabilities Associated with Variable Annuity and Other Universal Life-Type Contracts

Estimated gross profits are used in the amortization of the deferred policy acquisition costs ("DAC") asset, sales inducement assets (“SIA”) and unearned revenue reserves (“URR”). Portions of EGPs are also used in the valuation of reserves for death and other insurance benefit features on variable annuity and other universal life type contracts.

The most significant EGP based balances are as follows:

	Talcott Resolution	
	As of December 31,	
	2014	2013
DAC [1]	$ 1,200	$ 1,552
SIA	$ 89	$ 149
URR	$ —	$ 50
Death and Other Insurance Benefit Reserves, net of reinsurance [2]	$ 331	$ 565

[1] For additional information on DAC, see Note 8 - Deferred Policy Acquisition Costs and Present Value of Future Profits of Notes to Consolidated Financial Statements.

[2] For additional information on death and other insurance benefit reserves, see Note 10 - Separate Accounts, Death Benefits and Other Insurance Benefit Features of Notes to Consolidated Financial Statements.

Unlocks

The benefit (charge) to income from continuing operations, net of tax by asset and liability as a result of the Unlocks is as follows:

	Talcott Resolution		
	For the years ended December 31,		
	2014	2013	2012
DAC	$ (136)	$ (199)	$ (214)
SIA	(35)	(20)	(82)
URR	42	16	12
Death and Other Insurance Benefit Reserves	34	36	73
Total (before tax)	$ (95)	$ (167)	$ (211)
Income tax effect	(33)	(58)	(73)
Total (after-tax)	**$ (62)**	**$ (109)**	**$ (138)**

The Unlock charge for the year ended December 31, 2014 was primarily due to lower future estimated gross profits on the fixed annuity block driven by the continued low interest rate environment as well as higher variable annuity units costs due to higher than expected surrenders, partially offset by actual separate account returns being above our aggregated estimated returns during the period.

The Unlock charge for the year ended December 31, 2013 was primarily due to assumption changes in connection with the annual policyholder behavior assumption study, partially offset by actual separate account returns above our aggregated estimated returns during the period.

The Unlock charge for the year ended December 31, 2012 was driven primarily by policyholder assumption changes which reduced expected future gross profits including additional costs associated with the U.S. variable annuity macro hedge program, partially offset by actual separate account returns above our aggregated estimated return.

For most annuity contracts, the Company estimates gross profits over 20 years as EGPs emerging subsequent to that time frame are immaterial. Products sold in a particular year are aggregated into cohorts. Future gross profits for each cohort are projected over the estimated lives of the underlying contracts, based on future account value projections for variable annuity. The projection of future account values requires the use of certain assumptions including: separate account returns; separate account fund mix; fees assessed against the contract holder’s account balance; surrender and lapse rates; interest margin; mortality; and the extent and duration of hedging activities and hedging costs. Changes in these assumptions and, in addition, changes to other policyholder behavior assumptions such as resets, partial surrenders, reaction to price increases, and asset allocations causes EGPs to fluctuate which impacts earnings.

The Company determines EGPs from a single deterministic reversion to mean ("RTM") separate account return projection which is an estimation technique commonly used by insurance entities to project future separate account returns. Through this estimation technique, the Company's DAC model is adjusted to reflect actual account values at the end of each quarter. Through consideration of recent market returns, the Company will unlock, or adjust, projected returns over a future period so that the account value returns to the long-term expected rate of return, providing that those projected returns do not exceed certain caps. This Unlock for future separate account returns is determined each quarter. Under RTM, the expected long term weighted average rate of return is 8.3%.

In the third quarter of 2014, the Company completed a comprehensive non-market related policyholder behavior assumption study and incorporates the results of those studies into its projection of future gross profits. Additionally, throughout the year, the Company evaluates various aspects of policyholder behavior and periodically revises its policyholder assumptions as credible emerging data indicates that changes are warranted. The Company will continue to evaluate its assumptions related to policyholder behavior as initiatives to reduce the size of the variable annuity business are implemented by management. Upon completion of an annual assumption study or evaluation of credible new information, the Company will revise its assumptions to reflect its current best estimate. These assumption revisions will change the projected account values and the related EGPs in the DAC, SIA and URR amortization models, as well as the death and other insurance benefit reserving model. Beginning in 2015, the annual comprehensive non-market related policyholder behavior assumption study will be completed in the fourth quarter of the year.

All assumption changes that affect the estimate of future EGPs including the update of current account values, the use of the RTM estimation technique and policyholder behavior assumptions are considered an Unlock in the period of revision. An Unlock adjusts DAC, SIA, URR and death and other insurance benefit reserve balances in the Consolidated Balance Sheets with an offsetting benefit or charge in the Consolidated Statements of Operations in the period of the revision. An Unlock that results in an after-tax benefit generally occurs as a result of actual experience or future expectations of product profitability being favorable compared to previous estimates. An Unlock that results in an after-tax charge generally occurs as a result of actual experience or future expectations of product profitability being unfavorable compared to previous estimates.

EGPs are also used to determine the expected excess benefits and assessments included in the measurement of death and other insurance benefit reserves. These excess benefits and assessments are derived from a range of stochastic scenarios that have been calibrated to the Company's RTM separate account returns. The determination of death and other insurance benefit reserves is also impacted by discount rates, lapses, volatilities, mortality assumptions and benefit utilization, including assumptions around annuitization rates.

An Unlock revises EGPs, on a quarterly basis, to reflect market updates of policyholder account value and the Company's current best estimate assumptions. Modifications to the Company's hedging programs may impact EGPs, and correspondingly impact DAC recoverability. After each quarterly Unlock, the Company also tests the aggregate recoverability of DAC by comparing the DAC balance to the present value of future EGPs. The margin between the DAC balance and the present value of future EGPs for U.S. individual variable annuities was 36% as of December 31, 2014. If the margin between the DAC asset and the present value of future EGPs is exhausted, then further reductions in EGPs would cause portions of DAC to be unrecoverable and the DAC asset would be written down to equal future EGPs.

Evaluation of Other-Than-Temporary Impairments on Available-for-Sale Securities and Valuation Allowances on Mortgage Loans

The Company has a monitoring process that is overseen by a committee of investment and accounting professionals which identifies investments that are subject to an enhanced evaluation on a quarterly basis to determine if an other-than-temporary impairment ("impairment") is present for AFS securities or a valuation allowance is required for mortgage loans. This evaluation is a quantitative and qualitative process, which is subject to risks and uncertainties. For further discussion of the accounting policies, see the Significant Investment Accounting Policies Section in Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Consolidated Financial Statements. For a discussion of impairments recorded, see the Other-Than-Temporary Impairments within the Investment Portfolio Risks and Risk Management section of the MD&A.

Living Benefits Required to be Fair Valued (in Other Policyholder Funds and Benefits Payable)

Fair values for GMWBs classified as embedded derivatives are calculated using the income approach based upon internally developed models, because active and observable markets do not exist for those items. The fair value of these GMWBs and the related reinsurance and customized freestanding derivatives are calculated as an aggregation of the following components: Best Estimate Claim Payments; Credit Standing Adjustment; and Margins. The resulting aggregation is reconciled or calibrated, if necessary, to market information that is, or may be, available to the Company, but may not be observable by other market participants, including reinsurance discussions and transactions. The Company believes the aggregation of these components, as necessary and as reconciled or calibrated to the market information available to the Company, results in an amount that the Company would be required to transfer or receive, for an asset, to or from market participants in an active liquid market, if one existed, for those market participants to assume the risks associated with the guaranteed minimum benefits and the related reinsurance and customized derivatives. The fair value is likely to materially diverge from the ultimate settlement of the liability as the Company believes settlement will be based on our best estimate assumptions rather than those best estimate assumptions plus risk margins. In the absence of any transfer of the guaranteed benefit liability to a third party, the release of risk margins is likely to be reflected as realized gains in future periods' net income. Oversight of the Company's valuation policies and processes for product and GMWB reinsurance derivatives is performed by a multidisciplinary group comprised of finance, actuarial and risk management professionals. This multidisciplinary group reviews and approves changes and enhancements to the Company's valuation model as well as associated controls

For further discussion on the impact of fair value changes from living benefits see Note 5 - Fair Value Measurements of Notes to Consolidated Financial Statements, and for a discussion on the sensitivities of certain living benefits due to capital market factors see Variable Product Guarantee Risks and Risk Management section of the MD&A.

Goodwill Impairment

Goodwill balances are reviewed for impairment at least annually or more frequently if events occur or circumstances change that would indicate that a triggering event for a potential impairment has occurred. The goodwill impairment test follows a two-step process. In the first step, the fair value of a reporting unit is compared to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the second step of the impairment test is performed for purposes of measuring the impairment. In the second step, the fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit to determine an implied goodwill value. If the carrying amount of the reporting unit's goodwill exceeds the implied goodwill value, an impairment loss is recognized in an amount equal to that excess.

Management's determination of the fair value of each reporting unit incorporates multiple inputs into discounted cash flow calculations including assumptions that market participants would make in valuing the reporting unit. Assumptions include levels of economic capital, future business growth, earnings projections, assets under management for Mutual Funds, and the weighted average cost of capital used for purposes of discounting. Decreases in the amount of legal entity capital held or economic capital allocated to a reporting unit, decreases in business growth, decreases in earnings projections and increases in the weighted average cost of capital will all cause a reporting unit's fair value to decrease.

A reporting unit is defined as an operating segment or one level below an operating segment. The Company's reporting units, for which goodwill has been allocated, are equivalent to the Company's operating segments of Group Benefits, Personal Lines and Mutual Funds.

The carrying value of goodwill is $498 as of December 31, 2014 and is comprised of $138 for Group Benefits, $119 for Personal Lines, and $241 for Mutual Funds.

The annual goodwill assessment for the Group Benefits, Personal Lines and Mutual Funds reporting units was completed during the fourth quarter of 2014, which resulted in no write-downs of goodwill for the year ended December 31, 2014. The reporting units passed the first step of the annual impairment test with a significant margin with the exception of the Group Benefits reporting unit. Group Benefits passed the first step of its annual impairment test with less than a 10% margin. The fair value of the Group Benefits reporting unit is based on discounted cash flows using earnings projections on in force business and future business growth. There could be a positive or negative impact on the results of step one in future periods if assumptions change about the level of economic capital, future business growth, earnings projections or the weighted average cost of capital. Please see Note 9 - Goodwill for information regarding the 2013 and 2012 impairment tests.

Valuation of Investments and Derivative Instruments

Fixed Maturities, AFS; Equity Securities, AFS; Equity Securities, FVO, Fixed Maturities, FVO; Equity Securities, Trading; and Short-term Investments

The fair value of AFS securities, fixed maturities, FVO, equity securities, trading, and short-term investments in an active and orderly market (i.e., not distressed or forced liquidation) are determined by management after considering one of three primary sources of information: third-party pricing services, independent broker quotations or pricing matrices. Security pricing is applied using a “waterfall” approach whereby publicly available prices are first sought from third-party pricing services, any remaining unpriced securities are submitted to independent brokers for prices, or lastly, securities are priced using a pricing matrix. Typical inputs used by these pricing methods include, but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flows, prepayment speeds and default rates. Based on the typical trading volumes and the lack of quoted market prices for fixed maturities, third-party pricing services will normally derive the security prices through recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information as outlined above. If there are no recent reported trades, the third party pricing services and brokers may use matrix or model processes to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Included in the pricing of asset-backed-securities ("ABS") and residential mortgage-backed securities ("RMBS") are estimates of the rate of future prepayments of principal over the remaining life of the securities. Such estimates are derived based upon the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral. Actual prepayment experience may vary from these estimates. For further discussion, see the AFS Securities, Equity Securities, FVO Fixed Maturities, FVO, Equity Securities, Trading, and Short-Term Investments section in Note 5 of Notes to Consolidated Financial Statements.

The Company has analyzed the third-party pricing services' valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. For further discussion of fair value measurement, see Note 5 of Notes to Consolidated Financial Statements.

Derivative Instruments, including embedded derivatives within investments

The fair value of derivative instruments is determined using pricing valuation models for over-the-counter ("OTC") derivatives that utilize market data inputs, quoted market prices for exchanged-traded derivatives and transactions cleared through central clearing houses ("OTC-cleared"), or independent broker quotations. Excluding embedded and reinsurance related derivatives, as of December 31, 2014 and 2013, 96% and 97%, respectively, of derivatives, based upon notional values, were priced by valuation models or quoted market prices. The remaining derivatives were priced by broker quotations. The derivatives are valued using mid-market level inputs that are predominantly observable in the market with the exception of the customized swap contracts that hedge GMWB liabilities. Inputs used to value derivatives include, but are not limited to, swap interest rates, foreign currency forward and spot rates, credit spreads and correlations, interest and equity volatility and equity index levels. For further discussion on derivative instrument valuation methodologies, see the Derivative Instruments, including embedded derivatives within the investments section in Note 5 of Notes to Consolidated Financial Statements. For further discussion on GMWB and other guaranteed living benefits valuation methodologies, see the Living Benefits Required to be Fair Valued section in Note 5 of Notes to Consolidated Financial Statements.

Limited partnerships and other alternative investments

Limited partnerships and other alternative investments include hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value. These funds are fair valued using the net asset value per share or equivalent (“NAV”), as a practical expedient, calculated on a monthly basis and is the amount at which a unit or shareholder may redeem their investment, if redemption is allowed. Certain impediments to redemption include, but are not limited to the following: 1) redemption notice periods vary and may be as long as 90 days, 2) redemption may be restricted (e.g. only be allowed on a quarter-end), 3) a holding period referred to as a lock-up may be imposed whereby an investor must hold their investment for a specified period of time before they can make a notice for redemption, 4) gating provisions may limit all redemptions in a given period to a percentage of the entities' equity interests, or may only allow an investor to redeem a portion of their investment at one time and 5) early redemption penalties may be imposed that are expressed as a percentage of the amount redeemed. The Company assesses impediments to redemption and current market conditions that will restrict the redemption at the end of the notice period. For further discussion of fair value measurement, see Note 5 of Notes to Consolidated Financial Statements. In addition, certain limited partnerships and other alternative investments are accounted for under the equity method of accounting. For further discussion, see the Investments - Overview section of Note 1 of Notes to the Consolidated Financial Statements.

Valuation Allowance on Deferred Tax Assets

Deferred tax assets represent the tax benefit of future deductible temporary differences and operating loss and tax credit carryovers. Deferred tax assets are measured using the enacted tax rates expected to be in effect when such benefits are realized if there is no change in tax law. Under U.S. GAAP, we test the value of deferred tax assets for impairment on a quarterly basis at the entity level within each tax jurisdiction, consistent with our filed tax returns. Deferred tax assets are reduced by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion, or all, of the deferred tax assets will not be realized. The determination of the valuation allowance for our deferred tax assets requires management to make certain judgments and assumptions. In evaluating the ability to recover deferred tax assets, we have considered all available evidence as of December 31, 2014, including past operating results, the existence of cumulative losses in the most recent years, forecasted earnings, future taxable income, and prudent and feasible tax planning strategies. In the event we determine it is not more likely than not that we will not be able to realize all or part of our deferred tax assets in the future, an increase to the valuation allowance would be charged to earnings in the period such determination is made. Likewise, if it is later determined that it is more likely than not that those deferred tax assets would be realized, the previously provided valuation allowance would be reversed. Our judgments and assumptions are subject to change given the inherent uncertainty in predicting future performance and specific industry and investment market conditions.

The Company has recorded a deferred tax asset valuation allowance that is adequate to reduce the total deferred tax asset to an amount that will be more likely than not realized. The deferred tax asset valuation allowance was $181, relating mostly to the U.S. capital loss carryover, as of December 31, 2014 and $4, relating mostly to U.S. net operating losses, as of December 31, 2013. In assessing the need for a valuation allowance, management considered future taxable temporary difference reversals, future taxable income exclusive of reversing temporary differences and carryovers, taxable income in open carry back years, as well as other tax planning strategies. These tax planning strategies include holding a portion of debt securities with market value losses until recovery, altering the level of tax exempt securities held, making investments that allow utilization of foreign tax credits, business considerations such as asset-liability matching, and making investments which have specific tax characteristics. Management views such tax planning strategies as prudent and feasible, and would implement them, if necessary, to realize the deferred tax asset.

Contingencies Relating to Corporate Litigation and Regulatory Matters

Management evaluates each contingent matter separately. A loss is recorded if probable and reasonably estimable. Management establishes reserves for these contingencies at its “best estimate,” or, if no one number within the range of possible losses is more probable than any other, the Company records an estimated reserve at the low end of the range of losses.

The Company has a quarterly monitoring process involving legal and accounting professionals. Legal personnel first identify outstanding corporate litigation and regulatory matters posing a reasonable possibility of loss. These matters are then jointly reviewed by accounting and legal personnel to evaluate the facts and changes since the last review in order to determine if a provision for loss should be recorded or adjusted, the amount that should be recorded, and the appropriate disclosure. The outcomes of certain contingencies currently being evaluated by the Company, which relate to corporate litigation and regulatory matters, are inherently difficult to predict, and the reserves that have been established for the estimated settlement amounts are subject to significant changes. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to the consolidated financial condition of the Company. In view of the uncertainties regarding the outcome of these matters, as well as the uncertainties regarding tax-deductibility of payments, it is possible that the ultimate cost to the Company of these matters could exceed the reserve by an amount that would have a material adverse effect on the Company’s results of operations or liquidity in a particular quarterly or annual period.

KEY PERFORMANCE MEASURES AND RATIOS

The Company considers the measures and ratios discussed below to be key performance indicators for its businesses. Management believes that these ratios and measures are useful in understanding the underlying trends in The Hartford's businesses. However, these key performance indicators should only be used in conjunction with, and not in lieu of, the results presented in the segment discussions that follow in this MD&A. These ratios and measures may not be comparable to other performance measures used by the Company's competitors.

Definitions of Non-GAAP and other measures and ratios

Account Value

Account value includes policyholders' balances for investment contracts and reserves for future policy benefits for insurance contracts. Account value is a measure used by the Company because a significant portion of the Company's fee income is based upon the level of account value. These revenues increase or decrease with a rise or fall in the amount of account value whether caused by changes in the market or through net flows.

After-tax core earnings margin, excluding buyouts

After-tax core earnings margin, excluding buyouts, is a non-GAAP financial measure that the Company uses to evaluate, and believes is an important measure of, the Group Benefits segment's operating performance. After-tax margin is the most directly comparable U.S. GAAP measure. The Company believes that after-tax core earnings margin, excluding buyouts, provides investors with a valuable measure of the performance of Group Benefits because it reveals trends in the business that may be obscured by the effect of buyouts. After-tax core earnings margin, excluding buyouts, should not be considered as a substitute for after-tax margin and does not reflect the overall profitability of Group Benefits. Therefore, the Company believes it is important for investors to evaluate both after-tax core earnings margin, excluding buyouts, and after-tax margin when reviewing performance. After-tax core earnings margin, excluding buyouts is calculated by dividing core earnings excluding buyouts by revenues excluding buyouts and realized gains (losses). A reconciliation of after-tax margin to after-tax core earnings margin, excluding buyouts for the years ended December 31, 2014, 2013 and 2012 is set forth in the After-tax margin section within MD&A - Group Benefits.

Assets Under Management

Assets under management ("AUM") include account values and mutual fund assets. AUM is a measure used by the Company because a significant portion of the Company's revenues are based upon asset values. These revenues increase or decrease with a rise or fall in the amount of account value whether caused by changes in the market or through net flows.

Catastrophe ratio

The catastrophe ratio (a component of the loss and loss adjustment expense ratio) represents the ratio of catastrophe losses incurred in the current calendar year (net of reinsurance) to earned premiums and includes catastrophe losses incurred for both the current and prior accident years. A catastrophe is an event that causes $25 or more in industry insured property losses and affects a significant number of property and casualty policyholders and insurers. The catastrophe ratio includes the effect of catastrophe losses, but does not include the effect of reinstatement premiums.

Combined ratio

The combined ratio is the sum of the loss and loss adjustment expense ratio, the expense ratio and the policyholder dividend ratio. This ratio is a relative measurement that describes the related cost of losses and expenses for every $100 of earned premiums. A combined ratio below 100 demonstrates underwriting profit; a combined ratio above 100 demonstrates underwriting losses.

Combined ratio before catastrophes and prior accident year development

The combined ratio before catastrophes and prior accident year development, a non-GAAP financial measure, represents the combined ratio for the current accident year, excluding the impact of catastrophes. Combined ratio is the most directly comparable U.S. GAAP measure. A reconciliation of combined ratio to combined ratio before prior accident year reserve development for the years ended December 31, 2014, 2013 and 2012 is set forth in MD&A - Commercial Lines and Personal Lines.

Core Earnings

Core earnings, a non-GAAP measure, is an important measure of the Company's operating performance. The Company believes that core earnings provides investors with a valuable measure of the performance of the Company's ongoing businesses because it reveals trends in our insurance and financial services businesses that may be obscured by including the net effect of certain realized capital gains and losses, discontinued operations, pension settlements, loss on extinguishment of debt, gains and losses on business disposition transactions, certain restructuring and other costs and the impact of Unlocks to DAC, SIA, URR and death and other insurance benefit reserve balances. Some realized capital gains and losses are primarily driven by investment decisions and external economic developments, the nature and timing of which are unrelated to the insurance and underwriting aspects of our business. Accordingly, core earnings excludes the effect of all realized gains and losses (net of tax and the effects of DAC) that tend to be highly variable from period to period based on capital market conditions. The Company believes, however, that some realized capital gains and losses are integrally related to our insurance operations, so core earnings includes net realized gains and losses such as net periodic settlements on credit derivatives. These net realized gains and losses are directly related to an offsetting item included in the income statement such as net investment income. Net income (loss) is the most directly comparable U.S. GAAP measure. Core earnings should not be considered as a substitute for net income (loss) and does not reflect the overall profitability of the Company's business. Therefore, the Company believes that it is useful for investors to evaluate both net income (loss) and core earnings when reviewing the Company's performance.

A reconciliation of net income to core earnings is set forth below:

	For the years ended December 31,		
	2014	**2013**	**2012**
Net income (loss)	**$ 798**	**$ 176**	**$ (38)**
Less: Unlock charge, after-tax	(62)	(109)	(138)
Less: Restructuring and other costs, after-tax	(49)	(44)	(129)
Less: Loss from discontinued operations, after-tax	(551)	(1,049)	(258)
Less: Pension settlement, after-tax	(83)	—	—
Less: Loss on extinguishment of debt, after-tax	—	(138)	(587)
Less: Net reinsurance gain (loss) on dispositions, after-tax	15	(24)	(388)
Less: Net realized capital gains (losses), after-tax and DAC, excluded from core earnings [1]	(20)	121	340
Core earnings	**$ 1,548**	**$ 1,419**	**$ 1,122**

[1] Excludes net realized gain on dispositions of $1.0 billion, after-tax, for the year ended December 31, 2013 relating to the sales of the Retirement Plans and Individual Life businesses which are included in net reinsurance loss on dispositions, after-tax.

Current accident year loss and loss adjustment expense ratio before catastrophes

The current accident year loss and loss adjustment expense ratio before catastrophes is a measure of the cost of non-catastrophe claims incurred in the current accident year divided by earned premiums. Management believes that the current accident year loss and loss adjustment expense ratio before catastrophes is a performance measure that is useful to investors as it removes the impact of volatile and unpredictable catastrophe losses and prior accident year reserve development.

Expense ratio

The expense ratio for the underwriting segments of Commercial Lines and Personal Lines is the ratio of underwriting expenses to earned premiums. Underwriting expenses include the amortization of deferred policy acquisition costs and insurance operating costs and expenses, including certain centralized services and bad debt expense. Deferred policy acquisition costs include commissions, taxes, licenses and fees and other underwriting expenses and are amortized over the policy term.

The expense ratio for Group Benefits is expressed as the ratio of insurance operating costs and other expenses and amortization of deferred policy acquisition costs, to premiums and other considerations, excluding buyout premiums.

Fee Income

Fee income is largely driven from amounts collected as a result of contractually defined percentages of assets under management. These fees are generally collected on a daily basis. Therefore, the growth in assets under management either through positive net flows or net sales, or favorable equity market performance will have a favorable impact on fee income. Conversely, either negative net flows or net sales, or unfavorable equity market performance will reduce fee income.

Full Surrender Rates

Full surrender rates are an internal measure of contract surrenders calculated using annualized full surrenders divided by a two-point average of annuity account values. The full surrender rate represents full contract liquidation and excludes partial withdrawals.

Loss and loss adjustment expense ratio

The loss and loss adjustment expense ratio is a measure of the cost of claims incurred in the calendar year divided by earned premium and includes losses incurred for both the current and prior accident years, as well as the costs of mortality and morbidity and other contractholder benefits to policyholders. Among other factors, the loss and loss adjustment expense ratio needed for the Company to achieve its targeted return on equity fluctuates from year to year based on changes in the expected investment yield over the claim settlement period, the timing of expected claim settlements and the targeted returns set by management based on the competitive environment.

The loss and loss adjustment expense ratio is affected by claim frequency and claim severity, particularly for shorter-tail property lines of business, where the emergence of claim frequency and severity is credible and likely indicative of ultimate losses. Claim frequency represents the percentage change in the average number of reported claims per unit of exposure in the current accident year compared to that of the previous accident year. Claim severity represents the percentage change in the estimated average cost per claim in the current accident year compared to that of the previous accident year. As one of the factors used to determine pricing, the Company's practice is to first make an overall assumption about claim frequency and severity for a given line of business and then, as part of the ratemaking process, adjust the assumption as appropriate for the particular state, product or coverage.

Loss ratio, excluding buyouts

The loss ratio is utilized for the Group Benefits segment and is expressed as a ratio of benefits, losses and loss adjustment expenses to premiums and other considerations, excluding buyout premiums. Since Group Benefits occasionally buys a block of claims for a stated premium amount, the Company excludes this buyout from the loss ratio used for evaluating the underwriting results of the business as buyouts may distort the loss ratio. Buyout premiums represent takeover of open claim liabilities and other non-recurring premium amounts.

Mutual Fund Assets

Mutual fund assets are owned by the shareholders of those funds and not by the Company and therefore are not reflected in the Company's consolidated financial statements. Mutual fund assets are a measure used by the Company because a significant portion of the Company's revenues are based upon asset values. These revenues increase or decrease with a rise or fall in the amount of account value whether caused by changes in the market or through net flows.

New business written premium

New business written premium represents the amount of premiums charged for policies issues to customers who were not insured with the Company in the previous policy term. New business written premium plus renewal policy written premium equals total written premium.

Policies in force

Policies in force represent the number of policies with coverage in effect as of the end of the period. The number of policies in force is a growth measure used for Personal Lines and standard commercial lines within Commercial Lines and is affected by both new business growth and policy count retention.

Policy count retention

Policy count retention represents the ratio of the number of policies renewed during the period divided by the number of policies available to renew. The number of policies available to renew represents the number of policies, net of any cancellations, written in the previous policy term. Policy count retention is affected by a number of factors, including the percentage of renewal policy quotes accepted and decisions by the Company to non-renew policies because of specific policy underwriting concerns or because of a decision to reduce premium writings in certain classes of business or states. Policy count retention is also affected by advertising and rate actions taken by competitors.

Policyholder dividend ratio

The policyholder dividend ratio is the ratio of policyholder dividends to earned premium.

Prior accident year loss and loss adjustment expense ratio

The prior year loss and loss adjustment expense ratio represents the increase (decrease) in the estimated cost of settling catastrophe and non-catastrophe claims incurred in prior accident years as recorded in the current calendar year divided by earned premiums.

Reinstatement premiums

Reinstatement premium represents additional ceded premium paid for the reinstatement of the amount of reinsurance coverage that was reduced as a result of a reinsurance loss payment.

Renewal earned price increase (decrease)

Written premiums are earned over the policy term, which is six months for certain personal lines auto business and twelve months for substantially all of the remainder of the Company’s property and casualty business. Because the Company earns premiums over the six to twelve month term of the policies, renewal earned price increases (decreases) lag renewal written price increases (decreases) by six to twelve months.

Renewal written price increase (decrease)

Renewal written price increase (decrease) represents the combined effect of rate changes, amount of insurance and individual risk pricing decisions per unit of exposure since the prior year. The rate component represents the change in rate filings during the period and the amount of insurance represents the change in the value of the rating base, such as model year/vehicle symbol for auto, building replacement costs for property and wage inflation for workers’ compensation. A number of factors affect renewal written price increases (decreases) including expected loss costs as projected by the Company’s pricing actuaries, rate filings approved by state regulators, risk selection decisions made by the Company’s underwriters and marketplace competition. Renewal written price changes reflect the property and casualty insurance market cycle. Prices tend to increase for a particular line of business when insurance carriers have incurred significant losses in that line of business in the recent past or the industry as a whole commits less of its capital to writing exposures in that line of business. Prices tend to decrease when recent loss experience has been favorable or when competition among insurance carriers increases. Renewal written price statistics are subject to change from period to period, based on a number of factors, including changes in actuarial estimates and the effect of subsequent cancellations and non-renewals on rate achieved, and modifications made to better reflect ultimate pricing achieved.

Return on Assets (“ROA”), core earnings

ROA, core earnings, is a non-GAAP financial measure that the Company uses to evaluate, and believes is an important measure of, certain of the segment’s operating performance. ROA is the most directly comparable U.S. GAAP measure. The Company believes that ROA, core earnings, provides investors with a valuable measure of the performance of certain of the Company’s on-going businesses because it reveals trends in our businesses that may be obscured by the effect of realized gains (losses). ROA, core earnings, should not be considered as a substitute for ROA and does not reflect the overall profitability of our businesses. Therefore, the Company believes it is important for investors to evaluate both ROA, core earnings, and ROA when reviewing the Company’s performance. ROA is calculated by dividing core earnings by a two-point average AUM. A reconciliation of ROA to ROA, core earnings for the years ended December 31, 2014, 2013 and 2012 is set forth in the ROA section within MD&A - Mutual Funds.

Underwriting gain (loss)

The Company's management evaluates profitability of the P&C businesses primarily on the basis of underwriting gain (loss). Underwriting gain (loss) is a before-tax measure that represents earned premiums less incurred losses, loss adjustment expenses and underwriting expenses. Underwriting gain (loss) is influenced significantly by earned premium growth and the adequacy of the Company's pricing. Underwriting profitability over time is also greatly influenced by the Company's pricing and underwriting discipline, which seeks to manage exposure to loss through favorable risk selection and diversification, its management of claims, its use of reinsurance and its ability to manage its expense ratio, which it accomplishes through economies of scale and its management of acquisition costs and other underwriting expenses. Net income (loss) is the most directly comparable GAAP measure. The Company believes that underwriting gain (loss) provides investors with a valuable measure of before-tax profitability derived from underwriting activities, which are managed separately from the Company's investing activities. A reconciliation of underwriting gain (loss) to net income (loss) for Commercial Lines, Personal Lines and Property & Casualty Other Operations is set forth in their respective discussions herein.

Written and earned premiums

Written premium is a statutory accounting financial measure which represents the amount of premiums charged for policies issued, net of reinsurance, during a fiscal period. Earned premium is a U.S. GAAP and statutory measure. Premiums are considered earned and are included in the financial results on a pro rata basis over the policy period. Management believes that written premium is a performance measure that is useful to investors as it reflects current trends in the Company's sale of property and casualty insurance products. Written and earned premium are recorded net of ceded reinsurance premium.

Traditional life insurance type products, such as those sold by Group Benefits, collect premiums from policyholders in exchange for financial protection for the policyholder from a specified insurable loss, such as death or disability. These premiums together with net investment income earned from the overall investment strategy are used to pay the contractual obligations under these insurance contracts. Two major factors, new sales and persistency, impact premium growth. Sales can increase or decrease in a given year based on a number of factors, including but not limited to, customer demand for the Company's product offerings, pricing competition, distribution channels and the Company's reputation and ratings. Persistency refers to the percentage of policies remaining in-force from year-to-year.

COMMERCIAL LINES

Results of Operations

Underwriting Summary	2014	2013	2012

Combined ratio before catastrophes and prior year development	**91.5**	**95.1**	**98.3**

2015 Outlook

The Company expects economic conditions to continue to improve slowly driving a modest increase in exposures, while pricing is anticipated to moderate. As such, the Company expects low-to-mid single-digit written premiums growth in 2015 driven by small commercial and middle market where the Company continues to develop comprehensive product solutions, deeper relationships with distribution partners, differentiating customer experiences and enhanced ease of doing business processes and technologies. In specialty lines, the Company expects modest written premium growth in professional liability. The Company expects the combined ratio before catastrophes and prior accident year development will be between approximately 89.5 and 91.5 for 2015, compared to 91.5 in 2014, due to stable to slightly improving margins as earned pricing increases are expected to be slightly ahead of long-term loss costs trends.

Year ended December 31, 2014 compared to the year ended December 31, 2013

Overview

Net income, as compared to the prior year period, increased in 2014 primarily due to an improvement in underwriting results, driven by lower current accident year losses and loss adjustment expenses before catastrophes and lower prior accident years development, partially offset by a shift to net realized capital losses in the current year from net realized capital gains in the prior year period. Underwriting expenses, compared to the prior year period, reflect a reduction of $49, before tax, in the Company's estimated liability for NY State Workers' Compensation Board assessments.

Revenues - Earned and Written Premiums

Earned premiums increased in 2014, reflecting the impact of higher written premiums primarily in small commercial and to a lesser extent in middle market, partially offset by written premium declines in specialty lines.

Written premium increased in all small commercial lines of business, driven by favorable renewal premium due to higher policy count retention and higher written pricing, as well as an increase in new business and higher audit premium on workers' compensation policies. Written premium increases in middle market were driven primarily by higher renewal written premium in property, general liability and auto, partially offset by the impact of underwriting actions that reduced written premium in the programs business. Written premium decreases in specialty lines were primarily the result of underwriting actions to improve profitability of the captives business, partially offset by growth in national accounts and bond.

Losses and Loss Adjustment Expenses

Losses and loss adjustment expenses reflect favorable current accident year losses before catastrophes in all lines of business and lower unfavorable prior accident years development.

- The reduction in the current accident year loss and loss adjustment expense ratio before catastrophes in 2014 was primarily driven by a lower loss and loss adjustment expense ratio in workers' compensation due to earned pricing increases and favorable frequency and severity trends. Accordingly, the current accident year loss and loss adjustment expense ratio before catastrophes decreased by 3.4 points to 59.4 in 2014 from 62.8 in 2013.
- Current accident year catastrophe losses of $109, before tax, in 2014, compared to $105, before tax, in 2013. Losses in 2014 were primarily due to multiple winter storm and wind and hail events across various U.S. geographic regions. Losses in 2013 were primarily due to multiple wind and hail and tornado events across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.
- Prior accident years reserve strengthening of $13, before tax, in 2014, compared to $83, before tax, in 2013. Development in 2014 was primarily due to discount accretion on workers' compensation and strengthening related to commercial auto liability, partially offset by a release of professional and general liability reserves. Development in 2013 was primarily due to strengthening related to commercial auto liability and the closing of the New York Section 25A Fund for Reopened Cases, partially offset by a release of professional and general liability reserves. For additional information, see MD&A - Critical Accounting Estimates, Reserve Roll-forwards and Development.

Underwriting Ratios

The combined ratio, before catastrophes and prior year development, improved 3.6 points to 91.5 in 2014 from 95.1 in 2013. The improvement primarily reflects a decrease in the current accident year loss and loss adjustment expense ratio before catastrophes, as well as a decrease in the expense ratio (including a 0.8 point favorable impact on the expense ratio related to a reduction in NY State Workers' Compensation Board assessments).

Investment Results

Investment income decreased in 2014, as compared to the prior year period. For discussion of consolidated investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses).

Income Taxes

The effective tax rate, in both periods, differs from the U.S. Federal statutory rate primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Overview

Net income, as compared to the prior year period, increased in 2013 primarily due to improvements in underwriting results, driven by lower current accident year losses and loss adjustment expenses before catastrophes and lower current accident year catastrophe losses.

Revenues - Earned and Written Premium

Earned premiums decreased in 2013, reflecting the impact of lower written premiums primarily in middle market and specialty lines, partially offset by written premium growth in small commercial.

Written premium increases in small commercial, primarily in workers' compensation business, were driven by favorable audit premium as well as favorable renewal premium due to higher earned pricing, partially offset by lower policy count retention. Written premium decreases in middle market were driven primarily by lower renewal premium in workers' compensation business partially offset by new business premium growth in property, general liability and auto and favorable overall inforce policy retention. Written premium decreases in specialty lines were primarily the result of underwriting actions to reposition the captives business and exit unprofitable programs partially offset by new business growth in national accounts. The Company ceased writing all transportation programs effective January 1, 2014.

Losses and Loss Adjustment Expenses

Losses and loss adjustment expenses reflect favorable current accident year losses before catastrophes in all three businesses and a significant decline in current accident year catastrophes partially offset by unfavorable prior accident years development.

- Favorable current accident year losses and loss adjustment expenses before catastrophes were primarily driven by lower loss and loss adjustment expenses in workers' compensation due to favorable severity and frequency. The current accident year loss and loss adjustment expense ratio before catastrophes decreased accordingly by 4.0 points to 62.8 in 2013 from 66.8 in 2012.
- Current accident year catastrophe losses of $105, before tax, in 2013, compared to $325, before tax, in 2012. Losses in 2013 were primarily due to multiple thunderstorm, hail and tornado events across various U.S. geographic regions. Losses in 2012 were primarily driven by $207 related to Storm Sandy and multiple thunderstorm, hail and tornado events across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.
- Prior accident years reserve strengthening of $83, before tax, in 2013, compared to $72, before tax, in 2012. Development in 2013 was primarily due to strengthening related to commercial auto liability and the closing of the New York Section 25A Fund for Reopened Cases partially offset by a release of general liability reserves. Development in 2012 was primarily due to strengthening related to commercial auto liability claims, professional liability directors and officers claims and workers compensation partially offset by a release of general liability and catastrophe reserves. For additional information, see MD&A - Critical Accounting Estimates, Reserve Roll-forwards and Development.

Underwriting Ratios

The combined ratio, before catastrophes and prior year development, improved 3.2 points to 95.1 in 2013 from 98.3 in 2012. The improvement primarily reflects a decrease in the current accident year before catastrophes loss and loss adjustment expense ratio.

Investment Results

Investment income increased in 2013, as compared to the prior year period. For discussion of consolidated investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses).

Income Taxes

The effective tax rate, in both periods, differs from the U.S. Federal statutory rate primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Automobile	98.4	99.0	99.1
Homeowners	90.0	90.7	98.2

2015 Outlook

The Company expects moderate written premium growth driven by AARP Direct and AARP Agency. The Company expects the combined ratio before catastrophes and prior accident year development will be between approximately 89.0 and 91.0 for 2015 compared to 90.6 in 2014. The current accident year loss and loss adjustment expense ratio before catastrophes is expected to improve modestly for 2015, driven by continued focus on rate adequacy. For auto, the current accident year loss and loss adjustment expense ratio before catastrophes is expected to decline slightly in 2015, driven by earned pricing increases partially offset by moderate average claim severity. For homeowners, the current accident year loss and loss adjustment expense ratio before catastrophes is expected to decline in 2015, driven by earned pricing increases and lower claim frequency partially offset by increased average claim severity.

Year ended December 31, 2014 compared to the year ended December 31, 2013

Overview

Net income, as compared to the prior year period, decreased in 2014 primarily due to a change to net realized capital losses and a decrease in net servicing income, partially offset by improvements in underwriting results, driven by higher earned premiums and lower underwriting expenses.

Revenues - Earned and Written Premiums

Earned and written premiums increased in 2014 reflecting new business written premium growth in auto, primarily from AARP Direct and AARP Agency, improved earned pricing increases in both auto and homeowners, and continued high levels of premium retention.

Losses and Loss Adjustment Expenses

Losses and loss adjustment expenses reflect an increase in current accident year loss and loss adjustment expenses before catastrophes and higher current accident year catastrophes, partially offset by higher favorable prior accident years development.

- Current accident year losses and loss adjustment expenses before catastrophes increased in 2014 compared to 2013 driven by growth in earned premium, partially offset by a decline in the current accident year loss and loss adjustment expense ratio before catastrophes to 65.6 in 2014 from 65.9 in 2013.
- Current accident year catastrophe losses of $232, before tax, in 2014 compared to $207, before tax, in 2013. Losses in 2014 were primarily due to multiple thunderstorm and winter storm events across various U.S. geographic regions. Losses in 2013 were primarily due to multiple thunderstorm, hail and tornado events across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.
- Prior accident years reserve releases of $46, before tax, in 2014 compared to $39, before tax, in 2013. Reserve releases in 2014 were primarily related to prior accident year catastrophes, as well as prior accident year homeowners and extra contractual liability reserves. Reserve releases in 2013 were primarily related to Storm Sandy. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.

Underwriting Ratios

The combined ratio, before current accident year catastrophes and prior year development, improved to 90.6 in 2014 from 92.3 in 2013.

Investment Results

Investment income decreased in 2014, as compared to the prior year period. For discussion of consolidated investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses).

Income Taxes

The effective tax rates in 2014 and 2013 differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Overview

Net income, as compared to the prior year period, increased in 2013 primarily due to improvements in underwriting results, driven by lower current year catastrophes partially offset by lower favorable prior year development.

Revenues - Earned and Written Premiums

Earned and written premiums increased in 2013, reflecting new business written premium growth in auto and home, primarily from the AARP Direct and AARP through agents distribution channels and improved policy count retention in auto and home due to initiatives implemented over the last two years.

Losses and Loss Adjustment Expenses

Losses and loss adjustment expenses reflect a decline in current accident year catastrophes partially offset by lower favorable prior accident years development.

- Current accident year losses and loss adjustment expenses before catastrophes increased in 2013 compared to 2012 in line with the growth in earned premium and as reflected by the current accident year loss and loss adjustment expense ratio before catastrophes of 65.9 in 2013 as compared with 65.7 in 2012.
- Current accident year catastrophe losses of $207, before tax, in 2013 compared to $381, before tax in 2012. Losses in 2013 were primarily due to multiple thunderstorm, hail and tornado events across various U.S. geographic regions. Losses in 2012 were primarily driven by losses from Storm Sandy of $143 along with other thunderstorm and hail events across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.
- Prior accident years reserve releases of $39, before tax, in 2013 compared to $141, before tax, in 2012. Reserve releases in 2013 were primarily related to Storm Sandy. Reserve releases in 2012 were due to favorable emergence of losses in auto liability, homeowners and catastrophes. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.

Underwriting Ratios

The combined ratio, before current accident year catastrophes and prior year development, stayed consistent at 92.3 for 2012 and 2013.

Investment Results

Investment income increased in 2014, as compared to the prior year period. For discussion of consolidated investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses).

Income Taxes

The effective tax rates in 2013 and 2012 differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Year ended December 31, 2014 compared to the year ended December 31, 2013

Net loss, as compared to the prior year period, increased in 2014 primarily due to an increase in net asbestos and environmental reserve strengthening. As part of its annual ground-up asbestos and environmental reserve evaluations in 2014, the Company strengthened its associated reserves by $212 and $27, before tax, respectively. In 2013, the Company strengthened its net asbestos and environmental reserves by $130 and $10, before tax, respectively.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Net income, as compared to the prior year period, decreased in 2013 primarily due to net asbestos and environmental reserve strengthening. As part of its annual ground-up asbestos and environmental reserve evaluations in 2013, the Company strengthened its associated reserves by $130 and $10, before tax, respectively. In 2012, the Company strengthened its net asbestos and environmental reserves by $48 and $3, before tax, respectively.

The effective tax rates in 2014, 2013 and 2012 differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see the Income Taxes section within Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Consolidated Financial Statements.

For information on net asbestos and environmental reserves, see Property & Casualty Other Operations Claims within the Property and Casualty Insurance Product Reserves, Net of Reinsurance section in Critical Accounting Estimates.

[1] Group Benefits has a block of Association - Financial Institution business that is subject to a profit sharing arrangement with third parties. The Association - Financial Institutions business represented $72, $277 and $321 of premiums and other considerations, and $1, $1 and $2 of net income in 2014, 2013 and 2012, respectively.

2015 Outlook

The Company expects premiums to increase for 2015 due primarily to higher expected sales than prior year and continued strong book persistency. The Company expects Group Benefits' disability results to improve as a result of continued pricing actions, and lower incidence partially offset by lower life results due to less favorable life mortality compared to 2014. The Company expects Group Benefits' after-tax core earnings margin (excluding buyouts) will be between approximately 5.0% and 5.5% for 2015 as compared to 5.2% in 2014.

Year ended December 31, 2014 compared to the year ended December 31, 2013

Net income slightly decreased in 2014, as compared to the prior year period, primarily due to lower premiums and other considerations, net investment income and net realized capital gains, offset by lower benefits, losses and loss adjustment expenses and insurance operating costs and other expenses.

Premiums and other considerations decreased in 2014, as compared to the prior year period, due primarily to management actions related to the Association - Financial Institutions block of business. Insurance operating costs and other expenses decreased in 2014, compared to the prior year period, due primarily to lower profit sharing expense related to the Association - Financial Institutions block of business.

Fully insured ongoing sales, excluding buyouts declined 17% in 2014, as compared to prior year period. Excluding Association - Financial Institutions block of business, fully insured ongoing sales, excluding buyouts decreased 12% in 2014 primarily due to lower large case sales.

The total loss ratio increased by 0.6 points in 2014, as compared to the prior year period. Excluding the Association - Financial Institutions block of business, the loss ratio improved 1.9 points in 2014 due to improvements in both the life and disability loss ratios. The life loss ratio improvement reflects favorable mortality experience, improved pricing, and the impact of changes in reserve assumptions. The disability loss ratio improvement reflects improved accident year incidence and pricing partially offset by higher new claim severity and less favorable development on prior accident year recoveries.

The expense ratio improved 1.7 points in 2014, compared to the prior year period, primarily due to lower profit sharing expense related to the Association - Financial Institutions block of business in relation to lower premium and other considerations.

The after-tax core earnings margin, excluding buyouts, improved 0.9 points in 2014, compared to the prior year period. The improvement was primarily due to the improved loss ratio excluding the Association - Financial Institutions block of business.

Investment income and net realized capital gains decreased in 2014, as compared to the prior year period. For discussion of consolidated investment results, see MD&A - Investment Results, Investment Income (Loss) and Net Realized Capital Gains (Losses).

The effective tax rate, in both periods, differs from the U.S. Federal statutory rate primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Net income, as compared to the prior year period, increased in 2013 driven primarily by an improvement in the loss ratio and lower insurance operating costs and other expenses, partially offset by a decrease in premiums and other considerations.

The decrease in premiums was driven by continued pricing discipline, our decision not to renew our largest account effective January 1, 2013 due to pricing and other considerations and management actions to reduce the association business. Insurance operating costs and other expenses decreased in 2013 as compared to the prior year due to lower commission payments as a result of overall lower premiums.

The improvement in the loss ratio in 2013 was primarily attributable to the long-term disability product driven by favorable claim recoveries from claims incurred in 2013 and prior years, lower incidence trends and improved renewal pricing. Additionally, the 2012 loss ratio reflected unfavorable long-term disability severity. The increase in after-tax core earnings margin, excluding buyouts, was primarily due to an improved loss ratio.

The effective tax rate, in both periods, differs from the U.S. Federal statutory rate primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

[1] The year ended December 31, 2014 includes a planned asset transfer of $0.7 billion to the HIMCO Variable Insurance Trust ("HVIT") which supports legacy retirement mutual funds and runoff mutual funds (see footnote [3]). HVIT's invested assets are managed by Hartford Investment Management Company, a wholly-owned subsidiary of the Company.

[2] Talcott AUM (formerly Annuity Mutual Fund Assets) consist of Company-sponsored mutual fund assets held in separate accounts supporting variable insurance and investment products. The year ended December 31, 2014 includes a planned asset transfer of $2.0 billion to HVIT.

[3] Includes balanced, allocation, target date and alternative investment products.

2015 Outlook

The primary objective of Mutual Funds is to grow total AUM and core earnings. Strong fund performance, market appreciation, developing and maintaining client relationships and positive net flows are all factors that can increase AUM. Assuming normal market conditions, Mutual Funds expects moderate 2015 earnings growth driven by improved earnings from Mutual Fund assets offset by the runoff of the Talcott assets supporting the Hartford's legacy variable insurance products. The relationship with Wellington Management, sole sub-advisor for Mutual Funds, provides clients with a diversified lineup of domestic and international equity, fixed income, alternative, and asset allocation funds. These products combined with our strong long-term fund performance and expanded key client relationships are critical to drive improved net flows and future earnings.

Year ended December 31, 2014 compared to the year ended December 31, 2013

Net income, as compared to the prior year period, increased in 2014 primarily due to higher fee revenue driven by higher Mutual Fund average AUM. AUM increased reflecting positive market performance of the Mutual Fund assets throughout the year coupled with year over year improvements in net flows offset by expected runoff of Talcott assets. Redemptions in 2014 included fund liquidations of $0.7 billion and a transfer of HVIT assets within the Hartford of $2.7 billion.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Net income, as compared to the prior year period, increased in 2013 primarily due to higher fee revenue driven by higher Mutual Fund average AUM and partially offset by increased sales related expenses. AUM increased reflecting positive market performance of the Mutual Fund assets throughout the year offset by expected runoff of Talcott assets. Redemptions in 2013 included a portfolio rebalance at a key distributor and an institutional redemption, together totaling $2.5 billion.

Account value, beginning of period	**$ 61,812**	**$ 64,824**	**$ 68,760**
Net outflows	(11,726)	(14,598)	(11,388)
Change in market value and other	2,775	11,586	7,452
Account value, end of period	**$ 52,861**	**$ 61,812**	**$ 64,824**

[1] Includes earned premiums, fee income and other related to the Retirement Plans business of $38 and $368 and the Individual Life business of $2 and $866, for the years ended December 31, 2013 and 2012, respectively.

[2] Represents the loss from operations and sale of HLIKK in 2014, 2013 and 2012, and HLIL in 2013 and 2012. For additional information, see Note 19 Discontinued Operations of Notes to Consolidated Financial Statements.

[3] Included in the balance is approximately $(1.0) billion and $(1.2) billion for the years ended December 31, 2013 and 2012, respectively, related to a Talcott Resolution intra-segment funding agreement which eliminates in consolidation.

[4] Other account value includes $53.0 billion, $14.9 billion, and $39.8 billion as of December 31, 2014, and $54.7 billion, $14.7 billion, and $38.7 billion as of December 31, 2013, for the Retirement Plans, Individual Life, and Private Placement Life Insurance businesses; respectively. Account values associated with the Retirement Plans, and Individual Life businesses no longer generate asset-based fee income due to the sales of these businesses through reinsurance.

[5] Includes net losses for the year ended December 31, 2012, related to the Retirement Plans and Individual Life businesses sold in 2013 of $39 and $172, respectively. For further discussion of the disposed businesses, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

[6] Excludes account value related to the Japan business sold on June 30, 2014.

2015 Outlook

The principal goal for Talcott Resolution is to reduce the size and risk associated with the Company's in-force variable annuities. As a result, the Company expects account values and consequently earnings to decline due to surrenders, policyholder initiatives or transactions with third parties, that will reduce the size of this legacy book of business. Risk-reducing transactions may also cause a reduction in statutory capital and shareholders' equity.

As the Company's annuity book continues to run off, earnings will continue to decline. A key driver to the decline in earnings will be the pace at which customers surrender their contracts. In 2014, the Company continued to experience double digit variable annuities surrender rates driven by market appreciation, continued aging of the block and in-force management initiatives. Contract counts decreased 13% for variable annuities in 2014. Looking forward, the Company expects variable annuity surrender rates to decline in 2015, as 2014 included the effect of in-force management initiatives. The decline in policy counts will likely result in unit cost increases and margin compression because expenses will not reduce at the same pace as the annuity block, further contributing to a decline in earnings over time.

Year ended December 31, 2014 compared to the year ended December 31, 2013

The net loss for the year ended December 31, 2014 decreased compared to the net loss for the year ended December 31, 2013 primarily due to the decrease in the loss from discontinued operations, net of tax, related to the sale of HLIKK. Also contributing to the decrease in net loss were lower amortization of DAC, and lower insurance operating costs and other expenses, including lower costs associated with the enhanced surrender value program, and higher income from limited partnerships and other alternative investments, partially offset by a decline in earned fee income attributable to the continued run off of the business, and a decline in net investment income excluding that from limited partnerships and other alternative investments.

Account values for Talcott Resolution decreased to approximately $185 billion at year ended December 31, 2014 from approximately $219 billion at year ended December 31, 2013 due primarily to the sale of HLIKK, and net outflows partially offset by market value appreciation in variable annuities. For the year ended December 31, 2014 variable annuity net outflows decreased by approximately $2.9 billion as compared to the prior year period due to lower outflows from in-force management initiatives.

For the year ended December 31, 2014 the annualized full surrender rate on variable annuities declined to 13.5% compared to 16.7% for the year ended December 31, 2013. This decline was primarily due to lower surrenders from in-force management initiatives.

Contract counts decreased 13% for variable annuities at year ended December 31, 2014 compared to year ended December 31, 2013 primarily due to market appreciation, in-force management initiatives and the continued aging of the block.

The effective tax rates in 2014 and 2013 differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in separate account DRD. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Year ended December 31, 2013 compared to the year ended December 31, 2012

The net loss for the year ended December 31, 2013 was primarily driven by Unlock charges of $806, before tax, during the current year period compared to an Unlock benefit of $47, before tax, in the prior year period. The Unlock charge for the year ended 2013 includes a charge of $887, before tax, for hedge cost assumption changes associated with expanding the Japan variable annuity hedging program in the first quarter of 2013. In addition, variable annuity hedge program losses for the year ended 2013 were $1,558, before tax, including international losses of $1,586, compared to losses of $1,288 before tax, including international losses of $1,467, for the prior year period.

Lower fee income in 2013 due to the continued runoff of the variable annuity business, as well as costs associated with an enhanced surrender value program in the U.S., also contributed to the net loss for the year ended December 31, 2013. In addition, 2012 results of operations reflect the reinsurance loss on disposition related to the disposition of the Individual Life business, and losses in 2012 from the operations of the Retirement Plans and Individual Life businesses sold in 2013.

For further discussion of investment results and the results of the variable annuity hedge program, see MD&A – Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses). For further discussion of Unlocks, see MD&A - Critical Accounting Estimates, Estimated Gross Profits Used in the Valuation and Amortization of Assets and Liabilities Associated with Variable Annuity and Other Universal Life-Type Contracts.

The 2013 and 2012 effective tax rates differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in separate account DRD. For further discussion of income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Account value decreased to approximately $219 billion at December 31, 2013 from approximately $228 billion at December 31, 2012 due primarily to increased net outflows and negative currency translation impacts, partially offset by market value appreciation in variable annuities. In addition, the net decrease in account value reflects the disposition of $1.8 billion of variable annuities related to the sold U.K. business. In 2013 variable annuity net outflows increased by approximately $9.1 billion as compared to the prior year period driven by increased net outflows in the Japan variable annuities as a result of market appreciation and the expiration of the surrender charge period as the block of business ages.

The annualized full surrender rate on U.S. variable annuities rose to 16.7% for the year ended December 31, 2013 compared to 11.1% for the prior year period. The annualized full surrender rate on Japan variable annuities rose to 28.8% for the year ended December 31, 2013 compared to 3.4% for the prior year period. Surrender activity in Japan has increased significantly over the past nine months as market appreciation has resulted in an increased number of account values exceeding guaranteed amounts.

CORPORATE

Results of Operations

Operating Summary	2014	2013	2012
Fee income [1]	$ 10	$ 12	$ 168

Net loss	**$ (375)**	**$ (555)**	**$ (1,009)**

[1] Fee income includes the income associated with the sales of non-proprietary insurance products in the Company's broker-dealer subsidiaries that has an offsetting commission expense in insurance operating costs and other expenses.

Year ended December 31, 2014 compared to the year ended December 31, 2013

Net loss, as compared to the prior year period, decreased in 2014 primarily due to decreases in the loss on extinguishment of debt, a change to net realized capital gains, decreases in the reinsurance loss on disposition, and a lower effective income tax rate benefit in 2013.

The pension settlement charge in 2014 is related to voluntary lump-sum settlements with vested participants in the Company's defined benefit pension plan who had separated from service, but who had not yet commenced annuity benefits. For additional information regarding the pension settlement, see Note 17 - Employee Benefit Plans of Notes to Consolidated Financial Statements.

Insurance operating costs and other expenses increased in 2014 primarily due to benefits recognized in 2013 related to an insurance company recovery and the favorable resolution in 2013 of items under the Company's spin-off agreement with its former parent company. Interest expense declined in 2014 due to a decrease in outstanding debt from debt maturities and the paydown of $800 of senior notes in 2013.

In 2014, $200 of the Company's senior notes matured. For additional information regarding debt, see Note 12 - Debt of Notes to Consolidated Financial Statements.

For a reconciliation of the tax provision at the U.S. Federal statutory rate to the provision (benefit) for income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Net loss, as compared to the prior year period, decreased in 2013 primarily due to decreases in insurance operating costs and other expenses, the reinsurance loss on disposition, the loss on extinguishment of debt and interest expense. The net loss in 2013 was partially driven by net realized capital losses due to higher long-term interest rates and global credit hedging losses due to increases in the equity market as compared with net realized capital gains in 2012.

Insurance operating costs and other expenses decreased due to a benefit of $57, before tax, for an insurance recovery from the Company's insurers for past legal expenses associated with closed litigation and a benefit of $19, before tax, from the resolution of items under the Company's spin-off agreement with its former parent company. Restructuring costs, included in Corporate insurance operating costs and other expenses and related to the implementation of certain strategic initiatives, decreased to $64 in 2013 from $121 in 2012.

The reinsurance loss on disposition of $69 in 2013 consisted of the write-off of all of the goodwill held in Corporate allocated to the Retirement Plans business sold in 2013. The reinsurance loss on disposition of $118 in 2012 consisted of an impairment of goodwill related to the Individual Life business sold in 2013. For additional information regarding goodwill, see Note 9 - Goodwill of Notes to Consolidated Financial Statements.

In 2013, the Company repurchased approximately $800 of senior notes at a premium to the face amount of the then outstanding debt. In 2012, the Company repurchased all outstanding 10% fixed-to-floating rate junior subordinated debentures due 2068 with a $1.75 billion aggregate principal amount held by Allianz. Loss on extinguishment of debt consists of the premium associated with repurchasing the debentures at an amount greater than the face amount, the write-off of the unamortized discount and debt issuance and other costs related to the repurchase transactions. For additional information regarding debt, see Note 12 - Debt of Notes to Consolidated Financial Statements.

For a reconciliation of the tax provision at the U.S. Federal statutory rate to the provision (benefit) for income taxes, see Note 13 - Income Taxes of Notes to Consolidated Financial Statements.

ENTERPRISE RISK MANAGEMENT

The Company has an enterprise risk management function (“ERM”) that is charged with providing analysis of the Company’s risks on an individual and aggregated basis and with ensuring that the Company’s risks remain within its risk appetite and tolerances. The Company has established the Enterprise Risk and Capital Committee (“ERCC”) that includes the Company’s CEO, President, Chief Financial Officer, Chief Investment Officer, Chief Risk Officer, General Counsel and others as deemed necessary by the committee chair. The ERCC is responsible for managing the Company’s risks and overseeing the enterprise risk management program.

The Company categorizes its main risks as follows:

- Insurance Risk
- Operational Risk
- Financial Risk

Insurance Risk Management

The Company categorizes its insurance risks across both property-casualty and life products. The Company's insurance operations are vested in the ability to add value through the effective underwriting, pooling, and pricing of insurance risks. The Company has developed a disciplined approach to insurance risk management that is well integrated into the organization's underwriting, pricing, reinsurance, claims, and capital management processes.

At the same time, the Company has policies and procedures to manage concentrations or correlations of insurance risk, including ERM policies governing the risks related to natural and man-made property catastrophes such as hurricanes, earthquakes, tornado/hailstorms, winter storms, pandemics, terrorism, and casualty catastrophes. The Company establishes risk limits to control potential loss and actively monitors the risk exposures as a percent of statutory surplus or total available capital resources. The Company also uses reinsurance to transfer insurance risk to well-established and financially secure reinsurers. For additional information, see MD&A - Enterprise Risk Management, Reinsurance as a Risk Management Strategy.

Non-Catastrophic Insurance Risks

Non-catastrophic insurance risks exist within each of the Company's divisions and include, but are not limited to, the following:

- **Property:** Risk of loss to personal or commercial property from automobile related accidents, weather, explosions, smoke, shaking, fire, theft, vandalism, inadequate installation, faulty equipment, collisions and falling objects, and/or machinery mechanical breakdown resulting in physical damage and other covered perils.
- **Liability:** Risk of loss from automobile related accidents, uninsured and underinsured drivers, lawsuits from accidents, defective products, breach of warranty, negligent acts by professional practitioners, environmental claims, latent exposures, fraud, coercion, forgery, failure to fulfill obligations per contract surety, liability from errors and omissions, derivative lawsuits, and other securities actions and covered perils.
- **Mortality:** Risk of loss from unexpected trends in insured deaths impacting timing of payouts from life insurance or annuity products, personal or commercial automobile related accidents, and death of employees or executives during the course of employment, while on disability, or while collecting workers compensation benefits.
- **Morbidity**: Risk of loss to an insured from illness incurred during the course of employment or illness from other covered perils.
- **Disability:** Risk of loss incurred from personal or commercial automobile related losses, accidents arising outside of the workplace, injuries or accidents incurred during the course of employment, or from equipment, with each loss resulting in short term or long term disability payments.
- **Longevity:** Risk of loss from increased life expectancy trends among policyholders receiving long term benefit payments or annuity payouts.

The Company's processes for managing these risks include disciplined underwriting protocols, exposure controls, sophisticated risk based pricing, risk modeling, risk transfer, and capital management strategies. The Company has established underwriting guidelines for both individual risks, including individual policy limits, and risks in the aggregate, including aggregate exposure limits by geographic zone and peril. Pricing indications for each line of business are set independently by the Company's pricing actuaries and are integrated into the reserve review process to ensure consistency between pricing and reserving. Monthly reports track loss cost trends relative to pricing objectives within each state and product, and the Company's reserving actuaries provide an independent report to the Board on the Company's reserve position and loss cost trends.

Natural Catastrophe Risk

Natural catastrophe risk is defined as the exposure arising from natural phenomena (e.g., weather, earthquakes, wildfires, etc.) that create a concentration or aggregation of loss across the Company's insurance or asset portfolios. The Company uses both internal and third-party models to estimate the potential loss resulting from various catastrophe events and the potential financial impact those events would have on the Company's financial position and results of operations across the property-casualty, life, and asset management businesses. For natural catastrophe perils, the Company generally limits its estimated pre-tax loss as a result of natural catastrophes for property & casualty exposures from a single 250-year event to less than 30% of statutory surplus of the property and casualty insurance subsidiaries prior to reinsurance and to less than 15% of statutory surplus of the property and casualty insurance subsidiaries after reinsurance. The Company's modeled loss estimates are derived by averaging 21 modeled loss events representing a 250-year return period loss. For the peril of earthquake, the 21 events averaged to determine the modeled loss estimate include events occurring in California as well as the Northeastern, Southeastern, Northwestern, Midwestern and New Madrid regions of the United States with associated magnitudes ranging from 6.0 to 8.2 on the Moment Magnitude scale. For the peril of hurricane, the 21 events averaged to determine the modeled loss estimate include category 2, 3, 4 and 5 events in Florida, as well as other Gulf, Mid Atlantic and Northeastern region landfalls.

While Enterprise Risk Management has a process to track and manage these limits, from time to time, the estimated loss to natural catastrophes from a single 250-year event prior to reinsurance may fluctuate above or below these limits due to changes in modeled loss estimates, exposures, or statutory surplus. Currently, the Company's estimated pre-tax loss to a single 250-year natural catastrophe event prior to reinsurance is less than 30% of the statutory surplus of the property and casualty insurance subsidiaries and the Company's estimated pre-tax loss net of reinsurance is less than 15% of statutory surplus of the property and casualty operations. The estimated 250 year pre-tax probable maximum losses from hurricane events are estimated to be $1.5 billion and $570, before and after reinsurance, respectively. The estimated 250 year pre-tax probable maximum loss from earthquake events is estimated to be $736 before reinsurance and $471 net of reinsurance. The loss estimates represent total property losses for hurricane events and property and workers compensation losses for earthquake events resulting from a single event. The estimates provided are based on 250-year return period loss estimates that have a 0.4% likelihood of being exceeded in any single year.

The net loss estimates provided above assume that the Company is able to recover all losses ceded to reinsurers under its reinsurance programs. There are various methodologies used in the industry to estimate the potential property and workers compensation losses that would arise from various catastrophe events and companies may use different models and assumptions in their estimates. Therefore, the Company's estimates of gross and net losses arising from a 250-year hurricane or earthquake event may not be comparable to estimates provided by other companies. Furthermore, the Company's estimates are subject to significant uncertainty and could vary materially from the actual losses that would arise from these events and the loss estimates provided by other companies. The Company also manages natural catastrophe risk for group life and group disability, which in combination with property and workers compensation loss estimates are subject to separate enterprise risk management net aggregate loss limits as a percent of enterprise surplus.

Terrorism Risk

The Company defines terrorism risk as the risk of losses from terrorist attacks, including losses caused by single-site and multi-site conventional attacks, as well as the potential for attacks using nuclear, biological, chemical or radiological weapons (“NBCR”). The Company monitors aggregations of terrorism risk exposure around key landmarks primarily in major metropolitan areas that span the Company's insurance portfolio. ERM limits for terrorism apply to aggregations of risk across property-casualty, group benefits and specific asset portfolios and are defined based on a deterministic, single-site conventional terrorism attack scenario. The Company manages its potential estimated loss from a conventional terrorism loss scenario to less than $1.3 billion. In addition, the Company monitors exposures monthly and employs both internally developed and vendor-licensed loss modeling tools as part of its risk management discipline. While our modeled exposures to conventional terrorist attacks around landmark locations may fluctuate above and below $1.3 billion, currently, all such terrorism exposures are within ERM limits. For a discussion on risks related to terrorist attacks, see the risk factor, "The occurrence of one or more terrorist attacks in the geographic areas we serve or the threat of terrorism in general may have a material adverse effect on our business, financial condition, results of operations and liquidity."

Pandemic Risk

Pandemic risk is the exposure to loss arising from widespread influenza or other pathogens or bacterial infections that create an aggregation of loss across the Company's insurance or asset portfolios. Consistent with industry practice, the Company assesses exposure to pandemics by analyzing the potential impact from a variety of pandemic scenarios based on conditions consistent with historical outbreaks of flu-like viruses such as the “Severe” 1918 Spanish Flu, the Asian flu of 1957, the Hong Kong flu of 1968, and the 2009 outbreak of the swine flu. For pandemic risk, the Company generally limits its estimated pre-tax loss from a single 250 year event to less than 10% of total available capital resources. In evaluating these scenarios, the Company assesses the impact on group life policies, short-term and long term disability, annuities, COLI, property & casualty claims, and losses in the investment portfolio associated with market declines in the event of a widespread pandemic. While ERM has a process to track and manage these limits, from time to time, the estimated loss for pandemics may fluctuate above or below these limits due to changes in modeled loss estimates, exposures, or statutory surplus. Currently, the Company's estimated pre-tax loss for pandemic is less than 10% of enterprise statutory surplus.

Reinsurance as a Risk Management Strategy

The Hartford utilizes reinsurance to transfer risk to affiliated and unaffiliated insurers. Reinsurance is used to manage aggregation of risk as well as to transfer certain risk to reinsurance companies based on specific geographic or risk concentrations. All reinsurance processes are aligned under a single enterprise reinsurance risk management policy. Reinsurance purchasing is a centralized function across Commercial Lines, Personal Lines and Talcott Resolution to support a consistent strategy and to ensure that the reinsurance activities are fully integrated into the organization's risk management processes.

A variety of traditional reinsurance products are used as part of the Company's risk management strategy, including excess of loss occurrence-based products that protect property and workers compensation exposures, and individual risk or quota share arrangements, that protect specific classes or lines of business. The Company has no significant finite risk contracts in place and the statutory surplus benefit from all such prior year contracts is immaterial. Facultative reinsurance is used by the Company to manage policy-specific risk exposures based on established underwriting guidelines. The Hartford also participates in governmentally administered reinsurance facilities such as the Florida Hurricane Catastrophe Fund (“FHCF”), the Terrorism Risk Insurance Program established under The Terrorism Risk Insurance Program Reauthorization Act of 2015 (“TRIPRA”) and other reinsurance programs relating to particular risks or specific lines of business.

Reinsurance for Catastrophes

The Company has several catastrophe reinsurance programs, including reinsurance treaties that cover property and workers’ compensation losses aggregating from single catastrophe events. The following table summarizes the primary catastrophe treaty reinsurance coverages that the Company has in place as of January 1, 2015:

Coverage	Effective for the period	% of layer(s) reinsurance	Per occurrence limit	Retention
Principal property catastrophe program covering property catastrophe losses from a single event [1]	1/1/2015 to 1/1/2016	90%	$ 850	$ 350
Reinsurance with the FHCF covering Florida Personal Lines property catastrophe losses from a single event	6/1/2014 to 6/1/2015	90%	$ 109 [2]	$ 41
Workers compensation losses arising from a single catastrophe event [3]	7/1/2014 to 7/1/2015	80%	$ 350	$ 100

[1] Certain aspects of our catastrophe treaty have terms that extend beyond the traditional one year term.

[2] The per occurrence limit on the FHCF treaty is $109 for the 6/1/2014 to 6/1/2015 treaty year based on the Company's election to purchase the required coverage from FHCF. Coverage is based on the best available information from FHCF, which was updated in January 2015.

[3] In addition to the limit shown above, the workers compensation reinsurance includes a non-catastrophe, industrial accident layer, 80% placement of a $30 per event limit in excess of a $20 retention.

In addition to the property catastrophe reinsurance coverage described in the above table, the Company has other catastrophe and working layer treaties and facultative reinsurance agreements that cover property catastrophe losses on an aggregate excess of loss and on a per risk basis. The principal property catastrophe reinsurance program and certain other reinsurance programs include a provision to reinstate limits in the event that a catastrophe loss exhausts limits on one or more layers under the treaties. In addition, covering the period from January 1, 2014 to December 31, 2016, the Company has an aggregate loss treaty in place which provides one limit of $200 over the three-year period of aggregate qualifying property catastrophe losses in excess of a net retention of $860.

In addition to the reinsurance protection provided by The Hartford's traditional property catastrophe reinsurance program described above, until February 18, 2015, the Hartford had a fully collateralized reinsurance coverage from Foundation Re III for losses sustained from qualifying hurricane loss events. Under the terms of the treaty, the Company had coverage for losses from hurricanes using a customized industry index contract designed to replicate The Hartford's own catastrophe losses, with a provision that the actual losses incurred by the Company for covered events, net of reinsurance recoveries, cannot be less than zero.

The following table summarizes the terms of the reinsurance treaty with Foundation Re III that was in place as of December 31, 2014:

Covered perils	Treaty term	Covered losses	Bond amount issued by Foundation Re III
Hurricane loss events affecting the Gulf and Eastern Coast of the United States	2/18/2011 to 2/18/2015	At the time of the purchase, 67.5% of $200 in losses in excess of an index loss trigger equating to approximately $1.4 billion in losses to The Hartford	$135

There have been no events that are expected to trigger a recovery under the Foundation Re III reinsurance program and, accordingly, the Company has not recorded any recoveries from the associated reinsurance treaty. The Company did not replace the Foundation Re III treaty when it expired in February 2015.

Reinsurance for Terrorism

For the risk of terrorism, private sector catastrophe reinsurance capacity is generally limited and largely unavailable for terrorism losses caused by nuclear, biological, chemical or radiological weapons attacks. As such, the Company's principal reinsurance protection against large-scale terrorist attacks is the coverage currently provided through the TRIPRA 2015. On January 12, 2015, the President signed TRIPRA 2015, extending TRIPRA 2007, through the end of 2020. TRIPRA 2015 provides a backstop for insurance-related losses resulting from any “act of terrorism”, which is certified by the Secretary of Homeland Security and Attorney General and requires consultation by the Secretary of Treasury, for losses that that exceed a threshold of industry losses of $100 in 2015, and continue to increase to $200 by 2020. Under the program, in any one calendar year, the federal government would pay losses of 85% in 2015, which then continue to decrease 1% annually, starting on January 1st, 2016, down to 80% by the year 2020, from a certified act of terrorism after an insurer's losses exceed 20% of the Company's eligible direct commercial earned premiums of the prior calendar year up to a combined annual aggregate limit for the federal government and all insurers of $100 billion. The Company's estimated deductible under the program is $1.19 billion for 2015. If an act of terrorism or acts of terrorism result in covered losses exceeding the $100 billion annual industry aggregate limit, a future Congress would be responsible for determining how additional losses in excess of $100 billion will be paid.

Among other items, TRIPRA required that the President's Working Group on Financial Markets (“PWG”) continue to perform an analysis regarding the long-term availability and affordability of insurance for terrorism risk. Among the findings detailed in the PWG's initial report, released October 2, 2006, were that the high level of uncertainty associated with predicting the frequency of terrorist attacks, coupled with the unwillingness of some insurance policyholders to purchase insurance coverage, makes predicting long-term development of the terrorism risk market difficult, and that there is likely little potential for future market development for NBCR coverage. The January 2011 PWG report notes some improvements in capacity and modeling, but also noted that take-up rates for terrorism coverage remained relatively flat over the past three years and that insurers remain uncertain about the ability of models to predict the frequency and severity of terrorist attacks. The April 2014 PWG report notes that the availability and affordability of insurance for terrorism risk has not changed appreciably since 2010. Take up rates have increased since the first year of TRIA and are stable at 60% in the aggregate. The private market does not have capacity to provide reinsurance for terrorism risk to the extent provided by TRIPRA. With respect to NBCR coverage, a December 2008 study by the U.S. Government Accountability Office (“GAO”) found that property and casualty insurers still generally seek to exclude NBCR coverage from their commercial policies when permitted. However, while nuclear, pollution and contamination exclusions are contained in many property and liability insurance policies, the GAO report concluded that such exclusions may be subject to challenges in court because they were not specifically drafted to address terrorist attacks. Furthermore, workers compensation policies generally have no exclusion or limitations. The GAO found that commercial property and casualty policyholders, including companies that own high-value properties in large cities, generally reported that they could not obtain NBCR coverage. Commercial property and casualty insurers generally remain unwilling to offer NBCR coverage because of uncertainties about the risk and the potential for catastrophic losses.

Reinsurance Recoverables

Reinsurance Security

To manage reinsurer credit risk, a reinsurance security review committee evaluates the credit standing, financial performance, management and operational quality of each potential reinsurer. Through this process, the Company maintains a centralized list of reinsurers approved for participation in reinsurance transactions. Only reinsurers approved through this process are eligible to participate in new reinsurance transactions. The Company's approval designations reflect the differing credit exposure associated with various classes of business. Participation eligibility is categorized based upon the nature of the risk reinsured, including the expected liability payout duration. In addition to defining participation eligibility, the Company regularly monitors credit risk exposure to each reinsurance counterparty and has established limits tiered by counterparty credit rating. For further discussion on how the Company manages and mitigates third party credit risk, see MD&A - Enterprise Risk Management, Credit Risk.

Property and Casualty Insurance Product Reinsurance Recoverables

Property and casualty insurance product reinsurance recoverables represent loss and loss adjustment expense recoverables from a number of entities, including reinsurers and pools.

The components of the gross and net reinsurance recoverables are summarized as follows:

	As of December 31,	
Reinsurance Recoverables	**2014**	**2013**
Paid loss and loss adjustment expenses	$ 133	$ 138
Unpaid loss and loss adjustment expenses	2,868	2,841
Gross reinsurance recoverables	**3,001**	**2,979**
Less: Allowance for uncollectible reinsurance	(271)	(244)
Net reinsurance recoverables	**$ 2,730**	**$ 2,735**

Distribution of Gross Reinsurance Recoverables

As shown in the following table, a portion of the total gross reinsurance recoverables relates to the Company's mandatory participation in various involuntary assigned risk pools and the value of annuity contracts held under structured settlement agreements. Reinsurance recoverables due from mandatory pools are backed by the financial strength of the property and casualty insurance industry. Annuities purchased from third-party life insurers under structured settlements are recognized as reinsurance recoverables in cases where the Company has not obtained a release from the claimant. Of the remaining gross reinsurance recoverables, the portion of recoverables due from companies rated by A.M. Best is as follows:

	As of December 31,			
Distribution of gross reinsurance recoverables	**2014**		**2013**	
Gross reinsurance recoverables	$ 3,001		$ 2,979	
Less: mandatory (assigned risk) pools and structured settlements	(567)		(569)	
Gross reinsurance recoverables excluding mandatory pools and structured settlements	**$ 2,434**		**$ 2,410**	
		% of Total		**% of Total**
Rated A- (Excellent) or better by A.M. Best [1]	$ 1,561	64.1%	$ 1,558	64.6%
Other rated by A.M. Best	4	0.2%	4	0.2%
Total rated companies	1,565	64.3%	1,562	64.8%
Voluntary pools	92	3.8%	96	4.0%
Captives	488	20.0%	499	20.7%
Other not rated companies	289	11.9%	253	10.5%
Total	**$ 2,434**	**100.0%**	**$ 2,410**	**100.0%**

[1] Based on A.M. Best ratings as of December 31, 2014 and 2013, respectively.

Where its contracts permit, the Company secures future claim obligations with various forms of collateral, including irrevocable letters of credit, secured trusts, funds held accounts and group wide offsets. As part of its reinsurance recoverable review, the Company analyzes recent developments in commutation activity between reinsurers and cedants, recent trends in arbitration and litigation outcomes in disputes between cedants and reinsurers and the overall credit quality of the Company's reinsurers. As indicated in the above table, 64.1% of the gross reinsurance recoverables due from reinsurers rated by A.M. Best were rated A- (excellent) or better as of December 31, 2014. Due to the inherent uncertainties as to collection and the length of time before such amounts will be due, it is possible that future adjustments to the Company's reinsurance recoverables, net of the allowance, could be required, which could have a material adverse effect on the Company's consolidated results of operations or cash flows in a particular quarterly or annual period.

Annually, the Company completes evaluations of the reinsurance recoverable asset associated with older, long-term casualty liabilities reported in the Property & Casualty Other Operations reporting segment, and the allowance for uncollectible reinsurance reported in the Commercial Lines reporting segment. For a discussion regarding the results of these evaluations, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.

Life Insurance Product Reinsurance Recoverables

Life insurance product reinsurance recoverables represent future policy benefits and unpaid loss and loss adjustment expenses and other policyholder funds and benefits payable that are recoverable from a number of reinsurers.

The components of the gross and net reinsurance recoverables are as follows:

	As of December 31,			
Reinsurance Recoverables		**2014**		**2013**
Future policy benefits and unpaid loss and loss adjustment expenses and other policyholder funds and benefits payable		**20,190**		**20,595**
Gross reinsurance recoverables	**$**	**20,190**	**$**	**20,595**
Less: Allowance for uncollectible reinsurance [1]		—		—
Net reinsurance recoverables	**$**	**20,190**	**$**	**20,595**

[1] No allowance for uncollectible reinsurance is required as of December 31, 2014 and 2013.

As of December 31, 2014, the Company has reinsurance recoverables from MassMutual and Prudential of $8.6 billion and $10.4 billion, respectively. As of December 31, 2013 the Company has reinsurance recoverables from MassMutual and Prudential of $9.5 billion and $9.9 billion, respectively. These reinsurance recoverables are secured by invested assets held in trust for the benefit of the Company in the event of a default by the reinsurers. As of December 31, 2014, the fair value of assets held in trust securing the reinsurance recoverables from MassMutual and Prudential is $9.0 billion for each of these parties. As of December 31, 2014, the Company has no reinsurance-related concentrations of credit risk greater than 10% of the Company's consolidated stockholders' equity.

Guaranty Funds and Other Insurance-related Assessments

As part of its risk management strategy, the Company regularly monitors the financial wherewithal of other insurers and, in particular, activity by insurance regulators and various state guaranty associations relating to troubled insurers. In all states, insurers licensed to transact certain classes of insurance are required to become members of a guaranty fund. In most states, in the event of the insolvency of an insurer writing any such class of insurance in the state, members of the funds are assessed to pay certain claims of the insolvent insurer. A particular state's fund assesses its members based on their respective written premiums in the state for the classes of insurance in which the insolvent insurer was engaged. Assessments are generally limited for any year to one or two percent of the premiums written per year depending on the state. The amount and timing of assessments related to past insolvencies is unpredictable.

Citizens Property Insurance Corporation in Florida ("Citizens"), a non-affiliate insurer, provides property insurance to Florida homeowners and businesses that are unable to obtain insurance from other carriers, including for properties deemed to be "high risk." Citizens maintains a Personal Lines account, a Commercial Lines account and a High Risk account. If Citizens incurs a deficit in any of these accounts, Citizens may impose a "regular assessment" on other insurance carriers in the state, such as the Company, to fund the deficits, subject to certain restrictions and subject to approval by the Florida Office of Insurance Regulation. Carriers are then permitted to surcharge policyholders to recover the assessments over the next few years. Citizens may also opt to finance a portion of the deficits through issuing bonds and may impose "emergency assessments" on other insurance carriers to fund the bond repayments. Unlike with regular assessments, however, insurance carriers only serve as a collection agent for emergency assessments and are not required to remit surcharges for emergency assessments to Citizens until they collect surcharges from policyholders. Under U.S. GAAP, the Company is required to accrue for regular assessments in the period the assessments become probable and estimable and the obligating event has occurred. Surcharges to recover the amount of regular assessments may not be recorded as an asset until the related premium is written. Emergency assessments that may be levied by Citizens are not recorded in the income statement.

Operational Risk Management

The Hartford has an Operational Risk Management ("ORM") function whose responsibility is to provide a comprehensive and enterprise-wide view of the Company's operational risk on an aggregate basis. The Company defines operational risk as the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. Operational risk is inherent in our business and functional areas. It includes legal risk and considers reputational risk as an impact.

ORM is responsible for establishing, maintaining and communicating the framework, principles and guidelines of The Hartford's operational risk management program. In addition, ORM also manages business continuity, model risk management, the ORM system, and risk assessments. Responsibility for day-to-day management of operational risk lies within each business unit and functional area.

ORM works closely with the Operational Risk Committee ("ORC"), an enterprise wide governance group comprised of senior leaders from functional areas such as ORM, Operations and Technology, Claims, Legal, Compliance, Finance and Internal Audit. The ORC meets regularly and provides a forum for ensuring the effective identification, assessment, control, ownership, management and reporting of operational risks across the enterprise. Individual committees, such as the Enterprise Privacy and Security Committee, Enterprise Health, Environment and Safety Committee, and the Model Oversight Committees focus on specific operational risk issues.

ORM has various tools and processes for identifying, monitoring, measuring, prioritizing, and reporting operational risks. ORM facilitates the business risk assessment process which is used to identify the top risks in the business and functional areas, evaluate controls to mitigate those risks, and monitor control improvements. ORM also facilitates loss event collection and analysis, scenario analysis, and aggregated reporting of risks. ORM uses a centralized Governance, Risk, and Compliance (GRC) system to help manage operational risk primarily within the Company's finance, legal, compliance, data security, and information technology functions.

Financial Risk Management

The Company identifies the following categories of financial risk:

- Liquidity Risk
- Interest Rate Risk
- Equity Risk
- Foreign Currency Exchange Risk
- Credit Risk

Financial risks include direct and indirect risks to the Company's financial objectives coming from events that impact market conditions or prices. Financial risk also includes exposure to events that may cause correlated movement in multiple risk factors. The primary sources of financial risks are the Company's general account assets and the liabilities and the guarantees which the company has written over various liability products, particularly its portfolio of variable annuities. The Company assesses its financial risk on a U.S. GAAP, statutory and economic basis. The Hartford has developed a disciplined approach to financial risk management that is well integrated into the Company's underwriting, pricing, hedging, claims, asset and liability management, new product, and capital management processes. Consistent with its risk appetite, the Company establishes financial risk limits to control potential loss. Exposures are actively monitored, and mitigated where appropriate. The Company uses various risk management strategies, including reinsurance and derivative-based hedging to transfer risk to well-established and financially secure counterparties.

Liquidity Risk

Liquidity risk is the risk to current or prospective earnings or capital arising from the Company's inability or perceived inability to meet its contractual cash obligations at the legal entity level when they come due over given horizons without incurring unacceptable costs and without relying on uncommitted funding sources. Liquidity risk includes the inability to manage unplanned increases or accelerations in cash outflows, decreases or changes in funding sources, and changes in market conditions that affect the ability to liquidate assets quickly to meet obligations with minimal loss in value. Components of liquidity risk include funding risk, transaction risk and market liquidity risk. Funding risk is the gap between sources and uses of cash under normal and stressed conditions taking into consideration structural, regulatory and legal entity constraints. Changes in institution-specific conditions that affect the Company's ability to sell assets or otherwise transact business without incurring a significant loss in value is transaction risk. Changes in general market conditions that affect the institution's ability to sell assets or otherwise transact business without incurring a significant loss in value is market liquidity risk.

The Company has defined ongoing monitoring and reporting requirements to assess liquidity across the enterprise. The Company measures and manages liquidity risk exposures and funding needs within prescribed limits and across legal entities, business lines and currencies, taking into account legal, regulatory and operational limitations to the transferability of liquidity. The Company also monitors internal and external conditions, identifies material risk changes and emerging risks that may impact liquidity. The Company's CFO has primary responsibility for liquidity risk.

For further discussion on liquidity see the section on Capital Resources and Liquidity.

Interest Rate Risk

Interest rate risk is the risk of financial loss due to adverse changes in the value of assets and liabilities arising from movements in interest rates. Interest rate risk encompasses exposures with respect to changes in the level of interest rates, the shape of the term structure of rates and the volatility of interest rates. Interest rate risk does not include exposure to changes in credit spreads. The Company has exposure to interest rates arising from its fixed maturity securities, interest sensitive liabilities and discount rate assumptions associated with the Company's pension and other post retirement benefit obligations.

An increase in interest rates from current levels is generally a favorable development for the Company. Interest rate increases are expected to provide additional net investment income, reduce the cost of the variable annuity hedging program, limit the potential risk of margin erosion due to minimum guaranteed crediting rates in certain Talcott Resolution products. Conversely, if long-term interest rates rise dramatically within a six to twelve month time period, certain Talcott Resolution businesses may be exposed to disintermediation risk. Disintermediation risk refers to the risk that policyholders will surrender their contracts in a rising interest rate environment requiring the Company to liquidate assets in an unrealized loss position. In conjunction with the interest rate risk measurement and management techniques, certain of Talcott Resolution's fixed income product offerings have market value adjustment provisions at contract surrender. An increase in interest rates may also impact the Company's tax planning strategies and in particular its ability to utilize tax benefits of previously recognized realized capital losses.

A decline in interest rates results in certain mortgage-backed and municipal securities being more susceptible to paydowns and prepayments or calls. During such periods, the Company generally will not be able to reinvest the proceeds at comparable yields. Lower interest rates will also likely result in lower net investment income, increased hedging cost associated with variable annuities and, if declines are sustained for a long period of time, it may subject the Company to reinvestment risk, higher pension costs expense and possibly reduced profit margins associated with guaranteed crediting rates on certain Talcott Resolution products. Conversely, the fair value of the investment portfolio will increase when interest rates decline and the Company's interest expense will be lower on its variable rate debt obligations.

The Company manages its exposure to interest rate risk by constructing investment portfolios that maintain asset allocation limits and asset/liability duration matching targets which may include the use of derivatives. The Company analyzes interest rate risk using various models including parametric models and cash flow simulation under various market scenarios of the liabilities and their supporting investment portfolios, which may include derivative instruments. Key metrics that the Company uses to quantify its exposure to interest rate risk inherent in its invested assets and interest rate sensitive liabilities include duration, convexity and key rate duration. Duration is the price sensitivity of a financial instrument or series of cash flows to a parallel change in the underlying yield curve used to value the financial instrument or series of cash flows. For example, a duration of 5 means the price of the security will change by approximately 5% for a 100 basis point change in interest rates. Convexity is used to approximate how the duration of a security changes as interest rates change in a parallel manner. Key rate duration analysis measures the price sensitivity of a security or series of cash flows to each point along the yield curve and enables the Company to estimate the price change of a security assuming non-parallel interest rate movements.

To calculate duration, convexity, and key rate durations, projections of asset and liability cash flows are discounted to a present value using interest rate assumptions. These cash flows are then revalued at alternative interest rate levels to determine the percentage change in fair value due to an incremental change in the entire yield curve for duration and convexity, or a particular point on the yield curve for key rate duration. Cash flows from corporate obligations are assumed to be consistent with the contractual payment streams on a yield to worst basis. Yield to worst is a basis that represents the lowest potential yield that can be received without the issuer actually defaulting. The primary assumptions used in calculating cash flow projections include expected asset payment streams taking into account prepayment speeds, issuer call options and contract holder behavior. Mortgage-backed and asset-backed securities are modeled based on estimates of the rate of future prepayments of principal over the remaining life of the securities. These estimates are developed by incorporating collateral surveillance and anticipated future market dynamics. Actual prepayment experience may vary from these estimates.

The Company is also exposed to interest rate risk based upon the discount rate assumption associated with the Company's pension and other postretirement benefit obligations. The discount rate assumption is based upon an interest rate yield curve comprised of bonds rated AA with maturities primarily between zero and thirty years. For further discussion of discounting pension and other postretirement benefit obligations, refer to Note 17 - Employee Benefit Plans of Notes to Consolidated Financial Statements. In addition, management evaluates performance of certain Talcott Resolution products based on net investment spread which is, in part, influenced by changes in interest rates. For further discussion, see the Talcott Resolution section of the MD&A.

The investments and liabilities primarily associated with interest rate risk are included in the following discussion. Certain product liabilities, including those containing GMWB or GMDB, expose the Company to interest rate risk but also have significant equity risk. These liabilities are discussed as part of the Variable Product Guarantee Risks and Risk Management section below.

Fixed Maturity Investments

The Company's investment portfolios primarily consist of investment grade fixed maturity securities. The fair value of fixed maturity investments was $59.9 billion and $63.2 billion at December 31, 2014 and 2013, respectively. The fair value of these and other invested assets fluctuates depending on the interest rate environment and other general economic conditions. The weighted average duration of the portfolio, including fixed maturities, commercial mortgage loans, certain derivatives, and cash equivalents, was approximately 5.3 years as of both December 31, 2014 and 2013. As of December 31, 2013, the weighted average duration of the portfolio, excluding the Japan variable and fixed annuity business, was approximately 5.2 years.

Liabilities

The Company's issued investment contracts and certain insurance product liabilities, other than non-guaranteed separate accounts, include asset accumulation vehicles such as fixed annuities, guaranteed investment contracts, other investment and universal life-type contracts and certain insurance products such as long-term disability.

Asset accumulation vehicles primarily require a fixed rate payment, often for a specified period of time, such as fixed rate annuities with a market value adjustment feature. The term to maturity of these contracts generally range from less than one year to ten years. In addition, certain products such as corporate owned life insurance contracts and the general account portion of Talcott Resolutions' variable annuity products, credit interest to policyholders subject to market conditions and minimum interest rate guarantees. The term to maturity of the asset portfolio supporting these products may range from short to intermediate.

While interest rate risk associated with many of these products has been reduced through the use of market value adjustment features and surrender charges, the primary risk associated with these products is that the spread between investment return and credited rate may not be sufficient to earn targeted returns.

The Company also manages the risk of certain insurance liabilities similarly to investment type products due to the relative predictability of the aggregate cash flow payment streams. Products in this category may contain significant reliance upon actuarial (including mortality and morbidity) pricing assumptions and do have some element of cash flow uncertainty. Product examples include structured settlement contracts, on-benefit annuities (i.e., the annuitant is currently receiving benefits thereon) and short-term and long-term disability contracts. The cash outflows associated with these policy liabilities are not interest rate sensitive but do vary based on the timing and amount of benefit payments. The primary risks associated with these products are that the benefits will exceed expected actuarial pricing and/or that the actual timing of the cash flows will differ from those anticipated, or interest rate levels may deviate from those assumed in product pricing, ultimately resulting in an investment return lower than that assumed in pricing. The average duration of the liability cash flow payments can range from less than one year to in excess of fifteen years.

Derivatives

The Company utilizes a variety of derivative instruments to mitigate interest rate risk associated with its investment portfolio or hedge liabilities. Interest rate swaps are primarily used to convert interest receipts or payments to a fixed or variable rate. The use of such swaps enable the Company to customize contract terms and conditions to desired objectives and manage the duration profile within established tolerances. Interest rate swaps are also used to hedge the variability in the cash flow of a forecasted purchase or sale of fixed rate securities due to changes in interest rates. Interest rate caps, floors, swaps, swaptions, and futures may be used to manage portfolio duration.

As of December 31, 2014 and 2013 notional amounts pertaining to derivatives utilized to manage interest rate risk, including offsetting positions, totaled $19.3 billion and $15.3 billion, respectively ($19.2 billion and $15.1 billion, respectively, related to investments and $0.1 billion and $0.2 billion, respectively, related to Talcott Resolution liabilities). The fair value of these derivatives was $(468) and $(603) as of December 31, 2014 and 2013, respectively. These amounts do not include derivatives associated with the Variable Annuity Hedging Program.

Interest Rate Sensitivity

Invested Assets Supporting Fixed Liabilities

Included in the following table is the before-tax change in the net economic value of investment contracts (e.g., fixed annuity contracts) issued by the Company's Talcott Resolution segment, as well as certain insurance product liabilities (e.g., disability contracts) issued by the Company's Group Benefits segment, for which the payment rates are fixed at contract issuance and the investment experience is substantially absorbed by the Company's operations, along with the corresponding invested assets. Also included in this analysis are the interest rate sensitive derivatives used by the Company to hedge its exposure to interest rate risk in the investment portfolios supporting these contracts. This analysis does not include the assets and corresponding liabilities of certain insurance products such as auto, property, term life insurance, and certain life contingent annuities. Certain financial instruments, such as limited partnerships and other alternative investments, have been omitted from the analysis due to the fact that the investments generally lack sensitivity to interest rate changes. Separate account assets and liabilities are excluded from the analysis because gains and losses in separate accounts accrue to policyholders. The calculation of the estimated hypothetical change in net economic value below assumes a 100 basis point upward and downward parallel shift in the yield curve.

Interest rate sensitivity of fixed liabilities and invested assets supporting them	**Change in Net Economic Value as of December 31,**			
	2014		**2013 [1]**	
Basis point shift	-100	+100	-100	+100
Increase (decrease) in economic value, before tax	$ (452)	$ 304	$ (234)	$ 128

[1] The table above excludes all assets and liabilities associated with the Company's former Japan variable and fixed annuity business.

The carrying value of fixed maturities, commercial mortgage loans and short-term investments related to the businesses included in the table above was $27.2 billion and $28.6 billion, as of December 31, 2014 and 2013, respectively. The hypothetical change in net economic value increased as compared to December 31, 2013, primarily as a result of the impact of higher asset fair values driven by lower interest rates. The assets supporting the fixed liabilities are monitored and managed within set duration guidelines, and are evaluated on a daily basis, as well as annually using scenario simulation techniques in compliance with regulatory requirements.

Invested Assets Not Supporting Fixed Liabilities

The following table provides an analysis showing the estimated before-tax change in the fair value of the Company's investments and related derivatives, excluding assets supporting fixed liabilities which are included in the table above, assuming 100 basis point upward and downward parallel shifts in the yield curve as of December 31, 2014 and 2013. Certain financial instruments, such as limited partnerships and other alternative investments, have been omitted from the analysis due to the fact that the investments are accounted for under the equity method and generally lack sensitivity to interest rate changes.

Interest rate sensitivity of invested assets not supporting fixed liabilities	**Change in Fair Value as of December 31,**			
	2014		**2013 [1]**	
Basis point shift	-100	+100	-100	+100
Increase (decrease) in fair value, before tax	$ 2,182	$ (2,083)	$ 2,100	$ (2,005)

[1] The table above excludes all assets associated with the Company's former Japan variable and fixed annuity business.

The carrying value of fixed maturities, commercial mortgage loans and short-term investments related to the businesses included in the table above was $43.1 billion and $40.7 billion, as of December 31, 2014 and 2013, respectively. The selection of the 100 basis point parallel shift in the yield curve was made only as an illustration of the potential hypothetical impact of such an event and should not be construed as a prediction of future market events. Actual results could differ materially from those illustrated above due to the nature of the estimates and assumptions used in the above analysis. The Company's sensitivity analysis calculation assumes that the composition of invested assets and liabilities remain materially consistent throughout the year and that the current relationship between short-term and long-term interest rates will remain constant over time. As a result, these calculations may not fully capture the impact of portfolio re-allocations, significant product sales or non-parallel changes in interest rates.

Equity Risk

Equity risk is defined as the risk of financial loss due to changes in the value of global equities or equity indices. The Company has exposure to equity risk from assets under management, embedded derivatives within the Company's variable annuities and assets that support the Company's pension plans. Equity Risk on the Company's Variable Annuity products is mitigated through various hedging programs. (See the Variable Annuity Hedge Program Section)

The Company's exposure to equity risk includes the potential for lower earnings associated with certain businesses such as mutual funds and variable annuities where fee income is earned based upon the value of the assets under management. For further discussion of equity risk, see the Variable Product Guarantee Risks and Risk Management section below. In addition, Talcott Resolution includes certain guaranteed benefits, primarily associated with variable annuity products, which increase the Company's potential benefit exposure in the periods that equity markets decline.

The Company is also subject to equity risk based upon the assets that support its pension plans. The asset allocation mix is reviewed on a periodic basis. In order to minimize risk, the pension plans maintain a listing of permissible and prohibited investments. In addition, the pension plans have certain concentration limits and investment quality requirements imposed on permissible investment options. For further discussion of equity risk associated with the pension plans, see the Critical Accounting Estimates section of the MD&A under "Pension and Other Postretirement Benefit Obligations" and Note 17 of Notes to Consolidated Financial Statements.

Variable Product Guarantee Risks and Risk Management

The Company's variable products are significantly influenced by the U.S. and other equity markets. Increases or declines in equity markets impact certain assets and liabilities related to the Company's variable products and the Company's earnings derived from those products. The Company's variable products currently include U.S. variable annuity contracts and mutual funds.

Generally, declines in equity markets will:

- reduce the value of assets under management and the amount of fee income generated from those assets;
- increase the liability for GMWB benefits resulting in realized capital losses;
- increase the value of derivative assets used to hedge product guarantees resulting in realized capital gains;
- increase the costs of the hedging instruments we use in our hedging program;
- increase the Company's net amount at risk ("NAR") for GMDB and GMWB benefits;
- increase the amount of required assets to be held backing variable annuity guarantees to maintain required regulatory reserve levels and targeted risk based capital ratios; and
- decrease the Company's estimated future gross profits, resulting in a DAC unlock charge. See Estimated Gross Profits Used in the Valuation and Amortization of Assets and Liabilities Associated with Variable Annuity Contracts within the Critical Accounting Estimates section of the MD&A for further information.

Generally, increases in equity markets will reduce the value of the hedge derivative assets, resulting in realized capital losses, and will generally have the inverse impact of those listed above. For additional information, see Risk Hedging - Variable Annuity Hedging Program section.

Variable Annuity Guaranteed Benefits

The Company's variable annuities include GMDB and certain contracts include GMWB features. Declines in the equity markets will increase the Company's liability for these benefits. Generally, a GMWB contract is 'in the money' if the contract holder's guaranteed remaining benefit becomes greater than the account value.

The NAR is generally defined as the guaranteed minimum benefit amount in excess of the contract holder's current account value. Variable annuity account values with guarantee features were $52.9 billion and $81.9 billion (including HLIKK) as of December 31, 2014 and December 31, 2013, respectively.

The following tables summarize the account values of the Company's variable annuities with guarantee features and the NAR split between various guarantee features (retained net amount at risk does not take into consideration the effects of the variable annuity hedge programs in place as of each balance sheet date):

Total Variable Annuity Guarantees
As of December 31, 2014

($ in billions)	Account Value	Gross Net Amount at Risk	Retained Net Amount at Risk	% of Contracts In the Money[2]	% In the Money [2] [3]
U.S. Variable Annuity [1]					
GMDB	$ 52.9	$ 3.8	$ 0.8	23%	14%
GMWB	24.8	0.2	0.1	6%	11%

Total Variable Annuity Guarantees
As of December 31, 2013

($ in billions)	Account Value	Gross Net Amount at Risk	Retained Net Amount at Risk	% of Contracts In the Money [2]	% In the Money [2] [3]
U.S. Variable Annuity [1]					
GMDB	$ 61.8	$ 4.3	$ 1.0	16%	26%
GMWB	30.3	0.2	0.1	5%	12%
Japan Variable Annuity [1] [4]					
GMDB	20.1	0.8	0.6	31%	8%
GMIB [5]	18.5	0.1	0.1	20%	3%

[1] Policies with a guaranteed living benefit also have a guaranteed death benefit. The net amount at risk ("NAR") for each benefit is shown; however these benefits are not additive. When a policy terminates due to death, any NAR related to GMWB is released. Similarly, when a policy goes into benefit status on a GMWB, its GMDB NAR is reduced to zero.

[2] Excludes contracts that are fully reinsured.

[3] For all contracts that are "in the money", this represents the percentage by which the average contract was in the money.

[4] On June 30, 2014, the Company completed the sale of the Japan variable annuity business of HLIKK. For further information of the sale of Japan variable annuity business, HLIKK in 2014, see Note 2 - Business Dispositions of Notes to the Consolidated Financial Statements.

[5] Includes small amount of GMWB and GMAB.

Many policyholders with a GMDB also have a GMWB. Policyholders that have a product that offer both guarantees can only receive the GMDB or GMWB. The GMDB NAR disclosed in the tables above is a point in time measurement and assumes that all participants utilize the GMDB benefit on that measurement date. For additional information on the Company's GMDB liability, see Note 10 - Separate Accounts, Death Benefits and Other Insurance Benefit Features of Notes to Consolidated Financial Statements.

The Company expects to incur GMDB payments in the future only if the policyholder has an "in the money" GMDB at their death. If the account value is reduced to a specified level, the contract holder will receive an annuity equal to the guaranteed remaining balance ("GRB"). For the Company's "life-time" GMWB products, this annuity can exceed the GRB. As the account value fluctuates with equity market returns on a daily basis and the "life-time" GMWB payments may exceed the GRB, the ultimate amount to be paid by the Company, if any, is uncertain and could be significantly more or less than the Company's current carried liability. For additional information on the Company's GMWB liability, see Note 5 - Fair Value Measurements of Notes to Consolidated Financial Statements.

Variable Annuity Market Risk Exposures

The following table summarizes the broad Variable Annuity Guarantees offered by the Company and the market risks to which the guarantee is most exposed from a U.S. GAAP accounting perspective.

Variable Annuity Guarantees [1]	**U.S. GAAP Treatment [1]**	**Primary Market Risk Exposures [1]**
GMDB and life-contingent component of the GMWB	Accumulation of the portion of fees required to cover expected claims, less accumulation of actual claims paid	Equity Market Levels
GMWB (excluding life-contingent portions)	Fair Value	Equity Market Levels / Implied Volatility / Interest Rates

[1] Each of these guarantees and the related U.S. GAAP accounting volatility will also be influenced by actual and estimated policyholder behavior.

Risk Hedging

Variable Annuity Hedging Program

The Company's variable annuity hedging is primarily focused on reducing the economic exposure to market risks associated with guaranteed benefits that are embedded in our variable annuity contracts through the use of reinsurance and capital market derivative instruments. The variable annuity hedging also considers the potential impacts on Statutory accounting results.

Reinsurance

The Company uses reinsurance for a portion of contracts with GMWB riders issued prior to the third quarter of 2003 and GMWB risks associated with a block of business sold between the third quarter of 2003 and the second quarter of 2006. The Company also uses reinsurance for a majority of the GMDB issued.

Capital Market Derivatives

GMWB Hedge Program

The Company enters into derivative contracts to hedge market risk exposures associated with the GMWB liabilities that are not reinsured. These derivative contracts include customized swaps, interest rate swaps and futures, and equity swaps, options, and futures, on certain indices including the S&P 500 index, EAFE index, and NASDAQ index.

Additionally, the Company holds customized derivative contracts to provide protection from certain capital market risks for the remaining term of specified blocks of non-reinsured GMWB riders. These customized derivative contracts are based on policyholder behavior assumptions specified at the inception of the derivative contracts. The Company retains the risk for differences between assumed and actual policyholder behavior and between the performance of the actively managed funds underlying the separate accounts and their respective indices.

While the Company actively manages this dynamic hedging program, increased U.S. GAAP earnings volatility may result from factors including, but not limited to: policyholder behavior, capital markets, divergence between the performance of the underlying funds and the hedging indices, changes in hedging positions and the relative emphasis placed on various risk management objectives.

Macro Hedge Program

The Company's macro hedging program uses derivative instruments such as options and futures on equities and interest rates to provide protection against the statutory tail scenario risk arising from GMWB and GMDB liabilities, on the Company's statutory surplus. These macro hedges cover some of the residual risks not otherwise covered by specific dynamic hedging programs. Management assesses this residual risk under various scenarios in designing and executing the macro hedge program. The macro hedge program will result in additional U.S. GAAP earnings volatility as changes in the value of the macro hedge derivatives, which are designed to reduce statutory reserve and capital volatility, may not be closely aligned to changes in GAAP liabilities.

Variable Annuity Hedging Program Sensitivities

The underlying guaranteed living benefit liabilities and the related hedge assets within the GMWB (excluding the life-contingent GMWB benefits) and Macro hedge programs are carried at fair value, with the exception of liabilities within the Macro hedge program.

The following table presents our estimates of the potential instantaneous impacts from sudden market stresses related to equity market prices, interest rates, implied market volatilities, and foreign currency exchange rates. The sensitivities below represent: (1) the net estimated difference between the change in the fair value of GMWB liabilities and the underlying hedge instruments and (2) the estimated change in fair value of the hedge instruments for the macro program, before the impacts of amortization of DAC, and taxes. As noted above, certain hedge assets are used to hedge liabilities that are not carried at fair value and will not have a liability offset in the GAAP sensitivity analysis. All sensitivities are measured as of year end and are related to the fair value of liabilities and hedge instruments in place as of year end for the Company's variable annuity hedge programs. The impacts presented in the table below are estimated individually and measured without consideration of any correlation among market risk factors.

GAAP Sensitivity Analysis	As of December 31, 2014					
(before tax and DAC) [1]	GMWB			Macro		
Equity Market Return	**(20)%**	**(10)%**	**10 %**	**(20)%**	**(10)%**	**10 %**
Potential Net Fair Value Impact	*$ (19)*	*$ (10)*	*$ 8*	*$ 61*	*$ 22*	*$ (16)*
Interest Rates	**-50bps**	**-25bps**	**25bps**	**-50bps**	**-25bps**	**25bps**
Potential Net Fair Value Impact	*$ (2)*	*$ —*	*$ (1)*	*$ 14*	*$ 7*	*$ (7)*
Implied Volatilities	**10 %**	**2 %**	**(10)%**	**10 %**	**2 %**	**(10)%**
Potential Net Fair Value Impact	*$ 20*	*$ 4*	*$ (13)*	*$ 74*	*$ 15*	*$ (76)*

[1] These sensitivities are based on the following key market levels as of December 31, 2014: 1) S&P of 2059; 2) 10yr US swap rate of 2.34%; and 3) S&P 10yr volatility of 26.58%

The above sensitivity analysis is an estimate and should not be used to predict the future financial performance of the Company's variable annuity hedge programs. The actual net changes in the fair value liability and the hedging assets illustrated in the above table may vary materially depending on a variety of factors which include but are not limited to:

- The sensitivity analysis is only valid as of the measurement date and assumes instantaneous changes in the capital market factors and no ability to rebalance hedge positions prior to the market changes;
- Changes to the underlying hedging program, policyholder behavior, and variation in underlying fund performance relative to the hedged index, which could materially impact the liability; and
- The impact of elapsed time on liabilities or hedge assets, any non-parallel shifts in capital market factors, or correlated moves across the sensitivities.

Foreign Currency Exchange Risk

Foreign currency exchange risk is defined as the risk of financial loss due to changes in the relative value between currencies. The Company's foreign currency exchange risk is related to non-U.S. dollar denominated investments, which primarily consist of fixed maturity investments, and a yen denominated fixed payout annuity that is reinsured from HLIKK, a former, indirect wholly-owned subsidiary that was sold on June 30, 2014. For further discussion of the sale, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements. In addition, the Company's Talcott Resolution operations formerly issued non-U.S. dollar denominated funding agreement liability contracts. A significant portion of the Company's foreign currency exposure is mitigated through the use of derivatives.

Fixed Maturity Investments

The risk associated with the non-U.S. dollar denominated fixed maturities relates to potential decreases in value and income resulting from unfavorable changes in foreign exchange rates. The fair value of the non-U.S. dollar denominated fixed maturities at December 31, 2014 and 2013 were approximately $0.5 billion and $2.6 billion, respectively. Included in these amounts are $0.4 billion and $2.4 billion at December 31, 2014 and 2013, respectively, related to non-U.S. dollar denominated fixed maturity securities that directly support liabilities denominated in the same currencies. At December 31, 2014 and 2013, the derivatives used to hedge currency exchange risk related to the remaining non-U.S. dollar denominated fixed maturities had a total notional amount of $137 and $194, respectively, and total fair value of $2 and $(13), respectively.

Based on the fair values of the Company's non-U.S. dollar denominated securities and derivative instruments as of December 31, 2014 and 2013, management estimates that a 10% unfavorable change in exchange rates would decrease the fair values by a before-tax total of approximately $38 and $165, respectively. The estimated impact was based upon a 10% change in December 31 spot rates. The selection of the 10% unfavorable change was made only for illustration of the potential hypothetical impact of such an event and should not be construed as a prediction of future market events. Actual results could differ materially from those illustrated above due to the nature of the estimates and assumptions used in the above analysis.

Liabilities

The Company has foreign currency exchange risk associated with the yen denominated Japan fixed payout annuities reinsured from HLIKK. The Company has entered into pay U.S. dollar, receive yen swap contracts to hedge the currency exposure between the U.S. dollar denominated assets and the yen denominated fixed liability reinsurance payments.

Talcott Resolution previously issued non-U.S. dollar denominated funding agreement liability contracts. The Company hedged the foreign currency risk associated with these liability contracts with currency rate swaps. At December 31, 2014 and 2013, the derivatives used to hedge foreign currency exchange risk related to foreign denominated liability contracts had a total notional amount of $94 and a total fair value of $(20) and $(1), respectively.

Financial Risk on Statutory Capital

Statutory surplus amounts and risk-based capital (“RBC”) ratios may increase or decrease in any period depending upon a variety of factors and may be compounded in extreme scenarios or if multiple factors occur at the same time. At times the impact of changes in certain market factors or a combination of multiple factors on RBC ratios can be counterintuitive. Factors include:

- In general, as equity market levels and interest rates decline, the amount and volatility of both our actual potential obligation, as well as the related statutory surplus and capital margin for death and living benefit guarantees associated with variable annuity contracts can be materially negatively affected, sometimes at a greater than linear rate. Other market factors that can impact statutory surplus, reserve levels and capital margin include differences in performance of variable subaccounts relative to indices and/or realized equity and interest rate volatilities. In addition, as equity market levels increase, generally surplus levels will increase. RBC ratios will also tend to increase when equity markets increase. However, as a result of a number of factors and market conditions, including the level of hedging costs and other risk transfer activities, reserve requirements for death and living benefit guarantees and RBC requirements could increase with rising equity markets, resulting in lower RBC ratios. Non-market factors, which can also impact the amount and volatility of both our actual potential obligation, as well as the related statutory surplus and capital margin, include actual and estimated policyholder behavior experience as it pertains to lapsation, partial withdrawals, and mortality.
- As the value of certain fixed-income and equity securities in our investment portfolio decreases, due in part to credit spread widening, statutory surplus and RBC ratios may decrease.
- As the value of certain derivative instruments that do not qualify for hedge accounting decreases, statutory surplus and RBC ratios may decrease.
- Our statutory surplus is also impacted by widening credit spreads as a result of the accounting for the assets and liabilities in our fixed market value adjusted ("MVA") annuities. Statutory separate account assets supporting the fixed MVA annuities are recorded at fair value. In determining the statutory reserve for the fixed MVA annuities, we are required to use current crediting rates in the U.S. In many capital market scenarios, current crediting rates in the U.S. are highly correlated with market rates implicit in the fair value of statutory separate account assets. As a result, the change in statutory reserve from period to period will likely substantially offset the change in the fair value of the statutory separate account assets. However, in periods of volatile credit markets, such as we experienced in 2008 and 2009, actual credit spreads on investment assets may increase sharply for certain sub-sectors of the overall credit market, resulting in statutory separate account asset market value losses. As actual credit spreads are not fully reflected in the current crediting rates in the U.S. the calculation of statutory reserves will not substantially offset the change in fair value of the statutory separate account assets resulting in reductions in statutory surplus. This has resulted and may continue to result in the need to devote significant additional capital to support the product.
- With respect to our fixed annuity business, sustained low interest rates may result in a reduction in statutory surplus and an increase in NAIC required capital.

Most of these factors are outside of the Company’s control. The Company’s financial strength and credit ratings are significantly influenced by the statutory surplus amounts and RBC ratios of our insurance company subsidiaries. In addition, rating agencies may implement changes to their internal models that have the effect of increasing or decreasing the amount of statutory capital we must hold in order to maintain our current ratings.

The Company has reinsured approximately 26% of its risk associated with GMWB and 79% of its risk associated with the aggregate GMDB exposure. These reinsurance agreements serve to reduce the Company’s exposure to changes in the statutory reserves and the related capital and RBC ratios associated with changes in the capital markets. The Company also continues to explore other solutions for mitigating the capital market risk effect on surplus, such as external reinsurance solutions, modifications to our hedging program, changes in product design, increasing pricing and expense management.

Credit Risk

Credit risk is defined as the risk to earnings or capital due to uncertainty of an obligor's or counterparty's ability or willingness to meet its obligations in accordance with contractually agreed upon terms. The majority of the Company's credit risk is concentrated in its investment holdings but is also present in reinsurance and insurance portfolios. Credit risk is comprised of three major factors: the risk of change in credit quality, or credit migration risk; the risk of default; and the risk of a change in value of a financial instrument due to changes in credit spread that are unrelated to changes in obligor credit quality. A decline in creditworthiness is typically associated with an increase in an investment's credit spread, potentially resulting in an increase in other-than-temporary impairments and an increased probability of a realized loss upon sale.

The objective of the Company's enterprise credit risk management strategy is to identify, quantify, and manage credit risk on an aggregate portfolio basis and to limit potential losses in accordance with an established credit risk management policy. The Company manages to its credit risk appetite by primarily holding a diversified mix of investment grade issuers and counterparties across its investment, reinsurance, and insurance portfolios. Potential losses are also limited within portfolios by diversifying across geographic regions, asset types, and sectors.

The Company manages credit risk exposure from its inception to its maturity or sale. Both the investment and reinsurance areas have formulated procedures for counterparty approvals and authorizations. Although approval processes may vary by area and type of credit risk, approval processes establish minimum levels of creditworthiness and financial stability. Credits considered for investment are subjected to prudent and conservative underwriting reviews. Within the investment portfolio, private securities, such as commercial mortgages, and private placements, must be presented to their respective review committees for approval.

Credit risks are managed on an on-going basis through the use of various processes and analyses. At the investment, reinsurance, and insurance product levels, fundamental credit analyses are performed at the issuer/counterparty level on a regular basis. To provide a holistic review within the investment portfolio, fundamental analyses are supported by credit ratings, assigned by nationally recognized rating agencies or internally assigned, and by quantitative credit analyses. The Company utilizes a credit value at risk ("VaR") to measure default and migration risk on a monthly basis. Issuer and security level risk measures are also utilized. In the event of deterioration in credit quality, the Company maintains watch lists of problem counterparties within the investment and reinsurance portfolios. The watch lists are updated based on regular credit examinations and management reviews. The Company also performs quarterly assessments of probable expected losses in the investment portfolio. The process is conducted on a sector basis and is intended to promptly assess and identify potential problems in the portfolio and to recognize necessary impairments.

Credit risk policies at the enterprise and operation level ensure comprehensive and consistent approaches to quantifying, evaluating, and managing credit risk under expected and stressed conditions. These policies define the scope of the risk, authorities, accountabilities, terms, and limits, and are regularly reviewed and approved by senior management and ERM. Aggregate counterparty credit quality and exposure is monitored on a daily basis utilizing an enterprise-wide credit exposure information system that contains data on issuers, ratings, exposures, and credit limits. Exposures are tracked on a current and potential basis. Credit exposures are reported regularly to the ERCC and to the Finance, Investment and Risk Management Committee. Exposures are aggregated by ultimate parent across investments, reinsurance receivables, insurance products with credit risk, and derivative counterparties. The credit database and reporting system are available to all key credit practitioners in the enterprise.

The Company exercises various and differing methods to mitigate its credit risk exposure within its investment and reinsurance portfolios. Some of the reasons for mitigating credit risk include financial instability or poor credit, avoidance of arbitration or litigation, future uncertainty, and exposure in excess of risk tolerances. Credit risk within the investment portfolio is most commonly mitigated through asset sales or the use of derivative instruments. Counterparty credit risk is mitigated through the practice of entering into contracts only with highly creditworthy institutions and through the practice of holding and posting of collateral. In addition, transactions cleared through a central clearing house reduce risk due to their ability to require daily variation margin, monitor the Company's ability to request additional collateral in the event of a counterparty downgrade, and be an independent valuation source. Systemic credit risk is mitigated through the construction of high-quality, diverse portfolios that are subject to regular underwriting of credit risks. For further discussion of the Company's investment and derivative instruments, see MD&A - Enterprise Risk Management, Portfolio Risks and Risk Management and Note 6 - Investments and Derivative Instruments of Notes to Consolidated Financial Statements. For further discussion on managing and mitigating credit risk from the use of reinsurance via an enterprise security review process, see MD&A - Enterprise Risk Management, Insurance Risk Management, Reinsurance as a Risk Management Strategy.

As of December 31, 2014, the Company had no exposure to any credit concentration risk of a single issuer or counterparty greater than 10% of the Company's stockholders' equity, other than the U.S. government and certain U.S. government securities. As of December 31, 2013, the Company's only exposure to any credit concentration risk of a single issuer or counterparty greater than 10% of the Company's stockholders' equity, other than the U.S. government and certain U.S. government securities, were the Government of Japan. The Government of Japan securities represented $2.6 billion, or 14% of stockholders' equity, and 3% of total invested assets. For further discussion of concentration of credit risk in the investment portfolio, see the Concentration of Credit Risk section in Note 6 - Investments and Derivative Instruments of Notes to Consolidated Financial Statements.

Derivative Instruments

The Company utilizes a variety of OTC, OTC-cleared and exchange-traded derivative instruments as a part of its overall risk management strategy, as well as to enter into replication transactions. Derivative instruments are used to manage risk associated with interest rate, equity market, credit spread, issuer default, price, and currency exchange rate risk or volatility. Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that are permissible investments under the Company's investment policies. For further information on the Company's use of derivatives, see Note 6 of Notes to Consolidated Financial Statements.

Derivative activities are monitored and evaluated by the Company's compliance and risk management teams and reviewed by senior management. In addition, the Company monitors counterparty credit exposure on a monthly basis to ensure compliance with Company policies and statutory limitations. The notional amounts of derivative contracts represent the basis upon which pay or receive amounts are calculated and are not reflective of credit risk. Downgrades to the credit ratings of The Hartford's insurance operating companies may have adverse implications for its use of derivatives including those used to hedge benefit guarantees of variable annuities. In some cases, downgrades may give derivative counterparties for OTC derivatives and clearing brokers for OTC-cleared derivatives the right to cancel and settle outstanding derivative trades or require additional collateral to be posted. In addition, downgrades may result in counterparties and clearing brokers becoming unwilling to engage in or clear additional derivatives or may require collateralization before entering into any new trades. This will restrict the supply of derivative instruments commonly used to hedge variable annuity guarantees, particularly long-dated equity derivatives and interest rate swaps.

The Company uses various derivative counterparties in executing its derivative transactions. The use of counterparties creates credit risk that the counterparty may not perform in accordance with the terms of the derivative transaction. The Company has derivative counterparty exposure policies which limit the Company's exposure to credit risk. The Company's policies with respect to derivative counterparty exposure establishes market-based credit limits, favors long-term financial stability and creditworthiness of the counterparty and typically requires credit enhancement/credit risk reducing agreements. The Company minimizes the credit risk of derivative instruments by entering into transactions with high quality counterparties primarily rated A or better, which are monitored and evaluated by the Company's risk management team and reviewed by senior management. The Company also generally requires that OTC derivative contracts be governed by an International Swaps and Derivatives Association ("ISDA") Master Agreement, which is structured by legal entity and by counterparty and permits right of offset.

The Company has developed credit exposure thresholds which are based upon counterparty ratings. Credit exposures are measured using the market value of the derivatives, resulting in amounts owed to the Company by its counterparties or potential payment obligations from the Company to its counterparties. The Company enters into credit support annexes in conjunction with the ISDA agreements, which require daily collateral settlement based upon agreed upon thresholds. For purposes of daily derivative collateral maintenance, credit exposures are generally quantified based on the prior business day's market value and collateral is pledged to and held by, or on behalf of, the Company to the extent the current value of the derivatives exceed the contractual thresholds. In accordance with industry standard and the contractual agreements, collateral is typically settled on the next business day. The Company has exposure to credit risk for amounts below the exposure thresholds which are uncollateralized, as well as for market fluctuations that may occur between contractual settlement periods of collateral movements.

For the company's derivative programs, the maximum uncollateralized threshold for a derivative counterparty for a single legal entity is $10. The Company currently transacts OTC derivatives in five legal entities that have a threshold greater than zero; and therefore the maximum combined threshold for a single counterparty across all legal entities that use derivatives is $50. In addition, the Company may have exposure to multiple counterparties in a single corporate family due to a common credit support provider. As of December 31, 2014 the maximum combined threshold for all counterparties under a single credit support provider across all legal entities that use derivatives is $100. Based on the contractual terms of the collateral agreements, these thresholds may be immediately reduced due to a downgrade in either party's credit rating. For further discussion, see the Derivative Commitments section of Note 15 of Notes to Consolidated Financial Statements.

For the year ended December 31, 2014, the Company has incurred no losses on derivative instruments due to counterparty default.

In addition to counterparty credit risk, the Company may also introduce credit risk through the use of credit default swaps that are entered into to manage credit exposure. Credit default swaps involve a transfer of credit risk of one or many referenced entities from one party to another in exchange for periodic payments. The party that purchases credit protection will make periodic payments based on an agreed upon rate and notional amount, and for certain transactions there will also be an upfront premium payment. The second party, who assumes credit risk, will typically only make a payment if there is a credit event as defined in the contract and such payment will be typically equal to the notional value of the swap contract less the value of the referenced security issuer's debt obligation. A credit event is generally defined as default on contractually obligated interest or principal payments or bankruptcy of the referenced entity.

The Company uses credit derivatives to purchase credit protection and to assume credit risk with respect to a single entity, referenced index, or asset pool. The Company purchases credit protection through credit default swaps to economically hedge and manage credit risk of certain fixed maturity investments across multiple sectors of the investment portfolio. The Company also enters into credit default swaps that assume credit risk as part of replication transactions. Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that are permissible investments under the Company's investment policies. These swaps reference investment grade single corporate issuers and baskets, which include customized diversified portfolios of corporate issuers, which are established within sector concentration limits and may be divided into tranches which possess different credit ratings.

As of December 31, 2014 and 2013, the notional amount related to credit derivatives that purchase credit protection was $0.6 billion and $1.3 billion, respectively, while the fair value was $(6) and $(10), respectively. As of December 31, 2014 and 2013, the notional amount related to credit derivatives that assume credit risk was $1.5 billion and $1.9 billion, respectively, while the fair value was $3 and $33, respectively. For further information on credit derivatives, see Note 6 of Notes to Consolidated Financial Statements.

Investment Portfolio Risks and Risk Management

Investment Portfolio Composition

The following table presents the Company's fixed maturities, AFS, by credit quality. The average credit ratings referenced below and throughout this section are based on availability, and are the midpoint of the applicable ratings among Moody's, S&P, Fitch and Morningstar. If no rating is available from a rating agency, then an internally developed rating is used.

Fixed Maturities by Credit Quality

	December 31, 2014			December 31, 2013		
	Amortized Cost	Fair Value	Percent of Total Fair Value	Amortized Cost	Fair Value	Percent of Total Fair Value
United States Government/Government agencies	$ 7,135	$ 7,596	12.8%	$ 8,231	$ 8,208	13.2%
AAA	6,963	7,251	12.2%	6,215	6,376	10.2%
AA	9,258	10,056	16.9%	12,054	12,273	19.7%
A	15,250	16,717	28.2%	14,777	15,498	24.9%
BBB	13,464	14,397	24.2%	15,555	16,087	25.7%
BB & below	3,292	3,367	5.7%	3,809	3,915	6.3%
Total fixed maturities, AFS	**$ 55,362**	**$ 59,384**	**100%**	**$ 60,641**	**$ 62,357**	**100%**

The value of securities in the AA category declined as compared to December 31, 2013, primarily due to the sale of Japan Government bonds concurrent with the disposition of the Japan variable and fixed annuity business. The value of securities in the A category increased as a percentage of total as a result of the reduction in the AA rated securities discussed above. In addition, the value of securities in the BBB and BB & below categories has declined, as a result of sales of certain emerging market securities, primarily within the foreign government and corporate sectors. Fixed maturities, FVO, are not included in the above table. For further discussion on fair value option securities, see Note 5 - Fair Value Measurements of Notes to Consolidated Financial Statements.

The following table presents the Company's AFS securities by type, as well as fixed maturities and equity, FVO.

[1] Gross unrealized gains (losses) exclude the fair value of bifurcated embedded derivative features of certain securities. Changes in value are recorded in net realized capital gains (losses).

[2] Includes securities with pools of loans issued by the Small Business Administration which are backed by the full faith and credit of the U.S. government.

[3] Securities with an amortized cost and fair value of $1.0 billion and $1.1 billion, respectively, as of December 31, 2013, were reclassified in 2014 from utilities to energy as a result of an update to the Barclays bond index which is the primary component used in determining the classification in the above table. The balances as of December 31, 2013 have been reclassified to reflect the categorization as of December 31, 2014.

[4] Included in equity securities, AFS on the Consolidated Balance Sheets.

The decline in the fair value of AFS and FVO securities as compared to December 31, 2013 is primarily attributable to the sale of the Japan variable and fixed annuity buisness. In addition assets declined due to the effect of net outflows as a result of the continued runoff of Talcott Resolution, partially offset by higher valuations as a result of a decrease in long term interest rates and tighter credit spreads.

Energy Exposure

Market values of securities in the energy sector have experienced volatility in the second half of 2014 largely because prices for crude oil have declined significantly. West Texas Intermediate (WTI) crude oil is the benchmark for oil prices in the United States. Prices for WTI futures contracts for one month forward delivery have declined more than 51% from the June 2014 high of $108 a barrel, to $53 a barrel as of December 31, 2014. The drop in oil prices is primarily due to an increase in supply, lower than expected growth in global demand, and a stronger U.S. dollar. The speed and severity of the decline in oil prices has caused credit spreads to widen in the second half of 2014 for corporate and sovereign issuers that generate a large portion of their revenues from oil. The impact was more pronounced on issuers with below investment grade credit. Ultimately, the impact on these issuers will be determined by the severity and duration of the decline in oil prices and the ability of the issuers to adjust their cost structure or find other sources of revenue.

The Company has limited direct exposure within its investment portfolio to the energy sector, totaling only 5% of total invested assets as of December 31, 2014, and is primarily comprised of corporate and sovereign debt. The Company's exposure is primarily comprised of investment grade securities and the exposure is diversified by issuer and in different sub sectors of the energy market. The Company selectively reduced its exposure to the energy sector by approximately $300 in the fourth quarter of 2014. The table below summarizes the Company's exposure to the energy sector by sector and credit quality.

	December 31, 2014					
	Corporate & Equity Securities [1]		Foreign govt./govt. agencies [1] [2]		Total	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Investment grade	$ 2,923	$ 3,162	$ 268	$ 266	$ 3,191	$ 3,428
Below investment grade	288	266	36	32	324	298
Equity, AFS	23	21	—	—	23	21
Total energy exposure	**$ 3,234**	**$ 3,449**	**$ 304**	**$ 298**	**$ 3,538**	**$ 3,747**

	December 31, 2013					
	Corporate & Equity Securities [1]		Foreign govt./govt. agencies [1] [2]		Total	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Investment grade	$ 3,114	$ 3,338	$ 355	$ 340	$ 3,469	$ 3,678
Below investment grade	320	324	84	78	404	402
Equity, AFS	20	22	—	—	20	22
Total energy exposure	**$ 3,454**	**$ 3,684**	**$ 439**	**$ 418**	**$ 3,893**	**$ 4,102**

[1] Included in fixed maturities, AFS and FVO, equity, AFS and short-term investments on the Consolidated Balance Sheets. Excludes equity securities, FVO with cost and fair value of $45 and $45, respectively, that are hedged with total return swaps.

[2] Includes sovereigns for which oil exports are greater than 4% of gross domestic product.

The Company manages the credit risk associated with the energy sector within the investment portfolio on an on-going basis using macroeconomic analysis and issuer credit analysis. The Company considers alternate scenarios including oil prices remaining at low levels for an extended period and/or declining significantly below current levels. For additional details regarding the Company's management of credit risks, see the Credit Risk Section of this MD&A. The Company has evaluated all available-for-sale securities for potential other-than-temporary impairments as of December 31, 2014 and 2013 and concluded that for the securities in an unrealized loss position, it is more likely than not that we will recover our entire amortized cost basis in the securities. In addition, the Company does not currently have the intent-to-sell, nor will we be required to sell, the securities discussed above. For additional details regarding the Company's impairment process, see the Other-Than-Temporary Impairments Section of this MD&A.

Emerging Market Exposure

Early in 2014, emerging market securities were negatively impacted by lower European interest rates, increased political tension in eastern Europe, softer-than-expected economic growth, as well as trade and budget deficits, raising the potential for destabilizing capital outflows and rapid currency depreciation, causing bondholders to demand a higher yield which caused the fair value of securities held to decline. The decline in oil prices during the second half of 2014 has put added strain on certain emerging markets that rely on revenues derived from the energy sector. As a result of these factors, credit spreads for emerging market securities have been volatile and we expect continued sensitivity to geopolitical events, the ongoing evolution of Fed policy and other economic factors, including contagion risk.

The Company has limited direct exposure within its investment portfolio to emerging market issuers, totaling only 2% of total invested assets as of December 31, 2014, and is primarily comprised of sovereign and corporate debt issued in US dollars. The Company identifies exposures with the issuers' ultimate parent country of domicile, which may not be the country of the security issuer. The following table presents the Company's exposure to securities within certain emerging markets currently under the greatest stress, defined as countries that have a sovereign S&P credit rating of B- or below; or countries that have had a current account deficit and has an average inflation level greater than 5% over the past six months.

	December 31, 2014		December 31, 2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Argentina	$ 2	$ 2	$ 38	$ 40
Brazil	123	120	274	257
India	37	37	62	62
Indonesia	82	80	107	93
Kazakhstan	79	73	88	83
Lebanon	29	29	26	26
South Africa	54	53	65	60
Turkey	65	67	88	79
Ukraine	3	3	50	50
Uruguay	16	17	27	25
Venezuela	4	2	67	60
Other	97	96	50	50
Total [1]	**$ 591**	**$ 579**	**$ 942**	**$ 885**

[1] Includes an amortized cost and fair value of $137 and $131, respectively, as of December 31, 2014 and an amortized cost and fair value of $254 and $237, respectively, as of December 31, 2013 included in the exposure to the energy sector table above.

The Company manages the credit risk associated with emerging market securities within the investment portfolio on an on-going basis using macroeconomic analysis and issuer credit analysis subject to diversification and individual credit risk management limits. For additional details regarding the Company's management of credit risk, see the Credit Risk section of this MD&A. Due to increased political tensions in Argentina, Ukraine, and Venezuela, the Company selectively reduced its exposure to these economies during the first quarter of 2014.

In addition, the Company has limited exposure to the Russian Federation, with a total amortized cost and fair value of $23 and $20, respectively, as of December 31, 2014. The exposure is primarily comprised of government and government agency bonds, but also includes corporate bonds.

European Exposure

Certain economies in the European region have experienced adverse economic conditions, specifically in Europe's peripheral region (Greece, Ireland, Italy, Portugal and Spain), that were precipitated in part by elevated unemployment rates weighing on inflation rates, government debt levels and the slowing growth of the region. However, austerity measures aimed at reducing sovereign debt levels and the European Central Bank's plan to institute a bond buying program to provide liquidity and credit support, has reduced the risk of default on the sovereign debt of the countries within the region. As a result, economic conditions in the region have shown signs of improvement in the current period through stabilized credit ratings in Ireland, Portugal and Spain. Though economic conditions in the region have improved, continued slow GDP growth and elevated unemployment levels may continue to put pressure on sovereign debt.

The Company manages the credit risk associated with the European securities within the investment portfolio on an on-going basis using several processes which are supported by macroeconomic analysis and issuer credit analysis. For additional details regarding the Company's management of credit risk, see the Credit Risk section of this MD&A. The Company periodically considers alternate scenarios, including a base-case and both positive and negative "tail" scenarios that includes a partial or full break-up of the Eurozone. The outlook for key factors is evaluated, including the economic prospects for key countries, the potential for the spread of sovereign debt contagion, and the likelihood that policymakers and politicians pursue sufficient fiscal discipline and introduce appropriate backstops. Given the inherent uncertainty in the outcome of developments in the Eurozone, however, the Company has been focused on controlling both absolute levels of exposure and the composition of that exposure through both bond and derivative transactions.

The Company has limited direct European exposure, totaling only 6% of total invested assets as of December 31, 2014. The following tables present the Company's European securities included in the Securities by Type table above. The Company identifies exposures with the issuers' ultimate parent country of domicile, which may not be the country of the security issuer. The European countries within Europe's peripheral region are separately listed below because of the current significant economic strains persisting in these countries.

The following tables present the Company's European securities included in the Securities by Type table above.

	December 31, 2014							
	Corporate & Equity, AFS Non-Finan. [1]		Corporate & Equity, AFS Financials		Foreign Govt./ Govt. Agencies		Total

[1] Includes amortized cost and fair value of $4 as of December 31, 2014 and $34 as of December 31, 2013 related to limited partnerships and other alternative investments.

[2] Includes a notional amount and fair value of $44 and $0, respectively, as of December 31, 2014 and $190 and $(1), respectively, as of December 31, 2013 related to credit default swap protection. This includes a notional amount of $3 and $55 as of December 31, 2014 and December 31, 2013, respectively, related to single name corporate issuers in the financial services sector.

[3] As of December 31, 2014 and 2013, the Company had credit default swap protection with a notional amount of $3 related and $23 related to Corporate and Equity, AFS, respectively.

[4] Includes an amortized cost and fair value of $389 and $407, respectively, as of December 31, 2014 and an amortized cost and fair value of $574 and $590, respectively, as of December 31 2013 included in the exposure to the energy sector table above.

The Company’s European investment exposure largely relates to corporate entities which are domiciled in or generated a significant portion of its revenue within the United Kingdom, Germany, the Netherlands and Switzerland. Entities domiciled in the United Kingdom comprise the Company's largest exposure; as of December 31, 2014 and 2013, the exposure totals less than 3% of total invested assets. The majority of the European investments are U.S. dollar-denominated, and those securities that are pound and euro-denominated are hedged to U.S. dollars or support foreign-denominated liabilities. For a discussion of foreign currency risks, see the Foreign Currency Exchange Risk section of this MD&A. The Company does not hold any sovereign exposure to the peripheral region and does not hold any exposure to issuers in Greece. As of December 31, 2014 and 2013, the Company’s unfunded commitments associated with its investment portfolio was immaterial, and the weighted average credit quality of European investments was A- and A-, respectively.

As of December 31, 2014 and 2013, the Company’s credit default swaps that provide credit protection on European issuers had a notional amount of $44 and $190, respectively, and a fair value of $0 and $(1), respectively. As of December 31, 2014 and 2013 these credit default swaps that reference single name corporate and financial European issuers, of which a notional value of $3 and $23, respectively, related to the peripheral region. The maturity dates of credit defaults swaps are primarily consistent with the hedged bonds. For further information on the use of the Company’s credit derivatives and counterparty credit quality, see Derivative Instruments within the Credit Risk section of this MD&A.

In addition to the credit risk associated with the investment portfolio, the Company has $231 of reinsurance recoverables due from legal entity counterparties domiciled within Europe. For a more detail discussion of the Company's reinsurance arrangements, see Note 7 - Reinsurance of Notes to Consolidated Financial Statements.

Financial Services

The Company’s exposure to the financial services sector is predominantly through investment grade banking and insurance institutions. The following table presents the Company’s fixed maturity, AFS and equity, AFS securities in the financial services sector that are included in the Securities by Type table above.

	December 31, 2014			December 31, 2013		
	Amortized Cost	Fair Value	Net Unrealized	Amortized Cost	Fair Value	Net Unrealized
AAA	$ 31	$ 34	$ 3	$ 49	$ 52	$ 3
AA	401	436	35	468	493	25
A	2,610	2,804	194	2,518	2,616	98
BBB	1,681	1,734	53	1,978	1,952	(26)
BB & below	368	407	39	264	288	24
Total	**$ 5,091**	**$ 5,415**	**$ 324**	**$ 5,277**	**$ 5,401**	**$ 124**

The Company's exposure to the financial services sector remained relatively consistent, as the impact of sales was largely offset by higher valuations due to a decline in interest rates.

Commercial Real Estate

Commercial real estate market fundamentals, including property prices, financial conditions, transaction volume, and delinquencies, continue to improve. In addition, the availability of credit has increased and there is now less concern about the ability of borrowers to refinance as loans come due.

The following table presents the Company's exposure to CMBS bonds by current credit quality and vintage year, included in the Securities by Type table above. Credit protection represents the current weighted average percentage of the outstanding capital structure subordinated to the Company's investment holding that is available to absorb losses before the security incurs the first dollar loss of principal and excludes any equity interest or property value in excess of outstanding debt.

[1] The vintage year represents the year the pool of loans was originated.

The Company also has AFS exposure to CRE CDOs with an amortized cost and fair value of $114 and $193, respectively, as of December 31, 2014 and $176 and $248, respectively, as of December 31, 2013. These securities are comprised of diversified pools of commercial mortgage loans or equity positions of other CMBS securitizations. We continue to monitor these investments as economic and market uncertainties regarding future performance impact market liquidity and security premiums.

In addition to CMBS bonds and CRE CDOs, the Company has exposure to commercial mortgage loans as presented in the following table. These loans are collateralized by a variety of commercial properties and are diversified both geographically throughout the United States and by property type. These loans are primarily in the form of whole loans, where the Company is the sole lender, or may include participations. Loan participations are loans where the Company has purchased or retained a portion of an outstanding loan or package of loans and participates on a pro-rata basis in collecting interest and principal pursuant to the terms of the participation agreement. In general, A-Note participations have senior payment priority, followed by B-Note participations and then mezzanine loan participations. As of December 31, 2014, loans within the Company's mortgage loan portfolio that have had extensions or restructurings other than what is allowable under the original terms of the contract are immaterial.

Commercial Mortgage Loans

	December 31, 2014			December 31, 2013		
	Amortized Cost [1]	**Valuation Allowance**	**Carrying Value**	**Amortized Cost [1]**	**Valuation Allowance**	**Carrying Value**
Agricultural	$ 51	$ (5)	$ 46	$ 132	$ (7)	$ 125
Whole loans	5,333	(13)	5,320	5,223	(10)	5,213
A-Note participations	154	—	154	192	—	192
B-Note participations	17	—	17	99	(50)	49
Mezzanine loans	19	—	19	19	—	19
Total	**$ 5,574**	**$ (18)**	**$ 5,556**	**$ 5,665**	**$ (67)**	**$ 5,598**

[1] Amortized cost represents carrying value prior to valuation allowances, if any.

The overall decrease in mortgage loans is attributed to an increase in loan payoffs in the agricultural loan and loan participations portfolios, partially offset by loan originations in the whole loan portfolio. Since December 31, 2013, the Company funded $604 of commercial whole loans with a weighted average loan-to-value ("LTV") ratio of 61% and a weighted average yield of 4.0%. The Company continues to originate commercial whole loans within primary markets, such as office, industrial and multi-family, focusing on loans with strong LTV ratios and high quality property collateral. Included in the table above are mortgage loans held-for-sale with a carrying value and valuation allowance of $61 and $3, respectively, as of December 31, 2013. There were no mortgage loans held for sale a of December 31, 2014.

Municipal Bonds

The following table summarizes the amortized cost, fair value, and weighted average credit quality of the Company's available-for-sale investments in securities backed by states, municipalities and political subdivisions ("municipal bonds").

	December 31, 2014			December 31, 2013		
	Amortized Cost	Fair Value	Weighted Average Credit Quality	Amortized Cost	Fair Value	Weighted Average Credit Quality

Total Municipal	**$ 11,735**	**$ 12,871**	**AA-**	**$ 11,932**	**$ 12,173**	**AA-**

[1] *Pre-refunded bonds are bonds for which an irrevocable trust containing sufficient U.S. treasury, agency, or other securities has been established to fund the remaining payment of principal and interest.*

[2] *Leasing revenue bonds are generally the obligations of a financing authority established by the municipality that leases municipal facilities to a municipality. The notes are typically secured by lease payments made by the municipality that is leasing the facilities financed by the issue. Lease payments may be subject to annual appropriation by the municipality or the municipality may be obligated to appropriate general tax revenues to make lease payments.*

The overall increase in the fair value of municipal bonds is primarily due to the decline in interest rates and tighter credit spreads. As of December 31, 2014 and December 31, 2013, the largest issuer concentrations were the states of Illinois, California and Massachusetts, which each comprised less than 3% of the municipal bond portfolio and were primarily comprised of general obligation and taxable bonds.

Limited Partnerships and Other Alternative Investments

The following table presents the Company's investments in limited partnerships and other alternative investments which include hedge funds, mortgage and real estate funds, mezzanine debt funds, and private equity and other funds. Hedge funds are comprised of approximately half credit and equity related funds and approximately half global macro related funds with a market neutral focus. Mortgage and real estate funds consist of investments in funds whose assets consist of mortgage loans, mortgage loan participations, mezzanine loans or other notes which may be below investment grade, as well as equity real estate and real estate joint ventures. Mezzanine debt funds include investments in funds whose assets consist of subordinated debt that often incorporates equity-based options such as warrants and a limited amount of direct equity investments. Private equity and other funds primarily consist of investments in funds whose assets typically consist of a diversified pool of investments in small to mid-sized non-public businesses with high growth potential.

	December 31, 2014		December 31, 2013	
	Amount	Percent	Amount	Percent
Hedge funds	$ 1,187	40.3%	$ 1,341	44.1%

Private equity and other funds	1,133	38.5%	1,083	35.6%
Total	**$ 2,942**	**100%**	**$ 3,040**	**100%**

Available-for-Sale Securities — Unrealized Loss Aging

The total gross unrealized losses were $385 as of December 31, 2014, and have decreased $692, or 64%, from December 31, 2013, primarily due to a decrease in interest rates as well as sales. As of December 31, 2014, $324 of the gross unrealized losses were associated with securities depressed less than 20% of cost or amortized cost.

The remaining $61 of gross unrealized losses were associated with securities depressed greater than 20%. The securities depressed more than 20% are primarily corporate and equity securities within the energy sector, and securities with exposure to commercial real estate that have market spreads that are wider than the spreads at the securities' respective purchase dates. Unrealized losses on corporate and equity securities in the energy sector is primarily the result of the recent decline in oil prices previously discussed; see Exposure to the Energy Sector in the Investment Portfolio Risks and Risk Management section of this MD&A. Unrealized losses on securities with exposure to commercial and residential real estate are largely due to the continued market and economic uncertainties surrounding the performance of certain structures or vintages. Based on the Company's cash flow modeling and current market and collateral performance assumptions, these securities with exposure to commercial real estate have sufficient credit protection levels to receive contractually obligated principal and interest payments.

As part of the Company's ongoing security monitoring process, the Company has reviewed its AFS securities in an unrealized loss position and concluded that these securities are temporarily depressed and are expected to recover in value as the securities approach maturity or as real estate related market spreads continue to improve. For these securities in an unrealized loss position where a credit impairment has not been recorded, the Company's best estimate of expected future cash flows are sufficient to recover the amortized cost basis of the security. Furthermore, the Company neither has an intention to sell nor does it expect to be required to sell these securities. For further information regarding the Company's impairment analysis, see Other-Than-Temporary Impairments in the Investment Portfolio Risks and Risk Management section of this MD&A.

The following table presents the Company's unrealized loss aging for AFS securities by length of time the security was in a continuous unrealized loss position.

	December 31, 2014				December 31, 2013			
Consecutive Months	**Items**	**Cost or Amortized Cost**	**Fair Value**	**Unrealized Loss [1]**	**Items**	**Cost or Amortized Cost**	**Fair Value**	**Unrealized Loss [1]**

Other-Than-Temporary Impairments

The following table presents the Company's impairments recognized in earnings by security type excluding intent-to-sell impairment relating to the sales of Retirement Plans and Individual Life businesses.

	For the years ended December 31,		
	2014	2013	2012 [1]
ABS	$ —	$ 9	$ 29
CRE CDOs	—	2	10
CMBS			
Bonds	2	17	24
IOs	1	4	3
Corporate	35	20	28
Equity	11	15	65
Municipal	3	—	—
Agency	3	—	—
RMBS Non-agency			
RMBS Alt-A	—	—	1
Sub-prime	1	6	12
Other	3	—	—
Total	**$ 59**	**$ 73**	**$ 172**

[1] Excludes $177 of intent-to-sell impairments related to the sales of the Retirement Plans and Individual Life businesses.

Year ended December 31, 2014

For the year ended December 31, 2014, impairments recognized in earnings were comprised of credit impairments of $37, securities that the Company intends to sell of $17, impairments on equity securities of $2, and other impairments of $3.

Impairments for the year ended December 31, 2014 were primarily credit impairments concentrated in corporate securities. The corporate securities were impaired due to certain issuers that have experienced financial difficulty and either defaulted or are expected to default on contractually obligated principal and interest payments. Also included in credit impairments for the year ended December 31, 2014, were private placements that were impaired due to declines in expected cash flows related to the underlying referenced securities. The Company's determination of expected future cash flows used to calculate the credit loss amount is a quantitative and qualitative process. The Company incorporates its best estimate of future cash flows using internal assumptions and judgments that are informed by economic and industry specific trends, as well as our expectation with respect to security specific developments. Credit impairments for the year ended December 31, 2014 were primarily identified through security specific reviews and resulted from changes in the financial condition and near term prospects of certain issuers. Other impairments for the year ended December 31, 2014 primarily related to certain equity, AFS securities with debt-like characteristics that the Company intends to sell.

In addition to the credit impairments recognized in earnings, the Company recognized non-credit impairments in other comprehensive income of $5 for the year ended December 31, 2014, predominantly concentrated in corporate securities and CMBS. These non-credit impairments represent the difference between fair value and the Company's best estimate of expected future cash flows discounted at the security's effective yield prior to impairment, rather than at current market implied credit spreads. These non-credit impairments primarily represent increases in market liquidity premiums and credit spread widening that occurred after the securities were purchased, as well as a discount for variable-rate coupons which are paying less than at purchase date. In general, larger liquidity premiums and wider credit spreads are the result of deterioration of the underlying collateral performance of the securities, as well as the risk premium required to reflect future uncertainty in the real estate market.

Future impairments may develop as the result of changes in intent to sell specific securities or if actual results underperform current modeling assumptions, which may be the result of, but are not limited to, macroeconomic factors and security-specific performance below current expectations. Ultimate loss formation will be a function of macroeconomic factors and idiosyncratic security-specific performance.

Year ended December 31, 2013

For the year ended December 31, 2013, impairments recognized in earnings were comprised of credit impairments of $32, primarily concentrated in corporate and fixed rate CMBS bonds. Also, included were impairments on debt securities for which the Company had the intent-to-sell of $26, primarily related to structured securities with exposure to commercial and residential real estate and corporate securities. In addition, impairments recognized in earnings included impairments on equity securities of $15 that were in an unrealized loss position and the Company no longer believed the securities would recover in the foreseeable future.

Year ended December 31, 2012

For the year ended December 31, 2012, impairments recognized in earnings were comprised of intent-to-sell impairments of $238, which included $177 related to the sale of the Retirement Plans and Individual Life businesses. Also included were impairments on equity securities of $63 largely comprised of downgraded preferred equity securities of financial institutions. The Company's credit impairments totaled $48, primarily concentrated in structured securities associated with residential and commercial real estate, as well as ABS small business.

Valuation Allowances on Mortgage Loans

The following table presents (additions)/reversals to valuation allowances on mortgage loans.

	For the years ended December 31,		
	2014	**2013**	**2012**
Credit-related concerns	$ (4)	$ (2)	$ 14

Year ended December 31, 2014

For the year ended December 31, 2014, the change in valuation allowances on mortgage loan additions of $4 was largely driven by individual property performance. Continued improvement in commercial real estate property valuations will positively impact future loss development, with future impairments driven by idiosyncratic loan-specific performance, as well as the necessity of risk reduction in the portfolio, rather than overall deteriorating market fundamentals.

Year ended December 31, 2013

For the year ended December 31, 2013, the change in valuation allowances on mortgage loan additions of $2 was largely driven by individual property performance.

Year ended December 31, 2012

For the year ended December 31, 2012, the change in valuation allowances on mortgage loan reversals of $14 was largely driven by recovery of the property collateralizing a B-Note. The valuation allowance was reversed due to an increase in the valuation of the underlying collateral as a result of improved occupancy rates and performance of the property.

CAPITAL RESOURCES AND LIQUIDITY

The following section discusses the overall financial strength of The Hartford and its insurance operations including their ability to generate cash flows from each of their business segments, borrow funds at competitive rates and raise new capital to meet operating and growth needs over the next twelve months.

Liquidity Requirements and Sources of Capital

The Hartford Financial Services Group, Inc.

The liquidity requirements of the holding company of The Hartford Financial Services Group, Inc. ("HFSG Holding Company") have been and will continue to be met by HFSG Holding Company's fixed maturities, short-term investments and cash, dividends from its subsidiaries, principally its insurance operations, as well as the issuance of common stock, debt or other capital securities and borrowings from its credit facilities, as needed.

As of December 31, 2014, HFSG Holding Company held fixed maturities, short-term investments and cash of $2.1 billion. Expected liquidity requirements of the HFSG Holding Company for the next twelve months include interest on debt of approximately $360 and common stockholder dividends, subject to discretion of the Board of Directors, of approximately $300.

The Hartford has an intercompany liquidity agreement that allows for short-term advances of funds among the HFSG Holding Company and certain affiliates of up to $2.0 billion for liquidity and other general corporate purposes. The Connecticut Insurance Department granted approval for certain affiliated insurance companies that are parties to the agreement to treat receivables from a parent, including the HFSG Holding Company, as admitted assets for statutory accounting purposes. As of December 31, 2014, there were no amounts outstanding from the HFSG holding company.

Equity

In 2014, the Board of Directors approved increases aggregating $1.525 billion in the Company's authorized equity repurchase program, bringing the total authorization for equity repurchases to $2.775 billion for the period January 1, 2014 through December 31, 2015, with $979 remaining as of December 31, 2014.

In December 2014 the Company completed an ASR program, repurchasing a total of 13.9 million common shares under the ASR program for $525 million, including the initial delivery of 11.2 million common shares in July 2014 and 2.7 million common shares delivered in December 2014.

During the year ended December 31, 2014, the Company repurchased 49.5 million common shares for $1,796. During the period January 1, 2015 to February 24, 2015, the Company repurchased 4.1 million common shares, for $165.

Debt

In 2014, the Board also authorized the Company to allocate up to $500, including any premium or associated costs, to reduce debt outstanding. Initially expected to be completed prior to year end 2014, any repurchase of debt under the debt reduction allocation is now intended to occur in 2015 dependent on market conditions. In addition, the Company intends to repay at maturity the 4% senior notes due March 2015 and the 7.3% senior notes due November 2015 totaling $456.

On April 18, 2013, the Company issued $300 aggregate principal amount of 4.3% Senior Notes (the "4.3% Notes") due April 15, 2043. On March 26, 2013, the Company repurchased principal amounts of approximately $800, plus a payment for unpaid interest on senior notes due through the settlement date. The Company recognized a loss on extinguishment in 2013 of approximately $213, before tax, representing the excess of the repurchase price over the principal repaid and the write-off of the unamortized discount and debt issuance costs. For further information regarding debt, see Note 12 - Debt of Notes to Consolidated Financial Statements.

Intercompany Liquidity Agreements

Until April 1, 2014, Hartford Life and Annuity Insurance Company ("HLAI"), a wholly-owned subsidiary of the Company, ceded certain variable annuity contracts and their associated riders as well as certain payout annuities issued by HLAI or assumed by it to White River Life Reinsurance Company ("WRR"), an affiliate captive reinsurer which was dissolved on April 30, 2014. Upon dissolution, WRR repaid an intercompany note payable to the Company in the amount of $655 and returned $367 in capital to the Company, all of which was contributed as capital to HLAI to support the recaptured business. Effective April 1, 2014, the Company recaptured all reinsured risks from WRR to HLAI. This transaction received required regulatory approvals.

This arrangement provided the Company with a vehicle to provide more efficient financing of the risk associated with this business with internal funds. The reinsurance arrangement between HLAI and WRR did not impact the Company's reserving methodology or the amount of required regulatory capital associated with the reinsured business. The effects of this intercompany arrangement were eliminated in consolidation.

On January 29, 2015 Hartford Insurance Company of the Midwest, an indirect wholly-owned subsidiary of the Company, issued a Revolving Note (the "Note") in the principal amount of $58 to Hartford Fire Insurance Company, a subsidiary of the Company, under the intercompany liquidity agreement. The Note bears interest at 0.20% and matures on March 31, 2015.

Dividends

On February 26, 2015, The Hartford's Board of Directors declared a quarterly dividend of $0.18 per common share payable on April 1, 2015 to common shareholders of record as of March 9, 2015. There are no current restrictions on the HFSG Holding Company's ability to pay dividends to its shareholders. For a discussion of restrictions on dividends to the HFSG Holding Company from its insurance subsidiaries, see "Dividends from Insurance Subsidiaries" below. For a discussion of potential restrictions on the HFSG Holding Company's ability to pay dividends, see Part I, Item 1A, — Risk Factors for the risk factor *"Our ability to declare and pay dividends is subject to limitations"* .

Pension Plans and Other Postretirement Benefits

While the Company has significant discretion in making voluntary contributions to the U. S. qualified defined benefit pension plan, the Employee Retirement Income Security Act of 1974, as amended by the Pension Protection Act of 2006, the Worker, Retiree, and Employer Recovery Act of 2008, the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010, the Moving Ahead for Progress in the 21st Century Act of 2012 (MAP-21) and Internal Revenue Code regulations mandate minimum contributions in certain circumstances. The Company made contributions to the U. S. qualified defined benefit pension plan of $100, $100 and $200 in 2014, 2013 and 2012, respectively. No contributions were made to the other postretirement plans in 2014, 2013 and 2012. The Company's 2014, 2013 and 2012 required minimum funding contributions were immaterial. The Company does not have a 2015 required minimum funding contribution for the U.S. qualified defined benefit pension plan and the funding requirements for all pension plans are expected to be immaterial. The Company has not determined whether, and to what extent, contributions may be made to the U. S. qualified defined benefit pension plan in 2015. The Company will monitor the funded status of the U.S. qualified defined benefit pension plan during 2015 to make this determination.

In September 2014, the Company extended a limited time voluntary lump sum offer to vested participants in the U.S. qualified defined benefit pension plan who had separated from service, but who had not yet commenced annuity benefits. These participants had until November 2014 to elect to receive their benefit in a lump-sum payment, rather than as an annuity. The Company made benefit payments in December 2014 using assets from the U.S. qualified defined benefit pension plan. The Company recognized a pre-tax settlement charge of $128 in 2014. The pension settlement charge was offset by a corresponding increase in accumulated other comprehensive income and therefore did not impact consolidated stockholders' equity. For further discussion of the settlement, see Note 17 - Employee Benefit Plans of Notes to Consolidated Financial Statements.

Dividends from Insurance Subsidiaries

Dividends to the HFSG Holding Company from its insurance subsidiaries are restricted by insurance regulation. The payment of dividends by Connecticut-domiciled insurers is limited under the insurance holding company laws of Connecticut. These laws require notice to and approval by the state insurance commissioner for the declaration or payment of any dividend, which, together with other dividends or distributions made within the preceding twelve months, exceeds the greater of (i) 10% of the insurer's policyholder surplus as of December 31 of the preceding year or (ii) net income (or net gain from operations, if such company is a life insurance company) for the twelve-month period ending on the thirty-first day of December last preceding, in each case determined under statutory insurance accounting principles. In addition, if any dividend of a Connecticut-domiciled insurer exceeds the insurer's earned surplus, it requires the prior approval of the State of Connecticut Insurance Department ("CTDOI"). The insurance holding company laws of the other jurisdictions in which The Hartford's insurance subsidiaries are incorporated (or deemed commercially domiciled) generally contain similar (although in certain instances somewhat more restrictive) limitations on the payment of dividends. Dividends paid to HFSG Holding Company by its life insurance subsidiaries are further dependent on cash requirements of HLI and other factors. In addition to statutory limitations on paying dividends, the Company also takes other items into consideration when determining dividends from subsidiaries. These considerations include, but are not limited to, expected earnings and capitalization of the subsidiary, regulatory capital requirements and liquidity requirements of the individual operating company.

In 2014, HFSG Holding Company received approximately $2.5 billion in dividends from its property-casualty insurance subsidiaries through a series of transactions affecting the property and casualty and life insurance subsidiaries, including $1.4 billion of extraordinary dividends. As a result of the extraordinary dividend received in July 2014, Hartford Fire has no remaining ordinary dividend capacity for the twelve months following. As such, the Company does not anticipate taking any dividends from Hartford Fire until the third quarter of 2015. The dividends received from its property-casualty subsidiaries included $97 related to funding interest payments on an intercompany note between Hartford Holdings, Inc. ("HHI") and Hartford Fire Insurance Company.

In 2015, the Company’s property-casualty insurance subsidiaries are permitted to pay up to a maximum of approximately $1.5 billion in dividends to HFSG Holding Company without prior approval from the applicable insurance commissioner. In 2015, HFSG Holding Company anticipates receiving approximately $600 in dividends from its property-casualty insurance subsidiaries, net of any dividends paid by its property-casualty subsidiaries to fund interest payments on an intercompany note between HHI and Hartford Fire Insurance Company.

On January 30, 2015, HLA paid an extraordinary dividend of $100, based on approval received from the CTDOI. As a result of dividends and distributions taken in the preceding twelve months, effective March 3, 2015, HLA will have approximately $155 of ordinary dividend capacity available for the remainder of 2015. HFSG Holding Company anticipates receiving an additional $100 of dividends from HLA during 2015.

On January 30, 2015, HLIC paid an extraordinary dividend of $500, based on approval received from the CTDOI. As a result of this dividend, HLIC has no ordinary dividend capacity for the remainder of 2015. HFSG Holding Company anticipates receiving an additional $500 of extraordinary dividends from HLIC during 2015.

Other Sources of Capital for the HFSG Holding Company

The Hartford endeavors to maintain a capital structure that provides financial and operational flexibility to its insurance subsidiaries, ratings that support its competitive position in the financial services marketplace (see the “Ratings” section below for further discussion), and shareholder returns. As a result, the Company may from time to time raise capital from the issuance of equity, equity-related debt or other capital securities and is continuously evaluating strategic opportunities. The issuance of debt, common equity, equity-related debt or other capital securities could result in the dilution of shareholder interests or reduced net income due to additional interest expense.

Shelf Registrations

On August 9, 2013, The Hartford filed with the Securities and Exchange Commission (the “SEC”) an automatic shelf registration statement (Registration No. 333-190506) for the potential offering and sale of debt and equity securities. The registration statement allows for the following types of securities to be offered: debt securities, junior subordinated debt securities, preferred stock, common stock, depositary shares, warrants, stock purchase contracts, and stock purchase units. In that The Hartford is a well-known seasoned issuer, as defined in Rule 405 under the Securities Act of 1933, the registration statement went effective immediately upon filing and The Hartford may offer and sell an unlimited amount of securities under the registration statement during the three-year life of the registration statement.

Contingent Capital Facility

The Hartford is party to a put option agreement that provides The Hartford with the right to require the Glen Meadow ABC Trust, a Delaware statutory trust, at any time and from time to time, to purchase The Hartford’s junior subordinated notes in a maximum aggregate principal amount not to exceed $500. Under the Put Option Agreement, The Hartford will pay the Glen Meadow ABC Trust premiums on a periodic basis, calculated with respect to the aggregate principal amount of notes that The Hartford had the right to put to the Glen Meadow ABC Trust for such period. The Hartford has agreed to reimburse the Glen Meadow ABC Trust for certain fees and ordinary expenses. The Company holds a variable interest in the Glen Meadow ABC Trust where the Company is not the primary beneficiary. As a result, the Company did not consolidate the Glen Meadow ABC Trust. As of December 31, 2014, The Hartford has not exercised its right to require Glen Meadow ABC Trust to purchase the Notes. As a result, the notes remain a source of capital for the HFSG Holding Company.

Commercial Paper and Revolving Credit Facility

Commercial Paper

On December 18, 2014 the Board of Directors revised the Company's commercial paper issuance authorization from $2.0 billion to $1.0 billion to align the program with the Company's $1.0 billion five year revolving credit facility which became effective on October 31, 2014. On December 23, 2014, the Company entered into an agreement with a dealer under the commercial paper program. While The Hartford’s maximum borrowings available under its commercial paper program are $1.0 billion, the Company is dependent upon market conditions to access short-term financing through the issuance of commercial paper to investors. As of December 31, 2014 there is no commercial paper outstanding.

Revolving Credit Facilities

On October 31, 2014, the Company entered into a senior unsecured five-year revolving credit facility (the “Credit Facility”) that provides for up to $1.0 billion of unsecured credit through October 31, 2019, available in U.S. dollars, Euro, Sterling, Canadian dollars, and Japanese Yen, and terminated its $1.75 billion credit facility expiring January 6, 2016. As of December 31, 2014, there were no borrowings outstanding under the Credit Facility. The Credit Facility is available for general corporate purposes. Of the total availability under the Credit Facility, up to $250 is available to support letters of credit issued on behalf of the Company or subsidiaries of the Company. Under the Credit Facility, the Company must maintain a minimum level of consolidated net worth of $13.5 billion. The definition of consolidated net worth under the terms of the Credit Facility excludes AOCI and includes the Company’s outstanding junior subordinated debentures and perpetual preferred securities, net of discount. In addition, the Company’s maximum ratio of consolidated total debt to consolidated total capitalization permitted under the Credit Facility is 35%, and the maximum ratio of subsidiary debt to consolidated total capitalization is 10%. As of December 31, 2014, the Company was in compliance with all financial covenants under the Credit Facility.

HLIKK previously had four revolving credit facilities in support of operations. These credit facilities were transfered with the sale of HLIKK on June 30, 2014.

Derivative Commitments

Certain of the Company’s derivative agreements contain provisions that are tied to the financial strength ratings of the individual legal entity that entered into the derivative agreement as set by nationally recognized statistical rating agencies. If the legal entity’s financial strength were to fall below certain ratings, the counterparties to the derivative agreements could demand immediate and ongoing full collateralization and in certain instances demand immediate settlement of all outstanding derivative positions traded under each impacted bilateral agreement. The settlement amount is determined by netting the derivative positions transacted under each agreement. If the termination rights were to be exercised by the counterparties, it could impact the legal entity’s ability to conduct hedging activities by increasing the associated costs and decreasing the willingness of counterparties to transact with the legal entity. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position as of December 31, 2014 was $1.0 billion. Of this $1.0 billion the legal entities have posted collateral of $1.3 billion in the normal course of business. In addition, the Company has posted collateral of $41 associated with a customized GMWB derivative. Based on derivative market values as of December 31, 2014, a downgrade of one level below the current financial strength ratings by either Moody’s or S&P could require approximately an additional $4 to be posted as collateral. Based on derivative market values as of December 31, 2014, a downgrade by either Moody’s or S&P of two levels below the legal entities’ current financial strength ratings could require approximately an additional $18 of assets to be posted as collateral. These collateral amounts could change as derivative market values change, as a result of changes in our hedging activities or to the extent changes in contractual terms are negotiated. The nature of the collateral that we would post, if required, would be primarily in the form of U.S. Treasury bills, U.S. Treasury notes and government agency securities.

As of December 31, 2014, the aggregate notional amount and fair value of derivative relationships that could be subject to immediate termination in the event of rating agency downgrades to either BBB+ or Baa1 was $388 and $3, respectively.

Insurance Operations

Current and expected patterns of claim frequency and severity or surrenders may change from period to period but continue to be within historical norms and, therefore, the Company’s insurance operations’ current liquidity position is considered to be sufficient to meet anticipated demands over the next twelve months, including any obligations related to the Company’s restructuring activities. For a discussion and tabular presentation of the Company’s current contractual obligations by period, refer to Off-Balance Sheet Arrangements and Aggregate Contractual Obligations within the Capital Resources and Liquidity section of the MD&A.

The principal sources of operating funds are premiums, fees earned from assets under management and investment income, while investing cash flows originate from maturities and sales of invested assets. The primary uses of funds are to pay claims, claim adjustment expenses, commissions and other underwriting expenses, taxes, to purchase new investments and to make dividend payments to the HFSG Holding Company.

The Company’s insurance operations consist of property and casualty insurance products (collectively referred to as “Property & Casualty Operations”) and life insurance and legacy annuity products (collectively referred to as “Life Operations”).

Property & Casualty Operations

Property & Casualty Operations holds fixed maturity securities including a significant short-term investment position (securities with maturities of one year or less at the time of purchase) to meet liquidity needs.

As of December 31, 2014, Property & Casualty Operations' fixed maturities, short-term investments, and cash are summarized as follows:

Fixed maturities	$	25,610
Short-term investments		1,038
Cash		119
Less: Derivative collateral		125
Total	**$**	**26,642**

Liquidity requirements that are unable to be funded by Property & Casualty Operation's short-term investments would be satisfied with current operating funds, including premiums received or through the sale of invested assets. A sale of invested assets could result in realized losses.

Life Operations

Life Operations' total general account contractholder obligations are supported by $44 billion of cash and total general account invested assets, which includes a significant short-term investment position to meet liquidity needs.

As of December 31, 2014, Life Operations' fixed maturities, short-term investments, and cash are summarized as follows:

Fixed maturities	$	33,166
Short-term investments		2,853
Cash		280
Less: Derivative collateral		1,282
Total	**$**	**35,017**

Capital resources available to fund liquidity, upon contractholder surrender, are a function of the legal entity in which the liquidity requirement resides. Generally, obligations of Group Benefits will be funded by Hartford Life and Accident Insurance Company. Obligations of Talcott Resolution will generally be funded by Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company.

Contractholder obligations of the former Retirement Plans business were funded by Hartford Life Insurance Company and of the former Individual Life business were funded by both Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company. See Note 2 - Business Dispositions of Notes to the Consolidated Financial Statements as to the sale of the Retirement Plans and Individual Life businesses and related transfer of invested assets in 2013.

HLIC, an indirect wholly owned subsidiary, became a member of the Federal Home Loan Bank of Boston ("FHLBB") in May 2011. Membership allows HLIC access to collateralized advances, which may be used to support various spread-based businesses and enhance liquidity management. The Connecticut Department of Insurance ("CTDOI") will permit HLIC to pledge up to $1.39 billion in qualifying assets to secure FHLBB advances for 2015. The amount of advances that can be taken are dependent on the asset types pledged to secure the advances. The pledge limit is recalculated annually based on statutory admitted assets and capital and surplus. HLIC would need to seek the prior approval of the CTDOI if there were a desire to exceed these limits. As of December 31, 2014, HLIC had no advances outstanding under the FHLBB facility.

Contractholder Obligations		As of December 31, 2014
Total Life contractholder obligations	$	186,943
Less: Separate account assets [1]		134,702
General account contractholder obligations	**$**	**52,241**
Composition of General Account Contractholder Obligations		
Contracts without a surrender provision and/or fixed payout dates [2]	$	22,135
U.S. Fixed MVA annuities and Other [3]		8,748
Guaranteed investment contracts ("GIC") [4]		26
Other [5]		21,332
General account contractholder obligations	**$**	**52,241**

[1] In the event customers elect to surrender separate account assets or international statutory separate accounts, Life Operations will use the proceeds from the sale of the assets to fund the surrender, and Life Operations' liquidity position will not be impacted. In many instances Life Operations will receive a percentage of the surrender amount as compensation for early surrender (surrender charge), increasing Life Operations' liquidity position. In addition, a surrender of variable annuity separate account or general account assets (see below) will decrease Life Operations' obligation for payments on guaranteed living and death benefits.

[2] Relates to contracts such as payout annuities or institutional notes, other than guaranteed investment products with an MVA feature (discussed below) or surrenders of term life, group benefit contracts or death and living benefit reserves for which surrenders will have no current effect on Life Operations' liquidity requirements.

[3] Relates to annuities that are recorded in the general account (under U.S. GAAP), as the contractholders are subject to the Company's credit risk, although these annuities are held in a statutory separate account. In the statutory separate account, Life Operations is required to maintain invested assets with a fair value equal to the MVA surrender value of the Fixed MVA contract. In the event assets decline in value at a greater rate than the MVA surrender value of the Fixed MVA contract, Life Operations is required to contribute additional capital to the statutory separate account. Life Operations will fund these required contributions with operating cash flows or short-term investments. In the event that operating cash flows or short-term investments are not sufficient to fund required contributions, the Company may have to sell other invested assets at a loss, potentially resulting in a decrease in statutory surplus. As the fair value of invested assets in the statutory separate account are generally equal to the MVA surrender value of the Fixed MVA contract, surrender of Fixed MVA annuities will have an insignificant impact on the liquidity requirements of Life Operations.

[4] GICs are subject to discontinuance provisions which allow the policyholders to terminate their contracts prior to scheduled maturity at the lesser of the book value or market value. Generally, the market value adjustment reflects changes in interest rates and credit spreads. As a result, the market value adjustment feature in the GIC serves to protect the Company from interest rate risks and limit Life Operations' liquidity requirements in the event of a surrender.

[5] Surrenders of, or policy loans taken from, as applicable, these general account liabilities, which include the general account option for Life Operations' individual variable annuities and the variable life contracts of the former Individual Life business, the general account option for annuities of the former Retirement Plans business and universal life contracts sold by the former Individual Life business, may be funded through operating cash flows of Life Operations, available short-term investments, or Life Operations may be required to sell fixed maturity investments to fund the surrender payment. Sales of fixed maturity investments could result in the recognition of realized losses and insufficient proceeds to fully fund the surrender amount. In this circumstance, Life Operations may need to take other actions, including enforcing certain contract provisions which could restrict surrenders and/or slow or defer payouts. The Company has ceded reinsurance in connection with the sales of its Retirement Plans and Individual Life businesses in 2013 to MassMutual and Prudential, respectively.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

The Company does not have any off-balance sheet arrangements that are reasonably likely to have a material effect on the financial condition, results of operations, liquidity, or capital resources of the Company, except for the contingent capital facility described above, as well as unfunded commitments to purchase investments in limited partnerships and other alternative investments, private placements, and mortgage loans of $865 as disclosed in Note 14 - Commitments and Contingencies of Notes to Consolidated Financial Statements.

The following table summarizes the Company's aggregate contractual obligations as of December 31, 2014:

	Payments due by period				
	Total	**Less than 1 year**	**1-3 years**	**3-5 years**	**More than 5 years**
Property and casualty obligations [1]	$ 22,362	$ 5,282	$ 5,377	$ 2,611	$ 9,092
Life, annuity and disability obligations [2]	272,187	20,308	35,122	28,151	188,606
Operating lease obligations [3]	154	42	64	36	12
Long-term debt obligations [4]	11,986	822	1,657	1,264	8,243
Purchase obligations [5]	1,990	1,215	433	331	11
Other liabilities reflected on the balance sheet [6]	1,362	593	392	376	1
Total	**$ 310,041**	**$ 28,262**	**$ 43,045**	**$ 32,769**	**$ 205,965**

[1] The following points are significant to understanding the cash flows estimated for obligations under property and casualty contracts:

- *Reserves for Property & Casualty unpaid losses and loss adjustment expenses include IBNR and case reserves. While payments due on claim reserves are considered contractual obligations because they relate to insurance policies issued by the Company, the ultimate amount to be paid to settle both case reserves and IBNR is an estimate, subject to significant uncertainty. The actual amount to be paid is not finally determined until the Company reaches a settlement with the claimant. Final claim settlements may vary significantly from the present estimates, particularly since many claims will not be settled until well into the future.*
- *In estimating the timing of future payments by year, the Company has assumed that its historical payment patterns will continue. However, the actual timing of future payments could vary materially from these estimates due to, among other things, changes in claim reporting and payment patterns and large unanticipated settlements. In particular, there is significant uncertainty over the claim payment patterns of asbestos and environmental claims. In addition, the table does not include future cash flows related to the receipt of premiums that may be used, in part, to fund loss payments.*
- *Under U.S. GAAP, the Company is only permitted to discount reserves for losses and loss adjustment expenses in cases where the payment pattern and ultimate loss costs are fixed and determinable on an individual claim basis. For the Company, these include claim settlements with permanently disabled claimants. As of December 31, 2014, the total property and casualty reserves in the above table are gross of a reserve discount of $556.*

[2] Estimated life, annuity and disability obligations include death and disability claims, policy surrenders, policyholder dividends and trail commissions offset by expected future deposits and premiums on in-force contracts. Estimated life, annuity and disability obligations are based on mortality, morbidity and lapse assumptions comparable with the Company's historical experience, modified for recent observed trends. The Company has also assumed market growth and interest crediting consistent with other assumptions. In contrast to this table, the majority of the Company's obligations are recorded on the balance sheet at the current account values and do not incorporate an expectation of future market growth, interest crediting, or future deposits. Therefore, the estimated obligations presented in this table significantly exceed the liabilities recorded in reserve for future policy benefits and unpaid losses and loss adjustment expenses, other policyholder funds and benefits payable, and separate account liabilities. Due to the significance of the assumptions used, the amounts presented could materially differ from actual results. See Note 2 - Business Dispositions of Notes to Consolidated Financial Statements for further information as to Retirement Plans and Individual Life reinsurance transactions.

[3] Includes future minimum lease payments on operating lease agreements. See Note 14 of Notes to Consolidated Financial Statements for additional discussion on lease commitments.

[4] Includes contractual principal and interest payments. See Note 12 of Notes to Consolidated Financial Statements for additional discussion of long-term debt obligations.

[5] Includes $865 in commitments to purchase investments including approximately $604 of limited partnership and other alternative investments, $15 of private placements, and $246 of mortgage loans. Outstanding commitments under these limited partnerships and mortgage loans are included in payments due in less than 1 year since the timing of funding these commitments cannot be reliably estimated. The remaining commitments to purchase investments primarily represent payables for securities purchased which are reflected on the Company's Consolidated Balance Sheets. Also included in purchase obligations is $980 relating to contractual commitments to purchase various goods and services such as maintenance, human resources, and information technology in the normal course of business. Purchase obligations exclude contracts that are cancelable without penalty or contracts that do not specify minimum levels of goods or services to be purchased.

[6] Includes cash collateral of $327 which the Company has accepted in connection with the Company's derivative instruments. Since the timing of the return of the collateral is uncertain, the return of the collateral has been included in the payments due in less than 1 year. Also included in other long-term liabilities are net unrecognized tax benefits of $48, retained Japan fixed payout annuity liabilities of $886, and consumer notes of $74. Consumer notes include principal payments and contractual interest for fixed rate notes and interest based on current rates for floating rate notes.

Capitalization

The capital structure of The Hartford as of December 31, 2014 and 2013 consisted of debt and stockholders' equity, summarized as follows:

	December 31, 2014	December 31, 2013	Change
Short-term debt (includes current maturities of long-term debt)	$ 456	$ 200	128 %
Short-term due on revolving credit facility	—	238	(100)%
Long-term debt	5,653	6,106	(7)%
Total debt [1]	**6,109**	**6,544**	**(7)%**
Stockholders' equity excluding accumulated other comprehensive income (loss), net of tax ("AOCI")	17,792	18,984	(6)%
AOCI, net of tax	928	(79)	NM
Total stockholders' equity	**$ 18,720**	**$ 18,905**	**(1)%**
Total capitalization including AOCI	**$ 24,829**	**$ 25,449**	**(2)%**
Debt to stockholders' equity	33%	35%	
Debt to capitalization	25%	26%	

[1] Total debt of the Company excludes $71 and $84 of consumer notes as of December 31, 2014 and December 31, 2013, respectively.

The Hartford's total capitalization decreased $620 million, or 2%, from December 31, 2014 to December 31, 2013 primarily due to decreases in total debt. Total stockholders' equity, remained flat from December 31, 2013 to December 31, 2014 due to share repurchases during the period, offset by an increase in AOCI, primarily due to an increase in net unrealized capital gains from securities.

For additional information AOCI, net of tax, see Note 2 - Business Dispositions and Note 16 - Changes In and Reclassifications From Accumulated Other Comprehensive Income of Notes to Consolidated Financial Statements, respectively.

Cash Flow

	2014	2013	2012
Net cash provided by operating activities	$ 1,886	$ 1,237	$ 2,681
Net provided by (used for) for investing activities	$ 1,696	$ 3,745	$ (2,557)
Net cash used for financing activities	$ (4,476)	$ (5,820)	$ (228)
Cash — end of year	$ 399	$ 1,428	$ 2,421

Year ended December 31, 2014 compared to the year ended December 31, 2013

Cash provided by operating activities in 2014 reflect an increase in premiums collected and a decrease in loss and loss adjustment expenses paid, partially offset by an increase in payments for payables and accruals. Operating cash flows for the years ended December 31, 2014, and 2013 have been adequate to meet liquidity requirements. On June 30, 2014, the Company completed the sale of its Japan annuity business. The operations of this business are reported as discontinued operations and are primarily in Net cash provided by operating activities. For further information regarding these transactions, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

Cash used for investing activities in 2014 primarily relates to net proceeds from available-for-sale securities of $2.8 billion, and proceeds from the business sold of $963, partially offset by net payments for short-term investments of $1.8 billion. Cash used for investing activities in 2013 primarily relates to net proceeds from the sale of available-for-sale securities of $4.9 billion, and proceeds from the business sold of $815, partially offset by net payments on derivatives of $2.2 billion.

Cash used for financing activities in 2014 primarily relates to $2.2 billion related to net activity for investment and universal life products, and acquisition of treasury stock of $1.8 billion. Cash used for financing activities in 2013 primarily consists of net outflows on investment and universal life-type contracts of $2.1 billion, decrease in securities loaned or sold under agreements to repurchase of $1.9 billion, repayment of long term debt of $ 1.3 billion and treasury stock acquired of $600.

Year ended December 31, 2013 compared to the year ended December 31, 2012

Cash provided by operating activities decreased primarily due to realized capital losses of $1.5 billion in 2013, compared to an increase in income taxes received of $486 in 2012.

Cash used for investing activities in 2013 primarily relates to net proceeds of available-for-sale securities of $4.9 billion and proceeds from business sold of $815 offset by net payments on derivatives of $2.2 billion. Cash used for investing activities in 2012 primarily relates to net payments on derivatives of $2.7 billion, purchases of mortgage loans of $968 and net payments for the purchases of partnerships of $695, partially offset by net proceeds of available-for-sale securities of $1.7 billion and net receipts of fixed maturities, fair value option of $101.

Cash used for financing activities in 2013 primarily consists of net outflows on investment and universal life-type contracts of $2.1 billion, decrease in securities loaned or sold under agreements to repurchase of $1.9 billion, repayment of long term debt of $ 1.3 billion and treasury stock acquired of $600. Cash used for financing activities in 2012 primarily consists of net outflows on investment and universal life-type contracts of $1.4 billion, repurchase of warrants of $300, as well as share repurchases and dividends paid on common and preferred stock. These were partially offset by net increases in securities loaned or sold of $1.9 billion.

Equity Markets

For a discussion of the potential impact of the equity markets on capital and liquidity, see the Financial Risk on Statutory Capital and Liquidity Risk section in this MD&A.

Ratings

Ratings are an important factor in establishing a competitive position in the insurance marketplace and impact the Company's ability to access financing and its cost of borrowing. There can be no assurance that the Company’s ratings will continue for any given period of time, or that they will not be changed. In the event the Company’s ratings are downgraded, the Company’s competitive position, ability to access financing, and its cost of borrowing, may be adversely impacted.

On March 6, 2014, Moody’s Investors Service (“Moody’s”) affirmed the debt ratings of The Hartford Financial Services Group, Inc. and the insurance financial strength ratings of its property and casualty subsidiaries and Hartford Life and Accident Insurance Company. The outlook on these entities was changed to positive from stable. Moody’s downgraded the insurance financial strength rating of Hartford Life Insurance Company to Baa2 from A3. Moody’s affirmed the insurance financial strength rating of Hartford Life and Annuity Insurance Company. Moody's outlook for Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company is stable.

On April 3, 2014, A.M. Best revised the outlook to positive from stable and affirmed the issuer credit ratings and debt ratings of The Hartford Financial Services Group, Inc. and the financial strength ratings and issuer credit ratings of the property and casualty subsidiaries. A.M. Best upgraded the financial strength rating of Hartford Life and Accident Insurance Company to A from A- and affirmed the ratings of Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company. A.M. Best's outlook for Hartford Life and Accident Insurance Company, Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company is stable.

On April 15, 2014 Standard & Poor’s (“S&P”) raised its long-term financial strength rating and counterparty credit ratings on Hartford Life and Accident Insurance Company to A from A-. At the same time S&P raised the rating on Hartford Life Inc. to BBB from BBB-. The outlook for Hartford Life and Accident Insurance Company and Hartford Life, Inc. is stable.

On August 29, 2014 Fitch Ratings affirmed and withdrew the ratings on the HFSG holding company, as well as the insurer financial strength rating of its insurance subsidiaries for commercial reasons.

The following table summarizes The Hartford’s significant member companies’ financial ratings from the major independent rating organizations as of February 24, 2015:

Insurance Financial Strength Ratings:	**A.M. Best**	**Standard & Poor's**	**Moody's**
Hartford Fire Insurance Company	A	A	A2
Hartford Life and Accident Insurance Company	A	A	A3
Hartford Life Insurance Company	A-	BBB+	Baa2
Hartford Life and Annuity Insurance Company	A-	BBB+	Baa2
Other Ratings:			
The Hartford Financial Services Group, Inc.:			
Senior debt	bbb+	BBB	Baa3
Commercial paper	AMB-2	A-2	P-3

These ratings are not a recommendation to buy or hold any of The Hartford’s securities and they may be revised or revoked at any time at the sole discretion of the rating organization.

The agencies consider many factors in determining the final rating of an insurance company. One consideration is the relative level of statutory surplus necessary to support the business written. Statutory surplus represents the capital of the insurance company reported in accordance with accounting practices prescribed by the applicable state insurance department. See Part I, Item 1A. Risk Factors — “Downgrades in our financial strength or credit ratings, which may make our products less attractive, could increase our cost of capital and inhibit our ability to refinance our debt, which would have a material adverse effect on our business, financial condition, results of operations and liquidity.”

Statutory Surplus

The table below sets forth statutory surplus for the Company’s insurance companies as of December 31, 2014 and 2013:

	2014	2013
U.S. life insurance subsidiaries, includes domestic captive insurance subsidiaries in 2013	$ 7,157	$ 6,639
Property and casualty insurance subsidiaries	8,069	8,022
Total	**$ 15,226**	**$ 14,661**

Statutory capital and surplus for the U.S. life insurance subsidiaries, including domestic captive insurance subsidiaries in 2013, increased by $518, primarily due to variable annuity surplus impacts of $788, net income from non-variable annuity business of $187, increases in unrealized gains from other invested assets carrying values of $138, partially offset by returns of capital of $500, and changes in reserves on account of change in valuation basis of $100. Effective April 30, 2014 the last domestic captive ceased operations.

Statutory capital and surplus for the property and casualty insurance increased by $47, primarily due to statutory net income of $1.1 billion, and unrealized gains on investments of $1.4 billion, largely offset by dividends to the HFSG Holding Company of $2.5 billion.

The Company also held regulatory capital and surplus for its former operations in Japan until the sale of those operations on June 30, 2014. Under the accounting practices and procedures governed by Japanese regulatory authorities, the Company’s statutory capital and surplus was $1.2 billion as of December 31, 2013.

Statutory Capital

The Company’s stockholders’ equity, as prepared using U.S. generally accepted accounting principles (“U.S. GAAP”) was $18.7 billion as of December 31, 2014. The Company’s estimated aggregate statutory capital and surplus, as prepared in conformity with statutory accounting practices prescribed or permitted by the applicable state insurance department (“U.S. STAT”) was $15.2 billion as of December 31, 2014. Significant differences between U.S. GAAP stockholders’ equity and aggregate statutory capital and surplus prepared in accordance with U.S. STAT include the following:

- U.S. STAT excludes equity of non-insurance and foreign insurance subsidiaries not held by U.S. insurance subsidiaries.
- Costs incurred by the Company to acquire insurance policies are deferred under U.S. GAAP while those costs are expensed immediately under U.S. STAT.
- Temporary differences between the book and tax basis of an asset or liability which are recorded as deferred tax assets are evaluated for recoverability under U.S. GAAP while those amounts deferred are subject to limitations under U.S. STAT.
- The assumptions used in the determination of Life benefit reserves is prescribed under U.S. STAT, while the assumptions used under U.S. GAAP are generally the Company’s best estimates. The methodologies for determining life insurance reserve amounts may also be different. For example, reserving for living benefit reserves under U.S. STAT is generally addressed by the Commissioners’ Annuity Reserving Valuation Methodology and the related Actuarial Guidelines, while under U.S. GAAP, those same living benefits may be considered embedded derivatives and recorded at fair value or they may be considered SOP 03-1 reserves. The sensitivity of these life insurance reserves to changes in equity markets, as applicable, will be different between U.S. GAAP and U.S. STAT.
- The difference between the amortized cost and fair value of fixed maturity and other investments, net of tax, is recorded as an increase or decrease to the carrying value of the related asset and to equity under U.S. GAAP, while U.S. STAT only records certain securities at fair value, such as equity securities and certain lower rated bonds required by the NAIC to be recorded at the lower of amortized cost or fair value.
- U.S. STAT for life insurance companies establishes a formula reserve for realized and unrealized losses due to default and equity risks associated with certain invested assets (the Asset Valuation Reserve), while U.S. GAAP does not. Also, for those realized gains and losses caused by changes in interest rates, U.S. STAT for life insurance companies defers and amortizes the gains and losses, caused by changes in interest rates, into income over the original life to maturity of the asset sold (the Interest Maintenance Reserve) while U.S. GAAP does not.
- Goodwill arising from the acquisition of a business is tested for recoverability on an annual basis (or more frequently, as necessary) for U.S. GAAP, while under U.S. STAT goodwill is amortized over a period not to exceed 10 years and the amount of goodwill admitted as an asset is limited.

In addition, certain assets, including a portion of premiums receivable and fixed assets, are non-admitted (recorded at zero value and charged against surplus) under U.S. STAT. U.S. GAAP generally evaluates assets based on their recoverability.

Risk-Based Capital

The Company's U.S. insurance companies' states of domicile impose risk-based capital (“RBC”) requirements. The requirements provide a means of measuring the minimum amount of statutory capital and surplus (referred to collectively as "capital") appropriate for an insurance company to support its overall business operations, based on its size and risk profile. Regulatory compliance is determined by a ratio of a company's total adjusted capital (“TAC”) to its authorized control level RBC (“ACL RBC”). Companies below specific trigger points or ratios are classified within certain levels, each of which requires specified corrective action. The minimum level of TAC before corrective action commences (“Company Action Level”) is two times the ACL RBC. The adequacy of a company's capital is determined by the ratio of a company's TAC to its Company Action Level, known as the "RBC ratio". All of the Company's operating insurance subsidiaries had RBC ratios in excess of the minimum levels required by the applicable insurance regulations. On an aggregate basis, The Company's U.S. property and casualty insurance companies' RBC ratio was in excess of 200% of its Company Action Level as of December 31, 2014 and 2013. The RBC ratios for the Company's principal life insurance operating subsidiaries were all in excess of 425% of their respective Company Action Levels as of December 31, 2014 and 2013. The reporting of RBC ratios is not intended for the purpose of ranking any insurance company, or for use in connection with any marketing, advertising or promotional activities.

Similar to the RBC ratios that are employed by U.S. insurance regulators, regulatory authorities in the international jurisdictions in which The Company operates generally establish minimum solvency requirements for insurance companies. All of The Hartford's international insurance subsidiaries have solvency margins in excess of the minimum levels required by the applicable regulatory authorities.

Sensitivity

In any particular year, statutory surplus amounts and RBC ratios may increase or decrease depending upon a variety of factors. The amount of change in the statutory surplus or RBC ratios can vary based on individual factors and may be compounded in extreme scenarios or if multiple factors occur at the same time. At times the impact of changes in certain market factors or a combination of multiple factors on RBC ratios can be counterintuitive. For further discussion on these factors and the potential impacts to the life insurance subsidiaries, see the Financial Risk on Statutory Capital section within Enterprise Risk Management.

Statutory capital at the property and casualty subsidiaries has historically been maintained at or above the capital level required to meet "AA level" ratings from rating agencies. Statutory capital generated by the property and casualty subsidiaries in excess of the capital level required to meet "AA level" ratings is available for use by the enterprise or for corporate purposes. The amount of statutory capital can increase or decrease depending on a number of factors affecting property and casualty results including, among other factors, the level of catastrophe claims incurred, the amount of reserve development, the effect of changes in interest rates on investment income and the discounting of loss reserves, and the effect of realized gains and losses on investments.

In addition, the Company can access the $500 Glen Meadow trust contingent capital facility and maintains the ability to access $1.0 billion of capacity under its revolving credit facility.

Contingencies

Legal Proceedings — For a discussion regarding contingencies related to The Hartford's legal proceedings, please see the information contained under "Litigation" and "Asbestos and Environmental Claims," in Note 14 - Commitments and Contingencies of Notes to Consolidated Financial Statements, which is incorporated herein by reference.

For a discussion of terrorism reinsurance legislation and how it affects The Hartford, see MD&A - Enterprise Risk Management, Insurance Risk Management, Terrorism Risk.

Tax proposals and regulatory initiatives which have been or are being considered by Congress and/or the United States Treasury Department could have a material effect on the insurance business. These proposals and initiatives include, or could include, new taxes or assessments on large financial institutions, changes pertaining to the income tax treatment of insurance companies and life insurance products and annuities, repeal or reform of the estate tax and comprehensive federal tax reform, and changes to the regulatory structure for financial institutions. The nature and timing of any Congressional or regulatory action with respect to any such efforts is unclear.

Legislative Developments

Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act")

The Dodd-Frank Act was enacted on July 21, 2010, mandating changes to the regulation of the financial services industry. Implementation of the Dodd-Frank Act is ongoing and may affect our operations and governance in ways that could adversely affect our financial condition and results of operations. The Dodd-Frank Act requires central clearing of, and imposes new margin requirements on, certain derivatives transactions, which increases the costs of our hedging program. Other provisions in the Dodd-Frank Act that may impact us include: the new "Federal Insurance Office" within Treasury; the possible adverse impact on the pricing and liquidity of the securities in which we invest resulting from the proprietary trading and market making limitation of the Volcker Rule; the possible adverse impact on the market for insurance-linked securities, including catastrophe bonds, resulting from the limitations of banking entity involvement in and ownership of certain asset-backed securities transactions; and enhancements to corporate governance, especially regarding risk management.

The Dodd-Frank Act vests the Financial Stability Oversight Council ("FSOC") with the power to designate "systemically important" institutions, which will be subject to special regulatory supervision and other provisions intended to prevent, or mitigate the impact of, future disruptions in the U.S. financial system. Based on its most current financial data, The Hartford is below the quantitative thresholds used by the FSOC to determine which nonbank companies merit consideration. However, the FSOC has indicted it will review on a quarterly basis whether nonbank financial institutions meet the metrics for further review. If we were to be designated as a systemically important institution, we could be subject to heightened regulation under the Federal Reserve, which could impact requirements regarding our required level of capital, liquidity and leverage as well as our business and investment conduct. In addition, we could be subject to assessments to pay for the orderly liquidation of other systemically important financial institutions that have become insolvent.

Patient Protection and Affordable Care Act of 2010 (the "Affordable Care Act")

On March 23, 2010, the President signed the Affordable Care Act. The impact to The Hartford as an employer is consistent with other large employers. It is too early to tell how the Affordable Care Act will impact The Hartford's businesses. The Hartford's core business does not involve the issuance of health insurance and we do not issue any products that insure customers under the Affordable Care Act's individual mandate. There may be, nevertheless, impacts to The Hartford's businesses that are too early to identify as key aspects of the law are still not fully implemented. For example, private exchanges may provide The Hartford additional opportunities to market our group benefit products and services. Conversely, access to medical care and medical costs are a substantial component of both disability and workers compensation products offered by The Hartford. We are monitoring the impact of the Affordable Care Act on consumer, broker and medical provider behavior for leading indicators of changes in medical costs or loss payments primarily on the Company's workers' compensation and disability liabilities.

Budget of the United States Government

On February 2, 2015, the Obama Administration released its "Fiscal Year 2016, Budget of the U.S. Government" (the "Budget"). Although the Administration has not released proposed statutory language, the Budget includes proposals that if enacted, would affect the taxation of life insurance companies and certain life insurance products. In particular, the proposals would change the method used to determine the amount of dividend income received by a life insurance company on assets held in separate accounts used to support products, including variable life insurance and variable annuity contracts, which are eligible for the dividends received deduction ("DRD"). The DRD reduces the amount of dividend income subject to tax and is a significant component of the difference between the Company's actual tax expense and expected amount determined using the federal statutory tax rate of 35%. If this proposal were enacted, the Company's actual tax expense could increase, reducing earnings.

Terrorism Risk Insurance Program Reauthorization Act of 2015 ("TRIPRA")

On January 12, 2015, the President signed TRIPRA, extending a backstop for insurance-related losses resulting from "acts of terrorism" through the end of 2020. For additional information, see Part II, Item 7, MD&A - Enterprise Risk Management, Reinsurance as a Risk Management Strategy, Reinsurance for Terrorism.

Guaranty Fund and Other Insurance-related Assessments

For a discussion regarding Guaranty Fund and Other Insurance-related Assessments, see Note 14 of Notes to Consolidated Financial Statements.

IMPACT OF NEW ACCOUNTING STANDARDS

For a discussion of accounting standards, see Note 1 of Notes to Consolidated Financial Statements.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by this item is set forth in the Enterprise Risk Management section of Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and is incorporated herein by reference.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See Index to Consolidated Financial Statements and Schedules elsewhere herein.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures

The Company's principal executive officer and its principal financial officer, based on their evaluation of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) have concluded that the Company's disclosure controls and procedures are effective for the purposes set forth in the definition thereof in Exchange Act Rule 13a-15(e) as of December 31, 2014.

Management's annual report on internal control over financial reporting

The management of The Hartford Financial Services Group, Inc. and its subsidiaries ("The Hartford") is responsible for establishing and maintaining adequate internal control over financial reporting for The Hartford as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. A company's internal control over financial reporting includes policies and procedures that (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Hartford's management assessed its internal controls over financial reporting as of December 31, 2014 in relation to criteria for effective internal control over financial reporting described in "*Internal Control-Integrated Framework (2013)*" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment under those criteria, The Hartford's management concluded that its internal control over financial reporting was effective as of December 31, 2014.

Changes in internal control over financial reporting

There were no changes in the Company's internal control over financial reporting that occurred during the Company's fourth fiscal quarter of 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Attestation report of the Company's registered public accounting firm

The Hartford's independent registered public accounting firm, Deloitte & Touche LLP, has issued their attestation report on the Company's internal control over financial reporting which is set forth below.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
The Hartford Financial Services Group, Inc.
Hartford, Connecticut

We have audited the internal control over financial reporting of The Hartford Financial Services Group, Inc. and its subsidiaries (collectively, the "Company") as of December 31, 2014, based on the criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A. Controls and Procedures. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedules as of and for the year ended December 31, 2014 of the Company and our report, dated February 27, 2015, expressed an unqualified opinion on those consolidated financial statements and financial statement schedules and included an explanatory paragraph regarding the retrospective adjustment of the accompanying consolidated financial statements and financial statement schedules to reflect discontinued operations.

DELOITTE & TOUCHE LLP
Hartford, Connecticut
February 27, 2015

Item 9B. OTHER INFORMATION

None.

PART III

Item 10. DIRECTORS, AND EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE OF THE HARTFORD

Certain of the information called for by Item 10 will be set forth in the definitive proxy statement for the 2015 annual meeting of shareholders (the "Proxy Statement") to be filed by The Hartford with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Form 10-K under the captions and subcaptions "Board and Governance Matters", "Director Nominees" and "Section (16)(a) Beneficial Ownership Reporting Compliance" and is incorporated herein by reference.

The Company has adopted a Code of Ethics and Business Conduct, which is applicable to all employees of the Company, including the principal executive officer, the principal financial officer and the principal accounting officer. The Code of Ethics and Business Conduct is available on the investor relations section of the Company's website at: http://ir.thehartford.com. Any waiver of, or material amendment to, the Code of Ethics and Business Conduct will be posted promptly to our web site in accordance with applicable NYSE and SEC rules.

Executive Officers of The Hartford

Information about the executive officers of The Hartford who are also nominees for election as directors will be set forth in The Hartford's Proxy Statement. Set forth below is information about the other executive officers of the Company:

Name	Age	Position with The Hartford and Business Experience
Beth A. Bombara	47	Executive Vice President and Chief Financial Officer (July 2014-present); President of Talcott Resolution (July 2012-July 2014); Senior Vice President and Controller (June 2007-July 2012); Vice President (2004-June 2007)
Doug Elliott	54	President (July 2014-present); Executive Vice President and President of Commercial Lines (April 2011-July 2014); President and Chief Executive Officer, HSB Group (July 2007-March 2011); President and Chief Operating Officer, HSB Group (January 2007-June 2007); Senior Advisor, Aspen Insurance Holdings (2006); Chief Executive Officer of General Commercial and Personal Lines, St. Paul Travelers Companies (2004-2007)

Raymond J. Sprague	56	Executive Vice President Strategy and Business Development (August 2014-present); Senior Vice President of Small Commercial (July 2008-July 2014)

[1] Denotes a subsidiary of The Hartford.

Item 11. EXECUTIVE COMPENSATION

The information called for by Item 11 will be set forth in the Proxy Statement under the subcaptions “Compensation Discussion and Analysis”, “Executive Compensation”, “Director Compensation”, “Report of the Compensation and Management Development Committee”, and “Compensation and Management Development Committee Interlocks and Insider Participation” and is incorporated herein by reference.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Certain of the information called for by Item 12 will be set forth in the Proxy Statement under the caption “Information on Stock Ownership” and is incorporated herein by reference.

Equity Compensation Plan Information

The following table provides information as of December 31, 2014 about the securities authorized for issuance under the Company’s equity compensation plans. The Company maintains The Hartford Incentive Stock Plan (the "2000" Stock Plan), The Hartford 2005 Incentive Stock Plan (the “2005 Stock Plan”), The Hartford 2010 Incentive Stock Plan (the “2010 Stock Plan”), The Hartford 2014 Incentive Stock Plan (the "2014 Stock Plan") (collectively the "Stock Plans") and The Hartford Employee Stock Purchase Plan (the “ESPP”). On May 21, 2014, the shareholders of the Company approved the 2014 Stock Plan, which superseded the earlier plans. Pursuant to the provisions of the 2014 Stock Plan, no additional shares may be issued from the 2010 Stock Plan. To the extent that any awards under the 2005 Stock Plan and the 2010 Stock Plan are forfeited, terminated, surrendered, exchanged, expire unexercised or are settled in cash in lieu of stock (including to effect tax withholding) or for the issuance of a lesser number of shares than the number of shares subject to the award, the shares subject to such awards (or the relevant portion thereof) shall be available for award under the 2014 Stock Plan and such shares shall be added to the total number of shares available under the 2014 Stock Plan. For a description of the 2014 Stock Plan and the ESPP, see Note 18 - Stock Compensation Plans of Notes to Consolidated Financial Statements.

	(a)	(b)	(c)
	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights [1]	Weighted-average Exercise Price of Outstanding Options, Warrants and Rights [2]	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) [3]
Equity compensation plans approved by stockholders	11,998,466	$ 29.64	17,796,780
Equity compensation plans not approved by stockholders	—	—	—
Total	**11,998,466**	**$ 29.64**	**17,796,780**

[1] The amount shown in this column includes 3,744,845 outstanding options awarded under the 2000 Stock Plan, the 2005 Stock Plan and the 2010 Stock Plan. The amount shown in this column includes 7,190,307 outstanding restricted stock units and 1,063,314 outstanding performance shares at 100% of target (which excludes 346,756 shares that vested on December 31, 2014, related to the 2012-2014 performance period) as of December 31, 2014 under the 2010 Stock Plan and the 2014 Stock Plan. The maximum number of performance shares that could be awarded is 2,126,628 (200% of target) if the Company achieved the highest performance level. Under the 2010 and 2014 Stock Plans, no more than 500,000 shares in the aggregate can be earned by an individual employee with respect to restricted stock unit and performance share awards made in a single calendar year. As a result, the number of shares ultimately distributed to an employee with respect to awards made in the same year will be reduced, if necessary, so that the number does not exceed this limit.

[2] The weighted-average exercise price reflects outstanding options and does not reflect outstanding restricted stock units or performance shares because they do not have exercise prices.

[3] Of these shares, 5,193,622 remain available for purchase under the ESPP as of December 31, 2014. 12,603,158 shares remain available for issuance as options, restricted stock units, restricted stock awards or performance shares under the 2014 Stock Plan as of December 31, 2014.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Any information called for by Item 13 will be set forth in the Proxy Statement under the caption and subcaption “Board and Governance Matters” and “Director Independence” and is incorporated herein by reference.

Item 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information called for by Item 14 will be set forth in the Proxy Statement under the caption “Audit Matters” and is incorporated herein by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
The Hartford Financial Services Group, Inc.
Hartford, Connecticut

We have audited the accompanying consolidated balance sheets of The Hartford Financial Services Group, Inc. and its subsidiaries (collectively, the "Company") as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2014. Our audits also included the consolidated financial statement schedules listed in the Index at Item 15. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of The Hartford Financial Services Group, Inc. and its subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such consolidated financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, the accompanying consolidated financial statements and financial statement schedules have been retrospectively adjusted to reflect discontinued operations.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2014, based on the criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 27, 2015 expressed an unqualified opinion on the Company's internal control over financial reporting.

DELOITTE & TOUCHE LLP

THE HARTFORD FINANCIAL SERVICES GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollar amounts in millions, except for per share data, unless otherwise stated)

1. Basis of Presentation and Significant Accounting Policies

Basis of Presentation

The Hartford Financial Services Group, Inc. is a holding company for insurance and financial services subsidiaries that provide property and casualty insurance, group life and disability products and mutual funds to individual and business customers in the United States (collectively, "The Hartford", the "Company", "we" or "our"). Also, the Company continues to administer life and annuity products previously sold.

On June 30, 2014, the Company completed the sale of the issued and outstanding equity of Hartford Life Insurance KK, a Japanese company ("HLIKK"), to ORIX Life Insurance Corporation, a subsidiary of ORIX Corporation, a Japanese company.

On December 12, 2013, the Company completed the sale of the issued and outstanding equity of Hartford Life International Limited, a U.K. company ("HLIL"), to Columbia Insurance Company, a Berkshire Hathaway company.

On January 1, 2013, the Company completed the sale of its Retirement Plans business to Massachusetts Mutual Life Insurance Company ("MassMutual") and on January 2, 2013 the Company completed the sale of its Individual Life insurance business to The Prudential Insurance Company of America ("Prudential"), a subsidiary of Prudential Financial, Inc. These sales were structured as reinsurance transactions.

For further discussion of these transactions, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

The Consolidated Financial Statements have been prepared on the basis of accounting principles generally accepted in the United States of America ("U.S. GAAP"), which differ materially from the accounting practices prescribed by various insurance regulatory authorities.

Consolidation

The Consolidated Financial Statements include the accounts of The Hartford Financial Services Group, Inc., companies in which the Company directly or indirectly has a controlling financial interest and those variable interest entities ("VIEs") which the Company is required to consolidate. Entities in which the Company has significant influence over the operating and financing decisions but is not required to consolidate are reported using the equity method. For further discussions on VIEs see Note 6 - Investments and Derivative Instruments of the Notes to Consolidated Financial Statements. All intercompany transactions and balances between The Hartford and its subsidiaries and affiliates have been eliminated.

Discontinued Operations

The results of operations of a component of the Company that either has been disposed of or is classified as held-for-sale are reported in discontinued operations if the operations and cash flows of the component have been or will be eliminated from the ongoing operations of the Company as a result of the disposal transaction and the Company will not have any significant continuing involvement in the operations of the component after the disposal transaction. The Company is presenting as discontinued operations certain businesses that meet the criteria for reporting as discontinued operations. Amounts for prior periods have been retrospectively reclassified. For information on the specific businesses and related impacts, see Note 19 - Discontinued Operations of the Notes to Consolidated Financial Statements.

Use of Estimates

The preparation of financial statements, in conformity with U.S. GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates include those used in determining property and casualty insurance product reserves, net of reinsurance; estimated gross profits used in the valuation and amortization of assets and liabilities associated with variable annuity and other universal life-type contracts; evaluation of other-than-temporary impairments on available-for-sale securities and valuation allowances on investments; living benefits required to be fair valued; goodwill impairment; valuation of investments and derivative instruments; valuation allowance on deferred tax assets; and contingencies relating to corporate litigation and regulatory matters. Certain of these estimates are particularly sensitive to market conditions, and deterioration and/or volatility in the worldwide debt or equity markets could have a material impact on the Consolidated Financial Statements.

Reclassifications

Certain reclassifications have been made to prior year financial information to conform to the current year presentation.

1. Basis of Presentation and Significant Accounting Policies (continued)

Future Adoption of New Accounting Standards

Amendments to Consolidation Guidance

In February 2015, the Financial Accounting Standards Board ("FASB") issued updated consolidation guidance. The amendments revise existing guidance for when to consolidate variable interest entities ("VIEs") and general partners' investments in limited partnerships, end the deferral granted for applying the VIE guidance to certain investment companies, and reduce the number of circumstances where a decision maker's or service provider's fee arrangement is deemed to be a variable interest in an entity. The updates also modify consolidation guidance for determining whether limited partnerships are VIEs or voting interest entities. This guidance is effective for years beginning after December 15, 2015, and may be applied fully retrospectively or through a cumulative effect adjustment to retained earnings as of the beginning of the year of adoption. The Company will adopt the guidance on January 1, 2016 and has not yet determined the method or estimated effect of adoption on the Company's Consolidated Financial Statements.

Revenue Recognition

In May 2014, the FASB issued updated guidance for recognizing revenue. The guidance excludes insurance contracts and financial instruments. Revenue is to be recognized when, or as, goods or services are transferred to customers in an amount that reflects the consideration that an entity is expected to be entitled in exchange for those goods or services, and this accounting guidance is similar to current accounting for many transactions. This guidance is effective retrospectively for years beginning after December 15, 2016, with a choice of restating prior periods or recognizing a cumulative effect for contracts in place as of the adoption. Early adoption is not permitted. The Company has not yet determined its method for adoption or estimated the effect of the adoption on the Company's Consolidated Financial Statements.

Reporting Discontinued Operations

In April 2014, the FASB issued updated guidance on reporting discontinued operations. Under this updated guidance, a discontinued operation will include a disposal of a major part of an entity's operations and financial results such as a separate major line of business or a separate major geographical area of operations. The guidance raises the threshold to be a major operation but no longer precludes discontinued operations presentation where there is significant continuing involvement or cash flows with a disposed component of an entity. The guidance expands disclosures to include cash flows where there is significant continuing involvement with a discontinued operation and the pre-tax profit or loss of disposal transactions not reported as discontinued operations. The updated guidance is effective prospectively for years beginning on or after December 15, 2014, with early application permitted. The Company will apply the guidance to new disposals and operations newly classified as held for sale beginning first quarter of 2015, with no effect on existing reported discontinued operations. The effect on the Company's future results of operations or financial condition will depend on the nature of future disposal transactions.

Significant Accounting Policies

The Company's significant accounting policies are as follows:

Revenue Recognition

Property and casualty insurance premiums are earned on a pro rata basis over the lives of the policies and include accruals for ultimate premium revenue anticipated under auditable and retrospectively rated policies. Unearned premiums represent the premiums applicable to the unexpired terms of policies in force. An estimated allowance for doubtful accounts is recorded on the basis of periodic evaluations of balances due from insureds, management's experience and current economic conditions. The Company charges off any balances that are determined to be uncollectible. The allowance for doubtful accounts included in premiums receivable and agents' balances in the Consolidated Balance Sheets was $131 and $125 as of December 31, 2014 and 2013, respectively.

Traditional life products' premiums are recognized as revenue when due from policyholders. Group life, disability and accident premiums are generally both due from policyholders and recognized as revenue on a pro rata basis over the period of the contracts.

Fee income for universal life-type contracts consists of policy charges for policy administration, cost of insurance charges and surrender charges assessed against policyholders' account balances and are recognized in the period in which services are provided. Amounts representing account value collected from policyholders for investment and universal life-type contracts are considered deposits and are not included in revenue. Unearned revenue reserves, representing amounts assessed as consideration for policy origination of a universal life-type contract, are deferred and recognized in income over the period benefited, generally in proportion to estimated gross profits.

The Company provides investment management, administrative and distribution services to mutual funds. The Company charges fees to these mutual funds which are primarily based on the average daily net asset values of the mutual funds and recorded as fee income in the period in which the services are provided. Commission fees are based on the sale proceeds and recognized at the time of the transaction. Transfer agent fees are assessed as a charge per account and recognized as fee income in the period in which the services are provided.

1. Basis of Presentation and Significant Accounting Policies (continued)

Other revenues primarily consists of servicing revenues which are recognized as services are performed.

Dividends to Policyholders

Policyholder dividends are paid to certain property and casualty and life insurance policyholders. Policies that receive dividends are referred to as participating policies. Participating dividends to policyholders are accrued and reported in insurance operating costs and other expenses and other liabilities using an estimate of the amount to be paid based on underlying contractual obligations under policies and applicable state laws.

Net written premiums for participating property and casualty insurance policies represented 9%, 10% and 9% of total net written premiums for the years ended December 31, 2014, 2013 and 2012, respectively. Participating dividends to policyholders were $15, $16 and $14 for the years ended December 31, 2014, 2013 and 2012, respectively.

Total participating policies in-force represented 1% of the total life insurance policies in-force as of December 31, 2014, 2013 and 2012. Participating dividends to policyholders were $7, $18 and $20 for the years ended December 31, 2014, 2013 and 2012, respectively.

There were no additional amounts of income allocated to participating policyholders. If limitations exist on the amount of net income from participating life insurance contracts that may be distributed to stockholders, the policyholder’s share of net income on those contracts that cannot be distributed is excluded from stockholders' equity by a charge to operations and an increase to a liability.

Fair Value

The following financial instruments are carried at fair value in the Company’s Consolidated Financial Statements: fixed maturity and equity securities, available-for-sale (“AFS”); fixed maturities at fair value using fair value option (“FVO”); equity securities, FVO; equity securities, trading; short-term investments; freestanding and embedded derivatives; certain limited partnerships and other alternative investments; separate account assets and certain other liabilities. For further discussion of fair value, see Note 5 - Fair Value Measurements of Notes to Consolidated Financial Statements.

Investments

Overview

The Company’s investments in fixed maturities include bonds, structured securities, redeemable preferred stock and commercial paper. These investments, along with certain equity securities, which include common and non-redeemable preferred stocks, are classified as AFS and are carried at fair value. The after-tax difference from cost or amortized cost is reflected in stockholders’ equity as a component of Accumulated Other Comprehensive Income (Loss) (“AOCI”), after adjustments for the effect of deducting certain life and annuity deferred policy acquisition costs and reserve adjustments. Also included in equity securities, AFS are certain equity securities for which the Company elected the fair value option. These equity securities are carried at fair value with changes in value recorded in realized capital gains and losses on the Company's Consolidated Statements of Operations. Fixed maturities for which the Company elected the fair value option are classified as FVO and are carried at fair value with changes in value recorded in realized capital gains and losses. The equity investments associated with the Company's former variable annuity products offered in Japan are recorded at fair value and are classified as trading with changes in fair value recorded in discontinued operations. Policy loans are carried at outstanding balance. Mortgage loans are recorded at the outstanding principal balance adjusted for amortization of premiums or discounts and net of valuation allowances. Short-term investments are carried at amortized cost, which approximates fair value. Limited partnerships and other alternative investments are reported at their carrying value with the change in carrying value primarily accounted for under the equity method and accordingly the Company’s share of earnings are included in net investment income. Recognition of income related to limited partnerships and other alternative investments is delayed due to the availability of the related financial information, as private equity and other funds are generally on a three-month delay and hedge funds are on a one-month delay. Accordingly, income for the years ended December 31, 2014, 2013, and 2012 may not include the full impact of current year changes in valuation of the underlying assets and liabilities of the funds, which are generally obtained from the limited partnerships and other alternative investments’ general partners. In addition, for investments in a wholly-owned hedge fund of funds, the Company recognizes changes in the fair value of the underlying funds in net investment income, which is consistent with accounting requirements for investment companies. Other investments primarily consist of derivatives instruments which are carried at fair value.

1. Basis of Presentation and Significant Accounting Policies (continued)

Recognition and Presentation of Other-Than-Temporary Impairments

The Company deems bonds and certain equity securities with debt-like characteristics (collectively "debt securities") to be other-than-temporarily impaired ("impaired") if a security meets the following conditions: a) the Company intends to sell or it is more likely than not that the Company will be required to sell the security before a recovery in value, or b) the Company does not expect to recover the entire amortized cost basis of the security. If the Company intends to sell or it is more likely than not that the Company will be required to sell the security before a recovery in value, a charge is recorded in net realized capital losses equal to the difference between the fair value and amortized cost basis of the security. For those impaired debt securities which do not meet the first condition and for which the Company does not expect to recover the entire amortized cost basis, the difference between the security's amortized cost basis and the fair value is separated into the portion representing a credit other-than-temporary impairment, which is recorded in net realized capital losses, and the remaining non-credit impairment, which is recorded in OCI. Generally, the Company determines a security's credit impairment as the difference between its amortized cost basis and its best estimate of expected future cash flows discounted at the security's effective yield prior to impairment. The remaining non-credit impairment, which is recorded in OCI, is the difference between the security's fair value and the Company's best estimate of expected future cash flows discounted at the security's effective yield prior to the impairment, which typically represents current market liquidity and risk premiums. The previous amortized cost basis less the impairment recognized in net realized capital losses becomes the security's new cost basis. The Company accretes the new cost basis to the estimated future cash flows over the expected remaining life of the security by prospectively adjusting the security's yield, if necessary.

The Company's evaluation of whether a credit impairment exists for debt securities includes but is not limited to, the following factors: (a) changes in the financial condition of the security's underlying collateral, (b) whether the issuer is current on contractually obligated interest and principal payments, (c) changes in the financial condition, credit rating and near-term prospects of the issuer, (d) the extent to which the fair value has been less than the amortized cost of the security and (e) the payment structure of the security. The Company's best estimate of expected future cash flows used to determine the credit loss amount is a quantitative and qualitative process that incorporates information received from third-party sources along with certain internal assumptions and judgments regarding the future performance of the security. The Company's best estimate of future cash flows involves assumptions including, but not limited to, various performance indicators, such as historical and projected default and recovery rates, credit ratings, current and projected delinquency rates, and loan-to-value ("LTV") ratios. In addition, for structured securities, the Company considers factors including, but not limited to, average cumulative collateral loss rates that vary by vintage year, commercial and residential property value declines that vary by property type and location and commercial real estate delinquency levels. These assumptions require the use of significant management judgment and include the probability of issuer default and estimates regarding timing and amount of expected recoveries which may include estimating the underlying collateral value. In addition, projections of expected future debt security cash flows may change based upon new information regarding the performance of the issuer and/or underlying collateral such as changes in the projections of the underlying property value estimates.

For equity securities where the decline in the fair value is deemed to be other-than-temporary, a charge is recorded in net realized capital losses equal to the difference between the fair value and cost basis of the security. The previous cost basis less the impairment becomes the security's new cost basis. The Company asserts its intent and ability to retain those equity securities deemed to be temporarily impaired until the price recovers. Once identified, these securities are systematically restricted from trading unless approved by investment and accounting professionals. The investment and accounting professionals will only authorize the sale of these securities based on predefined criteria that relate to events that could not have been reasonably foreseen. Examples of the criteria include, but are not limited to, the deterioration in the issuer's financial condition, security price declines, a change in regulatory requirements or a major business combination or major disposition.

The primary factors considered in evaluating whether an impairment exists for an equity security include, but are not limited to: (a) the length of time and extent to which the fair value has been less than the cost of the security, (b) changes in the financial condition, credit rating and near-term prospects of the issuer, (c) whether the issuer is current on preferred stock dividends and (d) the intent and ability of the Company to retain the investment for a period of time sufficient to allow for recovery.

Mortgage Loan Valuation Allowances

The Company's security monitoring process reviews mortgage loans on a quarterly basis to identify potential credit losses. Commercial mortgage loans are considered to be impaired when management estimates that, based upon current information and events, it is probable that the Company will be unable to collect amounts due according to the contractual terms of the loan agreement. Criteria used to determine if an impairment exists include, but are not limited to: current and projected macroeconomic factors, such as unemployment rates, and property-specific factors such as rental rates, occupancy levels, LTV ratios and debt service coverage ratios ("DSCR"). In addition, the Company considers historic, current and projected delinquency rates and property values. These assumptions require the use of significant management judgment and include the probability and timing of borrower default and loss severity estimates. In addition, projections of expected future cash flows may change based upon new information regarding the performance of the borrower and/or underlying collateral such as changes in the projections of the underlying property value estimates.

1. Basis of Presentation and Significant Accounting Policies (continued)

For mortgage loans that are deemed impaired, a valuation allowance is established for the difference between the carrying amount and the Company's share of either (a) the present value of the expected future cash flows discounted at the loan's effective interest rate, (b) the loan's observable market price or, most frequently, (c) the fair value of the collateral. A valuation allowance has been established for either individual loans or as a projected loss contingency for loans with an LTV ratio of 90% or greater and consideration of other credit quality factors, including DSCR. Changes in valuation allowances are recorded in net realized capital gains and losses. Interest income on impaired loans is accrued to the extent it is deemed collectible and the loans continue to perform under the original or restructured terms. Interest income ceases to accrue for loans when it is probable that the Company will not receive interest and principal payments according to the contractual terms of the loan agreement. Loans may resume accrual status when it is determined that sufficient collateral exists to satisfy the full amount of the loan and interest payments, as well as when it is probable cash will be received in the foreseeable future. Interest income on defaulted loans is recognized when received.

Net Realized Capital Gains and Losses

Net realized capital gains and losses from investment sales are reported as a component of revenues and are determined on a specific identification basis. Net realized capital gains and losses also result from fair value changes in fixed maturities and equity, securities for which the fair value option was elected, and derivatives contracts (both free-standing and embedded) that do not qualify, or are not designated, as a hedge for accounting purposes, ineffectiveness on derivatives that qualify for hedge accounting treatment, and the change in value of derivatives in certain fair-value hedge relationships and their associated hedged asset. Impairments and mortgage loan valuation allowances are recognized as net realized capital losses in accordance with the Company's impairment and mortgage loan valuation allowance policies previously discussed above. Foreign currency transaction remeasurements are also included in net realized capital gains and losses.

Net Investment Income

Interest income from fixed maturities and mortgage loans is recognized when earned on the constant effective yield method based on estimated timing of cash flows. The amortization of premium and accretion of discount for fixed maturities also takes into consideration call and maturity dates that produce the lowest yield. For securitized financial assets subject to prepayment risk, yields are recalculated and adjusted periodically to reflect historical and/or estimated future repayments using the retrospective method; however, if these investments are impaired, any yield adjustments are made using the prospective method. Prepayment fees on fixed maturities and mortgage loans are recorded in net investment income when earned. For equity securities, dividends will be recognized as investment income on the ex-dividend date. Limited partnerships and other alternative investments primarily use the equity method of accounting to recognize the Company's share of earnings; however, the Company also uses investment fund accounting applied to a wholly-owned fund of funds. For impaired debt securities, the Company accretes the new cost basis to the estimated future cash flows over the expected remaining life of the security by prospectively adjusting the security's yield, if necessary. The Company's non-income producing investments were not material for the years ended December 31, 2014, 2013 and 2012.

Derivative Instruments

Overview

The Company utilizes a variety of over-the-counter ("OTC") derivative investments, including transactions cleared through a central clearing house ("OTC-cleared"), and exchange-traded derivative instruments as part of its overall risk management strategy. The types of instruments may include swaps, caps, floors, forwards, futures and options to achieve one of four Company-approved objectives: to hedge risk arising from interest rate, equity market, credit spread and issuer default, price or currency exchange rate risk or volatility; to manage liquidity; to control transaction costs; or to enter into synthetic replication transactions.

Interest rate, volatility, dividend, credit default and index swaps involve the periodic exchange of cash flows with other parties, at specified intervals, calculated using agreed upon rates or other financial variables and notional principal amounts. Generally, little to no cash or principal payments are exchanged at the inception of the contract. Typically, at the time a swap is entered into, the cash flow streams exchanged by the counterparties are equal in value.

Interest rate cap and floor contracts entitle the purchaser to receive from the issuer at specified dates, the amount, if any, by which a specified market rate exceeds the cap strike interest rate or falls below the floor strike interest rate, applied to a notional principal amount. A premium payment is made by the purchaser of the contract at its inception and no principal payments are exchanged.

Forward contracts are customized commitments that specify a rate of interest or currency exchange rate to be paid or received on an obligation beginning on a future start date and are typically settled in cash.

Financial futures are standardized commitments to either purchase or sell designated financial instruments, at a future date, for a specified price and may be settled in cash or through delivery of the underlying instrument. Futures contracts trade on organized exchanges. Margin requirements for futures are met by pledging securities or cash, and changes in the futures' contract values are settled daily in cash.

1. Basis of Presentation and Significant Accounting Policies (continued)

Option contracts grant the purchaser, for a premium payment, the right to either purchase from or sell to the issuer a financial instrument at a specified price, within a specified period or on a stated date.

Foreign currency swaps exchange an initial principal amount in two currencies, agreeing to re-exchange the currencies at a future date, at an agreed upon exchange rate. There may also be a periodic exchange of payments at specified intervals calculated using the agreed upon rates and exchanged principal amounts.

The Company's derivative transactions conducted in insurance company subsidiaries are used in strategies permitted under the derivative use plans required by the State of Connecticut, the State of Illinois and the State of New York insurance departments.

Accounting and Financial Statement Presentation of Derivative Instruments and Hedging Activities

Derivative instruments are recognized on the Consolidated Balance Sheets at fair value and are reported in Other Investments and Other Liabilities. For balance sheet presentation purposes, the Company has elected to offset the fair value amounts, income accruals, and related cash collateral receivables and payables of OTC derivative instruments executed in a legal entity and with the same counterparty or under a master netting agreement, which provides the Company with the legal right of offset.

During 2013, the Company began clearing interest rate swap and certain credit default swap derivative transactions through central clearing houses. OTC-cleared derivatives require initial collateral at the inception of the trade in the form of cash or highly liquid collateral, such as U.S. Treasuries and government agency investments. Central clearing houses also require additional cash collateral as variation margin based on daily market value movements. For information on collateral, see the derivative collateral arrangements section in Note 6 - Investments and Derivative Instruments. In addition, OTC-cleared transactions include price alignment interest either received or paid on the variation margin, which is reflected in net investment income. The Company has also elected to offset the fair value amounts, income accruals and related cash collateral receivables and payables of OTC-cleared derivative instruments based on clearing house agreements.

On the date the derivative contract is entered into, the Company designates the derivative as (1) a hedge of the fair value of a recognized asset or liability ("fair value" hedge), (2) a hedge of the variability in cash flows of a forecasted transaction or of amounts to be received or paid related to a recognized asset or liability ("cash flow" hedge), (3) a hedge of a net investment in a foreign operation ("net investment" hedge) or (4) held for other investment and/or risk management purposes, which primarily involve managing asset or liability related risks and do not qualify for hedge accounting.

Fair Value Hedges

Changes in the fair value of a derivative that is designated and qualifies as a fair value hedge, including foreign-currency fair value hedges, along with the changes in the fair value of the hedged asset or liability that is attributable to the hedged risk, are recorded in current period earnings as net realized capital gains and losses with any differences between the net change in fair value of the derivative and the hedged item representing the hedge ineffectiveness. Periodic cash flows and accruals of income/expense ("derivative periodic net coupon settlements") are recorded in the line item of the Consolidated Statements of Operations in which the cash flows of the hedged item are recorded.

Cash Flow Hedges

Changes in the fair value of a derivative that is designated and qualifies as a cash flow hedge, including foreign-currency cash flow hedges, are recorded in AOCI and are reclassified into earnings when the variability of the cash flow of the hedged item impacts earnings. Gains and losses on derivative contracts that are reclassified from AOCI to current period earnings are included in the line item in the Consolidated Statements of Operations in which the cash flows of the hedged item are recorded. Any hedge ineffectiveness is recorded immediately in current period earnings as net realized capital gains and losses. Periodic derivative net coupon settlements are recorded in the line item of the Consolidated Statements of Operations in which the cash flows of the hedged item are recorded.

Net Investment in a Foreign Operation Hedges

Changes in fair value of a derivative used as a hedge of a net investment in a foreign operation, to the extent effective as a hedge, are recorded in the foreign currency translation adjustments account within AOCI. Cumulative changes in fair value recorded in AOCI are reclassified into earnings upon the sale or complete, or substantially complete, liquidation of the foreign entity. Any hedge ineffectiveness is recorded immediately in current period earnings as net realized capital gains and losses. Periodic derivative net coupon settlements are recorded in the line item of the Consolidated Statements of Operations in which the cash flows of the hedged item are recorded.

1. Basis of Presentation and Significant Accounting Policies (continued)

Other Investment and/or Risk Management Activities

The Company's other investment and/or risk management activities primarily relate to strategies used to reduce economic risk or replicate permitted investments and do not receive hedge accounting treatment. Changes in the fair value, including periodic derivative net coupon settlements, of derivative instruments held for other investment and/or risk management purposes are reported in current period earnings as net realized capital gains and losses.

Hedge Documentation and Effectiveness Testing

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated changes in fair value or cash flow of the hedged item. At hedge inception, the Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking each hedge transaction. The documentation process includes linking derivatives that are designated as fair value, cash flow, or net investment hedges to specific assets or liabilities on the balance sheet or to specific forecasted transactions and defining the effectiveness and ineffectiveness testing methods to be used. The Company also formally assesses both at the hedge's inception and ongoing on a quarterly basis, whether the derivatives that are used in hedging transactions have been and are expected to continue to be highly effective in offsetting changes in fair values or cash flows of hedged items. Hedge effectiveness is assessed primarily using quantitative methods as well as using qualitative methods. Quantitative methods include regression or other statistical analysis of changes in fair value or cash flows associated with the hedge relationship. Qualitative methods may include comparison of critical terms of the derivative to the hedged item. Hedge ineffectiveness of the hedge relationships are measured each reporting period using the "Change in Variable Cash Flows Method", the "Change in Fair Value Method", the "Hypothetical Derivative Method", or the "Dollar Offset Method".

Discontinuance of Hedge Accounting

The Company discontinues hedge accounting prospectively when (1) it is determined that the derivative is no longer highly effective in offsetting changes in the fair value or cash flows of a hedged item; (2) the derivative is de-designated as a hedging instrument; or (3) the derivative expires or is sold, terminated or exercised.

When hedge accounting is discontinued because it is determined that the derivative no longer qualifies as an effective fair value hedge, the derivative continues to be carried at fair value on the balance sheet with changes in its fair value recognized in current period earnings. Changes in the fair value of the hedged item attributable to the hedged risk is no longer adjusted through current period earnings and the existing basis adjustment is amortized to earnings over the remaining life of the hedge item through the applicable earnings component associated with the hedged item.

When hedge accounting is discontinued because the Company becomes aware that it is not probable that the forecasted transaction will occur, the derivative continues to be carried on the balance sheet at its fair value, and gains and losses that were accumulated in AOCI are recognized immediately in earnings.

In other situations in which hedge accounting is discontinued on a cash flow hedge, including those where the derivative is sold, terminated or exercised, amounts previously deferred in AOCI are reclassified into earnings when earnings are impacted by the variability of the cash flow of the hedged item.

Embedded Derivatives

The Company purchases and issues financial instruments and products that contain embedded derivative instruments. When it is determined that (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host for measurement purposes. The embedded derivative, which is reported with the host instrument in the Consolidated Balance Sheets, is carried at fair value with changes in fair value reported in net realized capital gains and losses.

1. Basis of Presentation and Significant Accounting Policies (continued)

Credit Risk

Credit risk is defined as the risk of financial loss due to uncertainty of an obligor’s or counterparty’s ability or willingness to meet its obligations in accordance with agreed upon terms. Credit exposures are measured using the market value of the derivatives, resulting in amounts owed to the Company by its counterparties or potential payment obligations from the Company to its counterparties. The Company generally requires that OTC derivative contracts, other than certain forward contracts, be governed by International Swaps and Derivatives Association ("ISDA") agreements which are structured by legal entity and by counterparty, and permit right of offset. These agreements require daily collateral settlement based upon agreed upon thresholds. For purposes of daily derivative collateral maintenance, credit exposures are generally quantified based on the prior business day’s market value and collateral is pledged to and held by, or on behalf of, the Company to the extent the current value of the derivatives exceed the contractual thresholds. For the Company’s domestic derivative programs, the maximum uncollateralized threshold for a derivative counterparty for a single legal entity is $10. The Company also minimizes the credit risk of derivative instruments by entering into transactions with high quality counterparties rated A or better, which are monitored and evaluated by the Company’s risk management team and reviewed by senior management. OTC-cleared derivatives are governed by clearing house rules. Transactions cleared through a central clearing house reduce risk due to their ability to require daily variation margin, monitor the Company's ability to request additional collateral in the event of a counterparty downgrade, and act as an independent valuation source. In addition, the Company monitors counterparty credit exposure on a monthly basis to ensure compliance with Company policies and statutory limitations.

Cash

Cash represents cash on hand and demand deposits with banks or other financial institutions.

Reinsurance

The Company cedes insurance to affiliated and unaffiliated insurers in order to limit its maximum losses and to diversify its exposures and provide statutory surplus relief. Such arrangements do not relieve the Company of its primary liability to policyholders. Failure of reinsurers to honor their obligations could result in losses to the Company. The Company also assumes reinsurance from other insurers and is a member of and participates in reinsurance pools and associations. Assumed reinsurance refers to the Company’s acceptance of certain insurance risks that other insurance companies have underwritten.

Reinsurance accounting is followed for ceded and assumed transactions that provide indemnification against loss or liability relating to insurance risk (i.e. risk transfer). To meet risk transfer requirements, a reinsurance agreement must include insurance risk, consisting of underwriting, investment, and timing risk, and a reasonable possibility of a significant loss to the reinsurer. If the ceded and assumed transactions do not meet risk transfer requirements, the Company accounts for these transactions as financing transactions.

Premiums, benefits, losses and loss adjustment expenses reflect the net effects of ceded and assumed reinsurance transactions. Included in other assets are prepaid reinsurance premiums, which represent the portion of premiums ceded to reinsurers applicable to the unexpired terms of the reinsurance contracts. Included in reinsurance recoverables are balances due from reinsurance companies for paid and unpaid losses and loss adjustment expenses and are presented net of an allowance for uncollectible reinsurance.

The Company evaluates the financial condition of its reinsurers and concentrations of credit risk. Reinsurance is placed with reinsurers that meet strict financial criteria established by the Company. The Company entered into two reinsurance transactions upon completion of the sales of its Retirement Plans and Individual Life businesses in 2013. For further discussion of these transactions, see Note 2 - Business Dispositions and Note 7 - Reinsurance of Notes to Consolidated Financial Statements.

Deferred Policy Acquisition Costs and Present Value of Future Profits

Deferred policy acquisition costs ("DAC") represent costs that are directly related to the acquisition of new and renewal insurance contracts and incremental direct costs of contract acquisition that are incurred in transactions with either independent third parties or employees. Such costs primarily include commissions, premium taxes, costs of policy issuance and underwriting, and certain other expenses that are directly related to successfully issued contracts.

For property and casualty insurance products and group life, disability and accident contracts, costs are deferred and amortized ratably over the period the related premiums are earned. Deferred acquisition costs are reviewed to determine if they are recoverable from future income, and if not, are charged to expense. Anticipated investment income is considered in the determination of the recoverability of DAC.

1. Basis of Presentation and Significant Accounting Policies (continued)

For life insurance products, the DAC asset related to most universal life-type contracts (including variable annuities) is amortized over the estimated life of the contracts acquired in proportion to the present value of estimated gross profits (“EGPs”). EGPs are also used to amortize other assets and liabilities in the Company’s Consolidated Balance Sheets, such as, sales inducement assets (“SIA”) and unearned revenue reserves (“URR”). Components of EGPs are used to determine reserves for universal life-type contracts (including variable annuities) with death or other insurance benefits such as guaranteed minimum death, guaranteed minimum withdrawal and universal life insurance secondary guarantee benefits. These benefits are accounted for and collectively referred to as death and other insurance benefit reserves and are held in addition to the account value liability representing policyholder funds.

For most life insurance product contracts, the Company estimates gross profits over 20 years as EGPs emerging subsequent to that timeframe are immaterial. Products sold in a particular year are aggregated into cohorts. Future gross profits for each cohort are projected over the estimated lives of the underlying contracts, based on future account value projections for variable annuity and variable universal life products. The projection of future account values requires the use of certain assumptions including: separate account returns; separate account fund mix; fees assessed against the contract holder’s account balance; surrender and lapse rates; interest margin; mortality; and the extent and duration of hedging activities and hedging costs.

The Company determines EGPs from a single deterministic reversion to mean (“RTM”) separate account return projection which is an estimation technique commonly used by insurance entities to project future separate account returns. Through this estimation technique, the Company’s DAC model is adjusted to reflect actual account values at the end of each quarter. Through consideration of recent market returns, the Company will unlock ("Unlock"), or adjust, projected returns over a future period so that the account value returns to the long-term expected rate of return, providing that those projected returns do not exceed certain caps. This Unlock for future separate account returns is determined each quarter.

In the third quarter of 2014, the Company completed a comprehensive non-market related policyholder behavior assumption study and incorporates the results of those studies into its projection of future gross profits. Additionally, throughout the year, the Company evaluates various aspects of policyholder behavior and periodically revises its policyholder assumptions as credible emerging data indicates that changes are warranted. The Company will continue to evaluate its assumptions related to policyholder behavior as initiatives to reduce the size of the variable annuity business are implemented by management. Upon completion of an annual assumption study or evaluation of credible new information, the Company will revise its assumptions to reflect its current best estimate. These assumption revisions will change the projected account values and the related EGPs in the DAC, SIA and URR amortization models, as well as, the death and other insurance benefit reserving models. Beginning in 2015, the annual comprehensive non-market related policyholder behavior assumption study will be completed in the fourth quarter of each year.

All assumption changes that affect the estimate of future EGPs including the update of current account values, the use of the RTM estimation technique and policyholder behavior assumptions are considered an Unlock in the period of revision. An Unlock adjusts the DAC, SIA, URR and death and other insurance benefit reserve balances in the Consolidated Balance Sheets with an offsetting benefit or charge in the Consolidated Statements of Operations in the period of the revision. An Unlock revises EGPs to reflect the Company’s current best estimate assumptions. The Company also tests the aggregate recoverability of DAC by comparing the existing DAC balance to the present value of future EGPs. An Unlock that results in an after-tax benefit generally occurs as a result of actual experience or future expectations of product profitability being favorable compared to previous estimates. An Unlock that results in an after-tax charge generally occurs as a result of actual experience or future expectations of product profitability being unfavorable compared to previous estimates.

Income Taxes

The Company recognizes taxes payable or refundable for the current year and deferred taxes for the tax consequences of temporary differences between the financial reporting and tax basis of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years the temporary differences are expected to reverse. A deferred tax provision is recorded for the tax effects of differences between the Company's current taxable income and its income before tax under generally accepted accounting principles in the Consolidated Statements of Operations. The Company records a deferred tax asset valuation allowance that is adequate to reduce the total deferred tax asset to an amount that will more likely than not be realized.

Goodwill

Goodwill represents the excess of costs over the fair value of net assets acquired. Goodwill is not amortized but is reviewed for impairment at least annually or more frequently if events occur or circumstances change that would indicate that a triggering event for a potential impairment has occurred. The goodwill impairment test follows a two-step process. In the first step, the fair value of a reporting unit is compared to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the second step of the impairment test is performed for purposes of measuring the impairment. In the second step, the fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit to determine an implied goodwill value. If the carrying amount of the reporting unit’s goodwill exceeds the implied goodwill value, an impairment loss is recognized in an amount equal to that excess.

1. Basis of Presentation and Significant Accounting Policies (continued)

Management’s determination of the fair value of each reporting unit incorporates multiple inputs into discounted cash flow calculations, including assumptions that market participants would make in valuing the reporting unit. Assumptions include levels of economic capital, future business growth, earnings projections and assets under management for certain reporting units and the weighted average cost of capital used for purposes of discounting. Decreases in the amount of capital allocated to a reporting unit, decreases in business growth, decreases in earnings projections and increases in the weighted average cost of capital will all cause a reporting unit’s fair value to decrease.

Goodwill within Corporate is primarily attributed to the Company’s “buy-back” of Hartford Life, Inc. in 2000 and was allocated to each of Hartford Life’s reporting units based on the reporting unit’s fair value of in-force business at the buy-back date. Although this goodwill was allocated to each reporting unit, it is held in Corporate for segment reporting.

Property and Equipment

Property and equipment is carried at cost net of accumulated depreciation. Depreciation is based on the estimated useful lives of the various classes of property and equipment and is determined principally on the straight-line method. Accumulated depreciation was $2.3 billion and $2.2 billion as of December 31, 2014 and 2013, respectively. Depreciation expense was $198, $174, and $183 for the years ended December 31, 2014, 2013 and 2012, respectively.

Separate Accounts, Death Benefits and Other Insurance Benefit Features

The Company records the variable account value portion of variable annuity and variable life insurance products and institutional and governmental investment contracts within separate accounts. Separate account assets are reported at fair value and separate account liabilities are reported at amounts consistent with separate account assets. Investment income and gains and losses from those separate account assets accrue directly to the policyholder, who assumes the related investment risk, and are offset by the related liability changes reported in the same line item in the Consolidated Statements of Operations. The Company earns fees for investment management, certain administrative expenses, and mortality and expense risks assumed which are reported in fee income.

Certain contracts classified as universal life-type include death and other insurance benefit features including guaranteed minimum death benefit ("GMDB"), guaranteed minimum income benefit ("GMIB"), and guaranteed minimum withdrawal benefit ("GMWB") riders offered with variable annuity contracts, or secondary guarantee benefits offered with universal life insurance contracts. GMWBs that represent embedded derivatives are accounted for at fair value. Universal life insurance secondary guarantee benefits ensure that the policy will not terminate, and will continue to provide a death benefit, even if there is insufficient policy value to cover the monthly deductions and charges. For the Company's GMWB products, the withdrawal benefit can exceed the guaranteed remaining balance ("GRB"). These GMDBs, GMIBs, the life-contingent portion of GMWBs and the universal life insurance secondary guarantees require an additional liability be held above the account value liability representing the policyholders’ funds. This liability is reported in reserve for future policy benefits in the Company’s Consolidated Balance Sheets. Changes in the death and other insurance benefit reserves are recorded in benefits, losses and loss adjustment expenses in the Company’s Consolidated Statements of Operations.

The death and other insurance benefit liability is determined by estimating the expected present value of the benefits in excess of the policyholder’s expected account value in proportion to the present value of total expected fees. The liability is accrued as actual fees are earned. The expected present value of benefits and fees are generally derived from a set of stochastic scenarios, that have been calibrated to our RTM separate account returns, and assumptions including market rates of return, volatility, discount rates, lapse rates and mortality experience. Consistent with the Company’s policy on the Unlock, the Company regularly evaluates estimates used and adjusts the additional liability balance, with a related charge or credit to benefits, losses and loss adjustment expense. For further information on the Unlock, see the Deferred Policy Acquisition Costs and Present Value of Future Profits accounting policy section within this footnote.

The Company reinsures a portion of its in-force GMDB and all of its universal life insurance secondary guarantees and net reinsurance costs are recognized ratably over the accumulation period based on total expected assessments.

1. Basis of Presentation and Significant Accounting Policies (continued)

Reserve for Future Policy Benefits and Unpaid Losses and Loss Adjustment Expenses

Property and Casualty Insurance Products

The Hartford establishes property and casualty insurance products reserves to provide for the estimated costs of paying claims under insurance policies written by the Company. These reserves include estimates for both claims that have been reported and those that have been incurred but not reported, and include estimates of all losses and loss adjustment expenses associated with processing and settling these claims. Estimating the ultimate cost of future losses and loss adjustment expenses is an uncertain and complex process. This estimation process is based significantly on the assumption that past developments are an appropriate predictor of future events, and involves a variety of actuarial techniques that analyze experience, trends and other relevant factors. The uncertainties involved with the reserving process have become increasingly difficult due to a number of complex factors including social and economic trends and changes in the concepts of legal liability and damage awards. Accordingly, final claim settlements may vary from the present estimates, particularly when those payments may not occur until well into the future.

The Hartford regularly reviews the adequacy of its estimated losses and loss adjustment expense reserves by line of business within the various reporting segments. Adjustments to previously established reserves are reflected in the operating results of the period in which the adjustment is determined to be necessary. Such adjustments could possibly be significant, reflecting any variety of new and adverse or favorable trends.

Most of the Company's property and casualty insurance products reserves are not discounted. However, the Company has discounted to present value certain reserves for indemnity payments due to permanently disabled claimants under workers' compensation policies at an average interest rate of 3.5% in 2014 and 2013, respectively. These discounted reserves totaled approximately $1.0 billion at December 31, 2014 and 2013. The Company also has discounted liabilities for structured settlement agreements that provide fixed periodic payments to claimants. These structured settlements include annuities purchased to fund unpaid losses for permanently disabled claimants. Most of the annuities have been issued by the Company and these structured settlements are recorded at present value as annuity obligations, either within the reserve for future policy benefits if the annuity benefits are life-contingent or within other policyholder funds and benefits payable if the annuity benefits are not life-contingent. Annuities issued by the Company to fund structured settlement payments where the claimant has not released the Company of its obligation totaled $776 and $805 as of December 31, 2014 and 2013, respectively. These structured settlement liabilities were discounted to present value using an average interest rate of 6.7% in 2014 and 2013.

Life Insurance Products

Liabilities for future policy benefits are calculated by the net level premium method using interest, withdrawal and mortality assumptions appropriate at the time the policies were issued. The methods used in determining the liability for unpaid losses and future policy benefits are standard actuarial methods recognized by the American Academy of Actuaries. For the tabular reserves, discount rates are based on the Company's earned investment yield and the morbidity/mortality tables used are standard industry tables modified to reflect the Company's actual experience when appropriate. In particular, for the Company's group disability known claim reserves, the morbidity table for the early durations of claims is based exclusively on the Company's experience, incorporating factors such as gender, elimination period and diagnosis. These reserves are computed such that they are expected to meet the Company's future policy obligations. Future policy benefits are computed at amounts that, with additions from estimated premiums to be received and with interest on such reserves compounded annually at certain assumed rates, are expected to be sufficient to meet the Company's policy obligations at their maturities or in the event of an insured's death. Changes in or deviations from the assumptions used for mortality, morbidity, expected future premiums and interest can significantly affect the Company's reserve levels and related future operations.

Liabilities for the Company's group life and disability contracts, as well as its individual term life insurance policies, include amounts for unpaid losses and future policy benefits. Liabilities for unpaid losses include estimates of amounts to fully settle known reported claims, as well as claims related to insured events that the Company estimates have been incurred but have not yet been reported. These reserve estimates are based on known facts and interpretations of circumstances, and consideration of various internal factors including The Hartford's experience with similar cases, historical trends involving claim payment patterns, loss payments, pending levels of unpaid claims, loss control programs and product mix. In addition, the reserve estimates are influenced by consideration of various external factors including court decisions, economic conditions and public attitudes. The effects of inflation are implicitly considered in the reserving process. Group life and disability contracts with long tail claim liabilities are discounted because the payment pattern and the ultimate costs are reasonably fixed and determinable on an individual claim basis. These reserves were discounted to present value using a weighted average interest rate of 4.53% in 2014 and 4.71% in 2013.

Other Policyholder Funds and Benefits Payable

Other policyholder funds and benefits payable consist of non-variable account values associated with universal life-type contracts and investment contracts.

1. Basis of Presentation and Significant Accounting Policies (continued)

Universal life-type contracts consist of fixed and variable annuities and universal life insurance. The liability for universal life-type contracts is equal to the balance that accrues to the benefit of the policyholders as of the financial statement date, including credited interest, amounts that have been assessed to compensate the Company for services to be performed over future periods, and any amounts previously assessed against policyholders that are refundable on termination of the contract.

Investment contracts consist of institutional and governmental products, without life contingencies, including funding agreements, certain structured settlements and guaranteed investment contracts. The liability for investment contracts is equal to the balance that accrues to the benefit of the contract holder as of the financial statement date, which includes the accumulation of deposits plus credited interest, less withdrawals and amounts assessed through the financial statement date.

Foreign Currency

Foreign currency translation gains and losses are reflected in stockholders' equity as a component of accumulated other comprehensive income (loss). The Company's foreign subsidiaries' balance sheet accounts are translated at the exchange rates in effect at each year end and income statement accounts are translated at the average rates of exchange prevailing during the year. The national currencies of the international operations are generally their functional currencies. Gains and losses resulting from the remeasurement of foreign currency transactions are reflected in earnings in realized capital gains (losses) in the period in which they occur.

2. Business Dispositions

Sale of Hartford Life Insurance KK

On June 30, 2014, the Company completed the sale of all of the issued and outstanding equity of HLIKK to ORIX Life Insurance Corporation ("Buyer"), a subsidiary of ORIX Corporation, a Japanese company for cash proceeds of $963. HLIKK sold variable and fixed annuity policies in Japan from 2001 to 2009 and had been in runoff since 2009. The sale transaction resulted in an after-tax loss on disposition of $659 in the year ended December 31, 2014. The operations of the Company's Japan business meet the criteria for reporting as discontinued operations. For further information regarding discontinued operations, see Note 19 - Discontinued Operations of Notes to Consolidated Financial Statements. The Company's Japan business is included in the Talcott Resolution reporting segment.

Concurrently with the sale, HLIKK recaptured certain risks that had been reinsured to the Company’s U.S. subsidiaries, Hartford Life and Annuity Insurance Company ("HLAI") and Hartford Life Insurance Company ("HLIC") by terminating intercompany agreements. Upon closing, the Buyer became responsible for all liabilities for the recaptured business. The Company has, however, continued to provide reinsurance for Japan fixed payout annuities of $763 as of December 31, 2014.

The following table summarizes the major classes of assets and liabilities transferred by the Company in connection with the sale of HLIKK.

		Carrying Value As of Closing
Assets		
Cash and investments	$	18,733
Reinsurance recoverables	$	46
Property and equipment, net	$	18
Other assets	$	988
Liabilities		
Reserve for future policy benefits and unpaid loss and loss adjustment expenses	$	320
Other policyholder funds and benefits payable	$	2,265
Other policyholder funds and benefits payable - international variable annuities	$	16,465
Short-term debt	$	247
Other liabilities	$	102

Sale of Hartford Life International Limited

On December 12, 2013, the Company completed the sale of all of the issued and outstanding equity of HLIL in a cash transaction to Columbia Insurance Company, a Berkshire Hathaway company, for approximately $285. At closing, HLIL’s sole asset was its subsidiary, Hartford Life Limited, a Dublin-based company that sold variable annuities in the U.K. from 2005 to 2009. The sale transaction resulted in an after-tax loss of $102 upon disposition in the year ended December 31, 2013. The operations of the Company's U.K. variable annuity business meet the criteria for reporting as discontinued operations. For further information regarding discontinued operations, see Note 19 - Discontinued Operations of Notes to Consolidated Financial Statements. The Company's U.K. variable annuities business is included in the Talcott Resolution reporting segment.

Sale of Retirement Plans

On January 1, 2013, the Company completed the sale of its Retirement Plans business to MassMutual for a ceding commission of $355. The business sold included products and services provided to corporations pursuant to Section 401(k) of the Internal Revenue Code of 1986, as amended (the “Code”), and products and services provided to municipalities and not-for-profit organizations under Sections 457 and 403(b) of the Code, collectively referred to as government plans. The sale was structured as a reinsurance transaction and resulted in an after-tax loss of $24 for the year ended December 31, 2013. The after-tax loss is primarily driven by the reduction in goodwill that is non-deductible for income tax purposes. The Company recognized a reinsurance loss on disposition of $634 offset by $634 in net realized capital gains for the year ended December 31, 2013.

Upon closing, the Company reinsured $9.2 billion of policyholder liabilities and $26.3 billion of separate account liabilities under an indemnity reinsurance arrangement. The reinsurance transaction does not extinguish the Company's primary liability on the insurance policies issued under the Retirement Plans business. The Company also transferred invested assets with a carrying value of $9.3 billion, net of the ceding commission, to MassMutual and recognized other non-cash decreases in assets totaling $200 relating to deferred acquisition costs, deferred income taxes, goodwill, property and equipment and other assets associated with the disposition. The company continued to sell retirement plans during the transition period which ended on June 30, 2014. MassMutual has assumed all expenses and risks for these sales through the reinsurance agreement.

2. Business Dispositions (continued)

The Retirement Plans business is included in the Talcott Resolution reporting segment. Retirement Plans total revenues were $706 and its net loss was $39 for the year ended December 31, 2012.

Sale of Individual Life

On January 2, 2013, the Company completed the sale of its Individual Life insurance business to Prudential for consideration of $615 consisting primarily of a ceding commission. The business sold included variable universal life, universal life, and term life insurance. The sale was structured as a reinsurance transaction and resulted in a loss on business disposition consisting of a reinsurance loss partially offset by realized capital gains. The Company recognized a reinsurance loss on business disposition of $533, pre-tax, which included a goodwill impairment charge of $342 and a loss accrual for premium deficiency of $191, for the year ended December 31, 2012.

Upon closing the Company recognized an additional $940 in reinsurance loss on disposition offset by $940 in realized capital gains for a $0 impact on income, pre-tax, for the year ended December 31, 2013. In addition, the Company reinsured $8.7 billion of policyholder liabilities and $5.3 billion of separate account liabilities under indemnity reinsurance arrangements. The reinsurance transaction does not extinguish the Company's primary liability on the insurance policies issued under the Individual Life business. The Company also transferred invested assets with a carrying value of $8.0 billion, exclusive of $1.4 billion of assets supporting the modified coinsurance agreement, net of cash transferred in place of short-term investments, to Prudential and recognized other non-cash decreases in assets totaling $1.8 billion relating to deferred acquisition costs, deferred income taxes, property and equipment and other assets and other non-cash decreases in liabilities totaling $1.5 billion relating to other liabilities including the $191 loss accrual for premium deficiency, associated with the disposition. The Company continued to sell life insurance products and riders during the transition period which ended on June 30, 2014. Prudential has assumed all expenses and risk for these sales through the reinsurance agreement.

The Individual Life business is included in the Talcott Resolution reporting segment. Individual Life total revenues were $1.4 billion and its net loss was $172 for the year ended December 31, 2012.

For additional information regarding business dispositions, see Note 9 - Goodwill of Notes to Consolidated Financial Statements.

Composition of Invested Assets Transferred

The following table summarizes invested assets transferred by the Company in 2013 in connection with the sale of the Retirement Plans and Individual Life businesses.

	Carrying Value As of December 31, 2012
Fixed maturities, at fair value (amortized cost of $13,916) [1]	$ 15,349
Equity securities, AFS, at fair value (cost of $35) [2]	37
Fixed maturities, at fair value using the FVO [3]	16
Mortgage loans (net of allowances for loan losses of $1)	1,364
Policy loans, at outstanding balance	582
Total invested assets transferred	**$ 17,348**

[1] Includes $14.7 billion and $670 of securities in level 2 and 3 of the fair value hierarchy, respectively.
[2] All equity securities transferred are included in level 2 of the fair value hierarchy.
[3] All FVO securities transferred are included in level 3 of the fair value hierarchy.

3. Earnings (Loss) per Share

The following table presents a reconciliation of net income (loss) and shares used in calculating basic earnings (loss) per common share to those used in calculating diluted earnings (loss) per common share. Dilutive potential common shares are included in the calculation of diluted per share amounts provided there is income from continuing operations, net of tax, available to common shareholders.

	For the years ended December 31,		
(In millions, except for per share data)	**2014**	**2013**	**2012**
Earnings			
Income from continuing operations			
Income from continuing operations, net of tax	$ 1,349	$ 1,225	$ 220
Less: Preferred stock dividends	—	10	42
Income from continuing operations, net of tax, available to common shareholders	**1,349**	**1,215**	**178**
Add: Dilutive effect of preferred stock dividends	—	10	42
Income from continuing operations, net of tax, available to common shareholders and assumed conversion of preferred shares	**1,349**	**1,225**	**220**
Loss from discontinued operations, net of tax	**(551)**	**(1,049)**	**(258)**
Net income (loss)			
Net income (loss)	798	176	(38)
Less: Preferred stock dividends	—	10	42
Net income (loss) available to common shareholders	**$ 798**	**$ 166**	**$ (80)**
Add: Dilutive effect of preferred stock dividends	—	10	42
Net income (loss) available to common shareholders and assumed conversion of preferred shares	**798**	**176**	**(38)**
Shares			
Weighted average common shares outstanding, basic	**441.8**	**447.7**	**437.7**
Dilutive effect of warrants	12.1	32.2	26.0
Dilutive effect of stock-based awards under compensation plans	6.3	4.5	2.2
Dilutive effect of mandatory convertible preferred shares	—	6.2	—
Weighted average shares outstanding and dilutive potential common shares [1]	**460.2**	**490.6**	**465.9**
Earnings (loss) per common share			
Basic			
Income from continuing operations, net of tax, available to common shareholders	$ 3.05	$ 2.71	$ 0.41
Loss from discontinued operations, net of tax	(1.24)	(2.34)	(0.59)
Net income (loss) available to common shareholders	**$ 1.81**	**$ 0.37**	**$ (0.18)**
Diluted			
Income from continuing operations, net of tax, available to common shareholders	$ 2.93	$ 2.50	$ 0.38
Loss from discontinued operations, net of tax	(1.20)	(2.14)	(0.55)
Net income (loss) available to common shareholders	**$ 1.73**	**$ 0.36**	**$ (0.17)**

[1] For additional information, see Note 15 - Equity and Note 18 - Stock Compensation Plans of Notes to Consolidated Financial Statements.

Basic earnings per share is computed based on the weighted average number of common shares outstanding during the year. Diluted earnings per share includes the dilutive effect of assumed exercise or issuance of warrants and stock-based awards under compensation plans, and assumed conversion of preferred shares to common using the treasury stock method.

Under the treasury stock method, for warrants and stock-based awards, shares are assumed to be issued and then reduced for the number of shares repurchaseable with theoretical proceeds at the average market price for the period. Contingently issuable shares are included for the number of shares issuable assuming the end of the reporting period was the end of the contingency period, if dilutive.

Under the if-converted method for mandatory convertible preferred stock the conversion to common shares is assumed if the inclusion of these shares and the related dividend adjustment are dilutive to the earnings per share calculation. For the year ended December 31, 2012, 20.9 million shares for mandatory convertible preferred shares, along with the related dividend adjustment, would have been antidilutive to the earnings (loss) per share calculations. Assuming the impact of the mandatory convertible preferred shares was not antidilutive, weighted average common shares outstanding and dilutive potential common shares would have totaled 486.8 million, for the year ended December 31, 2012.

4. Segment Information

The Company currently conducts business principally in six reporting segments, as well as a Corporate category. The Company's revenues from continuing operations are generated primarily in the United States ("U.S."). Any foreign sourced revenue in continuing operations is immaterial.

The Company’s reporting segments, as well as the Corporate category, are as follows:

Commercial Lines

Commercial Lines provides workers’ compensation, property, automobile, marine, livestock, liability and umbrella coverages primarily throughout the United States (“U.S.”), along with a variety of customized insurance products and risk management services including professional liability, bond, and specialty casualty coverages.

Personal Lines

Personal Lines provides standard automobile, homeowners and personal umbrella coverages to individuals across the U.S., including a special program designed exclusively for members of AARP.

Property & Casualty Other Operations

Property & Casualty Other Operations includes certain property and casualty operations, currently managed by the Company, that have discontinued writing new business and including substantially all of the Company’s asbestos and environmental exposures.

Group Benefits

Group Benefits provides employers, associations, affinity groups and financial institutions with group life, accident and disability coverage, along with other products and services, including voluntary benefits, and group retiree health.

Mutual Funds

Mutual Funds offers investment products for retail and retirement accounts and provides investment management and administrative services such as product design, implementation and oversight. This business also includes the runoff of the mutual funds supporting the Company's variable annuity products.

Talcott Resolution

Talcott Resolution is comprised of runoff business from the Company's individual annuity, the retained Japan fixed payout annuity liabilities, institutional and private-placement life insurance businesses. The Company's individual annuity business consist of U.S. annuity products for individuals, which include variable, fixed, and payout annuity products. In addition, Talcott Resolution includes the Retirement Plans and Individual Life businesses sold in 2013 and the Company's discontinued Japan and U.K. annuity businesses. For further information regarding the sale of these businesses, see Note 2 - Business Dispositions and Note 19 - Discontinued Operations of Notes to Consolidated Financial Statements.

Corporate

The Company includes in the Corporate category the Company’s debt financing and related interest expense, as well as other capital raising activities, certain purchase accounting adjustments and other charges not allocated to the segments.

Financial Measures and Other Segment Information

Certain transactions between segments occur during the year that primarily relate to tax settlements, insurance coverage, expense reimbursements, services provided, security transfers and capital contributions. Also, one segment may purchase group annuity contracts from another to fund pension costs and annuities to settle casualty claims. In addition, certain inter-segment transactions occur that relate to interest income on allocated surplus. Consolidated net investment income is unaffected by such transactions.

4. Segment Information (continued)

The following table presents revenues by product line for each reporting segment, as well as the Corporate category.

Revenues	For the years ended December 31, 2014	2013	2012
Earned premiums, fees, and other considerations			
Commercial Lines			
Workers' compensation	$ 2,971	$ 2,975	$ 2,987
Property	559	521	505
Automobile	591	579	587
Package business	1,163	1,139	1,160
Liability	582	566	562
Bond	210	201	205
Professional liability	213	222	253
Total Commercial Lines	6,289	6,203	6,259
Personal Lines			
Automobile	2,613	2,522	2,526
Homeowners	1,193	1,138	1,110
Total Personal Lines [1]	3,806	3,660	3,636
Property & Casualty Other Operations	1	1	(2)
Group Benefits			
Group disability	1,450	1,452	1,735
Group life	1,478	1,717	1,881
Other	167	161	194
Total Group Benefits	3,095	3,330	3,810
Mutual Funds			
Mutual Fund	586	520	419
Talcott	137	148	207
Total Mutual Funds	723	668	626
Talcott Resolution	1,407	1,463	2,708
Corporate	11	11	167
Total earned premiums, fees, and other considerations	15,332	15,336	17,204
Net investment income:			
Securities available-for-sale and other	3,153	3,263	4,126
Equity securities, trading	1	1	1
Total net investment income	3,154	3,264	4,127
Net realized capital gains	16	1,798	497
Other revenues	112	275	258
Total revenues	**$ 18,614**	**$ 20,673**	**$ 22,086**

[1] For 2014, 2013 and 2012, AARP members accounted for earned premiums of $3.0 billion, $2.9 billion and $2.8 billion, respectively.

Net income (loss)	For the years ended December 31, 2014	2013	2012
Commercial Lines	$ 983	$ 870	$ 547
Personal Lines	207	229	166
Property & Casualty Other Operations	(108)	(2)	57
Group Benefits	191	192	129
Mutual Funds	87	76	71
Talcott Resolution	(187)	(634)	1
Corporate	(375)	(555)	(1,009)
Net income (loss)	**$ 798**	**$ 176**	**$ (38)**

4. Segment Information (continued)

	For the years ended December 31,		
Amortization of deferred policy acquisition costs and present value of future profits	**2014**	**2013**	**2012**
Commercial Lines	$ 919	$ 905	$ 927
Personal Lines	348	332	332
Group Benefits	32	33	33
Mutual Funds	28	39	35
Talcott Resolution	402	485	663
Total amortization of deferred policy acquisition costs and present value of future profits	**$ 1,729**	**$ 1,794**	**$ 1,990**

	For the years ended December 31,		
Income tax expense (benefit)	**2014**	**2013**	**2012**
Commercial Lines	$ 385	$ 320	$ 159
Personal Lines	92	100	65
Property & Casualty Other Operations	(51)	(20)	14
Group Benefits	63	63	31
Mutual Funds	49	42	38
Talcott Resolution	16	(7)	(99)
Corporate	(204)	(252)	(517)
Total income tax expense (benefit)	**$ 350**	**$ 246**	**$ (309)**

	As of December 31,	
Assets	**2014**	**2013**
Commercial Lines	$ 28,451	$ 27,119
Personal Lines	5,983	5,873
Property & Casualty Other Operations	4,328	4,331
Group Benefits	9,686	8,882
Mutual Funds	443	307
Talcott Resolution	191,801	222,269
Corporate [1]	4,321	9,103
Total assets	**$ 245,013**	**$ 277,884**

[1] In 2014, the Company prospectively changed its methodology for allocating assets and liabilities to align with the legal entity capital of Property and Casualty, Group Benefits, Mutual Funds and Talcott Resolution and, within Property and Casualty, align assets and liabilities following the Company's internal capital allocation models. This resulted in a reallocation of assets and liabilities from Corporate to the segments.

5. Fair Value Measurements

The following section applies the fair value hierarchy and disclosure requirements for the Company's financial instruments that are carried at fair value. The fair value hierarchy prioritizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2 or 3).

Level 1	Observable inputs that reflect quoted prices for identical assets or liabilities in active markets that the Company has the ability to access at the measurement date. Level 1 securities include highly liquid U.S. Treasuries, money market funds and exchange traded equity securities, open-ended mutual funds reported in separate account assets and exchange-traded derivative instruments.
Level 2	Observable inputs, other than quoted prices included in Level 1, for the asset or liability or prices for similar assets and liabilities. Most fixed maturities and preferred stocks, including those reported in separate account assets, are model priced by vendors using observable inputs and are classified within Level 2. Also included are hedge funds where investment company accounting guidance has been applied to a wholly-owned fund of funds measured at fair value where an investment can be redeemed, or substantially redeemed, at the NAV at the measurement date or in the near-term, not to exceed 90 days. Derivative instruments classified within Level 2 are priced using observable market inputs such as swap yield curves and credit default swap curves.
Level 3	Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Level 3 securities include less liquid securities, guaranteed product embedded and reinsurance derivatives and other complex derivative instruments, as well as hedge fund investments carried at fair value, consistent with investment company accounting guidance, that cannot be redeemed in the near-term at the NAV. Because Level 3 fair values, by their nature, contain one or more significant unobservable inputs, as there is little or no observable market for these assets and liabilities, considerable judgment is used to determine the Level 3 fair values. Level 3 fair values represent the Company's best estimate of an amount that could be realized in a current market exchange absent actual market exchanges.

In many situations, inputs used to measure the fair value of an asset or liability position may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value. Transfers of securities among the levels occur at the beginning of the reporting period. The amount of transfers from Level 1 to Level 2 was $2.5 billion, and $1.3 billion, for the years ended December 31, 2014 and 2013, respectively, which represented previously on-the-run U.S. Treasury securities that are now off-the-run. For the years ended December 31, 2014 and 2013, there were no transfers from Level 2 to Level 1. In most cases, both observable (e.g., changes in interest rates) and unobservable (e.g., changes in risk assumptions) inputs are used in the determination of fair values that the Company has classified within Level 3. Consequently, these values and the related gains and losses are based upon both observable and unobservable inputs. The Company's fixed maturities included in Level 3 are classified as such because these securities are primarily priced by independent brokers and/or are within illiquid markets.

5. Fair Value Measurements (continued)

The following tables present assets and (liabilities) carried at fair value by hierarchy level. These disclosures provide information as to the extent to which the Company uses fair value to measure financial instruments and information about the inputs used to value those financial instruments to allow users to assess the relative reliability of the measurements. The following table presents assets and (liabilities) carried at fair value by hierarchy level.

	December 31, 2014			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets accounted for at fair value on a recurring basis

5. Fair Value Measurements (continued)

[1] *Includes OTC and OTC-cleared derivative instruments in a net asset value position after consideration of the impact of collateral posting requirements which may be imposed by agreements, clearinghouse rules, and applicable law. As of December 31, 2014 and 2013, $413 and $128, respectively, of cash collateral liability was netted against the derivative asset value in the Consolidated Balance Sheets and is excluded from the table above. See footnote 4 below for derivative liabilities.*
[2] *Represents hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value.*
[3] *Approximately $2.5 billion and $2.4 billion of investment sales receivable, as of December 31, 2014 and 2013, respectively, are excluded from this disclosure requirement because they are trade receivables in the ordinary course of business where the carrying amount approximates fair value.*
[4] *Includes OTC and OTC-cleared derivative instruments in a net negative market value position (derivative liability) after consideration of the impact of collateral posting requirements which may be imposed by agreements, clearing house rules and applicable law. In the Level 3 roll-forward table included below in this Note 5, the derivative assets and liabilities are referred to as "freestanding derivatives" and are presented on a net basis.*
[5] *Represents embedded derivatives associated with non-funding agreement-backed consumer equity linked notes.*

Determination of Fair Values

The valuation methodologies used to determine the fair values of assets and liabilities under the "exit price" notion, reflect market participant objectives and are based on the application of the fair value hierarchy that prioritizes relevant observable market inputs over unobservable inputs. The Company determines the fair values of certain financial assets and liabilities based on quoted market prices where available, and where prices represent a reasonable estimate of fair value. The Company also determines fair value based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's default spreads, liquidity, and where appropriate, risk margins on unobservable parameters. The following is a discussion of the methodologies used to determine fair values for the financial instruments listed in the above tables.

The fair value process is monitored by the Valuation Committee, which is a cross-functional group of senior management within the Company that meets at least quarterly. The Valuation Committee is co-chaired by the Heads of Investment Operations and Accounting, and has representation from various investment sector professionals, accounting, operations, legal, compliance and risk management. The purpose of the committee is to oversee the pricing policy and procedures by ensuring objective and reliable valuation practices and pricing of financial instruments, as well as addressing valuation issues and approving changes to valuation methodologies and pricing sources. There are also two working groups under the Valuation Committee, a Securities Fair Value Working Group ("Securities Working Group") and a Derivatives Fair Value Working Group ("Derivatives Working Group"), which include various investment, operations, accounting and risk management professionals that meet monthly to review market data trends, pricing and trading statistics and results, and any proposed pricing methodology changes described in more detail in the following paragraphs.

The Company also has an enterprise-wide Operational Risk Management function, led by the Chief Operational Risk Officer, which is responsible for establishing, maintaining and communicating the framework, principles and guidelines of the Company's operational risk management program. This includes model risk management which provides an independent review of the suitability, characteristics and reliability of model inputs, as well as an analysis of significant changes to current models.

Fixed Maturities, AFS; Equity Securities, AFS; Equity Securities, FVO; Fixed Maturities, FVO, Equity Securities, Trading; and Short-term Investments

The fair value of AFS and FVO securities, equity securities, trading, and short-term investments in an active and orderly market (e.g. not distressed or forced liquidation) are determined by management after considering the following primary sources of information: quoted prices for identical assets or liabilities, third-party pricing services, independent broker quotations, or pricing matrices. Security pricing is applied using a "waterfall" approach whereby publicly available prices are first sought from third-party pricing services, and the remaining unpriced securities are submitted to independent brokers for prices, or priced using a pricing matrix. Typical inputs used by these pricing methods include, but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Based on the typical trading volumes and the lack of quoted market prices for fixed maturities, third-party pricing services will normally derive the security prices from recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information as outlined above. If there are no recently reported trades, the third-party pricing services and independent brokers may use matrix or model processes to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Included in the pricing of ABS and RMBS are estimates of the rate of future prepayments of principal over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral. Actual prepayment experience may vary from these estimates.

Prices from third-party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

5. Fair Value Measurements (continued)

A pricing matrix is used to price private placement securities for which the Company is unable to obtain a price from a third-party pricing service by discounting the expected future cash flows from the security by a developed market discount rate utilizing current credit spreads. Credit spreads are developed each month using market based data for public securities adjusted for credit spread differentials between public and private securities which are obtained from a survey of multiple private placement brokers. The appropriate credit spreads determined through this survey approach are based upon the issuer's financial strength and term to maturity, utilizing an independent public security index and trade information and adjusting for the non-public nature of the securities.

The Securities Working Group performs ongoing analysis of the prices and credit spreads received from third parties to ensure that the prices represent a reasonable estimate of the fair value. This process involves quantitative and qualitative analysis and is overseen by investment and accounting professionals. As a part of this analysis, the Company considers trading volume, new issuance activity and other factors to determine whether the market activity is significantly different than normal activity in an active market, and if so, whether transactions may not be orderly considering the weight of available evidence. If the available evidence indicates that pricing is based upon transactions that are stale or not orderly, the Company places little, if any, weight on the transaction price and will estimate fair value utilizing an internal pricing model. In addition, the Company ensures that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models developed based on spreads, and when available, market indices. As a result of this analysis, if the Company determines that there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly and approved by the Valuation Committee. The Company's internal pricing model utilizes the Company's best estimate of expected future cash flows discounted at a rate of return that a market participant would require. The significant inputs to the model include, but are not limited to, current market inputs, such as credit loss assumptions, estimated prepayment speeds and market risk premiums.

The Company conducts other specific monitoring controls around pricing. Daily analyses identify price changes over 3% for fixed maturities and 5% for equity securities and trade prices that differ over 3% to the current day's price. Weekly analyses identify prices that differ more than 5% from published bond prices of a corporate bond index. Monthly analyses identify price changes over 3%, prices that have not changed, and missing prices. Also on a monthly basis, a second source validation is performed on most sectors. Analyses are conducted by a dedicated pricing unit that follows up with trading and investment sector professionals and challenges prices with vendors when the estimated assumptions used differ from what the Company feels a market participant would use. Any changes from the identified pricing source are verified by further confirmation of assumptions used. Examples of other procedures performed include, but are not limited to, initial and on-going review of third-party pricing services' methodologies, review of pricing statistics and trends, and back testing recent trades.

The Company has analyzed the third-party pricing services' valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Most prices provided by third-party pricing services are classified into Level 2 because the inputs used in pricing the securities are market observable. Due to a general lack of transparency in the process that brokers use to develop prices, most valuations that are based on brokers' prices are classified as Level 3. Some valuations may be classified as Level 2 if the price can be corroborated with observable market data.

Derivative Instruments, including embedded derivatives within investments

Derivative instruments are fair valued using pricing valuation models for OTC derivatives that utilize independent market data inputs, quoted market prices for exchange-traded and OTC-cleared derivatives, or independent broker quotations. Excluding embedded and reinsurance related derivatives, as of December 31, 2014 and 2013, 96% and 97%, respectively, of derivatives, based upon notional values, were priced by valuation models or quoted market prices. The remaining derivatives were priced by broker quotations.

The Derivatives Working Group performs ongoing analysis of the valuations, assumptions and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. The Company performs various controls on derivative valuations which include both quantitative and qualitative analysis. Analyses are conducted by a dedicated derivative pricing team that works directly with investment sector professionals to analyze impacts of changes in the market environment and investigate variances. There is a monthly analysis to identify market value changes greater than pre-defined thresholds, stale prices, missing prices and zero prices. Also on a monthly basis, a second source validation, typically to broker quotations, is performed for certain of the more complex derivatives, as well as for any existing deals with a market value greater than $10 and all new deals during the month. In addition, on a daily basis, market valuations are compared to counterparty valuations for OTC derivatives. A model validation review is performed on any new models, which typically includes detailed documentation and validation to a second source. The model validation documentation and results of validation are presented to the Valuation Committee for approval. There is a monthly control to review changes in pricing sources to ensure that new models are not moved to production until formally approved.

5. Fair Value Measurements (continued)

The Company utilizes derivative instruments to manage the risk associated with certain assets and liabilities. However, the derivative instrument may not be classified with the same fair value hierarchy level as the associated assets and liabilities. Therefore the realized and unrealized gains and losses on derivatives reported in the Level 3 rollforward may not reflect the offsetting impact of the realized and unrealized gains and losses of the associated assets and liabilities.

Limited partnerships and other alternative investments

A portion of limited partnerships and other alternative investments include hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value. These funds are fair valued using the net asset value per share or equivalent ("NAV"), as a practical expedient, calculated on a monthly basis and is the amount at which a unit or shareholder may redeem their investment, if redemption is allowed. Certain impediments to redemption include, but are not limited to the following: 1) redemption notice periods vary and may be as long as 90 days, 2) redemption may be restricted (e.g. only be allowed on a quarter-end), 3) a holding period referred to as a lock-up may be imposed whereby an investor must hold their investment for a specified period of time before they can make a notice for redemption, 4) gating provisions may limit all redemptions in a given period to a percentage of the entities' equity interests, or may only allow an investor to redeem a portion of their investment at one time and 5) early redemption penalties may be imposed that are expressed as a percentage of the amount redeemed. The Company regularly assesses impediments to redemption and current market conditions that will restrict the redemption at the end of the notice period. Any funds that are subject to significant liquidity restrictions are reported in Level 3; all others have been classified as Level 2.

Valuation Techniques and Inputs for Investments

Generally, the Company determines the estimated fair value of its AFS and FVO securities, equity securities, trading, and short-term investments using the market approach. The income approach is used for securities priced using a pricing matrix, as well as for derivative instruments. Certain limited partnerships and other alternative investments are measured at fair value using a NAV as a practical expedient. For Level 1 investments, which are comprised of on-the-run U.S. Treasuries, exchange-traded equity securities, short-term investments, and exchange traded futures and option contracts, valuations are based on observable inputs that reflect quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

For most of the Company's debt securities, the following inputs are typically used in the Company's pricing methods: reported trades, benchmark yields, bids and/or estimated cash flows. For securities except U.S. Treasuries, inputs also include issuer spreads, which may consider credit default swaps. Derivative instruments are valued using mid-market inputs that are predominantly observable in the market.

5. Fair Value Measurements (continued)

A description of additional inputs used in the Company's Level 2 and Level 3 measurements is listed below:

Level 2 The fair values of most of the Company's Level 2 investments are determined by management after considering prices received from third party pricing services. These investments include most fixed maturities and preferred stocks, including those reported in separate account assets; as well as, hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value, and derivative instruments.

- *ABS, CDOs, CMBS and RMBS* — Primary inputs also include monthly payment information, collateral performance, which varies by vintage year and includes delinquency rates, collateral valuation loss severity rates, collateral refinancing assumptions, credit default swap indices and, for ABS and RMBS, estimated prepayment rates.
- *Corporates, including investment grade private placements* — Primary inputs also include observations of credit default swap curves related to the issuer.
- *Foreign government/government agencies* - Primary inputs also include observations of credit default swap curves related to the issuer and political events in emerging market economies.
- *Municipals* — Primary inputs also include Municipal Securities Rulemaking Board reported trades and material event notices, and issuer financial statements.
- *Short-term investments* — Primary inputs also include material event notices and new issue money market rates.
- *Equity securities, trading* — Consist of investments in mutual funds. Primary inputs include net asset values obtained from third party pricing services.
- *Credit derivatives* — Primary inputs include the swap yield curve and credit default swap curves.
- *Foreign exchange derivatives* — Primary inputs include the swap yield curve, currency spot and forward rates, and cross currency basis curves.
- *Interest rate derivatives* — Primary input is the swap yield curve.
- *Limited partnerships and other alternative investments* — Primary inputs include a NAV for investment companies with no redemption restrictions as reported on their U.S. GAAP financial statements, which are recorded on a one-month lag.

Level 3 Most of the Company's securities classified as Level 3 include less liquid securities such as lower quality ABS, CMBS, commercial real estate ("CRE") CDOs and RMBS primarily backed by sub-prime loans. Securities included in level 3 are primarily valued based on broker prices or broker spreads, without adjustments. Primary inputs for non-broker priced investments, including structured securities, are consistent with the typical inputs used in Level 2 measurements noted above, but are Level 3 due to their less liquid markets. Additionally, certain long-dated securities are priced based on third party pricing services, including municipal securities, foreign government/government agencies, bank loans and below investment grade private placement securities. Primary inputs for these long-dated securities are consistent with the typical inputs used in Level 1 and Level 2 measurements noted above, but include benchmark interest rate or credit spread assumptions that are not observable in the marketplace. Level 3 investments also include hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value where the Company does not have the ability to redeem the investment in the near-term at the NAV. Also included in Level 3 are certain derivative instruments that either have significant unobservable inputs or are valued based on broker quotations. Significant inputs for these derivative contracts primarily include the typical inputs used in the Level 1 and Level 2 measurements noted above, but also include equity and interest rate volatility and swap yield curves beyond observable limits.

5. Fair Value Measurements (continued)

Significant Unobservable Inputs for Level 3 Assets Measured at Fair Values

The following tables present information about significant unobservable inputs used in Level 3 assets measured at fair value. The tables exclude securities such as ABS and CRE CDOs for which fair values are predominately based on broker quotations.

As of December 31, 2014							
Securities			**Unobservable Inputs**				
Assets accounted for at fair value on a recurring basis	**Fair Value**	**Predominant Valuation Method**	**Significant Unobservable Input**	**Minimum**	**Maximum**	**Weighted Average [1]**	**Impact of Increase in Input on Fair Value [2]**
CMBS	$ 284	Discounted cash flows	Spread (encompasses prepayment, default risk and loss severity)	46 bps	2,475 bps	284 bps	Decrease
Corporate [3]	568	Discounted cash flows	Spread	123 bps	765 bps	279 bps	Decrease
Municipal [3]	32	Discounted cash flows	Spread	212 bps	212 bps	212 bps	Decrease
RMBS	1,281	Discounted cash flows	Spread	23 bps	1,904 bps	142 bps	Decrease
			Constant prepayment rate	—%	7.0%	2.0%	Decrease [4]
			Constant default rate	1.0%	14.0%	7.0%	Decrease
			Loss severity	—%	100.0%	78.0%	Decrease

As of December 31, 2013							
Securities			**Unobservable Inputs**				
Assets accounted for at fair value on a recurring basis	**Fair Value**	**Predominant Valuation Method**	**Significant Unobservable Input**	**Minimum**	**Maximum**	**Weighted Average [1]**	**Impact of Increase in Input on Fair Value [2]**
CMBS	$ 663	Discounted cash flows	Spread (encompasses prepayment, default risk and loss severity)	99 bps	3,000 bps	527 bps	Decrease
Corporate [3]	665	Discounted cash flows	Spread	119 bps	5,594 bps	344 bps	Decrease
Municipal [3]	29	Discounted cash flows	Spread	184 bps	184 bps	184 bps	Decrease
RMBS	1,272	Discounted cash flows	Spread	62 bps	1,748 bps	232 bps	Decrease
			Constant prepayment rate	—%	10.0%	3.0%	Decrease [4]
			Constant default rate	1.0%	22.0%	8.0%	Decrease
			Loss severity	—%	100.0%	80.0%	Decrease

[1] The weighted average is determined based on the fair value of the securities.
[2] Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in the table above.
[3] Level 3 corporate and municipal securities excludes those for which the Company bases fair value on broker quotations as discussed below.
[4] Decrease for above market rate coupons and increase for below market rate coupons.

5. Fair Value Measurements (continued)

As of December 31, 2014						
Freestanding Derivatives			**Unobservable Inputs**			
	Fair Value	**Predominant Valuation Method**	**Significant Unobservable Input**	**Minimum**	**Maximum**	**Impact of Increase in Input on Fair Value [1]**
Interest rate derivative						
Interest rate swaps	(29)	Discounted cash flows	Swap curve beyond 30 years	3%	3%	Decrease
Interest rate swaptions	22	Option model	Interest rate volatility	1%	1%	Increase
GMWB hedging instruments						
Equity options	46	Option model	Equity volatility	22%	34%	Increase
Customized swaps	124	Discounted cash flows	Equity volatility	10%	40%	Increase
Macro hedge program						
Equity options	141	Option model	Equity volatility	27%	28%	Increase

As of December 31, 2013						
Freestanding Derivatives			**Unobservable Inputs**			
	Fair Value	**Predominant Valuation Method**	**Significant Unobservable Input**	**Minimum**	**Maximum**	**Impact of Increase in Input on Fair Value [1]**
Interest rate derivative						
Interest rate swaps	(24)	Discounted cash flows	Swap curve beyond 30 years	4%	4%	Increase
Long interest rate swaptions	42	Option model	Interest rate volatility	1%	1%	Increase
GMWB hedging instruments						
Equity options	72	Option model	Equity volatility	21%	29%	Increase
Customized swaps	74	Discounted cash flows	Equity volatility	10%	50%	Increase
Macro hedge program						
Equity options	139	Option model	Equity volatility	24%	31%	Increase
International program hedging [2]						
Equity options	(35)	Option model	Equity volatility	24%	37%	Increase
Short interest rate swaptions	(13)	Option model	Interest rate volatility	—%	1%	Decrease
Long interest rate swaptions	50	Option model	Interest rate volatility	1%	1%	Increase

[1] Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in the table. Changes are based on long positions, unless otherwise noted. Changes in fair value will be inversely impacted for short positions.

[2] Excludes derivatives for which the Company based fair value on broker quotations.

Securities and derivatives for which the Company bases fair value on broker quotations predominately include ABS, CDOs, corporate, fixed maturities, FVO and certain credit derivatives. Due to the lack of transparency in the process brokers use to develop prices for these investments, the Company does not have access to the significant unobservable inputs brokers use to price these securities and derivatives. The Company believes however, the types of inputs brokers may use would likely be similar to those used to price securities and derivatives for which inputs are available to the Company, and therefore may include, but not be limited to, loss severity rates, constant prepayment rates, constant default rates and credit spreads. Therefore, similar to non broker priced securities and derivatives, generally, increases in these inputs would cause fair values to decrease. For the year ended December 31, 2014, no significant adjustments were made by the Company to broker prices received.

As of December 31, 2014 and 2013, excluded from the tables above are hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value which total $189 and $108, respectively, of Level 3 assets. The predominant valuation method uses a NAV calculated on a monthly basis and represents funds where the Company does not have the ability to redeem the investment in the near-term at that NAV, including an assessment of the investee's liquidity.

5. Fair Value Measurements (continued)

Product Derivatives

The Company formerly offered certain variable annuity products with GMWB riders. The GMWB provides the policyholder with a GRB which is generally equal to premiums less withdrawals. If the policyholder's account value is reduced to the specified level through a combination of market declines and withdrawals but the GRB still has value, the Company is obligated to continue to make annuity payments to the policyholder until the GRB is exhausted. Certain contract provisions can increase the GRB at contractholder election or after the passage of time. The GMWB represents an embedded derivative in the variable annuity contract. When it is determined that (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host for measurement purposes. The embedded derivative is carried at fair value, with changes in fair value reported in net realized capital gains and losses. The Company's GMWB liability is reported in other policyholder funds and benefits payable in the Consolidated Balance Sheets. The notional value of the embedded derivative is the GRB.

In valuing the embedded derivative, the Company attributes to the derivative a portion of the expected fees to be collected over the expected life of the contract from the contract holder equal to the present value of future GMWB claims. The excess of fees collected from the contract holder in the current period over the current period's attributed fees are associated with the host variable annuity contract and reported in fee income.

GMWB Reinsurance Derivative

The Company has reinsurance arrangements in place to transfer a portion of its risk of loss due to GMWB. These arrangements are recognized as derivatives and carried at fair value in reinsurance recoverables. Changes in the fair value of the reinsurance agreements are reported in net realized capital gains and losses.

The fair value of the GMWB reinsurance derivative is calculated as an aggregation of the components described in the Living Benefits Required to be Fair Valued discussion below and is modeled using significant unobservable policyholder behavior inputs, identical to those used in calculating the underlying liability, such as lapses, fund selection, resets and withdrawal utilization and risk margins.

Living Benefits Required to be Fair Valued (in Other Policyholder Funds and Benefits Payable)

Fair values for GMWBs classified as embedded derivatives are calculated using the income approach based upon internally developed models because active, observable markets do not exist for those items. The fair value of these GMWBs and the related reinsurance and customized freestanding derivatives are calculated as an aggregation of the following components: Best Estimate Claim Payments; Credit Standing Adjustment; and Margins. The resulting aggregation is reconciled or calibrated, if necessary, to market information that is, or may be, available to the Company, but may not be observable by other market participants, including reinsurance discussions and transactions. The Company believes the aggregation of these components, as necessary and as reconciled or calibrated to the market information available to the Company, results in an amount that the Company would be required to transfer or receive, for an asset, to or from market participants in an active liquid market, if one existed, for those market participants to assume the risks associated with the guaranteed minimum benefits and the related reinsurance and customized derivatives. The fair value is likely to materially diverge from the ultimate settlement of the liability as the Company believes settlement will be based on our best estimate assumptions rather than those best estimate assumptions plus risk margins. In the absence of any transfer of the guaranteed benefit liability to a third party, the release of risk margins is likely to be reflected as realized gains in future periods' net income. Each component described below is unobservable in the marketplace and require subjectivity by the Company in determining their value. Oversight of the Company's valuation policies and processes for product and GMWB reinsurance derivatives is performed by a multidisciplinary group comprised of finance, actuarial and risk management professionals. This multidisciplinary group reviews and approves changes and enhancements to the Company's valuation model as well as associated controls.

Best Estimate

Claim Payments

The Best Estimate Claim Payments is calculated based on actuarial and capital market assumptions related to projected cash flows, including the present value of benefits and related contract charges, over the lives of the contracts, incorporating expectations concerning policyholder behavior such as lapses, fund selection, resets and withdrawal utilization. For the customized derivatives, policyholder behavior is prescribed in the derivative contract. Because of the dynamic and complex nature of these cash flows, best estimate assumptions and a Monte Carlo stochastic process is used in valuation. The Monte Carlo stochastic process involves the generation of thousands of scenarios that assume risk neutral returns consistent with swap rates and a blend of observable implied index volatility levels. Estimating these cash flows involves numerous estimates and subjective judgments regarding a number of variables. These variables include expected market rates of return, market volatility, correlations of market index returns to funds, fund performance, discount rates, and assumptions about policyholder behavior which emerge over time.

5. Fair Value Measurements (continued)

At each valuation date, the Company assumes expected returns based on:

- risk-free rates as represented by the Eurodollar futures, LIBOR deposits and swap rates to derive forward curve rates;
- market implied volatility assumptions for each underlying index based primarily on a blend of observed market "implied volatility" data;
- correlations of historical returns across underlying well known market indices based on actual observed returns over the ten years preceding the valuation date; and
- three years of history for fund indexes compared to separate account fund regression.

On a daily basis, the Company updates capital market assumptions used in the GMWB liability model such as interest rates, equity indices and the blend of implied equity index volatilities. The Company monitors various aspects of policyholder behavior and may modify certain of its assumptions, including living benefit lapses and withdrawal rates, if credible emerging data indicates that changes are warranted. In addition, the Company will continue to evaluate policyholder behavior assumptions as we begin to implement initiatives to reduce the size of the variable annuity business. At a minimum, all policyholder behavior assumptions are reviewed and updated, as appropriate, in conjunction with the completion of the Company's comprehensive study to refine its estimate of future gross profits during the third quarter of each year.

Credit Standing Adjustment

This assumption makes an adjustment that market participants would make, in determining fair value, to reflect the risk that guaranteed benefit obligations, or the GMWB reinsurance recoverables will not be fulfilled. The Company incorporates a blend of observable Company and reinsurer credit default spreads from capital markets, adjusted for market recoverability. The credit standing adjustment assumption, net of reinsurance, resulted in pre-tax realized gains (losses) of $3, $(13) and $(69), for the years ended December 31, 2014, 2013 and 2012, respectively. As of December 31, 2014 and 2013, the credit standing adjustment was $1 and $(1), respectively.

Margins

The behavior risk margin adds a margin that market participants would require, in determining fair value, for the risk that the Company's assumptions about policyholder behavior could differ from actual experience. The behavior risk margin is calculated by taking the difference between adverse policyholder behavior assumptions and best estimate assumptions.

Assumption updates, including policyholder behavior assumptions, affected best estimates and margins for total pre-tax realized gains of $31, $75 and $274 for the years ended December 31, 2014, 2013 and 2012, respectively. As of December 31, 2014 and 2013, the behavior risk margin was $74 and $108, respectively.

In addition to the non-market-based updates described above, the Company recognized non-market-based updates driven by the relative outperformance (underperformance) of the underlying actively managed funds as compared to their respective indices resulting in pre-tax realized gains (losses) of approximately $5, $33 and $106 for the years ended December 31, 2014, 2013 and 2012, respectively.

Significant unobservable inputs used in the fair value measurement of the GMWB embedded derivative and the GMWB reinsurance derivative are withdrawal utilization and withdrawal rates, lapse rates, reset elections and equity volatility. The following table provides quantitative information about the significant unobservable inputs and is applicable to all of the GMWB embedded derivative and the GMWB reinsurance derivative. Significant increases in any of the significant unobservable inputs, in isolation, will generally have an increase or decrease correlation with the fair value measurement, as shown in the table.

Significant Unobservable Input	Unobservable Inputs (Minimum)	Unobservable Inputs (Maximum)	Impact of Increase in Input on Fair Value Measurement [1]
Withdrawal Utilization [2]	20%	100%	Increase
Withdrawal Rates [3]	—%	8%	Increase
Lapse Rates [4]	—%	75%	Decrease
Reset Elections [5]	20%	75%	Increase
Equity Volatility [6]	10%	40%	Increase

[1] Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in the table.
[2] Range represents assumed cumulative percentages of policyholders taking withdrawals.
[3] Range represents assumed cumulative annual amount withdrawn by policyholders.
[4] Range represents assumed annual percentages of full surrender of the underlying variable annuity contracts across all policy durations for in force business.
[5] Range represents assumed cumulative percentages of policyholders that would elect to reset their guaranteed benefit base.
[6] Range represents implied market volatilities for equity indices based on multiple pricing sources.

5. Fair Value Measurements (continued)

Generally a change in withdrawal utilization assumptions would be accompanied by a directionally opposite change in lapse rate assumptions, as the behavior of policyholders that utilize GMWB riders is typically different from policyholders that do not utilize these riders.

Separate Account Assets

Separate account assets are primarily invested in mutual funds. Other separate account assets include fixed maturities, limited partnerships, equity securities, short-term investments and derivatives that are valued in the same manner, and using the same pricing sources and inputs, as those investments held by the Company. Separate account assets classified as Level 3 primarily include limited partnerships in which fair value represents the separate account's share of the fair value of the equity in the investment ("net asset value") and are classified in Level 3, based on the Company's ability to redeem its investments.

Assets and Liabilities Measured at Fair Value on a Recurring Basis Using Significant Unobservable Inputs (Level 3)

The tables below provide fair value roll-forwards for the years ended December 31, 2014 and 2013, for the financial instruments classified as Level 3.

For the year ended December 31, 2014

	Fixed Maturities, AFS								
Assets	**ABS**	**CDOs**	**CMBS**	**Corporate**	**Foreign govt./govt. agencies**	**Municipal**	**RMBS**	**Total Fixed Maturities, AFS**	**Fixed Maturities, FVO**

	Other Policyholder Funds and Benefits Payable					
Liabilities	**Guaranteed Withdrawal Benefits**	**International Guaranteed Living Benefits**	**International Other Living Benefits**	**Equity Linked Notes**	**Total Other Policyholder Funds and Benefits Payable**	**Consumer Notes**
Fair value as of January 1, 2013	$ (1,249)	$ (50)	$ 2	$ (7)	$ (1,304)	$ (2)
Total realized/unrealized gains (losses)						
Included in net income [1] [2] [6]	1,306	13	3	(10)	1,312	—
Settlements	(93)	40	(2)	(1)	(56)	—
Fair value as of December 31, 2013	**$ (36)**	**$ 3**	**$ 3**	**$ (18)**	**$ (48)**	**$ (2)**
Changes in unrealized gains (losses) included in net income related to financial instruments still held at December 31, 2013 [2] [7]	$ 1,306	$ 13	$ 3	$ (10)	$ 1,312	$ —

[1] The Company classifies gains and losses on GMWB reinsurance derivatives and GMWB embedded derivatives as unrealized gains (losses) for purposes of disclosure in this table because it is impracticable to track on a contract-by-contract basis the realized gains (losses) for these derivatives and embedded derivatives.

[2] All amounts in these rows are reported in net realized capital gains/losses. The realized/unrealized gains (losses) included in net income for separate account assets are offset by an equal amount for separate account liabilities, which results in a net zero impact on net income for the Company. All amounts are before income taxes and amortization DAC.

[3] All amounts are before income taxes and amortization of DAC.

[4] Transfers in and/or (out) of Level 3 are primarily attributable to the availability of market observable information and the re-evaluation of the observability of pricing inputs.

[5] Derivative instruments are reported in this table on a net basis for asset/(liability) positions and reported in the Consolidated Balance Sheets in other investments and other liabilities.

[6] Includes both market and non-market impacts in deriving realized and unrealized gains (losses).

[7] Amounts presented are for Level 3 only and therefore may not agree to other disclosures included herein.

Fair Value Option

The Company classifies the underlying fixed maturities held in certain consolidated investment funds within the Fixed Maturities, FVO line on the Consolidated Balance Sheets. The Company reports consolidated investment companies at fair value with changes in the fair value of these securities recognized in net realized capital gains and losses, which is consistent with accounting requirements for investment companies. The investment funds hold fixed income securities in multiple sectors and the Company has management and control of the funds as well as a significant ownership interest.

FVO investments also include certain securities that contain embedded credit derivatives with underlying credit risk primarily related to residential and commercial real estate.

The Company also elected the fair value option for certain equity securities in order to align the accounting with total return swap contracts that hedge the risk associated with the investments. The swaps do not qualify for hedge accounting and the change in value of both the equity securities and the total return swap are recorded in net realized capital gains and losses. These equity securities are classified within equity securities, AFS on the Consolidated Balance Sheets. Income earned from FVO securities is recorded in net investment income and changes in fair value are recorded in net realized capital gains and losses.

The Company previously held fair value option investments in foreign government securities that aligned with the accounting for yen-based fixed annuity liabilities, which are adjusted for changes in foreign-exchange spot rates. These investments were previously held in a U.S. subsidiary and were disposed of as a consequence of the recapture of certain risks by HLIKK. For further discussion on the sale, see the Sale of Hartford Life Insurance KK section in Note 2 - Business Dispositions of Notes to Consolidated Financial Statements. The change in fair value on these investments was previously recorded as a component of net realized capital gains and losses, but has been reclassified to discontinued operations.

5. Fair Value Measurements (continued)

The following table presents the changes in fair value of those assets and liabilities accounted for using the fair value option reported in net realized capital gains and losses in the Company's Consolidated Statements of Operations.

	For the years ended December 31,	
	2014	2013
Assets		
Fixed maturities, FVO		
Corporate	$ (3)	$ (13)
CRE CDOs	18	11
Foreign government	—	(4)
RMBS	(1)	—
Total fixed maturities, FVO	**$ 14**	**$ (6)**
Equity, FVO	(3)	—
Total realized capital gains (losses)	**$ 11**	**$ (6)**

The following table presents the fair value of assets and liabilities accounted for using the fair value option included in the Company's Consolidated Balance Sheets.

	As of December 31,	
	2014	2013
Assets		
Fixed maturities, FVO		
ABS	$ 15	$ 3

Municipals	2	1
RMBS	215	15
Total fixed maturities, FVO	**$ 488**	**$ 844**
Equity, FVO [1]	**$ 348**	**$ —**

[1] Included in equity securities, AFS on the Consolidated Balance Sheets.

5. Fair Value Measurements (continued)

Financial Instruments Not Carried at Fair Value

The following table presents carrying amounts and fair values of The Hartford's financial instruments not carried at fair value and not included in the above fair value discussion as of December 31, 2014 and 2013.

	Fair Value Hierarchy Level	December 31, 2014		December 31, 2013	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets					
Policy loans	Level 3	$ 1,431	$ 1,431	$ 1,420	$ 1,480
Mortgage loans	Level 3	5,556	5,840	5,598	5,641
Liabilities					
Other policyholder funds and benefits payable [1]	Level 3	$ 7,304	$ 7,522	$ 9,152	$ 9,352
Senior notes [2]	Level 2	5,009	5,837	5,206	5,845
Junior subordinated debentures [2]	Level 2	1,100	1,291	1,100	1,271
Revolving credit facility	Level 2	—	—	238	238
Consumer notes [3] [4]	Level 3	68	68	82	82
Assumed investment contracts [4]	Level 3	763	851	—	—

[1] Excludes guarantees on variable annuities, group accident and health and universal life insurance contracts, including corporate owned life insurance.
[2] Included in long-term debt in the Consolidated Balance Sheets, except for current maturities, which are included in short-term debt.
[3] Excludes amounts carried at fair value and included in preceding disclosures.
[4] Included in other liabilities in the Consolidated Balance Sheets.

Fair values for policy loans were determined using current loan coupon rates, which reflect the current rates available under the contracts. As a result, the carrying value approximates the fair value of the policy loans. During the second quarter of 2014, the Company changed the valuation technique used to estimate the fair value of policy loans, which previously was estimated by utilizing discounted cash flow calculations, using U.S. Treasury interest rates, based on the loan durations.

Fair values for mortgage loans were estimated using discounted cash flow calculations based on current lending rates for similar type loans. Current lending rates reflect changes in credit spreads and the remaining terms of the loans.

Fair values for other policyholder funds and benefits payable, and assumed investment contracts, not carried at fair value, are estimated based on the cash surrender values of the underlying policies or by estimating future cash flows discounted at current interest rates adjusted for credit risk.

Fair values for senior notes and junior subordinated debentures are determined using the market approach based on reported trades, benchmark interest rates and issuer spread for the Company which may consider credit default swaps.

Fair values for consumer notes were estimated using discounted cash flow calculations using current interest rates adjusted for estimated loan durations.

6. Investments and Derivative Instruments

Net Investment Income (Loss)

	For the years ended December 31,		
(Before-tax)	2014	2013	2012
Fixed maturities [1]	$ 2,420	$ 2,552	$ 3,299
Equity securities, AFS	38	30	36
Mortgage loans	265	260	334
Policy loans	80	83	119
Limited partnerships and other alternative investments	294	287	196
Other investments [2]	179	167	248
Investment expenses	(122)	(115)	(105)
Total net investment income	**$ 3,154**	**$ 3,264**	**$ 4,127**

[1] Includes net investment income on short-term investments.
[2] Includes income from derivatives that hedge fixed maturities and qualify for hedge accounting.

Net Realized Capital Gains (Losses)

	For the years ended December 31,		
(Before-tax)	2014	2013	2012
Gross gains on sales [1]	$ 527	$ 2,313	$ 801
Gross losses on sales	(250)	(659)	(420)
Net OTTI losses recognized in earnings [2]	(59)	(73)	(349)
Valuation allowances on mortgage loans	(4)	(1)	14
Periodic net coupon settlements on credit derivatives	1	(8)	(18)
Results of variable annuity hedge program			
GMWB derivatives, net	5	262	519
Macro hedge program	(11)	(234)	(340)
Total results of variable annuity hedge program	(6)	28	179
Other, net [3]	(193)	198	290
Net realized capital gains	**$ 16**	**$ 1,798**	**$ 497**

[1] Includes $1.5 billion of gains relating to the sales of the Retirement Plans and Individual Life businesses in the year ended December 31, 2013.
[2] Includes $177 of intent-to-sell impairments relating to the Retirement Plans and Individual Life businesses sold for the year ended December 31, 2012.
[3] Primarily consists of changes in the value of non-qualifying derivatives, including interest rate derivatives used to manage the risk of a rise in interest rates and manage duration, transactional foreign currency revaluation gains (losses) on the Japan fixed payout annuity liabilities assumed from HLIKK and gains (losses) on non-qualifying derivatives used to hedge the foreign currency exposure of the liabilities. For the years ended December 31, 2014, 2013, and 2012, gains (losses) from transactional foreign currency revaluation of the Japan fixed payout annuity liabilities were $116, $250, and $189, respectively. For the years ended December 31, 2014, 2013, and 2012, gains (losses) on instruments used to hedge the foreign currency exposure on the fixed payout annuities were $(148), $(268), and $(300), respectively. Also includes $71 and $110 of gains relating to the sales of the Retirement Plans and Individual Life businesses for the years ended December 31, 2013 and 2012, respectively.

Net realized capital gains and losses from investment sales are reported as a component of revenues and are determined on a specific identification basis. Before tax, net gains and losses on sales and impairments previously reported as unrealized gains in AOCI were $217, $1.5 billion, and $32 for the years ended December 31, 2014, 2013, and 2012, respectively.

6. Investments and Derivative Instruments (continued)

Sales of Available-for-Sale Securities

	For the years ended December 31,		
	2014	**2013**	**2012**
Fixed maturities, AFS			
Sale proceeds	$ 22,923	$ 39,225	$ 41,442
Gross gains [1]	456	2,143	825
Gross losses	(182)	(645)	(399)
Equity securities, AFS			
Sale proceeds	$ 354	$ 274	$ 295
Gross gains	22	96	34
Gross losses	(20)	(6)	(20)

[1] Includes $1.5 billion of gross gains related to the sale of the Individual Life and Retirement Plans businesses for the year ended December 31, 2013.

Sales of AFS securities in 2014 were primarily a result of duration and liquidity management, as well as tactical changes to the portfolio as a result of changing market conditions.

Other-Than-Temporary Impairment Losses

The following table presents a roll-forward of the Company's cumulative credit impairments on debt securities held as of December 31, 2014, 2013 and 2012.

	For the years ended December 31,		
(Before-tax)	**2014**	**2013**	**2012**
Balance as of beginning of period	$ (552)	$ (1,013)	$ (1,676)

Equity securities, AFS [3]	676	50	(27)	699	—	850	67	(49)	868	—
Total AFS securities	**$ 56,038**	**$ 4,427**	**$ (385)**	**$ 60,083**	**$ (11)**	**$ 61,491**	**$ 2,813**	**$ (1,077)**	**$ 63,225**	**$ (19)**

[1] Represents the amount of cumulative non-credit OTTI losses recognized in OCI on securities that also had credit impairments. These losses are included in gross unrealized losses as of December 31, 2014 and 2013.

[2] Gross unrealized gains (losses) exclude the fair value of bifurcated embedded derivative features of certain securities. Subsequent changes in value will be recorded in net realized capital gains (losses).

[3] As of December 31, 2014, excludes equity securities, FVO, with a cost of $351 and fair value of $348, which are included in equity securities, AFS on the Consolidated Balance Sheets.

The following table presents the Company's fixed maturities, AFS, by contractual maturity year.

	December 31, 2014		December 31, 2013	
Contractual Maturity	Amortized Cost	Fair Value	Amortized Cost	Fair Value
One year or less	$ 2,141	$ 2,168	$ 2,195	$ 2,228
Over one year through five years	11,264	11,827	11,930	12,470
Over five years through ten years	8,802	9,226	10,814	11,183
Over ten years	19,859	22,517	22,031	22,631
Subtotal	42,066	45,738	46,970	48,512
Mortgage-backed and asset-backed securities	13,296	13,646	13,671	13,845
Total fixed maturities, AFS	**$ 55,362**	**$ 59,384**	**$ 60,641**	**$ 62,357**

Estimated maturities may differ from contractual maturities due to security call or prepayment provisions. Due to the potential for variability in payment spreads (i.e. prepayments or extensions), mortgage-backed and asset-backed securities are not categorized by contractual maturity.

Concentration of Credit Risk

The Company aims to maintain a diversified investment portfolio including issuer, sector and geographic stratification, where applicable, and has established certain exposure limits, diversification standards and review procedures to mitigate credit risk.

6. Investments and Derivative Instruments (continued)

The Company did not have exposure to any credit concentration risk of a single issuer greater than 10% of the Company's stockholders' equity, other than the U.S. government and certain U.S. government securities as of December 31, 2014. As of December 31, 2013, the Company's only exposure to any credit concentration risk of a single issuer greater than 10% of the Company's stockholders' equity, other than the U.S. government and certain U.S. government securities, was the Government of Japan, which represents $2.6 billion, or 14% of stockholders' equity, and 3% of total invested assets. As of December 31, 2014, other than U.S. government and certain U.S. government agencies, the Company's three largest exposures by issuer were the State of Illinois, JP Morgan Chase &Co., and Goldman Sachs Group Inc. which each comprised less than 1% of total invested assets. As of December 31, 2013, other than U.S. government and certain U.S. government agencies, the Company's three largest exposures by issuer were the Government of Japan, Goldman Sachs Group Inc., and State of Illinois which each comprised less than 4% of total invested assets. The Company's three largest exposures by sector as of December 31, 2014 were municipal securities, financial services, and utilities which comprised approximately 17%, 7% and 6%, respectively, of total invested assets. The Company's three largest exposures by sector as of December 31, 2013 were municipal investments, utilities, and financial services which comprised approximately 15%, 8% and 7%, respectively, of total invested assets.

Security Unrealized Loss Aging

The following tables present the Company's unrealized loss aging for AFS securities by type and length of time the security was in a continuous unrealized loss position.

	December 31, 2014								
	Less Than 12 Months			12 Months or More			Total

[1] Unrealized losses exclude the change in fair value of bifurcated embedded derivative features of certain securities. Subsequent changes in fair value are recorded in net realized capital gains (losses).

[2] As of December 31, 2014, excludes equity securities, FVO which are included in equity securities, AFS on the Consolidated Balance Sheets.

6. Investments and Derivative Instruments (continued)

As of December 31, 2014, AFS securities in an unrealized loss position, consisted of 3,065 securities, primarily in the corporate sector, which are depressed primarily due to an increase in interest rates and/or wider credit spreads since the securities were purchased. As of December 31, 2014, 92% of these securities were depressed less than 20% of cost or amortized cost. The decrease in unrealized losses during 2014 was primarily attributable to a decrease in interest rates.

Most of the securities depressed for twelve months or more relate to certain floating rate corporate securities with greater than 10 years to maturity concentrated in the financial services sector and structured securities with exposure to commercial and residential real estate. Corporate securities are primarily depressed because the securities have floating-rate coupons and have long-dated maturities or are perpetual and current credit spreads are wider than when these securities were purchased. For certain commercial and residential real estate securities, current market spreads continue to be wider than spreads at the securities' respective purchase dates, even though credit spreads have continued to tighten over the past five years. The Company neither has an intention to sell nor does it expect to be required to sell the securities outlined above.

Mortgage Loans

	December 31, 2014			December 31, 2013		
	Amortized Cost [1]	Valuation Allowance	Carrying Value	Amortized Cost [1]	Valuation Allowance	Carrying Value
Total commercial mortgage loans	**$ 5,574**	**$ (18)**	**$ 5,556**	**$ 5,665**	**$ (67)**	**$ 5,598**

[1] Amortized cost represents carrying value prior to valuation allowances, if any.

As of December 31, 2014 and 2013, the carrying value of mortgage loans associated with the valuation allowance was $140 and $191, respectively. Included in the table above are mortgage loans held-for-sale with a carrying value and valuation allowance of $61 and $3, respectively, as of December 31, 2013. The carrying value of these loans is included in mortgage loans in the Company's Consolidated Balance Sheets. There were no mortgage loans held-for-sale as of December 31, 2014. As of December 31, 2014, loans within the Company's mortgage loan portfolio that have had extensions or restructurings other than what is allowable under the original terms of the contract are immaterial.

The following table presents the activity within the Company's valuation allowance for mortgage loans. These loans have been evaluated both individually and collectively for impairment. Loans evaluated collectively for impairment are immaterial.

	For the years ended December 31,		
	2014	2013	2012
Balance as of January 1	**$ (67)**	**$ (68)**	**$ (102)**
(Additions)/Reversals	(4)	(2)	14
Deductions	53	3	20
Balance as of December 31	**$ (18)**	**$ (67)**	**$ (68)**

The decline in the valuation allowance as compared to December 31, 2013 resulted from the sale of the underlying collateral supporting one commercial mortgage loan. The loan was fully reserved for and the Company did not recover any proceeds as a result of the sale.

The weighted-average LTV ratio of the Company's commercial mortgage loan portfolio was 57% as of December 31, 2014, while the weighted-average LTV ratio at origination of these loans was 62%. LTV ratios compare the loan amount to the value of the underlying property collateralizing the loan. The loan values are updated no less than annually through property level reviews of the portfolio. Factors considered in the property valuation include, but are not limited to, actual and expected property cash flows, geographic market data and capitalization rates. DSCRs compare a property's net operating income to the borrower's principal and interest payments. The weighted average DSCR of the Company's commercial mortgage loan portfolio was 2.51x as of December 31, 2014. As of December 31, 2014, the Company held only one delinquent commercial mortgage loan past due by 90 days or more. The carrying value and valuation allowance of this loan totaled $7 and $0, respectively, and was not accruing income. As of December 31, 2013, the Company held one delinquent commercial mortgage loan past due by 90 days or more. This loan had a total carrying value and valuation allowance totaled $0 and $50, respectively, and was not accruing income.

6. Investments and Derivative Instruments (continued)

The following table presents the carrying value of the Company's commercial mortgage loans by LTV and DSCR.

Commercial Mortgage Loans Credit Quality

	December 31, 2014		December 31, 2013	
Loan-to-value	Carrying Value	Avg. Debt-Service Coverage Ratio	Carrying Value	Avg. Debt-Service Coverage Ratio
Greater than 80%	$ 53	1.07x	$ 101	0.99x
65% - 80%	789	1.75x	1,195	1.82x
Less than 65%	4,714	2.66x	4,302	2.53x
Total commercial mortgage loans	**$ 5,556**	**2.51x**	**$ 5,598**	**2.34x**

The following tables present the carrying value of the Company's mortgage loans by region and property type.

Mortgage Loans by Region

	December 31, 2014		December 31, 2013	
	Carrying Value	Percent of Total	Carrying Value	Percent of Total

Variable Interest Entities

The Company is involved with various special purpose entities and other entities that are deemed to be VIEs primarily as a collateral or investment manager and as an investor through normal investment activities, as well as a means of accessing capital through a contingent capital facility. For further information on the facility, see Note 12 - Debt of Notes to Consolidated Financial Statements.

A VIE is an entity that either has investors that lack certain essential characteristics of a controlling financial interest or lacks sufficient funds to finance its own activities without financial support provided by other entities.

6. Investments and Derivative Instruments (continued)

The Company performs ongoing qualitative assessments of its VIEs to determine whether the Company has a controlling financial interest in the VIE and therefore is the primary beneficiary. The Company is deemed to have a controlling financial interest when it has both the ability to direct the activities that most significantly impact the economic performance of the VIE and the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE. Based on the Company's assessment, if it determines it is the primary beneficiary, the Company consolidates the VIE in the Company's Consolidated Financial Statements.

Consolidated VIEs

The following table presents the carrying value of assets and liabilities, and the maximum exposure to loss relating to the VIEs for which the Company is the primary beneficiary. Creditors have no recourse against the Company in the event of default by these VIEs nor does the Company have any implied or unfunded commitments to these VIEs. The Company's financial or other support provided to these VIEs is limited to its collateral or investment management services and original investment.

	December 31, 2014			December 31, 2013		
	Total Assets	**Total Liabilities [1]**	**Maximum Exposure to Loss [2]**	**Total Assets**	**Total Liabilities [1]**	**Maximum Exposure to Loss [2]**
CDOs [3]	$ 5	$ 5	$ —	$ 31	$ 33	$ —
Investment funds [4]	238	—	243	164	—	173
Limited partnerships and other alternative investments	3	1	2	4	—	4
Total	**$ 246**	**$ 6**	**$ 245**	**$ 199**	**$ 33**	**$ 177**

[1] Included in other liabilities in the Company's Consolidated Balance Sheets.
[2] The maximum exposure to loss represents the maximum loss amount that the Company could recognize as a reduction in net investment income or as a realized capital loss and is the cost basis of the Company's investment.
[3] Total assets included in fixed maturities, AFS and short-term investments, or cash in the Company's Consolidated Balance Sheets.
[4] Total assets included in fixed maturities, FVO, short-term investments, and equity, AFS in the Company's Consolidated Balance Sheets.

CDOs represent structured investment vehicles for which the Company has a controlling financial interest as it provides collateral management services, earns a fee for those services and also holds investments in the securities issued by these vehicles. Investment funds represent wholly-owned fixed income funds for which the Company has management and control of the investments which is the activity that most significantly impacts its economic performance. Limited partnerships represent one hedge fund for which the Company holds a majority interest in the fund as an investment.

Non-Consolidated VIEs

The Company holds a significant variable interest for one VIE for which it is not the primary beneficiary and, therefore, was not consolidated on the Company's Consolidated Balance Sheets. This VIE represents a contingent capital facility ("facility") that has been held by the Company since February 2007 for which the Company has no implied or unfunded commitments. Assets and liabilities recorded for the facility were $12 and $14 as of December 31, 2014, respectively, and $17 and $19, respectively, as of December 31, 2013. Additionally, the Company has a maximum exposure to loss of $3 and $3, respectively, as of December 31, 2014 and 2013, which represents the issuance costs that were incurred to establish the facility. The Company does not have a controlling financial interest as it does not manage the assets of the facility nor does it have the obligation to absorb losses or the right to receive benefits that could potentially be significant to the facility, as the asset manager has significant variable interest in the vehicle. The Company's financial or other support provided to the facility is limited to providing ongoing support to cover the facility's operating expenses. For further information on the facility, see Note 12 - Debt of Notes to Consolidated Financial Statements.

In addition, the Company, through normal investment activities, makes passive investments in structured securities issued by VIEs for which the Company is not the manager which are included in ABS, CDOs, CMBS and RMBS in the Available-for-Sale Securities table and fixed maturities, FVO, in the Company's Consolidated Balance Sheets. The Company has not provided financial or other support with respect to these investments other than its original investment. For these investments, the Company determined it is not the primary beneficiary due to the relative size of the Company's investment in comparison to the principal amount of the structured securities issued by the VIEs, the level of credit subordination which reduces the Company's obligation to absorb losses or right to receive benefits and the Company's inability to direct the activities that most significantly impact the economic performance of the VIEs. The Company's maximum exposure to loss on these investments is limited to the amount of the Company's investment.

6. Investments and Derivative Instruments (continued)

Repurchase Agreements, Dollar Roll Transactions and Other Collateral Transactions

From time to time, the Company enters into repurchase agreements and dollar roll transactions to manage liquidity or to earn incremental spread income. A repurchase agreement is a transaction in which one party (transferor) agrees to sell securities to another party (transferee) in return for cash (or securities), with a simultaneous agreement to repurchase the same securities at a specified price at a later date. A dollar roll is a type of repurchase agreement where a mortgage backed security is sold with an agreement to repurchase substantially the same security at a specified time in the future. These transactions generally have a contractual maturity of ninety days or less and the carrying amounts of these instruments approximates fair value.

As part of repurchase agreements and dollar roll transactions, the Company transfers collateral of U.S. government and government agency securities and receives cash. For the repurchase agreements, the Company obtains cash in an amount equal to at least 95% of the fair value of the securities transferred. The agreements contain contractual provisions that require additional collateral to be transferred when necessary and provide the counterparty the right to sell or re-pledge the securities transferred. The cash received from the repurchase program is typically invested in short-term investments or fixed maturities. Repurchase agreements include master netting provisions that provide the counterparties the right to offset claims and apply securities held by them with respect to their obligations in the event of a default. Although the Company has the contractual right to offset claims, fixed maturities do not meet the specific conditions for net presentation under U.S. GAAP. The Company accounts for the repurchase agreements and dollar roll transactions as collateralized borrowings. The securities transferred under repurchase agreements and dollar roll transactions are included in fixed maturities, AFS with the obligation to repurchase those securities recorded in other liabilities on the Company's Consolidated Balance Sheets.

The Company had no outstanding repurchase agreements or dollar roll transactions as of December 31, 2014 or December 31, 2013.

The Company is required by law to deposit securities with government agencies in certain states in which it conducts business. As of December 31, 2014 and 2013, the fair value of securities on deposit was approximately $2.5 billion and $1.9 billion, respectively.

As of December 31, 2013, the Company pledged as collateral $272 in Japan government bonds reported in fixed maturities, AFS, associated with short-term debt of $238. The collateral and short-term debt were related to the Japan variable and fixed annuity business and were transferred to the Buyer as of June 30, 2014.

As of December 31, 2014 and 2013, the Company has pledged as collateral $34 and $34, respectively, of U.S. government securities and government agency securities for letters of credit.

Refer to Derivative Collateral Arrangements section of this note for disclosure of collateral in support of derivative transactions.

Equity Method Investments

The majority of the Company's investments in limited partnerships and other alternative investments, including hedge funds, mortgage and real estate funds, mezzanine debt funds, and private equity and other funds (collectively, “limited partnerships”), are accounted for under the equity method of accounting. The Company’s maximum exposure to loss as of December 31, 2014 is limited to the total carrying value of $2.9 billion. In addition, the Company has outstanding commitments totaling $604 to fund limited partnership and other alternative investments as of December 31, 2014. The Company’s investments in limited partnerships are generally of a passive nature in that the Company does not take an active role in the management of the limited partnerships. In 2014, aggregate investment income from limited partnerships and other alternative investments exceeded 10% of the Company’s pre-tax consolidated net income. Accordingly, the Company is disclosing aggregated summarized financial data for the Company’s limited partnership investments. This aggregated summarized financial data does not represent the Company’s proportionate share of limited partnership assets or earnings. Aggregate total assets of the limited partnerships in which the Company invested totaled $85.8 billion and $85.6 billion as of December 31, 2014 and 2013, respectively. Aggregate total liabilities of the limited partnerships in which the Company invested totaled $10.6 billion and $11.4 billion as of December 31, 2014 and 2013, respectively. Aggregate net investment income of the limited partnerships in which the Company invested totaled $3.6 billion, $1.8 billion and $1.0 billion for the periods ended December 31, 2014, 2013 and 2012, respectively. Aggregate net income of the limited partnerships in which the Company invested totaled $9.6 billion, $8.4 billion and $7.2 billion for the periods ended December 31, 2014, 2013 and 2012, respectively. As of, and for the period ended, December 31, 2014, the aggregated summarized financial data reflects the latest available financial information.

6. Investments and Derivative Instruments (continued)

Derivative Instruments

The Company utilizes a variety of OTC, OTC-cleared and exchange traded derivative instruments as a part of its overall risk management strategy as well as to enter into replication transactions. Derivative instruments are used to manage risk associated with interest rate, equity market, credit spread, issuer default, price, and currency exchange rate risk or volatility. Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that would be permissible investments under the Company's investment policies. The Company also may enter into and has previously issued financial instruments and products that either are accounted for as free-standing derivatives, such as certain reinsurance contracts, or may contain features that are deemed to be embedded derivative instruments, such as the GMWB rider included with certain variable annuity products.

Strategies that qualify for hedge accounting

Certain derivatives the Company enters into satisfy the hedge accounting requirements as outlined in Note 1 of these financial statements. Typically, these hedge relationships include interest rate and foreign currency swaps where the terms or expected cash flows of the securities being hedged closely match the terms of the swap. The swaps are typically used to manage interest rate duration of certain fixed maturity securities or liability contracts. The hedge strategies by hedge accounting designation include:

Cash flow hedges

Interest rate swaps are predominantly used to manage portfolio duration and better match cash receipts from assets with cash disbursements required to fund liabilities. These derivatives primarily convert interest receipts on floating-rate fixed maturity securities to fixed rates. The Company also enters into forward starting swap agreements to hedge the interest rate exposure related to the purchase of fixed-rate securities, primarily to hedge interest rate risk inherent in the assumptions used to price certain liabilities.

Foreign currency swaps are used to convert foreign currency-denominated cash flows related to certain investment receipts and liability payments to U.S. dollars in order to reduce cash flow fluctuations due to changes in currency rates.

Fair value hedges

Interest rate swaps are used to hedge the changes in fair value of fixed maturity securities due to fluctuations in interest rates.

Non-qualifying strategies

Derivative relationships that do not qualify for hedge accounting ("non-qualifying strategies") primarily include the hedge program for the Company's variable annuity products as well as the hedging and replication strategies that utilize credit default swaps. In addition, hedges of interest rate and foreign currency risk of certain fixed maturities and liabilities do not qualify for hedge accounting.

The non-qualifying strategies include:

Interest rate swaps, swaptions, and futures

The Company may use interest rate swaps, swaptions, and futures to manage duration between assets and liabilities in certain investment portfolios. In addition, the Company enters into interest rate swaps to terminate existing swaps, thereby offsetting the changes in value of the original swap. As of December 31, 2014 and 2013, the notional amount of interest rate swaps in offsetting relationships was $13.1 billion and $6.9 billion, respectively.

Foreign currency swaps and forwards

The Company enters into foreign currency swaps and forwards to convert the foreign currency exposures of certain foreign currency-denominated fixed maturity investments to U.S. dollars.

Japan fixed payout annuity hedge

The Company formerly offered certain variable annuity products with a GMIB rider through HLIKK, a former indirect wholly-owned subsidiary that was sold on June 30, 2014. For further discussion on the sale, see the Sale of Hartford Life Insurance KK section in Note 2 - Business Dispositions of Notes to the Consolidated Financial Statements. The Company will continue to reinsure from HLIKK the Japan fixed payout annuities. The Company invests in U.S. dollar denominated assets to support the reinsurance liability. The Company entered into pay U.S. dollar, receive yen swap contracts to hedge the currency and yen interest rate exposure between the U.S. dollar denominated assets and the yen denominated fixed liability reinsurance payments.

6. Investments and Derivative Instruments (continued)

Credit contracts

Credit default swaps are used to purchase credit protection on an individual entity or referenced index to economically hedge against default risk and credit-related changes in value on fixed maturity securities. Credit default swaps are also used to assume credit risk related to an individual entity or referenced index as a part of replication transactions. These contracts require the Company to pay or receive a periodic fee in exchange for compensation from the counterparty should the referenced security issuers experience a credit event, as defined in the contract. The Company is also exposed to credit risk related to credit derivatives embedded within certain fixed maturity securities which are comprised of structured securities that contain credit derivatives that reference a standard index of corporate securities. In addition, the Company enters into credit default swaps to terminate existing credit default swaps, thereby offsetting the changes in value of the original swap going forward.

Equity index swaps and options

Beginning in 2014, the Company entered into total return swaps to hedge equity risk of equity common stock investments which are accounted for using fair value option in order to align the accounting treatment with net realized capital gains (losses). The Company also enters into equity index options with the purpose of hedging the impact of an adverse equity market environment on the investment portfolio. In addition, the Company formerly offered certain equity indexed products, a portion of which contain embedded derivatives that require bifurcation. The Company uses equity index swaps to economically hedge the equity volatility risk associated with the equity indexed products.

GMWB derivatives, net

The Company formerly offered certain variable annuity products with GMWB riders. The GMWB product is a bifurcated embedded derivative (“GMWB product derivatives”) that has a notional value equal to the GRB. The Company uses reinsurance contracts to transfer a portion of its risk of loss due to GMWB. The reinsurance contracts covering GMWB (“GMWB reinsurance contracts”) are accounted for as free-standing derivatives with a notional amount equal to the GRB amount.

The Company utilizes derivatives (“GMWB hedging instruments”) as part of an actively managed program designed to hedge a portion of the capital market risk exposures of the non-reinsured GMWB riders due to changes in interest rates, equity market levels, and equity volatility. These derivatives include customized swaps, interest rate swaps and futures, and equity swaps, options and futures, on certain indices including the S&P 500 index, EAFE index and NASDAQ index. The following table presents notional and fair value for GMWB hedging instruments.

	Notional Amount		Fair Value	
	December 31, 2014	December 31, 2013	December 31, 2014	December 31, 2013
Customized swaps	$ 7,041	$ 7,839	$ 124	$ 74
Equity swaps, options, and futures	3,761	4,237	39	44
Interest rate swaps and futures	3,640	6,615	11	(77)
Total	**$ 14,442**	**$ 18,691**	**$ 174**	**$ 41**

Macro hedge program

The Company utilizes equity options, swaps and foreign currency options to partially hedge against a decline in the equity markets and the resulting statutory surplus and capital impact primarily arising from the guaranteed minimum death benefit ("GMDB") and GMWB obligations. The following table presents notional and fair value for the macro hedge program.

	Notional Amount		Fair Value	
	December 31, 2014	December 31, 2013	December 31, 2014	December 31, 2013
Equity options and swaps	$ 5,983	$ 9,934	$ 141	$ 139
Foreign currency options	400	—	—	—
Total	**$ 6,383**	**$ 9,934**	**$ 141**	**$ 139**

Contingent capital facility put option

The Company entered into a put option agreement that provides the Company the right to require a third-party trust to purchase, at any time, The Hartford’s junior subordinated notes in a maximum aggregate principal amount of $500. Under the put option agreement, The Hartford will pay premiums on a periodic basis and will reimburse the trust for certain fees and ordinary expenses.

6. Investments and Derivative Instruments (continued)

Modified coinsurance reinsurance contracts

As of December 31, 2014 and 2013, the Company had approximately $1.0 billion and $1.3 billion, respectively, of invested assets supporting other policyholder funds and benefits payable reinsured under a modified coinsurance arrangement in connection with the sale of the Individual Life business structured as a reinsurance transaction. The assets are primarily held in a trust established by the Company. The Company pays or receives cash quarterly to settle the results of the reinsured business, including the investment results. As a result of this modified coinsurance arrangement, the Company has an embedded derivative that transfers to the reinsurer certain unrealized changes in fair value due to interest rate and credit risks of these assets. The notional amounts of the embedded derivative reinsurance contracts are the invested assets that are carried at fair value supporting the reinsured reserves.

Derivative Balance Sheet Classification

The following table summarizes the balance sheet classification of the Company’s derivative related fair value amounts as well as the gross asset and liability fair value amounts. For reporting purposes, the Company has elected to offset the fair value amounts, income accruals, and related cash collateral receivables and payables of OTC derivative instruments executed in a legal entity and with the same counterparty under a master netting agreement, which provides the Company with the legal right of offset. The Company has also elected to offset the fair value amounts, income accruals and related cash collateral receivables and payables of OTC-cleared derivative instruments based on clearing house agreements. The fair value amounts presented below do not include income accruals or related cash collateral receivables and payables, which are netted with derivative fair value amounts to determine balance sheet presentation. Derivative fair value reported as liabilities after taking into account the master netting agreements, is $1.1 billion and $1.3 billion as of December 31, 2014 and 2013, respectively. Derivatives in the Company’s separate accounts where the associated gains and losses accrue directly to policyholders are not included. The Company’s derivative instruments are held for risk management purposes, unless otherwise noted in the following table. The notional amount of derivative contracts represents the basis upon which pay or receive amounts are calculated and is presented in the table to quantify the volume of the Company’s derivative activity. Notional amounts are not necessarily reflective of credit risk. The tables below exclude investments that contain an embedded credit derivative for which the Company has elected the fair value option. For further discussion, see the Fair Value Option section in Note 5 - Fair Value Measurements of Notes to the Consolidated Financial Statements.

[1] Represents hedge programs formerly associated with the Japan variable and fixed annuity products which were terminated due to the sale of HLIKK during 2014. For further information on the sale, see Note 2 - Business Dispositions of Notes to the Consolidated Financial Statements.

[2] The derivative instruments related to this strategy are held for other investment purposes.

[3] These derivatives are embedded within liabilities and are not held for risk management purposes.

6. Investments and Derivative Instruments (continued)

Change in Notional Amount

The net decrease in notional amount of derivatives since December 31, 2013 was primarily due to the following:

- The decrease in notional amount related to the international program hedging instruments resulted from the termination of the hedging program associated with the Japan variable annuity product due to the sale of HLIKK. For further discussion on the sale, see the Sale of Hartford Life Insurance KK section in Note 2 - Business Dispositions of Notes to the Consolidated Financial Statements.
- The decrease in notional amount related to the GMWB hedging instruments primarily resulted from portfolio re-balancing, including the termination of offsetting positions.
- The decrease in notional amount associated with the macro hedge program was primarily driven by the expiration of certain out-of-the-money options.
- These declines in notional amount were partially offset by an increase in notional amount related to non-qualifying interest rate swaps and futures related to duration shortening positions, which were subsequently closed by offset.

Change in Fair Value

The net improvement in the total fair value of derivative instruments since December 31, 2013 was primarily related to the following:

- The increase in fair value of qualifying interest rate derivatives was primarily due to a decline in interest rates.
- The net increase in fair value related to the combined GMWB hedging program, which includes the GMWB product, reinsurance, and hedging derivatives, was primarily driven by liability model assumption updates and increased volatility, partially offset by a decline in fair value resulting from policyholder behavior primarily related to increased surrenders.
- The increase in the fair value associated with the international program hedging instruments resulted from the termination of the hedging program associated with the Japan variable annuity product due to the sale of HLIKK. For further discussion on the sale, see the Sale of Hartford Life Insurance KK section in Note 2 - Business Dispositions of Notes to the Consolidated Financial Statements.
- These improvements in fair value were partially offset by a decrease in fair value associated with the fixed payout annuity hedges primarily driven by a decline in U.S. interest rates and by a depreciation of the Japanese yen in relation to the U.S. dollar.
- Additional declines in fair value related to modified coinsurance reinsurance contracts, which are accounted for as embedded derivatives and transfer to the reinsurer the investment experience related to the assets supporting the reinsured policies, were driven by a decline in interest rates, slightly offset by credit spread widening.

6. Investments and Derivative Instruments (continued)

Offsetting of Derivative Assets/Liabilities

The following tables present the gross fair value amounts, the amounts offset, and net position of derivative instruments eligible for offset in the Company's Consolidated Balance Sheets. Amounts offset include fair value amounts, income accruals and related cash collateral receivables and payables associated with derivative instruments that are traded under a common master netting agreement, as described above. Also included in the tables are financial collateral receivables and payables, which is contractually permitted to be offset upon an event of default, although is disallowed for offsetting under U.S. GAAP.

As of December 31, 2014

	(i)	(ii)	(iii) = (i) - (ii)		(iv)	(v) = (iii) - (iv)
			Net Amounts Presented in the Statement of Financial Position		Collateral Disallowed for Offset in the Statement of Financial Position	
Description	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Financial Position	Derivative Assets [1]	Accrued Interest and Cash Collateral Received [2]	Financial Collateral Received [4]	Net Amount
Other investments	$ 1,175	$ 969	$ 364	$ (158)	$ 109	$ 97
Description	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Statement of Financial Position	Derivative Liabilities [3]	Accrued Interest and Cash Collateral Pledged [3]	Financial Collateral Pledged [4]	Net Amount
Other liabilities	$ (1,741)	$ (799)	$ (927)	$ (15)	$ (1,079)	$ 137

As of December 31, 2013

	(i)	(ii)	(iii) = (i) - (ii)		(iv)	(v) = (iii) - (iv)
			Net Amounts Presented in the Statement of Financial Position		Collateral Disallowed for Offset in the Statement of Financial Position	
Description	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Financial Position	Derivative Assets [1]	Accrued Interest and Cash Collateral Received [2]	Financial Collateral Received [4]	Net Amount
Other investments	$ 1,845	$ 1,463	$ 442	$ (60)	$ 242	$ 140
Description	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Statement of Financial Position	Derivative Liabilities [3]	Accrued Interest and Cash Collateral Pledged [3]	Financial Collateral Pledged [4]	Net Amount
Other liabilities	$ (2,626)	$ (1,496)	$ (1,223)	$ 93	$ (1,204)	$ 74

[1] Included in other investments in the Company's Consolidated Balance Sheets.
[2] Included in other assets in the Company's Consolidated Balance Sheets and is limited to the net derivative receivable associated with each counterparty.
[3] Included in other liabilities in the Company's Consolidated Balance Sheets and is limited to the net derivative payable associated with each counterparty. Not included in this amount are embedded derivatives associated with consumer notes of $(3) and $(2) as of December 31, 2014 and December 31, 2013, respectively, which were not eligible for offset in the Company's Consolidated Balance Sheets.
[4] Excludes collateral associated with exchange-traded derivatives instruments.

Cash Flow Hedges

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of OCI and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing hedge ineffectiveness are recognized in current period earnings. All components of each derivative’s gain or loss were included in the assessment of hedge effectiveness.

6. Investments and Derivative Instruments (continued)

The following table presents the components of the gain or loss on derivatives that qualify as cash flow hedges:

Derivatives in Cash Flow Hedging Relationships

	Gain (Loss) Recognized in OCI on Derivative (Effective Portion)			Net Realized Capital Gains(Losses) Recognized in Income on Derivative (Ineffective Portion)		
	2014	2013	2012	2014	2013	2012
Interest rate swaps	$ 150	$ (315)	$ 120	$ 2	$ (3)	$ —
Foreign currency swaps	(10)	12	(31)	—	—	—
Total	**$ 140**	**$ (303)**	**$ 89**	**$ 2**	**$ (3)**	**$ —**

Derivatives in Cash Flow Hedging Relationships

		Gain (Loss) Reclassified from AOCI into Income (Effective Portion)		
	Location	2014	2013	2012
Interest rate swaps	Net realized capital gain/(loss)	$ (1)	$ 91	$ 90
Interest rate swaps	Net investment income	87	97	140
Foreign currency swaps	Net realized capital gain/(loss)	(13)	4	(6)
Total		**$ 73**	**$ 192**	**$ 224**

As of December 31, 2014, the before-tax deferred net gains on derivative instruments recorded in AOCI that are expected to be reclassified to earnings during the next twelve months are $63. This expectation is based on the anticipated interest payments on hedged investments in fixed maturity securities that will occur over the next twelve months, at which time the Company will recognize the deferred net gains (losses) as an adjustment to net investment income over the term of the investment cash flows. The maximum term over which the Company is hedging its exposure to the variability of future cash flows for forecasted transactions, excluding interest payments on existing variable-rate financial instruments, is approximately two years.

During the years ended December 31, 2014 and 2013, the Company had no net reclassifications from AOCI to earnings resulting from the discontinuance of cash-flow hedges due to forecasted transactions that were no longer probable of occurring. For the year ended December 31, 2012 the before-tax deferred net gains on derivative instruments reclassified from AOCI to earnings totaled $99 which primarily resulted from the discontinuance of cash flow hedges due to forecasted transactions no longer probable of occurring associated with variable rate bonds sold as part of the Individual Life and Retirement Plans business dispositions. For further information on the business dispositions, see Note 2 - Business Dispositions of Notes to the Consolidated Financial Statements.

Fair Value Hedges

For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivatives as well as the offsetting loss or gain on the hedged items attributable to the hedged risk are recognized in current earnings. The Company includes the gain or loss on the derivative in the same line item as the offsetting loss or gain on the hedged item. All components of each derivative's gain or loss were included in the assessment of hedge effectiveness.

The Company recognized in income gains (losses) representing the ineffective portion of fair value hedges as follows:

Derivatives in Fair Value Hedging Relationships

	Gain (Loss) Recognized in Income [1]					
	2014		2013		2012	
	Derivative	Hedged Item	Derivative	Hedged Item	Derivative	Hedged Item
Interest rate swaps						
Net realized capital gains (losses)	$ (3)	$ 1	$ 7	$ (12)	$ (4)	$ 2
Foreign currency swaps						
Net realized capital gains (losses)	—	—	1	(1)	(7)	7
Benefits, losses and loss adjustment expenses	—	—	(2)	2	(6)	6
Total	**$ (3)**	**$ 1**	**$ 6**	**$ (11)**	**$ (17)**	**$ 15**

[1] The amounts presented do not include the periodic net coupon settlements of the derivative or the coupon income (expense) related to the hedged item. The net of the amounts presented represents the ineffective portion of the hedge.

6. Investments and Derivative Instruments (continued)

Non-qualifying Strategies

For non-qualifying strategies, including embedded derivatives that are required to be bifurcated from their host contracts and accounted for as derivatives, the gain or loss on the derivative is recognized currently in earnings within net realized capital gains (losses). The following table presents the gain or loss recognized in income on non-qualifying strategies:

Non-qualifying Strategies
Gain (Loss) Recognized within Net Realized Capital Gains (Losses)

	December 31,

Derivative instruments formerly associated with Japan [3]	(2)	—	—
Total [2]	**$ (353)**	**$ (125)**	**$ 105**

[1] The associated liability is adjusted for changes in spot rates through realized capital gains and was $116, $250 and $189 for the years ended December 31, 2014, 2013 and 2012, respectively, which is not presented in this table
[2] Excludes investments that contain an embedded credit derivative for which the Company has elected the fair value option. For further discussion, see the Fair Value Option section in Note 5 - Fair Value Measurements.
[3] These amounts relate to the termination of the hedging program associated with the Japan variable annuity product due to the sale of HLIKK.

For the year ended December 31, 2014 the net realized capital gain (loss) related to derivatives used in non-qualifying strategies was primarily comprised of the following:

- The net loss related to interest rate derivatives used to manage the risk of a rise in interest rates and manage duration, was driven by a decline in U.S. interest rates.
- The net loss related to the Japan fixed payout annuity hedge was primarily driven by a decline in U.S. interest rates and a depreciation of the Japanese yen in relation to the U.S. dollar.
- The loss associated with modified coinsurance reinsurance contracts, which are accounted for as embedded derivatives and transfer to the reinsurer the investment experience related to the assets supporting the reinsured policies, was primarily driven by a decline in long-term interest rates, partially offset by credit spread widening. The assets remain on the Company's books and the Company recorded an offsetting gain in AOCI as a result of the increase in market value of the bonds.

In addition, for the year ended December 31, 2014 the Company recognized gains of $13, due to cash recovered on derivative receivables that were previously written-off related to the bankruptcy of Lehman Brothers Inc. The derivative receivables were the result of the contractual collateral threshold amounts and open collateral calls prior to the bankruptcy filing as well as interest rate and credit spread movements from the date of the last collateral call to the date of the bankruptcy filing. For the years ended December 31, 2013 and 2012 there were no recognized gains and gains of $9, respectively, due to derivative receivables that were previously written-off related to the bankruptcy of Lehman Brothers Inc.

6. Investments and Derivative Instruments (continued)

For the year ended December 31, 2013 the net realized capital gain (loss) related to derivatives used in non-qualifying strategies was primarily comprised of the following:

- The net loss related to the Japan fixed annuity payout hedge was primarily driven by a depreciation of the Japanese yen in relation to the U.S. dollar.
- The net loss on the macro hedge program was primarily due to an improvement in domestic equity markets, an increase in interest rates, and a decline in equity volatility.
- The net gain related to the combined GMWB hedging program, which includes the GMWB product, reinsurance, and hedging derivatives, was primarily driven by revaluing the liability for living benefits resulting from favorable policyholder behavior largely related to increased full surrenders and liability assumption updates for partial lapses and withdrawal rates.

For the year ended December 31, 2012 the net realized capital gain (loss) related to derivatives used in non-qualifying strategies was primarily due to the following:

- The net gain related to the combined GMWB hedging program, which includes the GMWB product, reinsurance, and hedging derivatives, was primarily driven by liability model assumption updates largely related to a reduction in the reset assumptions to better align with actual experience, outperformance of underlying actively managed funds compared to their respective indices, and lower equity volatility.
- The gain on credit derivatives that assume credit risk as part of replication transactions resulted from credit spread tightening.
- The net loss on the macro hedge program was primarily due to the passage of time, an improvement in domestic equity markets, and a decrease in equity volatility.
- The net loss related to the Japan fixed annuity payout hedge was primarily driven by a depreciation of the Japanese yen in relation to the U.S. dollar, the strengthening of the currency basis swap spread between the U.S. dollar and the Japanese yen, and a decline in U.S. interest rates.

Refer to Note 14 - Commitments and Contingencies for additional disclosures regarding contingent credit related features in derivative agreements.

Credit Risk Assumed through Credit Derivatives

The Company enters into credit default swaps that assume credit risk of a single entity or referenced index in order to synthetically replicate investment transactions. The Company will receive periodic payments based on an agreed upon rate and notional amount and will only make a payment if there is a credit event. A credit event payment will typically be equal to the notional value of the swap contract less the value of the referenced security issuer’s debt obligation after the occurrence of the credit event. A credit event is generally defined as a default on contractually obligated interest or principal payments or bankruptcy of the referenced entity. The credit default swaps in which the Company assumes credit risk primarily reference investment grade single corporate issuers and baskets, which include standard and customized diversified portfolios of corporate issuers. The diversified portfolios of corporate issuers are established within sector concentration limits and may be divided into tranches that possess different credit ratings.

6. Investments and Derivative Instruments (continued)

The following tables present the notional amount, fair value, weighted average years to maturity, underlying referenced credit obligation type and average credit ratings, and offsetting notional amounts and fair value for credit derivatives in which the Company is assuming credit risk as of December 31, 2014 and 2013.

As of December 31, 2014

				Underlying Referenced Credit Obligation(s) [1]			
Credit Derivative type by derivative risk exposure	**Notional Amount [2]**	**Fair Value**	**Weighted Average Years to Maturity**	**Type**	**Average Credit Rating**	**Offsetting Notional Amount [3]**	**Offsetting Fair Value [3]**
Single name credit default swaps

Investment grade risk exposure	350	339	3 years	Corporate Credit	BBB+	—	—
Total [5]	**$ 5,768**	**$ 374**				**$ 3,882**	**$ (7)**

[1] The average credit ratings are based on availability and the midpoint of the applicable ratings among Moody's, S&P, Fitch and Morningstar. If no rating is available from a rating agency, then an internally developed rating is used.

[2] Notional amount is equal to the maximum potential future loss amount. These derivatives are governed by agreements, clearing house rules and applicable law which include collateral posting requirements. There is no additional specific collateral related to these contracts or recourse provisions included in the contracts to offset losses.

[3] The Company has entered into offsetting credit default swaps to terminate certain existing credit default swaps, thereby offsetting the future changes in value of, or losses paid related to, the original swap.

[4] Includes $3.5 billion and $4.1 billion as of December 31, 2014 and 2013, respectively, of standard market indices of diversified portfolios of corporate and CMBS issuers referenced through credit default swaps. These swaps are subsequently valued based upon the observable standard market index.

[5] Excludes investments that contain an embedded credit derivative for which the Company has elected the fair value option. For further discussion, see the Fair Value Option section in Note 5 - Fair Value Measurements.

6. Investments and Derivative Instruments (continued)

Derivative Collateral Arrangements

The Company enters into various collateral arrangements in connection with its derivative instruments, which require both the pledging and accepting of collateral. As of December 31, 2014 and 2013, the Company pledged cash collateral associated with derivative instruments with a fair value of $120 and $347, respectively, for which the collateral receivable has been primarily included within other assets on the Company's Consolidated Balance Sheets. As of December 31, 2014 and 2013, the Company also pledged securities collateral associated with derivative instruments with a fair value of $1.1 billion and $1.3 billion, respectively, which have been included in fixed maturities on the Consolidated Balance Sheets. The counterparties have the right to sell or re-pledge these securities.

As of December 31, 2014 and 2013, the Company accepted cash collateral associated with derivative instruments of $327 and $180, respectively, which was invested and recorded in the Consolidated Balance Sheets in fixed maturities and short-term investments with corresponding amounts recorded in other liabilities. The Company also accepted securities collateral as of December 31, 2014 and 2013 with a fair value of $109 and $243, respectively, of which the Company has the ability to sell or repledge $97 and $191, respectively. As of December 31, 2014 and 2013, the fair value of repledged securities totaled $0 and $39, respectively, and the Company did not sell any securities. In addition, as of December 31, 2014 and 2013, non-cash collateral accepted was held in separate custodial accounts and was not included in the Company’s Consolidated Balance Sheets.

7. Reinsurance

The Company cedes insurance to affiliated and unaffiliated insurers to enable the Company to manage capital and risk exposure. Such arrangements do not relieve the Company of its primary liability to policyholders. Failure of reinsurers to honor their obligations could result in losses to the Company. The Company's procedures include careful initial selection of its reinsurers, structuring agreements to provide collateral funds where necessary, and regularly monitoring the financial condition and ratings of its reinsurers. The Company has ceded reinsurance in connection with the sales of its Retirement Plans and Individual Life businesses in 2013 to MassMutual and Prudential, respectively. For further discussion of these transactions, see Note 2 -Business Dispositions of Notes to Consolidated Financial Statements.

Reinsurance Recoverables

Reinsurance recoverables include balances due from reinsurance companies and are presented net of an allowance for uncollectible reinsurance. Reinsurance recoverables include an estimate of the amount of gross losses and loss adjustment expense reserves that may be ceded under the terms of the reinsurance agreements, including incurred but not reported unpaid losses. The Company's estimate of losses and loss adjustment expense reserves ceded to reinsurers is based on assumptions that are consistent with those used in establishing the gross reserves for business ceded to the reinsurance contracts. The Company calculates its ceded reinsurance projection based on the terms of any applicable facultative and treaty reinsurance, including an estimate of how incurred but not reported losses will ultimately be ceded by reinsurance agreements. Accordingly, the Company's estimate of reinsurance recoverables is subject to similar risks and uncertainties as the estimate of the gross reserve for unpaid losses and loss adjustment expenses.

The Company's reinsurance recoverables are summarized as follows:

	As of December 31,	
	2014	2013
Property and Casualty Insurance Products:		
Paid loss and loss adjustment expenses	$ 133	$ 138
Unpaid loss and loss adjustment expenses	2,868	2,841
Gross reinsurance recoverables	3,001	2,979
Allowance for uncollectible reinsurance	(271)	(244)
Net reinsurance recoverables	**$ 2,730**	**$ 2,735**
Life Insurance Products:		
Future policy benefits and unpaid loss and loss adjustment expenses and other policyholder funds and benefits payable		
Sold businesses (MassMutual and Prudential)	$ 18,997	$ 19,374
Other reinsurers	1,193	1,221
Net reinsurance recoverables [1]	**$ 20,190**	**$ 20,595**
Reinsurance recoverables, net	**$ 22,920**	**$ 23,330**

[1] No allowance for uncollectible reinsurance is required as of December 31, 2014 and 2013.

As of December 31, 2014, the Company has reinsurance recoverables from MassMutual and Prudential of $8.6 billion and $10.4 billion, respectively. As of December 31, 2013, the Company has reinsurance recoverables from MassMutual and Prudential of $9.5 billion and $9.9 billion, respectively. These reinsurance recoverables are secured by invested assets held in trust for the benefit of the Company in the event of a default by the reinsurers. As of December 31, 2014, the fair value of assets held in trust securing the Company's reinsurance recoverables from MassMutual and Prudential is $9.0 billion for each of these parties. As of December 31, 2014, the Company has no reinsurance-related concentrations of credit risk greater than 10% of the Company's consolidated stockholders' equity.

The allowance for uncollectible reinsurance reflects management's best estimate of reinsurance cessions that may be uncollectible in the future due to reinsurers' unwillingness or inability to pay. The Company analyzes recent developments in commutation activity between reinsurers and cedants, recent trends in arbitration and litigation outcomes in disputes between reinsurers and cedants and the overall credit quality of the Company's reinsurers. Based on this analysis, the Company may adjust the allowance for uncollectible reinsurance or charge off reinsurer balances that are determined to be uncollectible. Where its contracts permit, the Company secures future claim obligations with various forms of collateral, including irrevocable letters of credit, secured trusts, funds held accounts and group-wide offsets.

Due to the inherent uncertainties as to collection and the length of time before reinsurance recoverables become due, it is possible that future adjustments to the Company's reinsurance recoverables, net of the allowance, could be required, which could have a material adverse effect on the Company's consolidated results of operations or cash flows in a particular quarter or annual period.

7. Reinsurance (continued)

Insurance Revenues

The effect of reinsurance on property and casualty premiums written and earned is as follows:

	For the years ended December 31,		
Premiums Written	**2014**	**2013**	**2012**
Direct	$ 10,571	$ 10,564	$ 10,405
Assumed	275	247	230
Ceded	(602)	(882)	(788)
Net	**$ 10,244**	**$ 9,929**	**$ 9,847**
Premiums Earned			
Direct	$ 10,531	$ 10,494	$ 10,484
Assumed	264	241	205
Ceded	(699)	(871)	(796)
Net	**$ 10,096**	**$ 9,864**	**$ 9,893**

The reduction in ceded premium for the year ended December 31, 2014 was driven by the Company's decision to exit unprofitable programs, including captive programs where the Company ceded direct premiums to insured captive insurance companies. Ceded losses, which reduce losses and loss adjustment expenses incurred, were $502, $459, and $512 for the years ended December 31, 2014, 2013, and 2012, respectively.

The effect of reinsurance on life insurance earned premiums and fee income is as follows:

	For the years ended December 31,		
	2014	**2013**	**2012**
Gross earned premiums, fees and other considerations	$ 6,029	$ 6,435	$ 6,905
Reinsurance assumed	193	138	137
Reinsurance ceded	(1,720)	(1,780)	(524)
Net earned premiums, fees and other considerations	**$ 4,502**	**$ 4,793**	**$ 6,518**

The Company reinsures certain of its risks to other reinsurers under yearly renewable term, coinsurance, and modified coinsurance arrangements, and variations thereto. Yearly renewable term and coinsurance arrangements result in passing all or a portion of the risk to the reinsurer. Generally, the reinsurer receives a proportionate amount of the premiums less an allowance for commissions and expenses and is liable for a corresponding proportionate amount of all benefit payments. Modified coinsurance is similar to coinsurance except that the cash and investments that support the liabilities for contract benefits are not transferred to the assuming company, and settlements are made on a net basis between the companies. Coinsurance with funds withheld is a form of coinsurance except that the investment assets that support the liabilities are withheld by the ceding company.

The cost of reinsurance related to long-duration contracts is accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies. Insurance recoveries on ceded reinsurance agreements, which reduce death and other benefits, were $863, $913 and $285 for the years ended December 31, 2014, 2013, and 2012, respectively.

In addition, the Company has reinsured a portion of the risk associated with variable annuities and the associated GMDB and GMWB riders.

8. Deferred Policy Acquisition Costs and Present Value of Future Profits

Changes in the DAC balance are as follows:

	For the years ended December 31,		
	2014	2013	2012
Balance, beginning of period	**$ 2,161**	**$ 5,725**	**$ 6,556**
Deferred Costs	1,364	1,330	1,639
Amortization — DAC	(1,593)	(1,615)	(1,844)
Amortization — Unlock charge, pre-tax [1]	(136)	(1,086)	(144)
Amortization — DAC related to business dispositions [2] [3]	—	(2,229)	—
Adjustments to unrealized gains and losses on securities AFS and other	27	122	(364)
Effect of currency translation	—	(86)	(118)
Balance, end of period	**$ 1,823**	**$ 2,161**	**$ 5,725**

[1] Includes Unlock charge of $887 related to elimination of future estimated gross profits on the Japan variable annuity block in the first quarter of 2013. As a result of the Japan annuity business sale completed in June 2014, this Unlock charge has been reclassified to discontinued operations. For further information regarding this transaction, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

[2] Includes accelerated amortization of $352 and $2,374 recognized upon the sale of the Retirement Plans and Individual Life businesses, respectively, in 2013. For further information, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

[3] Includes previously unrealized gains on securities AFS of $148 and $349 recognized upon the sale of the Retirement Plans and Individual Life businesses, respectively, in 2013.

9. Goodwill

The carrying value of goodwill allocated to reporting units as of December 31, 2014 and 2013 is as follows:

	Gross	Accumulated Impairments	Carrying Value
Personal Lines	$ 119	$ —	$ 119
Mutual Funds	149	—	149
Corporate [1]	585	(355)	230
Total	**$ 853**	**$ (355)**	**$ 498**

[1] Carrying value as of December 31, 2014 and 2013 includes $138 and $92 for the Group Benefits and Mutual Funds reporting units, respectively.

Year ended December 31, 2014

The annual goodwill assessment for the Group Benefits, Personal Lines, and Mutual Funds reporting units was completed as of October 31, 2014, which resulted in no write-downs of goodwill for the year ended December 31, 2014. The reporting units passed the first step of their annual impairment test with a significant margin with the exception of the Group Benefits reporting unit. Group Benefits passed the first step of its annual impairment test with less than a 10% margin. The fair value of the Group Benefits reporting unit is based on discounted cash flows using earnings projections on in force business and future business growth. There could be a positive or negative impact on the results of step one in future periods if assumptions change about the level of capital, future business growth, earnings projections or the weighted average cost of capital.

Year ended December 31, 2013

During the first quarter of 2013, the Company completed the sale of its Retirement Plans business to MassMutual. Accordingly, the carrying value of the reporting unit's goodwill of $156 was reduced and included in reinsurance loss on disposition in the Company's Consolidated Statements of Operations.

The annual goodwill assessment for the Mutual Funds, Group Benefits, and Personal Lines reporting units was completed as of October 31, 2013, which resulted in no write-downs of goodwill for the year ended December 31, 2013. All reporting units passed the first step of their annual impairment test with a significant margin.

Year ended December 31, 2012

During the first quarter of 2012, the Company determined that a triggering event requiring an impairment assessment had occurred as a result of its decision to pursue sales or other strategic alternatives for the Individual Life and Retirement Plans reporting units.

The Company completed interim impairment tests during each of the first three quarters of 2012 for the Retirement Plans reporting unit which resulted in no impairment of goodwill. The annual goodwill assessment for Retirement Plans was completed as of October 31, 2012 and an additional impairment test was completed as of December 31, 2012 as a result of the anticipated sale of this business unit. No write-down of goodwill resulted for the year ended December 31, 2012. Retirement Plans passed step one of the goodwill impairment tests with a margin of less than 10% between fair value and book value of the reporting unit as of both dates. The fair value of the Retirement Plans reporting unit as of October 31, 2012 and December 31, 2012 was based on a negotiated transaction price.

The Company completed interim impairment tests during each of the first three quarters of 2012 for the Individual Life reporting unit which resulted in no impairment of goodwill in the first and second quarters of 2012. In the third quarter of 2012, the Individual Life reporting unit failed the goodwill impairment test as the carrying amount of the Individual Life reporting unit's goodwill exceeded the implied goodwill value. Accordingly, an impairment loss of $342 was recognized, representing the carrying value of the reporting unit's goodwill. The goodwill impairment loss is included with reinsurance loss on disposition in the Company's Consolidated Statements of Operations. The fair value of the Individual Life reporting unit as of September 30, 2012 was based on a negotiated transaction price.

The annual goodwill assessment for the Mutual Funds and Personal Lines reporting units and the Group Benefits reporting unit within Corporate was completed as of October 31, 2012, which resulted in no write-downs of goodwill for the year ended December 31, 2012. The reporting units passed the first step of their annual impairment test with a significant margin with the exception of the Group Benefits reporting unit. Group Benefits passed the first step of its annual impairment test with less than a 10% margin. The fair value of the Group Benefits reporting unit is based on discounted cash flows using earnings projections on in force business and future business growth.

10. Separate Accounts, Death Benefits and Other Insurance Benefit Features

U.S. GMDB/GMWB, International GMDB/GMIB, and Universal Life Secondary Guarantee Benefits

Changes in the gross U.S. GMDB/GMWB, International GMDB/GMIB, and universal life secondary guarantee benefits are as follows:

	U.S. GMDB/GMWB [1]	International GMDB/GMIB	Universal Life Secondary Guarantees
Liability balance as of January 1, 2014	**$ 849**	**$ 272**	**$ 1,802**

Paid	(98)	(14)	—
Unlock	(81)	(2)	—
Impact of reinsurance transactions (MassMutual and Prudential)	—	—	1,485
Currency translation adjustment	—	(6)	—
Reinsurance recoverable asset, as of December 31, 2013	**$ 533**	**$ 23**	**$ 1,802**

[1] These liability balances include all GMDB benefits, plus the life-contingent portion of GMWB benefits in excess of the return of the GRB. GMWB benefits up to the return of the GRB are embedded derivatives held at fair value and are excluded from these balances.

10. Separate Accounts, Death Benefits and Other Insurance Benefit Features (continued)

The following table provides details concerning GMDB/GMWB exposure as of December 31, 2014:

Account Value by GMDB/GMWB Type

Maximum anniversary value ("MAV") [1]	Account Value ("AV") [8]	Net Amount at Risk ("NAR") [9]	Retained Net Amount at Risk ("RNAR") [9]	Weighted Average Attained Age of Annuitant
MAV only	$ 17,435	$ 2,590	$ 396	70
With 5% rollup [2]	1,451	209	59	70
With Earnings Protection Benefit Rider ("EPB") [3]	4,342	579	83	68
With 5% rollup & EPB	547	115	25	71
Total MAV	23,775	3,493	563	
Asset Protection Benefit ("APB") [4]	15,183	228	151	68
Lifetime Income Benefit ("LIB") – Death Benefit [5]	624	7	7	68
Reset [6] (5-7 years)	3,036	22	22	69
Return of Premium ("ROP") [7]/Other	10,243	57	50	68
Subtotal Variable Annuity with GMDB/GMWB [10]	**52,861**	**3,807**	**793**	**69**
Less: General Account Value with GMDB/GMWB	4,009			
Subtotal Separate Account Liabilities with GMDB	**$ 48,852**			
Separate Account Liabilities without GMDB	$ 85,850			
Total Separate Account Liabilities	**$ 134,702**			

[1] MAV GMDB is the greatest of current AV, net premiums paid and the highest AV on any anniversary before age 80 years (adjusted for withdrawals).
[2] Rollup GMDB is the greatest of the MAV, current AV, net premium paid and premiums (adjusted for withdrawals) accumulated at generally 5% simple interest up to the earlier of age 80 years or 100% of adjusted premiums.
[3] EPB GMDB is the greatest of the MAV, current AV, or contract value plus a percentage of the contract's growth. The contract's growth is AV less premiums net of withdrawals, subject to a cap of 200% of premiums net of withdrawals.
[4] APB GMDB is the greater of current AV or MAV, not to exceed current AV plus 25% times the greater of net premiums and MAV (each adjusted for premiums in the past 12 months).
[5] LIB GMDB is the greatest of current AV, net premiums paid, or for certain contracts a benefit amount that ratchets over time, generally based on market performance.
[6] Reset GMDB is the greatest of current AV, net premiums paid and the most recent five to seven year anniversary AV before age 80 years (adjusted for withdrawals).
[7] ROP GMDB is the greater of current AV or net premiums paid.
[8] AV includes the contract holder's investment in the separate account and the general account.
[9] NAR is defined as the guaranteed benefit in excess of the current AV. RNAR represents NAR reduced for reinsurance. NAR and RNAR are highly sensitive to equity markets movements and increase when equity markets decline.
[10] Some variable annuity contracts with GMDB also have a life-contingent GMWB that may provide for benefits in excess of the return of the GRB. Such contracts included in this amount have $8.5 billion of total account value and weighted average attained age of 70 years. There is no NAR or retained NAR related to these contracts.

In the U.S., account balances of contracts with guarantees were invested in variable separate accounts as follows:

Asset type	As of December 31, 2014	As of December 31, 2013
Equity securities (including mutual funds)	$ 44,786	$ 52,858
Cash and cash equivalents	4,066	4,605
Total	**$ 48,852**	**$ 57,463**

As of December 31, 2014 and December 31, 2013, approximately 17% of the equity securities above were funds invested in fixed income securities and approximately 83% were funds invested in equity securities.

For further information on guaranteed living benefits that are accounted for at fair value, such as GMWB, see Note 5 - Fair Value Measurements of Notes to Consolidated Financial Statements.

11. Reserves for Future Policy Benefits and Unpaid Losses and Loss Adjustment Expenses

Property and Casualty Insurance Products Unpaid Losses and Loss Adjustment Expenses

A rollforward of liabilities for unpaid losses and loss adjustment expenses follows:

	For the years ended December 31,		
	2014	2013	2012
Beginning liabilities for unpaid losses and loss adjustment expenses, gross	**$ 21,704**	**$ 21,716**	**$ 21,550**
Reinsurance and other recoverables	3,028	3,027	3,033
Beginning liabilities for unpaid losses and loss adjustment expenses, net	**18,676**	**18,689**	**18,517**
Add provision for unpaid losses and loss adjustment expenses			
Current year	6,572	6,621	7,274
Prior years	228	192	(4)
Total provision for unpaid losses and loss adjustment expenses	**6,800**	**6,813**	**7,270**
Less payments			
Current year	2,639	2,552	2,882
Prior years	4,072	4,274	4,216
Total payments	**6,711**	**6,826**	**7,098**
Ending liabilities for unpaid losses and loss adjustment expenses, net	**18,765**	**18,676**	**18,689**
Reinsurance and other recoverables	3,041	3,028	3,027
Ending liabilities for unpaid losses and loss adjustment expenses, gross	**$ 21,806**	**$ 21,704**	**$ 21,716**

As of December 31, 2014 and 2013, property and casualty insurance products reserves were discounted by a total of $556 and $553, respectively. The current accident year benefit from discounting property and casualty insurance products reserves was $34 in 2014, $46 in 2013 and $48 in 2012. The reduction in the discount benefit in 2014 as compared to 2013 reflects lower claim volume and a shorter than expected payment pattern in 2014. The slight reduction in the discount benefit in 2013 as compared to 2012 reflects lower claim volume in 2013 partially offset by a higher discount rate in 2013. Accretion of discounts for prior accident years totaled $31 in 2014, $31 in 2013, and $52 in 2012.

In the opinion of management, based upon the known facts and current law, the reserves recorded for the Company's property and casualty insurance products at December 31, 2014 represent the Company's best estimate of its ultimate liability for losses and loss adjustment expenses related to losses covered by policies written by the Company. However, because of the significant uncertainties surrounding reserves, and particularly asbestos and environmental exposures, it is possible that management's estimate of the ultimate liabilities for these claims may change and that the required adjustment to recorded reserves could exceed the currently recorded reserves by an amount that could be material to the Company's results of operations or cash flows. For additional information, see Note 14 - Commitments and Contingencies, Guaranty Fund and Other Insurance-related Assessments.

Losses and loss adjustment expenses are also impacted by trends, frequency and severity. Examples of current trends affecting frequency and severity include increases in medical cost inflation rates, the changing use of medical care procedures, the introduction of new products and changes in internal claim practices. Other trends include changes in the legislative and regulatory environment over workers' compensation claims and evolving exposures to claims relating to molestation or abuse and other mass torts. In the case of the reserves for asbestos exposures, factors contributing to the high degree of uncertainty include inadequate loss development patterns, plaintiffs' expanding theories of liability, the risks inherent in major litigation, and inconsistent emerging legal doctrines. In the case of the reserves for environmental exposures, factors contributing to the high degree of uncertainty include expanding theories of liabilities and damages, the risks inherent in major litigation, inconsistent decisions concerning the existence and scope of coverage for environmental claims, and uncertainty as to the monetary amount being sought by the claimant from the insured.

11. Reserves for Future Policy Benefits and Unpaid Losses and Loss Adjustment Expenses (continued)

The following table presents (favorable) unfavorable prior accident years reserve development:

	For the years ended December 31,		
	2014	2013	2012
Auto liability	$ 25	$ 144	$ (25)
Homeowners	(7)	(6)	(32)
Professional liability	(17)	(29)	40
Package business	3	2	(20)
General liability	(25)	(75)	(87)
Bond	8	(8)	(9)
Commercial property	2	(7)	(8)
Net asbestos reserves	212	130	48
Net environmental reserves	30	12	10
Uncollectible reinsurance	—	(25)	—
Workers' compensation	(7)	(2)	78
Workers' compensation - NY 25a Fund for Reopened Cases	—	80	—
Change in workers' compensation discount, including accretion	30	30	52
Catastrophes	(45)	(63)	(66)
Other reserve re-estimates, net	$ 19	$ 9	$ 15
Total prior accident years development	**$ 228**	**$ 192**	**$ (4)**

Net unfavorable reserve development in 2014 primarily included the following:

- a strengthening in commercial auto liability reserves, for several accident years;
- a strengthening of net asbestos reserves driven by the annual ground-up asbestos reserve evaluation;
- partially offset by a release of general liability reserves due to lower frequency in late emerging claims ; and
- also offset by a release of professional liability reserves, for accident years 2010, 2012 and 2013; and
- also offset by a release of catastrophe reserves primarily for accident year 2013.

Net unfavorable reserve development in 2013 primarily included the following:

- a strengthening in commercial auto liability reserves, for accident years 2010 to 2012;
- a strengthening related to the closing of the New York Section 25A Fund for Reopened Cases (the "Fund");
- a strengthening of net asbestos reserves driven by the annual ground-up asbestos reserve evaluation;
- partially offset by a release of general liability reserves, for accident years 2006 to 2011; and
- also offset by a release of professional liability reserves, for accident years 2008 to 2012; and
- also offset by a release of catastrophe reserves primarily related to Storm Sandy.

Net favorable reserve development in 2012 primarily included the following:

- a release of general liability reserves, for accident years 2006 to 2008;
- a release of catastrophes, primarily related to the 2001 World Trade Center worker's compensation claims;
- partially offset by a strengthening of reserves for workers' compensation reserves, for accident years 2009 to 2011; and
- also offset by a strengthening of asbestos and environmental reserves.

11. Reserves for Future Policy Benefits and Unpaid Losses and Loss Adjustment Expenses (continued)

Life Insurance Products Unpaid Losses and Loss Adjustment Expenses

A rollforward of liabilities for group life, disability and accident, for unpaid losses and loss adjustment expenses follows:

	For the years ended December 31,		
	2014	2013	2012
Beginning liabilities for unpaid losses and loss adjustment expenses, gross	**$ 6,308**	**$ 6,547**	**$ 6,547**
Reinsurance recoverables	267	252	233
Beginning liabilities for unpaid losses and loss adjustment expenses, net	**6,041**	**6,295**	**6,314**
Add provision for unpaid losses and loss adjustment expenses			
Current year	2,370	2,534	2,989
Prior years	(11)	(17)	52
Total provision for unpaid losses and loss adjustment expenses	**2,359**	**2,517**	**3,041**
Less payments			
Current year	1,161	1,207	1,460
Prior years	1,426	1,564	1,600
Total payments	**2,587**	**2,771**	**3,060**
Ending liabilities for unpaid losses and loss adjustment expenses, net	**5,813**	**6,041**	**6,295**
Reinsurance recoverables	271	267	252
Ending liabilities for unpaid losses and loss adjustment expenses, gross	**$ 6,084**	**$ 6,308**	**$ 6,547**

The liability for unpaid losses and loss adjustment expenses for group life, disability and accident contracts was discounted to present value using rates based on the Company's earned investment yield estimated at the time the claims are incurred. The decrease in the provision for unpaid losses and loss adjustment expenses related to prior years was due to favorable claim recoveries in both the group life and group disability lines of business, net of accretion of discount.

The liability for future policy benefits and unpaid losses and loss adjustment expenses is as follows:

	2014	2013
Group life term, disability and accident unpaid losses and loss adjustment expenses	$ 6,084	$ 6,308
Group life other unpaid losses and loss adjustment expenses	203	206
Individual life unpaid losses and loss adjustment expenses	171	167
Future policy benefits	13,180	12,988
Future policy benefits and unpaid losses and loss adjustment expenses	**$ 19,638**	**$ 19,669**

12. Debt

The Company's long-term debt securities are issued by either HFSG Holding Company or HLI, and are unsecured obligations of HFSG Holding Company or HLI, and rank on a parity with all other unsecured and unsubordinated indebtedness of HFSG Holding Company or HLI.

Debt is carried net of discount. Short-term and long-term debt by issuance are as follows:

	As of December 31,	
	2014	2013
Revolving Credit Facilities	$ —	$ 238
Senior Notes and Debentures		
4.75% Notes, due 2014	—	200
4.0% Notes, due 2015	289	289
7.3% Notes, due 2015	167	167
5.5% Notes, due 2016	275	275
5.375% Notes, due 2017	415	415
4.0% Notes, due 2017	295	295

6.0% Notes, due 2019	413	413
5.5% Notes, due 2020	499	499
5.125% Notes, due 2022	797	796
7.65% Notes, due 2027	80	79
7.375% Notes, due 2031	63	63
5.95% Notes, due 2036	299	298
6.625% Notes, due 2040	295	295
6.1% Notes, due 2041	326	326
6.625% Notes, due 2042	178	178
4.3% Notes, due 2043	298	298
Junior Subordinated Debentures		
7.875% Notes, due 2042	600	600
8.125% Notes, due 2068	500	500
Total Notes and Debentures	**6,109**	**6,306**
Less: Current maturities	456	200
Long-Term Debt	**5,653**	**6,106**
Total Debt	**$ 6,109**	**$ 6,544**

The effective interest rate on the 6.1% senior notes due 2041 is 7.9%. The effective interest rate on the remaining notes does not differ materially from the stated rate. The Company incurred interest expense of $376, $397 and $457 on long-term debt for the years ended December 31, 2014, 2013 and 2012, respectively.

Collateralized Advances

Hartford Life Insurance Company ("HLIC"), an indirect wholly owned subsidiary, became a member of the Federal Home Loan Bank of Boston ("FHLBB") in May 2011. Membership allows HLIC access to collateralized advances, which may be used to support various spread-based businesses and enhance liquidity management. The Connecticut Department of Insurance ("CTDOI") will permit HLIC to pledge up to $1.39 billion in qualifying assets to secure FHLBB advances for 2015. The amount of advances that can be taken are dependent on the asset types pledged to secure the advances. The pledge limit is recalculated annually based on statutory admitted assets and capital and surplus. HLIC would need to seek the prior approval of the CTDOI if there were a desire to exceed these limits. As of December 31, 2014, HLIC had no advances outstanding under the FHLBB facility.

Senior Notes

On March 26, 2013, the Company repurchased principal amounts of approximately $800, plus a payment for unpaid interest on senior notes due through the settlement date. The Company recognized a loss on extinguishment in 2013 of approximately $213, before tax, representing the excess of the repurchase price over the principal repaid and the write-off of the unamortized discount and debt issuance costs.

12. Debt (continued)

On April 18, 2013, the Company issued $300 aggregate principal amount of 4.3% Senior Notes (the "4.3% Notes") due April 15, 2043 for net proceeds of approximately $295, after deducting underwriting discounts and expenses from the offering. The 4.3% Notes bear interest at an annual fixed rate of 4.3% from the date of issuance to April 15, 2043, payable semi-annually in arrears on April 15 and October 15, commencing October 15, 2013. The Company, at its option, can redeem the 4.3% Notes at any time in whole, or from time to time in part, at a redemption price at a discount rate of US Treasury due November 15, 2042 plus 25 basis points, or if greater, 100% of the principal amount of notes to be redeemed, plus accrued and unpaid interest to the date of redemption.

Junior Subordinated Debentures

On April 17, 2012, the Company (i) repurchased all outstanding 10% fixed-to-floating rate junior subordinated debentures due 2068 with a $1.75 billion aggregate principal amount held by Allianz SE (“Allianz”) (the “10% Debentures”) for $2.125 billion (plus a payment by the Company of unpaid interest on the 10% Debentures) and (ii) settled the repurchase of the Series B and Series C warrants held by Allianz to purchase shares of the Company’s common stock, see Note 15 - Equity. In addition, the 10% Debentures replacement capital covenant (the “10% Debentures RCC”) was terminated on April 12, 2012 with the consent of the holders of a majority in aggregate principal amount of the Company’s outstanding 6.1% senior notes due 2041. Upon closing, the Company recognized a loss on extinguishment in the second quarter of 2012 of $587, after-tax, representing the premium associated with repurchasing the 10% Debentures at an amount greater than the face amount, the write-off of the unamortized discount and debt issuance costs related to the 10% Debentures and other costs related to the repurchase transaction. On April 5, 2012, the Company issued $600 aggregate principal amount of 7.875% fixed-to-floating rate junior subordinated debentures due 2042 (the “Debentures”) for net proceeds of approximately $586, after deducting underwriting discounts and offering expenses. The Company financed the repurchase of the 10% Debentures through the issuance of the Senior Notes and the Debentures in 2012.

The Debentures bear interest from the date of issuance to but excluding April 15, 2022 at an annual rate of 7.875%, payable quarterly in arrears on January 15, April 15, July 15 and October 15 of each year to and including April 15, 2022. Commencing on April 15, 2022 the Debentures bear interest at an annual rate equal to three-month LIBOR, reset quarterly, plus 5.596%, payable quarterly in arrears on January 15, April 15, July 15 and October 15 of each year, commencing on July 15, 2022. The Company has the right, on one or more occasions, to defer the payment of interest on the Debentures. The Company may defer interest for up to ten consecutive years without giving rise to an event of default. Deferred interest will accumulate additional interest at an annual rate equal to the annual interest rate then applicable to the Debentures. If the Company defers interest payments on the Debentures, the Company generally may not make payments on or redeem or purchase any shares of its capital stock or any of its debt securities or guarantees that rank upon liquidation, dissolution or winding up equally with or junior to the Debentures, subject to certain limited exceptions.

The Company may elect to redeem the Debentures in whole at any time or in part from time to time on or after April 15, 2022, at a redemption price equal to the principal amount of the Debentures being redeemed plus accrued and unpaid interest to but excluding the date of redemption. If the Debentures are not redeemed in whole, at least $25 aggregate principal amount of the Debentures must remain outstanding after giving effect to such redemption. The Debentures may be redeemed in whole at any time prior to April 15, 2022, within 90 days of the occurrence of a tax event or rating agency event, at a redemption price equal to the greater of (i) the principal amount of the Debentures being redeemed, or (ii) the present value of the (a) outstanding principal and (b) remaining scheduled payments of interest that would have been payable from the redemption date to and including April 15, 2022 on the Debentures to be redeemed (not including any portion of such payments of interest accrued and unpaid to but excluding the redemption date), discounted from their respective interest payment dates to but excluding the redemption date at a discount rate equal to the Treasury Rate plus a spread of 0.7%, in each case, plus accrued and unpaid interest to but excluding the redemption date.

The Debentures are unsecured, subordinated and junior in right of payment and upon liquidation to all of the Company’s existing and future senior indebtedness. In addition, the Debentures are effectively subordinated to all of the Company’s subsidiaries’ existing and future indebtedness and other liabilities, including obligations to policyholders. The Debentures do not limit the Company’s or the Company’s subsidiaries’ ability to incur additional debt, including debt that ranks senior in right of payment and upon liquidation to the Debentures.

The Debentures rank equally in right of payment and upon liquidation with (i) any indebtedness the terms of which provide that such indebtedness ranks equally with the Debentures, including guarantees of such indebtedness, (ii) the Company’s existing 8.125% fixed-to-floating rate junior subordinated debentures due 2068 (the “8.125% Debentures”), (iii) the Company’s Income Capital Obligation Notes due 2067, issuable pursuant to the Junior Subordinated Indenture, dated as of February 12, 2007, between the Company and Wilmington Trust Company (the “ICON securities”), (iv) our trade accounts payable, and (v) any of our indebtedness owed to a person who is our subsidiary or employee.

12. Debt (continued)

Long-Term Debt Maturities

Long-term debt maturities (at par values), as of December 31, 2014 are summarized as follows:

2015	$ 456
2016	275
2017	712
2018	320
2019	413
Thereafter	4,025

Shelf Registrations

On August 9, 2013, the Company filed with the Securities and Exchange Commission (the "SEC") an automatic shelf registration statement (Registration No. 333-190506) for the potential offering and sale of debt and equity securities. The registration statement allows for the following types of securities to be offered: debt securities, junior subordinated debt securities, preferred stock, common stock, depositary shares, warrants, stock purchase contracts, and stock purchase units. In that The Hartford is a well-known seasoned issuer, as defined in Rule 405 under the Securities Act of 1933, the registration statement went effective immediately upon filing and The Hartford may offer and sell an unlimited amount of securities under the registration statement during the three-year life of the registration statement.

Contingent Capital Facility

The Company is party to a put option agreement that provides The Hartford with the right to require the Glen Meadow ABC Trust, a Delaware statutory trust, at any time and from time to time, to purchase The Hartford's junior subordinated notes in a maximum aggregate principal amount not to exceed $500. Under the Put Option Agreement, The Hartford will pay the Glen Meadow ABC Trust premiums on a periodic basis, calculated with respect to the aggregate principal amount of notes that The Hartford had the right to put to the Glen Meadow ABC Trust for such period. The Hartford has agreed to reimburse the Glen Meadow ABC Trust for certain fees and ordinary expenses. The Company holds a variable interest in the Glen Meadow ABC Trust where the Company is not the primary beneficiary. As a result, the Company did not consolidate the Glen Meadow ABC Trust. As of December 31, 2014, The Hartford has not exercised its right to require Glen Meadow ABC Trust to purchase the notes. As a result, the notes remain a source of capital for the HFSG Holding Company.

Revolving Credit Facilities

On October 31, 2014, the Company entered into a senior unsecured five-year revolving credit facility (the "Credit Facility") that provides for up to $1.0 billion of unsecured credit through October 31, 2019, available in U.S. dollars, Euro, Sterling, Canadian dollars, and Japanese Yen, and terminated its $1.75 billion credit facility expiring January 6, 2016. As of December 31, 2014, there were no borrowings outstanding under the Credit Facility. The Credit Facility is available for general corporate purposes. Of the total availability under the Credit Facility, up to $250 is available to support letters of credit issued on behalf of the Company or subsidiaries of the Company. Under the Credit Facility, the Company must maintain a minimum level of consolidated net worth of $13.5 billion. The definition of consolidated net worth under the terms of the Credit Facility excludes AOCI and includes the Company's outstanding junior subordinated debentures and perpetual preferred securities, net of discount. In addition, the Company's maximum ratio of consolidated total debt to consolidated total capitalization permitted under the Credit Facility is 35%, and the maximum ratio of subsidiary debt to consolidated total capitalization is 10%. As of December 31, 2014, the Company was in compliance with all financial covenants under the Credit Facility.

HLIKK previously had four revolving credit facilities in support of operations. These credit facilities were transfered with the sale of HLIKK on June 30, 2014.

Commercial Paper

On December 18, 2014 the Board of Directors revised the Company's commercial paper issuance authorization from $2.0 billion to $1.0 billion to align the program with the Company's $1.0 billion five year revolving credit facility which became effective on October 31, 2014. On December 23, 2014, the Company entered into an agreement with a dealer under the commercial paper program. While The Hartford's maximum borrowings available under its commercial paper program are $1.0 billion, the Company is dependent upon market conditions to access short-term financing through the issuance of commercial paper to investors. There is no commercial paper outstanding as of December 31, 2014.

13. Income Taxes

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions, as applicable. Income (loss) from continuing operations before income taxes included income (loss) from domestic operations of $1,736, $1,473 and $(106) for the years ended December 31, 2014, 2013 and 2012, and income (loss) from foreign operations of $(37), $(2) and $17 for the years ended December 31, 2014, 2013 and 2012.

The provision (benefit) for income taxes consists of the following:

	For the years ended December 31,		
	2014	2013	2012
Income Tax Expense (Benefit)			
Current - U.S. Federal	$ (62)	$ 219	$ 33
International	2	—	—
Total current	**(60)**	**219**	**33**
Deferred - U.S. Federal	410	27	(342)
Total income tax expense (benefit)	**$ 350**	**$ 246**	**$ (309)**

Deferred tax assets and liabilities on the consolidated balance sheets represent the tax consequences of differences between the financial reporting and tax basis of assets and liabilities.

Deferred tax assets (liabilities) include the following:

	As of December 31,	
Deferred Tax Assets	**2014**	**2013**
Tax discount on loss reserves	$ 573	$ 632
Tax basis deferred policy acquisition costs	163	207
Unearned premium reserve and other underwriting related reserves	456	434
Investment-related items [1]	1,020	1,641
Insurance product derivatives	44	13
Employee benefits	677	523
Alternative minimum tax credit	652	823
Net operating loss carryover [1]	1,936	1,093
Foreign tax credit carryover	178	163
Capital loss carryover	172	—
Other	—	63
Total Deferred Tax Assets	**5,871**	**5,592**
Valuation Allowance	(181)	(4)
Deferred Tax Assets, Net of Valuation Allowance	**5,690**	**5,588**
Deferred Tax Liabilities		
Financial statement deferred policy acquisition costs and reserves	(1,040)	(894)
Net unrealized gains on investments	(1,489)	(669)
Other depreciable and amortizable assets	(217)	(185)
Other	(47)	—
Total Deferred Tax Liabilities	**(2,793)**	**(1,748)**
Net Deferred Tax Asset	**$ 2,897**	**$ 3,840**

[1] On July 18, 2014, the U.S. Internal Revenue Service issued Internal Revenue Code Section 446 Directive ("the Directive") regarding the tax treatment of hedging gains and losses related to the hedging of variable annuity guaranteed minimum benefits such as contracts with GMDB and GMWB riders. The Directive accelerated the tax deduction related to previously deferred investment hedging losses. While the acceleration did not have a material effect on the Company's overall consolidated deferred tax asset, the Directive resulted in a re-characterization of deferred tax assets. The changes were a decrease in temporary differences for investment-related items and an increase in net operating loss carryover.

13. Income Taxes (continued)

The Company has recorded a deferred tax asset valuation allowance that is adequate to reduce the total deferred tax asset to an amount that will more likely than not be realized. In assessing the need for a valuation allowance, management considered future taxable temporary difference reversals, future taxable income exclusive of reversing temporary differences and carryovers, taxable income in open carry back years and other tax planning strategies. From time to time, tax planning strategies could include holding a portion of debt securities with market value losses until recovery, altering the level of tax exempt securities held, making investments which have specific tax characteristics, and business considerations such as asset-liability matching. Management views such tax planning strategies as prudent and feasible and would implement them, if necessary, to realize the deferred tax assets.

As shown in the deferred tax assets (liabilities) table above, included in net deferred income taxes are the future tax benefits associated with the net operating loss carryover, foreign tax credit carryover, capital loss carryover, and alternative minimum tax credit carryover.

	For the years ended December 31,				Expiration	
	2014		2013			
	Carryover amount	Expected tax benefit, gross	Carryover amount	Expected tax benefit, gross	Dates	Amount
Net operating loss carryover	$ 5,547	$ 1,936	$ 3,123	$ 1,093	2016 - 2017	$ 3
					2023 - 2033	$ 5,544
Foreign tax credit carryover	$ 178	$ 178	$ 163	$ 163	2018 - 2024	$ 178
Capital loss carryover	$ 491	$ 172	$ —	$ —	2019	$ 491
Alternative minimum tax credit carryover	$ 652	$ 652	$ 823	$ 823	No expiration	$ —

Net operating loss carryover

As of December 31, 2014 and 2013, the net deferred tax asset included the expected tax benefit attributable to net operating losses of $5,547 and $3,123, respectively, consisting of U.S. losses of $5,508 and $3,123, respectively, and foreign losses of $39 and $0. If unutilized, the U.S. losses expire as follows: $3 from 2016-2017, $5,544 from 2023-2033. Utilization of these loss carryovers is dependent upon the generation of sufficient future taxable income. Due to limitations on the use of certain losses, a valuation allowance of $9 has been established in order to recognize only the portion of net operating losses that will more likely than not be realized.

Most of the net operating loss carryover originated from the Company's U.S. and international annuity business, including from the hedging program. Given the sale of the Japan subsidiary in June 2014, and continued runoff of the U.S. fixed and variable annuity business, the exposure to taxable losses from the Talcott Resolution business is significantly lessened. Given the expected earnings of its property and casualty, group benefits and mutual fund businesses, the Company expects to generate sufficient taxable income in the future to utilize its net operating loss carryover net of the recorded valuation allowance. Although the Company projects there will be sufficient future taxable income to fully recover the remainder of the loss carryover, the Company's estimate of the likely realization may change over time.

Alternative minimum tax credit and foreign tax credit carryover

As of December 31, 2014 and 2013, the net deferred tax asset included the expected tax benefit attributable to alternative minimum tax credit carryover of $652 and $823 and foreign tax credit carryover of $178 and $163 respectively. The alternative minimum tax credits have no expiration date and the foreign tax credit carryover expire from 2018 to 2024. These credits are available to offset regular federal income taxes from future taxable income and although the Company believes there will be sufficient future regular federal taxable income, there can be no certainty that future events will not affect the ability to utilize the credits. Additionally, the use of the foreign tax credits generally depends on the generation of sufficient taxable income to first utilize all U.S. net operating loss carryover. However, the Company has identified certain investments which allow for utilization of the foreign tax credits without first using the net operating loss carryover. Consequently, the Company believes it is more likely than not the foreign tax credit carryover will be fully realized. Accordingly, no valuation allowance has been provided on either the alternative minimum tax carryover or foreign tax credit carryover.

Capital loss carryover

As of December 31, 2014 and 2013, the net deferred tax asset included the expected tax benefit attributable to the capital loss carryover of $491 and $0, respectively. The capital loss carryover of $491 at December 31, 2014 was largely due to the loss on sale of the Company’s Japan subsidiary, HLIKK, which has been accounted for as discontinued operations. If unutilized, the capital loss carryover will expire in 2019. Utilization of the capital loss carryover requires the Company to realize sufficient taxable capital gains. While the Company has some ability to utilize the capital loss carryover by generating capital gains through tax planning strategies, the Company concluded that it is more likely than not that this asset will not be realized and, accordingly, in 2014, the Company has recorded a valuation allowance of $172 through discontinued operations.

13. Income Taxes (continued)

Included in Other liabilities in the Consolidated Balance Sheets as of December 31, 2014 and 2013 are net deferred tax liabilities related to Japan of $0 and $61, respectively. The net deferred tax liability of $61 as of December 31, 2013 was comprised of taxes on future taxable income related to owed reinsurance recoverables, loss reserves and foreign currency translation adjustments.

As of December 31, 2014 the Company had a current income tax receivable of $38, of which $2 was related to Canada and due from a foreign jurisdiction. As of December 31, 2013 the Company had a current income tax receivable of $72, of which $70 was a payable related to Japan and due to a foreign jurisdiction.

The Company's unrecognized tax benefits were unchanged during the years ended December 31, 2014, 2013, and 2012, remaining at $48 as of December 31, 2014, and 2013. This entire amount, if it were recognized, would affect the effective tax rate in the period it is released.

The Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years prior to 2007. The federal audit of the years 2007-2011 is expected to conclude in 2015 and it is reasonably possible the Company may be able to reduce part of or the entire amount of the unrecognized tax benefits within the next 12 months. Apart from the possible reduction in unrecognized tax benefits, management does not expect the conclusion of the federal audit for the 2007-2011 years will have a material impact on the consolidated financial condition or results of operations. Management believes that adequate provision has been made in the financial statements for any potential assessments that may result from tax examinations and other tax-related matters for all open tax years.

The Company classifies interest and penalties (if applicable) as income tax expense in the consolidated financial statements. The Company recognized interest expense of $0, $5, and $0 for the years ended December 31, 2014, 2013 and 2012, respectively. The Company had approximately $1 of interest payable for 2014 and 2013. The Company does not believe it would be subject to any penalties in any open tax years and, therefore, has not booked any accrual for penalties.

A reconciliation of the tax provision (benefit) at the U.S. Federal statutory rate to the provision (benefit) for income taxes is as follows:

	For the years ended December 31,		
	2014	**2013**	**2012**
Tax provision (benefit) at U.S. Federal statutory rate	$ 595	$ 515	$ (31)
Tax-exempt interest	(138)	(138)	(141)
Dividends received deduction	(114)	(139)	(145)
Valuation allowance	5	(2)	—
Other	2	10	8
Provision (benefit) for income taxes	**$ 350**	**$ 246**	**$ (309)**

14. Commitments and Contingencies

Contingencies Relating to Corporate Litigation and Regulatory Matters

Management evaluates each contingent matter separately. A loss is recorded if probable and reasonably estimable. Management establishes liabilities for these contingencies at its "best estimate," or, if no one number within the range of possible losses is more probable than any other, the Company records an estimated liability at the low end of the range of losses.

Litigation

The Hartford is involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending or providing indemnity for third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Hartford accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. Subject to the uncertainties discussed below under the caption "Asbestos and Environmental Claims," management expects that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to the consolidated financial condition, results of operations or cash flows of The Hartford.

The Hartford is also involved in other kinds of legal actions, some of which assert claims for substantial amounts. These actions include, among others, and in addition to the matters described below, putative state and federal class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, underpayment of claims or improper underwriting practices in connection with various kinds of insurance policies, such as personal and commercial automobile, property, life and inland marine; improper sales practices in connection with the sale of life insurance and other investment products; and improper fee arrangements in connection with investment products. The Hartford also is involved in individual actions in which punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims. Like many other insurers, The Hartford also has been joined in actions by asbestos plaintiffs asserting, among other things, that insurers had a duty to protect the public from the dangers of asbestos and that insurers committed unfair trade practices by asserting defenses on behalf of their policyholders in the underlying asbestos cases. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to the consolidated financial condition of The Hartford. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, the outcome in certain matters could, from time to time, have a material adverse effect on the Company's results of operations or cash flows in particular quarterly or annual periods.

In addition to the inherent difficulty of predicting litigation outcomes, the Mutual Funds Litigation identified below purports to seek substantial damages for unsubstantiated conduct spanning a multi-year period based on novel applications of complex legal theories. The alleged damages are not quantified or factually supported in the complaint, and, in any event, the Company's experience shows that demands for damages often bear little relation to a reasonable estimate of potential loss. The court has made no substantive legal decisions defining the scope of the claims or the potentially available damages, and no legal precedent has been identified that would aid in determining a reasonable estimate of potential loss. Accordingly, management cannot reasonably estimate the possible loss or range of loss, if any.

Mutual Funds Litigation - In February 2011, a derivative action was brought on behalf of six Hartford retail mutual funds in the United States District Court for the District of New Jersey, alleging that Hartford Investment Financial Services, LLC ("HIFSCO"), an indirect subsidiary of the Company, received excessive advisory and distribution fees in violation of its statutory fiduciary duty under Section 36(b) of the Investment Company Act of 1940. HIFSCO moved to dismiss and, in September 2011, the motion was granted in part and denied in part, with leave to amend the complaint. In November 2011, plaintiffs filed an amended complaint on behalf of The Hartford Global Health Fund, The Hartford Conservative Allocation Fund, The Hartford Growth Opportunities Fund, The Hartford Inflation Plus Fund, The Hartford Advisors Fund, and The Hartford Capital Appreciation Fund. Plaintiffs seek to rescind the investment management agreements and distribution plans between HIFSCO and these funds and to recover the total fees charged thereunder or, in the alternative, to recover any improper compensation HIFSCO received, in addition to lost earnings. HIFSCO filed a partial motion to dismiss the amended complaint and, in December 2012, the court dismissed without prejudice the claims regarding distribution fees and denied the motion with respect to the advisory fees claims. In March 2014, the plaintiffs filed a new complaint that, among other things, added as new plaintiffs The Hartford Floating Rate Fund and The Hartford Small Company Fund and named as a defendant Hartford Funds Management Company, LLC ("HFMC"), an indirect subsidiary of the Company which assumed the role as advisor to the funds as of January 2013. Discovery is ongoing. HFMC and HIFSCO dispute the allegations and expect to file a motion for summary judgment in the second quarter of 2015.

14. Commitments and Contingencies (continued)

Asbestos and Environmental Claims

The Company continues to receive asbestos and environmental claims. Asbestos claims relate primarily to bodily injuries asserted by people who came in contact with asbestos or products containing asbestos. Environmental claims relate primarily to pollution and related clean-up costs.

The Company wrote several different categories of insurance contracts that may cover asbestos and environmental claims. First, the Company wrote primary policies providing the first layer of coverage in an insured's liability program. Second, the Company wrote excess policies providing higher layers of coverage for losses that exhaust the limits of underlying coverage. Third, the Company acted as a reinsurer assuming a portion of those risks assumed by other insurers writing primary, excess and reinsurance coverages. Fourth, subsidiaries of the Company participated in the London Market, writing both direct insurance and assumed reinsurance business.

Significant uncertainty limits the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid losses and expenses related to environmental and particularly asbestos claims. The degree of variability of reserve estimates for these exposures is significantly greater than for other more traditional exposures.

In the case of the reserves for asbestos exposures, factors contributing to the high degree of uncertainty include inadequate loss development patterns, plaintiffs' expanding theories of liability, the risks inherent in major litigation, and inconsistent emerging legal doctrines. Furthermore, over time, insurers, including the Company, have experienced significant changes in the rate at which asbestos claims are brought, the claims experience of particular insureds, and the value of claims, making predictions of future exposure from past experience uncertain. Plaintiffs and insureds also have sought to use bankruptcy proceedings, including "pre-packaged" bankruptcies, to accelerate and increase loss payments by insurers. In addition, some policyholders have asserted new classes of claims for coverages to which an aggregate limit of liability may not apply. Further uncertainties include insolvencies of other carriers and unanticipated developments pertaining to the Company's ability to recover reinsurance for asbestos and environmental claims. Management believes these issues are not likely to be resolved in the near future.

In the case of the reserves for environmental exposures, factors contributing to the high degree of uncertainty include expanding theories of liability and damages, the risks inherent in major litigation, inconsistent decisions concerning the existence and scope of coverage for environmental claims, and uncertainty as to the monetary amount being sought by the claimant from the insured.

The reporting pattern for assumed reinsurance claims, including those related to asbestos and environmental claims, is much longer than for direct claims. In many instances, it takes months or years to determine that the policyholder's own obligations have been met and how the reinsurance in question may apply to such claims. The delay in reporting reinsurance claims and exposures adds to the uncertainty of estimating the related reserves.

It is also not possible to predict changes in the legal and legislative environment and their effect on the future development of asbestos and environmental claims.

Given the factors described above, the Company believes the actuarial tools and other techniques it employs to estimate the ultimate cost of claims for more traditional kinds of insurance exposure are less precise in estimating reserves for certain of its asbestos and environmental exposures. For this reason, the Company principally relies on exposure-based analysis to estimate the ultimate costs of these claims and regularly evaluates new account information in assessing its potential asbestos and environmental exposures. The Company supplements this exposure-based analysis with evaluations of the Company's historical direct net loss and expense paid and reported experience, and net loss and expense paid and reported experience by calendar and/or report year, to assess any emerging trends, fluctuations or characteristics suggested by the aggregate paid and reported activity.

As of December 31, 2014 and 2013, the Company reported $1.7 billion of net asbestos reserves and $247 and $276 of net environmental reserves, respectively. The Company believes that its current asbestos and environmental reserves are appropriate. However, analyses of future developments could cause The Hartford to change its estimates and ranges of its asbestos and environmental reserves, and the effect of these changes could be material to the Company's consolidated operating results and liquidity.

Lease Commitments

The total rental expense on operating leases was $62, $79, and $105 in 2014, 2013, and 2012, respectively, which excludes sublease rental income of $4, $8, and $6 in 2014, 2013 and 2012, respectively.

14. Commitments and Contingencies (continued)

Future minimum lease commitments as of December 31, 2014 are as follows:

	Operating Leases
2015	$ 42
2016	35
2017	29
2018	22
2019	14
Thereafter	12
Total minimum lease payments [1]	**$ 154**

[1] Excludes expected future minimum sublease income of approximately $3, $2, $2, $2, $2 and $3 in 2015, 2016, 2017, 2018, 2019 and thereafter respectively.

The Company's lease commitments consist primarily of lease agreements for office space, data processing, furniture and fixtures, office equipment, and transportation equipment that expire at various dates. Capital lease assets are included in property and equipment.

Unfunded Commitments

As of December 31, 2014, the Company has outstanding commitments totaling $865, of which $604 is committed to fund limited partnership and other alternative investments, which may be called by the partnership during the commitment period to fund the purchase of new investments and partnership expenses. Additionally, $246 is related to mortgage loans the Company is expecting to fund in the first half of 2015. The remaining outstanding commitments are related to various funding obligations associated with private placement securities.

Guaranty Funds and Other Insurance-related Assessments

In all states, insurers licensed to transact certain classes of insurance are required to become members of a guaranty fund. In most states, in the event of the insolvency of an insurer writing any such class of insurance in the state, members of the funds are assessed to pay certain claims of the insolvent insurers. A particular state's fund assesses its members based on their respective written premiums in the state for the classes of insurance in which the insolvent insurer was engaged. Assessments are generally limited for any year to one or two percent of the premiums written per year depending on the state.

The Hartford accounts for guaranty fund and other related assessments in accordance with Accounting Standards Codification 405-30, "Insurance-Related Assessments." Liabilities for guaranty fund and other insurance-related assessments are accrued when an assessment is probable, when it can be reasonably estimated, and when the event obligating the Company to pay an imposed or probable assessment has occurred. Liabilities for guaranty funds and other insurance-related assessments are not discounted and are included as part of other liabilities in the Consolidated Balance Sheets. As of December 31, 2014 and 2013, the liability balance was $131 and $138 respectively. As of December 31, 2014 and 2013, $42 and $37, respectively, related to premium tax offsets were included in other assets.

Derivative Commitments

Certain of the Company's derivative agreements contain provisions that are tied to the financial strength ratings of the individual legal entity that entered into the derivative agreement as set by nationally recognized statistical rating agencies. If the legal entity's financial strength were to fall below certain ratings, the counterparties to the derivative agreements could demand immediate and ongoing full collateralization and in certain instances demand immediate settlement of all outstanding derivative positions traded under each impacted bilateral agreement. The settlement amount is determined by netting the derivative positions transacted under each agreement. If the termination rights were to be exercised by the counterparties, it could impact the legal entity's ability to conduct hedging activities by increasing the associated costs and decreasing the willingness of counterparties to transact with the legal entity. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position as of December 31, 2014 is $1.0 billion. Of this $1.0 billion the legal entities have posted collateral of $1.3 billion in the normal course of business. In addition, the Company has posted collateral of $41 associated with a customized GMWB derivative. Based on derivative market values as of December 31, 2014, a downgrade of one level below the current financial strength ratings by either Moody's or S&P could require approximately an additional $4 to be posted as collateral. Based on derivative market values as of December 31, 2014, a downgrade by either Moody's or S&P of two levels below the legal entities' current financial strength ratings could require approximately an additional $18 of assets to be posted as collateral. These collateral amounts could change as derivative market values change, as a result of changes in our hedging activities or to the extent changes in contractual terms are negotiated. The nature of the collateral that we would post, if required, would be primarily in the form of U.S. Treasury bills, U.S. Treasury notes and government agency securities.

14. Commitments and Contingencies (continued)

Guarantees

In the ordinary course of selling businesses or entities to third parties, the Company has agreed to indemnify purchasers for losses arising out of breaches of representations and warranties with respect to the business or entities being sold, covenants and obligations of the Company and/or its subsidiaries following the closing. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. The Company does not expect to make any payments on these guarantees and is not carrying any liabilities associated with these guarantees.

15. Equity

Series F Preferred Stock

In 2010, the Company issued 23 million depositary shares, each representing a 1/40th interest in the Company's 7.25% Series F mandatory convertible preferred stock at a price of $25 per depositary share and received net proceeds of approximately $556. Cumulative dividends on each share of the Series F mandatory convertible preferred stock were payable at a rate of 7.25% per annum on the initial liquidation preference of $1,000 per share. The Series F mandatory convertible preferred stock was converted to 21.2 million shares of common stock on April 1, 2013.

Allianz SE Warrants

In 2012, the Company repurchased 69,351,806 Series B and Series C warrants, at an exercise price of $25.23, for $300 representing all of the outstanding warrants held by Allianz. Under the terms of the investment agreement, these warrants initially entitled Allianz to purchase 69,115,324 shares of the Company's common stock at an exercise price of $25.32 per share. The warrant repurchase was settled on April 17, 2012.

Capital Purchase Program ("CPP") Warrants

As of December 31, 2014 and 2013, respectively, the Company has 7.2 million and 32.4 million CPP warrants outstanding and exercisable. The CPP warrants were issued in 2009 as part of a program established by the U.S. Department of the Treasury under the Emergency Economic Stabilization Act of 2008. The CPP warrants expire in 2019.

CPP warrant exercises were 25.2 million and 18.1 million during the years ended December 31, 2014 and 2013, respectively. During the year ended December 31, 2013, the Company also repurchased 1.6 million CPP warrants for $33 under the Company's authorized equity repurchase program.

The declaration of common stock dividends by the Company in excess of a threshold triggers a provision in the Company's warrant agreement with The Bank of New York Mellon resulting in adjustments to the CPP warrant exercise price. Accordingly, the CPP warrant exercise price was $9.388, $9.504 and $9.599 as of December 31, 2014, 2013 and 2012, respectively. The exercise price will be settled by the Company's withholding the number of common shares issuable upon exercise of the warrants equal to the value of the aggregate exercise price of the warrants so exercised determined by reference to the closing price of the Company's common stock on the trading day on which the warrants are exercised and notice is delivered to the warrant agent.

Equity Repurchase Program

In 2014, the Board of Directors approved increases aggregating $1.525 billion in the Company's authorized equity repurchase program, bringing the total authorization for equity repurchases to $2.775 billion for the period January 1, 2014 through December 31, 2015, with $979 remaining as of December 31, 2014.

During the year ended December 31, 2014, the Company repurchased 49.5 million common shares for $1,796. During the period January 1, 2015 to February 24, 2015, the Company repurchased 4.1 million common shares for $165.

Statutory Results

The domestic insurance subsidiaries of The Hartford prepare their statutory financial statements in conformity with statutory accounting practices prescribed or permitted by the applicable state insurance department which vary materially from U.S. GAAP. Prescribed statutory accounting practices include publications of the National Association of Insurance Commissioners ("NAIC"), as well as state laws, regulations and general administrative rules. The differences between statutory financial statements and financial statements prepared in accordance with U.S. GAAP vary between domestic and foreign jurisdictions. The principal differences are that statutory financial statements do not reflect deferred policy acquisition costs and limit deferred income taxes, predominately use interest rate and mortality assumptions prescribed by the NAIC for life benefit reserves, generally carry bonds at amortized cost, and present reinsurance assets and liabilities net of reinsurance.

Statutory net income and statutory capital and surplus are as follows:

	For the years ended December 31,		
Statutory Net Income	**2014**	**2013**	**2012**
U.S. life insurance subsidiaries, includes domestic captive insurance subsidiaries	$ 415	$ 2,144	$ 592
Property and casualty insurance subsidiaries	1,228	1,217	883
Total	**$ 1,643**	**$ 3,361**	**$ 1,475**

15. Equity (continued)

Statutory Capital and Surplus	As of December 31, 2014	2013
U.S. life insurance subsidiaries, includes domestic captive insurance subsidiaries for 2013	$ 7,157	$ 6,639
Property and casualty insurance subsidiaries	8,069	8,022
Total	**$ 15,226**	**$ 14,661**

The Company also held regulatory capital and surplus for its former operations in Japan until the sale of those operations on June 30, 2014. Under the accounting practices and procedures governed by Japanese regulatory authorities, the Company’s statutory capital and surplus for its Japan operations was $1.2 billion, as of December 31, 2013.

Regulatory Capital Requirements

The Company's U.S. insurance companies' states of domicile impose risk-based capital (“RBC”) requirements. The requirements provide a means of measuring the minimum amount of statutory capital and surplus (referred to collectively as "capital") appropriate for an insurance company to support its overall business operations based on its size and risk profile. Regulatory compliance is determined by a ratio of a company's total adjusted capital (“TAC”) to its authorized control level RBC (“ACL RBC”). Companies below specific trigger points or ratios are classified within certain levels, each of which requires specified corrective action. The minimum level of TAC before corrective action commences (“Company Action Level”) is two times the ACL RBC. The adequacy of a company's capital is determined by the ratio of a company's TAC to its Company Action Level, known as the "RBC ratio". All of the Company's operating insurance subsidiaries had RBC ratios in excess of the minimum levels required by the applicable insurance regulations. On an aggregate basis, the Company's U.S. property and casualty insurance companies' RBC ratio was in excess of 200% of its Company Action Level as of December 31, 2014 and 2013. The RBC ratios for the Company's principal life insurance operating subsidiaries were all in excess of 425% of their Company Action Levels as of December 31, 2014 and 2013. The reporting of RBC ratios is not intended for the purpose of ranking any insurance company, or for use in connection with any marketing, advertising, or promotional activities.

Similar to the RBC ratios that are employed by U.S. insurance regulators, regulatory authorities in the international jurisdictions in which the Company operates generally establish minimum solvency requirements for insurance companies. All of the Company's international insurance subsidiaries have solvency margins in excess of the minimum levels required by the applicable regulatory authorities.

Dividend Restrictions

Dividends to the HFSG Holding Company from its insurance subsidiaries are restricted. The payment of dividends by Connecticut-domiciled insurers is limited under the insurance holding company laws of Connecticut. These laws require notice to and approval by the state insurance commissioner for the declaration or payment of any dividend, which, together with other dividends or distributions made within the preceding twelve months, exceeds the greater of (i) 10% of the insurer’s policyholder surplus as of December 31 of the preceding year or (ii) net income (or net gain from operations, if such company is a life insurance company) for the twelve-month period ending on the thirty-first day of December last preceding, in each case determined under statutory insurance accounting principles. In addition, if any dividend of a Connecticut-domiciled insurer exceeds the insurer’s earned surplus, it requires the prior approval of the Connecticut Insurance Commissioner. The insurance holding company laws of the other jurisdictions in which The Hartford’s insurance subsidiaries are incorporated (or deemed commercially domiciled) generally contain similar (although in certain instances somewhat more restrictive) limitations on the payment of dividends. Dividends paid to HFSG Holding Company by its life insurance subsidiaries are further dependent on cash requirements of HLI and other factors. In addition to statutory limitations on paying dividends, the Company also takes other items into consideration when determining dividends from subsidiaries. These considerations include, but are not limited to expected earnings and capitalization of the subsidiary, regulatory capital requirements and liquidity requirements of the individual operating company.

In 2014, HFSG Holding Company received approximately $2.5 billion in dividends from its property-casualty insurance subsidiaries through a series of transactions affecting the property and casualty and life insurance subsidiaries, including $1.4 billion of extraordinary dividends. As a result of the extraordinary dividend received in July 2014, Hartford Fire has no remaining ordinary dividend capacity for the twelve months following. As such, the Company does not anticipate taking any dividends from Hartford Fire until the third quarter of 2015. The dividends received from its property-casualty subsidiaries included $97 related to funding interest payments on an intercompany note between Hartford Holdings, Inc. (“HHI”) and Hartford Fire Insurance Company.

In 2015, the Company’s property-casualty insurance subsidiaries are permitted to pay up to a maximum of approximately $1.5 billion in dividends to HFSG Holding Company without prior approval from the applicable insurance commissioner. In 2015, HFSG Holding Company anticipates receiving approximately $600 in dividends from its property-casualty insurance subsidiaries, net of any dividends paid by its property-casualty subsidiaries to fund interest payments on an intercompany note between HHI and Hartford Fire Insurance Company.

15. Equity (continued)

On January 30, 2015, HLA paid an extraordinary dividend of $100, based on approval received from the CTDOI. As a result of dividends and distributions taken in the preceding twelve months, effective March 3, 2015, HLA will have approximately $155 of ordinary dividend capacity available for the remainder of 2015. HFSG Holding Company anticipates receiving an additional $100 of dividends from HLA during 2015.

On January 30, 2015, HLIC paid an extraordinary dividend of $500, based on approval received from the CTDOI. As a result of this dividends, HLIC has no ordinary dividend capacity for the remainder of 2015. HFSG Holding Company anticipates receiving an additional $500 of extraordinary dividends from HLIC during 2015.

There are no current restrictions on the HFSG Holding Company's ability to pay dividends to its shareholders.

Restricted Net Assets

The Company's insurance subsidiaries had net assets of $21 billion, determined in accordance with U.S. GAAP, that were restricted from payment to the HFSG Holding Company, without prior regulatory approval at December 31, 2014.

16. Changes in and Reclassifications From Accumulated Other Comprehensive Income (Loss)

Changes in AOCI, net of tax and DAC, by component consist of the following:

For the year ended December 31, 2014

	Net Unrealized Gain on Securities	OTTI Losses in OCI	Net Gain (Loss) on Cash Flow Hedging Instruments	Foreign Currency Translation Adjustments	Pension and Other Postretirement Plan Adjustments	Total AOCI
Beginning balance	$ 987	$ (12)	$ 108	$ 91	$ (1,253)	$ (79)
OCI before reclassifications	1,474	3	89	13	(437)	1,142
Amounts reclassified from AOCI	(91)	4	(47)	(112)	111	(135)
Net OCI	1,383	7	42	(99)	(326)	1,007
Ending balance	**$ 2,370**	**$ (5)**	**$ 150**	**$ (8)**	**$ (1,579)**	**$ 928**

For the year ended December 31, 2013

	Net Unrealized Gain on Securities	OTTI Losses in OCI	Net Gain (Loss) on Cash Flow Hedging Instruments	Foreign Currency Translation Adjustments	Pension and Other Postretirement Plan Adjustments	Total AOCI
Beginning balance	$ 3,418	$ (47)	$ 428	$ 406	$ (1,362)	$ 2,843
OCI before reclassifications	(1,416)	51	(195)	(337)	74	(1,823)
Amounts reclassified from AOCI	(1,015)	(16)	(125)	22	35	(1,099)
Net OCI	(2,431)	35	(320)	(315)	109	(2,922)
Ending balance	**$ 987**	**$ (12)**	**$ 108**	**$ 91**	**$ (1,253)**	**$ (79)**

For the year ended December 31, 2012

	Net Unrealized Gain on Securities	OTTI Losses in OCI	Net Gain (Loss) on Cash Flow Hedging Instruments	Foreign Currency Translation Adjustments	Pension and Other Postretirement Plan Adjustments	Total AOCI
Beginning balance	$ 1,511	$ (99)	$ 516	$ 574	$ (1,251)	$ 1,251
OCI before reclassifications	1,928	149	58	(168)	(320)	1,647
Amounts reclassified from AOCI	(21)	(97)	(146)	—	209	(55)
Net OCI	1,907	52	(88)	(168)	(111)	1,592
Ending balance	**$ 3,418**	**$ (47)**	**$ 428**	**$ 406**	**$ (1,362)**	**$ 2,843**

16. Changes in and Reclassifications From Accumulated Other Comprehensive Income (Loss) (continued)

Reclassifications from AOCI consist of the following:

AOCI	Amount Reclassified from AOCI			Affected Line Item in the Consolidated Statement of Operations
	For the year ended December 31, 2014	For the year ended December 31, 2013	For the year ended December 31, 2012	
Net Unrealized Gain on Securities

[1] The December 31, 2013 amount includes $1.5 billion of net unrealized gains on securities relating to the sales of the Retirement Plans and Individual Life businesses.
[2] The December 31, 2013 amount includes $71 of net gains on cash flow hedging instruments relating to the sales of the Retirement Plans and Individual Life businesses.
[3] The December 31, 2014 amount relates to the sale of the HLIKK variable and fixed annuity business and the December 31, 2013 amount relates to the sale of the UK variable annuity business.

17. Employee Benefit Plans

The Company maintains The Hartford Retirement Plan for U.S. Employees, a U.S. qualified defined benefit pension plan (the "Plan") that covers substantially all U.S. employees hired prior to January 1, 2013. The Company also maintains non-qualified pension plans to provide retirement benefits previously accrued that are in excess of Internal Revenue Code limitations.

Effective December 31, 2012, the Company amended the Plan to freeze participation and benefit accruals. As a result, employees do not accrue further benefits under the plan after that date, although interest will continue to accrue to existing cash balance formula account balances. Compensation earned by employees up to December 31, 2012 is used for purposes of calculating benefits under the Plan but there are no future benefit accruals after that date. Participants as of December 31, 2012 will continue to earn vesting credit with respect to their frozen accrued benefits as they continue to work. The freeze also applies to The Hartford Excess Pension Plan II, the Company's non-qualified excess benefit plan for certain highly compensated employees.

The Company provides certain health care and life insurance benefits for eligible retired employees. The Company's contribution for health care benefits will depend upon the retiree's date of retirement and years of service. In addition, the plan has a defined dollar cap for certain retirees which limits average Company contributions. The Hartford has prefunded a portion of the health care obligations through a trust fund where such prefunding can be accomplished on a tax effective basis. Effective January 1, 2002, Company-subsidized retiree medical, retiree dental and retiree life insurance benefits were eliminated for employees with original hire dates with the Company on or after January 1, 2002. The Company also amended its postretirement medical, dental and life insurance coverage plans to no longer provide subsidized coverage for employees who retire on or after January 1, 2014.

Assumptions

Pursuant to accounting principles related to the Company's pension and other postretirement obligations to employees under its various benefit plans, the Company is required to make a significant number of assumptions in order to calculate the related liabilities and expenses each period. The two economic assumptions that have the most impact on pension and other postretirement expense are the discount rate and the expected long-term rate of return on plan assets. In determining the discount rate assumption, the Company utilizes a discounted cash flow analysis of the Company's pension and other postretirement obligations and currently available market and industry data. The yield curve utilized in the cash flow analysis is comprised of bonds rated Aa or higher with maturities primarily between zero and thirty years. Based on all available information, it was determined that 4.00% and 3.75% were the appropriate discount rates as of December 31, 2014 to calculate the Company's pension and other postretirement obligations, respectively.

The Company determines the expected long-term rate of return assumption based on an analysis of the Plan portfolio's historical compound rates of return since 1979 (the earliest date for which comparable portfolio data is available) and over 5 year and 10 year periods. The Company selected these periods, as well as shorter durations, to assess the portfolio's volatility, duration and total returns as they relate to pension obligation characteristics, which are influenced by the Company's workforce demographics. In addition, the Company also applies long-term market return assumptions to an investment mix that generally anticipates 60% fixed income securities, 20% equity securities and 20% alternative assets to derive an expected long-term rate of return. Based upon these analyses, management determined the long-term rate of return assumption to be 7.10% as of December 31, 2014 and 2013. To determine the Company's 2015 expense, the Company plans to apply an expected long-term rate of return on plan assets of 6.90%.

Weighted average assumptions used in calculating the Company's benefit obligations and the net amount recognized were as follows:

	Pension Benefits		Other Postretirement Benefits	
	For the years ended December 31,			
	2014	2013	2014	2013
Discount rate	4.00%	4.75%	3.75%	4.25%

Weighted average assumptions used in calculating the net periodic benefit cost for the Company's pension plans were as follows:

	For the years ended December 31,		
	2014	2013	2012
Discount rate	4.75%	4.00%	4.50%
Expected long-term rate of return on plan assets	7.10%	7.10%	7.30%
Rate of increase in compensation levels	—%	3.75%	3.75%

17. Employee Benefit Plans (continued)

Weighted average assumptions used in calculating the net periodic benefit cost for the Company's other postretirement plans were as follows:

	For the years ended December 31,		
	2014	2013	2012
Discount rate	4.25%	3.50%	4.00%
Expected long-term rate of return on plan assets	7.10%	7.10%	7.30%

Assumed health care cost trend rates were as follows:

	For the years ended December 31,		
	2014	2013	2012
Pre-65 health care cost trend rate	7.70%	8.05%	8.45%
Post-65 health care cost trend rate	5.60%	5.70%	6.15%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	5.00%	5.00%	4.75%
Year that the rate reaches the ultimate trend rate	2023	2021	2020

A one-percentage point change in assumed health care cost trend rates would have an insignificant effect on the amounts reported for other postretirement plans.

Obligations and Funded Status

The following tables set forth a reconciliation of beginning and ending balances of the benefit obligation and fair value of plan assets, as well as the funded status of the Company's defined benefit pension and postretirement health care and life insurance benefit plans. International plans represent an immaterial percentage of total pension assets, liabilities and expense and, for reporting purposes, are combined with domestic plans.

	Pension Benefits		Other Postretirement Benefits	
	For the years ended December 31,			
Change in Benefit Obligation	2014	2013	2014	2013
Benefit obligation — beginning of year	**$ 5,516**	**$ 6,080**	**$ 312**	**$ 313**
Service cost (excluding expenses)	2	1	—	—
Interest cost	258	238	14	11
Plan participants' contributions	—	—	26	24
Actuarial loss (gain)	(8)	14	38	39
Settlements	(319)	—	—	—
Change in assumptions	846	(508)	16	(19)
Benefits paid	(268)	(308)	(70)	(58)
Retiree drug subsidy	—	—	2	2
Foreign exchange adjustment	(2)	(1)	—	—
Benefit obligation — end of year	**$ 6,025**	**$ 5,516**	**$ 338**	**$ 312**

Settlements in 2014 were primarily the result of the Company's extension of a limited time voluntary lump sum offer to approximately 13,500 vested participants in the U.S. qualified defined benefit pension plan who had separated from service, but who had not yet commenced annuity benefits. The Company made lump sum benefit payments totaling $274 to approximately 5,600 vested participants. The Company also made lump sum payments of $45 to eligible cash balance participants independent of the voluntary lump sum offer.

Changes in assumptions in 2014 include an increase of $279 related to the Company's use of updated mortality rates reflecting improved life expectancy and an increase of $567 related to a reduction in the discount rate.

17. Employee Benefit Plans (continued)

	Pension Benefits		Other Postretirement Benefits	
	For the years ended December 31,			
Change in Plan Assets	**2014**	**2013**	**2014**	**2013**
Fair value of plan assets — beginning of year	**$ 4,630**	**$ 4,850**	**$ 213**	**$ 220**
Actual return on plan assets	565	(27)	16	13
Employer contributions	101	101	—	—
Benefits paid [1]	(245)	(278)	(33)	(20)
Expenses paid	(24)	(15)	—	—
Settlements	(319)	—	—	—
Foreign exchange adjustment	(1)	(1)	—	—
Fair value of plan assets — end of year	**$ 4,707**	**$ 4,630**	**$ 196**	**$ 213**
Funded status — end of year	**$ (1,318)**	**$ (886)**	**$ (142)**	**$ (99)**

[1] Other postretirement benefits paid represent non-key employee postretirement medical benefits paid from the Company's prefunded trust fund.

The fair value of assets for pension benefits, and hence the funded status, presented in the table above excludes assets of $129 and $123 as of December 31, 2014 and 2013, respectively, held in rabbi trusts and designated for the non-qualified pension plans. The assets do not qualify as plan assets; however, the assets are available to pay benefits for certain retired, terminated and active participants. Such assets are available to the Company’s general creditors in the event of insolvency. The assets consist of equity and fixed income investments. To the extent the fair value of these rabbi trusts were included in the table above, pension plan assets would have been $4,836 and $4,753 as of December 31, 2014 and 2013, respectively, and the funded status of pension benefits would have been $(1,189) and $(763) as of December 31, 2014 and 2013, respectively.

The accumulated benefit obligation for all defined benefit pension plans was $6,024 and $5,515 as of December 31, 2014 and 2013, respectively.

The following table provides information for the Company's defined benefit pension plans with an accumulated benefit obligation in excess of plan assets.

	As of December 31,	
	2014	**2013**
Projected benefit obligation	$ 6,025	$ 5,516
Accumulated benefit obligation	6,024	5,515
Fair value of plan assets	4,707	4,630

As of December 31, 2014, pension and other postretirement benefits plan assets totaling $4.9 billion were invested in the separate accounts of HLIC.

Amounts recognized in the Company's Consolidated Balance Sheets consist of:

	Pension Benefits		Other Postretirement Benefits	
	As of December 31,			
	2014	**2013**	**2014**	**2013**
Other liabilities	$ 1,318	$ 886	$ 142	$ 99

17. Employee Benefit Plans (continued)

Components of Net Periodic Benefit Cost and Other Amounts Recognized in Other Comprehensive Income (Loss)

Total net periodic benefit cost includes the following components:

	Pension Benefits			Other Postretirement Benefits		
	For the years ended December 31,					
	2014	2013	2012	2014	2013	2012
Service cost	$ 2	$ 1	$ 92	$ —	$ —	$ 2
Interest cost	258	238	250	14	11	14
Expected return on plan assets	(325)	(315)	(312)	(14)	(14)	(14)
Amortization of prior service credit	—	—	(9)	(7)	(7)	(4)
Amortization of actuarial loss	45	59	231	5	2	1
Settlements	128	—	1	—	—	—
Curtailment gain due to plan freeze	—	—	(11)	—	—	(1)
Net periodic benefit cost	**$ 108**	**$ (17)**	**$ 242**	**$ (2)**	**$ (8)**	**$ (2)**

Amounts recognized in other comprehensive income (loss) were as follows:

	Pension Benefits		Other Postretirement Benefits	
	For the years ended December 31,			
	2014	2013	2014	2013
Amortization of actuarial loss	$ 45	$ 59	$ 5	$ 2
Settlement loss	128	—	—	—
Amortization of prior service credit	—	—	(7)	(7)
Net gain (loss) arising during the year	(622)	137	(51)	(21)
Total	**$ (449)**	**$ 196**	**$ (53)**	**$ (26)**

Amounts in accumulated other comprehensive income (loss) on a before tax basis that have not yet been recognized as components of net periodic benefit cost consist of:

	Pension Benefits		Other Postretirement Benefits	
	As of December 31,			
	2014	2013	2014	2013
Net loss	$ (2,428)	$ (1,979)	$ (124)	$ (77)
Prior service credit	—	—	97	103
Total	**$ (2,428)**	**$ (1,979)**	**$ (27)**	**$ 26**

The estimated net loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost during 2015 is $58. The estimated prior service cost for the other postretirement benefit plans that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost during 2015 is $(7). The estimated net loss for the other postretirement plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost during 2015 is $5.

Plan Assets

Investment Strategy and Target Allocation

The overall investment strategy of the Plan is to maximize total investment returns to provide sufficient funding for present and anticipated future benefit obligations within the constraints of a prudent level of portfolio risk and diversification. With respect to asset management, the oversight responsibility of the Plan rests with The Hartford's Pension Fund Trust and Investment Committee composed of individuals whose responsibilities include establishing overall objectives and the setting of investment policy; selecting appropriate investment options and ranges; reviewing the asset allocation mix and asset allocation targets on a regular basis; and monitoring performance to determine whether or not the rate of return objectives are being met and that policy and guidelines are being followed. The Company believes that the asset allocation decision will be the single most important factor determining the long-term performance of the Plan.

17. Employee Benefit Plans (continued)

The Company's pension plan and other postretirement benefit plans' target allocation by asset category is presented in the table below.

	Target Asset Allocation			
	Pension Plans		Other Postretirement Plans	
	(minimum)	(maximum)	(minimum)	(maximum)
Equity securities	10%	25%	15%	35%
Fixed income securities	50%	70%	65%	85%
Alternative assets	10%	25%	—%	—%

Divergent market performance among different asset classes may, from time to time, cause the asset allocation to deviate from the desired asset allocation ranges. The asset allocation mix is reviewed on a periodic basis. If it is determined that an asset allocation mix rebalancing is required, future portfolio additions and withdrawals will be used, as necessary, to bring the allocation within tactical ranges.

The Company's pension plan and other postretirement benefit plans' weighted average asset allocation is presented in the table below.

	Pension Plans		Other Postretirement Plans	
	Percentage of Assets at Fair Value		Percentage of Assets at Fair Value	
	As of December 31,			
	2014	2013	2014	2013
Equity securities	21%	23%	25%	31%
Fixed income securities	62%	57%	75%	68%
Alternative assets	17%	20%	—%	1%
Total	**100%**	**100%**	**100%**	**100%**

The Plan assets are invested primarily in separate portfolios managed by HIMCO, a wholly-owned subsidiary of the Company, except for the international equity assets which are managed by a major financial institution. These portfolios encompass multiple asset classes reflecting the current needs of the Plan, the investment preferences and risk tolerance of the Plan and the desired degree of diversification. These asset classes include publicly traded equities, bonds and alternative investments and are made up of individual investments in cash and cash equivalents, equity securities, debt securities, asset-backed securities and hedge funds. Hedge fund investments represent a diversified portfolio of partnership investments in absolute-return investment strategies.

In addition, the Company uses U.S. Treasury bond futures contracts and U.S. Treasury STRIPS in a duration overlay program to adjust the duration of Plan assets to better match the duration of the benefit obligation.

Investment Valuation

For further discussion of the valuation of investments, see Note 5 - Fair Value Measurements of Notes to Consolidated Financial Statements.

17. Employee Benefit Plans (continued)

Pension Plan Assets

The fair values of the Company's pension plan assets by asset category are as follows:

	Pension Plan Assets at Fair Value as of December 31, 2014			
Asset Category	**Level 1**	**Level 2**	**Level 3**	**Total**
Short-term investments:	$ 56	$ 252	$ —	$ 308
Fixed Income Securities:				
Corporate	—	919	34	953
RMBS	—	181	28	209
U.S. Treasuries	24	1,198	5	1,227
Foreign government	—	65	5	70
CMBS	—	156	—	156
Other fixed income [1]	—	93	4	97
Equity Securities:				
Large-cap domestic	526	—	—	526
International	435	3	—	438
Other investments:				
Hedge funds	—	562	181	743
Total pension plan assets at fair value [2]	**$ 1,041**	**$ 3,429**	**$ 257**	**$ 4,727**

[1] Includes ABS, municipal bonds, and foreign bonds.

[2] Excludes approximately $42 of investment payables net of investment receivables that are excluded from this disclosure requirement because they are trade receivables in the ordinary course of business where the carrying amount approximates fair value. Also excludes approximately $22 of interest receivable.

17. Employee Benefit Plans (continued)

The fair values of the Company's pension plan assets by asset category are as follows:

Asset Category	Pension Plan Assets at Fair Value as of December 31, 2013			
	Level 1	Level 2	Level 3	Total
Short-term investments:	$ 13	$ 364	$ —	$ 377
Fixed Income Securities:				
Corporate	—	890	12	902
RMBS	—	156	2	158
U.S. Treasuries	10	922	1	933
Foreign government	—	42	4	46
CMBS	—	196	1	197
Other fixed income [1]	—	85	10	95
Equity Securities:				
Large-cap domestic	—	514	—	514
Mid-cap domestic	50	—	—	50
Small-cap domestic	50	—	—	50
International	459	1	—	460
Other investments:				
Hedge funds	—	499	361	860
Total pension plan assets at fair value [2]	**$ 582**	**$ 3,669**	**$ 391**	**$ 4,642**

[1] Includes ABS and municipal bonds.
[2] Excludes approximately $34 of investment payables net of investment receivables that are excluded from this disclosure requirement because they are trade receivables in the ordinary course of business where the carrying amount approximates fair value. Also excludes approximately $22 of interest receivable.

The tables below provide fair value level 3 rollforwards for the Pension Plan Assets for which significant unobservable inputs (Level 3) are used in the fair value measurement on a recurring basis. The Plan classifies the fair value of financial instruments within Level 3 if there are no observable markets for the instruments or, in the absence of active markets, if one or more of the significant inputs used to determine fair value are based on the Plan's own assumptions. Therefore, the gains and losses in the tables below include changes in fair value due to both observable and unobservable factors.

Pension Plan Asset Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

Assets	Corporate	RMBS	Foreign government	Other fixed income	Hedge funds	Totals
Fair Value as of January 1, 2014	**$ 12**	**$ 2**	**$ 4**	**$ 12**	**$ 361**	**$ 391**
Realized gains (losses), net	—	—	—	—	4	4
Changes in unrealized gains (losses), net	—	7	1	(5)	4	7
Purchases	12	3	2	6	219	242
Sales	(5)	(1)	(2)	(2)	(183)	(193)
Transfers into Level 3	20	17	—	7	—	44
Transfers out of Level 3	(5)	—	—	(9)	(224)	(238)
Fair Value as of December 31, 2014	**$ 34**	**$ 28**	**$ 5**	**$ 9**	**$ 181**	**$ 257**

During the year ended December 31, 2014, transfers into and (out) of Level 3 are primarily attributable to the appearance of or lack thereof of market observable information and the re-evaluation of the observability of pricing inputs.

17. Employee Benefit Plans (continued)

Pension Plan Asset Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

Assets	Corporate	RMBS	Foreign government	Other fixed income	Hedge funds	Totals
Fair Value as of January 1, 2013	**$ 3**	**$ 3**	**$ 2**	**$ 9**	**$ 263**	**$ 280**
Realized gains/(losses), net	—	—	—	—	(6)	(6)
Changes in unrealized gains/(losses), net	—	—	—	(1)	2	1
Purchases	12	—	2	10	200	224
Sales	(3)	(1)	—	(3)	(79)	(86)
Transfers into Level 3	—	—	—	1	36	37
Transfers out of Level 3	—	—	—	(4)	(55)	(59)
Fair Value as of December 31, 2013	**$ 12**	**$ 2**	**$ 4**	**$ 12**	**$ 361**	**$ 391**

During the year ended December 31, 2013, transfers in and/or (out) of Level 3 are primarily attributable to the availability of market observable information and the re-evaluation of the observability of pricing inputs.

There was no Company common stock included in the Plan's assets as of December 31, 2014 and 2013.

The fair value of the Company's other postretirement plan assets by asset category are as follows:

	Other Postretirement Plan Assets at Fair Value as of December 31, 2014			
Asset Category	**Level 1**	**Level 2**	**Level 3**	**Total**
Short-term investments	$ 8	$ 5	$ —	$ 13
Fixed Income Securities:				
Corporate	—	41	3	44
RMBS	—	22	3	25
U.S. Treasuries	1	44	—	45
Foreign government	—	2	—	2
CMBS	—	15	—	15
Other fixed income	—	7	—	7
Equity Securities:				
Large-cap	49	—	—	49
Total other postretirement plan assets at fair value [1]	$ 58	**$ 136**	$ 6	**$ 200**

[1] Excludes approximately $5 of investment payables net of investment receivables that are excluded from this disclosure requirement because they are trade receivables in the ordinary course of business where the carrying amount approximates fair value. Also excludes approximately $1 of interest receivable.

17. Employee Benefit Plans (continued)

The fair value of the Company's other postretirement plan assets by asset category are as follows:

	Other Postretirement Plan Assets at Fair Value as of December 31, 2013			
Asset Category	**Level 1**	**Level 2**	**Level 3**	**Total**
Short-term investments	$ —	$ 10	$ —	$ 10
Fixed Income Securities:				
Corporate	—	55	—	55
RMBS	—	19	—	19
U.S. Treasuries	—	38	—	38
Foreign government	—	1	—	1
CMBS	—	24	—	24
Other fixed income	—	4	—	4
Equity Securities:				
Large-cap	—	66	—	66
Total other postretirement plan assets at fair value [1]	$ —	**$ 217**	$ —	**$ 217**

[1] Excludes approximately $5 of investment payables net of investment receivables that are not carried at fair value and approximately $1 of interest receivable carried at fair value.

Other Postretirement Plan Asset Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

Assets	Corporate	RMBS	Foreign Government	Other Fixed Income	Totals
Fair Value as of January 1, 2014	**$ —**	**$ —**	**$ —**	**$ —**	**$ —**
Realized gains/(losses), net	—	—	—	—	—
Changes in unrealized gains/(losses), net	—	—	—	—	—
Purchases	3	3	—	—	6
Sales	—	—	—	—	—
Transfers into Level 3	—	—	—	—	—
Transfers out of Level 3	—	—	—	—	—
Fair Value as of December 31, 2014	**$ 3**	**$ 3**	**$ —**	**$ —**	**$ 6**

There was no Company common stock included in the other postretirement benefit plan assets as of December 31, 2014 and 2013.

Concentration of Risk

In order to minimize risk, the Plan maintains a listing of permissible and prohibited investments. In addition, the Plan has certain concentration limits and investment quality requirements imposed on permissible investment options. Permissible investments include U.S. equity, international equity, alternative asset and fixed income investments including derivative instruments. Derivative instruments include future contracts, options, swaps, currency forwards, caps or floors and will be used to control risk or enhance return but will not be used for leverage purposes.

Securities specifically prohibited from purchase include, but are not limited to: shares or fixed income instruments issued by The Hartford, short sales of any type within long-only portfolios, non-derivative securities involving the use of margin, leveraged floaters and inverse floaters, including money market obligations, natural resource real properties such as oil, gas or timber and precious metals.

Other than U.S. government and certain U.S. government agencies backed by the full faith and credit of the U.S. government, the Plan does not have any material exposure to any concentration risk of a single issuer.

Cash Flows

The following table illustrates the Company's contributions.

Employer Contributions	Pension Benefits	Other Postretirement Benefits
2014	$ 101	$ —
2013	$ 101	$ —

17. Employee Benefit Plans (continued)

In 2014, the Company, at its discretion, made $100 in contributions to the U.S. qualified defined benefit pension plan. The Company does not have a 2015 required minimum funding contribution for the U.S. qualified defined benefit pension plan. The Company has not determined whether, and to what extent, contributions may be made to the U. S. qualified defined benefit pension plan in 2015. The Company will monitor the funded status of the U.S. qualified defined benefit pension plan during 2015 to make this determination.

Employer contributions in 2014 and 2013 were made in cash and did not include contributions of the Company's common stock.

Benefit Payments

The following table sets forth amounts of benefits expected to be paid over the next ten years from the Company's pension and other postretirement plans as of December 31, 2014:

	Pension Benefits	Other Postretirement Benefits
2015	$ 318	$ 42
2016	324	40
2017	327	38
2018	332	35
2019	338	32
2020 - 2024	1,735	123
Total	**$ 3,374**	**$ 310**

In addition, the following table sets forth amounts of other postretirement benefits expected to be received under the Medicare Part D Subsidy over the next ten years as of December 31, 2014:

2015	$ 3
2016	3
2017	3
2018	3
2019	3
2020 - 2024	18
Total	**$ 33**

Investment and Savings Plan

Substantially all U.S. employees of the Company are eligible to participate in The Hartford Investment and Savings Plan under which designated contributions may be invested in common stock of The Hartford or certain other investments. The Company's contributions include a non-elective contribution of 2.0% of eligible compensation and a dollar-for-dollar matching contribution of up to 6.0% of eligible compensation contributed by the employee each pay period. The Company also maintains a non-qualified savings plan, The Hartford Excess Savings Plan, with the same level of Company matching contributions, with respect to employee compensation in excess of the limit that can be recognized under the tax-qualified Investment and Savings Plan. The Company discontinued non-elective contributions to the Excess Savings Plan effective December 31, 2013. Eligible compensation includes overtime and bonuses but is limited to a total, for the Investment and Savings Plan and Excess Savings Plan combined, of $1 annually. The total cost to The Hartford for these plans was approximately $113 and $123 for the years ended December 31, 2014 and 2013, respectively.

Prior to January 1, 2013, the contributions to The Hartford Investment and Savings Plan were matched at a 50% rate up to a Company contribution of 3.0% of base salary. In 2012, employees who had earnings of less than $110 thousand in the preceding year also received a contribution of 1.5% of base salary and employees who had earnings of $110 thousand or more in the preceding year received a contribution of 0.5% of base salary. The cost to The Hartford for this plan was approximately $58 for the year ended December 31, 2012.

Additionally, The Hartford has established defined contribution pension plans for certain employees of the Company's international subsidiaries. The cost to The Hartford for the years ended December 31, 2014, 2013, and 2012 for these plans was immaterial.

As of December 31, 2014, investment and savings plan assets totaling $368 million were invested in the separate accounts of HLIC.

18. Stock Compensation Plans

The Company's stock-based compensation plans are described below. Shares issued in satisfaction of stock-based compensation may be made available from authorized but unissued shares, shares held by the Company in treasury or from shares purchased in the open market. In 2014, 2013 and 2012, the Company issued shares from treasury in satisfaction of stock-based compensation.

The Company recognized stock-based compensation expense as follows:

	For the years ended December 31,		
	2014	2013	2012
Stock-based compensation plans expense	$ 98	$ 69	$ 95
Income tax benefit	(34)	(24)	(33)
Total stock-based compensation plans expense, after-tax	**$ 64**	**$ 45**	**$ 62**

In 2014, the Company modified an executive's awards to receive retirement treatment. The incremental compensation cost resulting from the modifications totaled $16 of which $11 was recognized at the modification date. The remainder is recognized over the remaining service period.

The Company did not capitalize any cost of stock-based compensation. As of December 31, 2014, the total compensation cost related to non-vested awards not yet recognized was $86, which is expected to be recognized over a weighted average period of 1.9 years.

Stock Plan

On May 21, 2014, at the Company's Annual Meeting of Shareholders, the shareholders approved The Hartford 2014 Incentive Stock Plan (the "Incentive Stock Plan") which supersedes and replaces earlier incentive stock plans and as a result is currently the only plan pursuant to which future stock-based awards may be granted (other than the Subsidiary Stock Plan and the Employee Stock Purchase Plan described below). The terms of the Incentive Stock Plan are substantially similar to the terms of the earlier incentive stock plans, with changes primarily to ensure alignment with market practices and simplify administration. These changes did not result in incremental compensation cost for outstanding awards. The Incentive Stock Plan provides for awards to be granted in the form of non-qualified or incentive stock options qualifying under Section 422 of the Internal Revenue Code, stock appreciation rights, performance shares, restricted stock or restricted stock units, or any other form of stock-based award. The maximum number of shares, subject to adjustments set forth in the Incentive Stock Plan, that may be issued to Company employees and third party service providers during the 10-year duration of the Incentive Stock Plan is 12,000,000 shares. If any award under an earlier incentive stock plan (other than the plan approved in 2000) is forfeited, terminated, surrendered, exchanged, expires unexercised, or is settled in cash in lieu of stock (including to effect tax withholding) or for the net issuance of a lesser number of shares than the number subject to the award, the shares of stock subject to such award (or the relevant portion thereof) shall be available for awards under the Incentive Stock Plan and such shares shall be added to the maximum limit. As of December 31, 2014, there were 12,603,158 shares available for future issuance.

The fair values of awards granted under the Incentive Stock Plan are measured as of the grant date and expensed ratably over the awards' vesting periods, generally 3 years. For stock option awards to retirement-eligible employees the Company recognizes the expense immediately or over a period shorter than the stated vesting period because the employees receive accelerated vesting upon retirement and therefore the vesting period is considered non-substantive.

Stock Option Awards

Under the Incentive Stock Plan, options granted have an exercise price at least equal to the market price of the Company's common stock on the date of grant, and an option's maximum term is not to exceed 10 years. Options generally become exercisable over a three year period commencing one year from the date of grant. Certain other options become exercisable at the later of three years from the date of grant or upon specified market appreciation of the Company's common shares.

The Company uses a hybrid lattice/Monte-Carlo based option valuation model (the "valuation model") that incorporates the possibility of early exercise of options into the valuation. The valuation model also incorporates the Company's historical termination and exercise experience to determine the option value.

The valuation model incorporates ranges of assumptions for inputs, and therefore, those ranges are disclosed below. The term structure of volatility is generally constructed utilizing implied volatilities from exchange-traded options, CPP warrants related to the Company's stock, historical volatility of the Company's stock and other factors. The Company uses historical data to estimate option exercise and employee termination within the valuation model, and accommodates variations in employee preference and risk-tolerance by segregating the grantee pool into a series of behavioral cohorts and conducting a fair valuation for each cohort individually. The expected term of options granted is derived from the output of the option valuation model and represents, in a mathematical sense, the period of time that options are expected to be outstanding. The risk-free rate for periods within the contractual life of the option is based on the U.S. Constant Maturity Treasury yield curve in effect at the time of grant.

18. Stock Compensation Plans (continued)

	For the years ended December 31,		
	2014	2013	2012
Expected dividend yield	1.7%	1.7%	1.3%
Expected annualized spot volatility	25.9% - 57.8%	31.1% - 48.1%	38.6% - 51.5%
Weighted average annualized volatility	35.1%	47.3%	51.4%
Risk-free spot rate	0.1% - 2.8%	0.1% - 1.9%	0.1% - 2.0%
Expected term	5.0 years	5.0 years	5.2 years

A summary of non-qualified stock option activity under the Company's Incentive Stock Plan is presented below.

	Number of Options (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
	For the year ended December 31, 2014			
Outstanding at beginning of year	4,534	$ 36.34		
Granted	925	$ 35.83		
Exercised	(603)	$ 20.03		
Forfeited	(608)	$ 68.53		
Expired	(503)	$ 65.96		
Outstanding at end of year	3,745	$ 29.64	7.4 years	$ 53
Outstanding, fully vested and expected to vest	3,688	$ 27.18	7.4 years	$ 50
Exercisable at end of year	1,705	$ 30.64	6.3 years	$ 26

Aggregate intrinsic value represents the value of the Company's closing stock price on the last trading day of the period in excess of the exercise price multiplied by the number of options outstanding or exercisable. The aggregate intrinsic value excludes the effect of stock options that have a zero or negative intrinsic value. The weighted average grant-date fair value per share of options granted during the years ended December 31, 2014, 2013, and 2012 was $10.59, $7.78 and $7.41, respectively. The total intrinsic value of options exercised during the years ended December 31, 2014, 2013 and 2012 was $10, $5, and $4, respectively.

Share Awards

Share awards granted under the Incentive Stock Plan and outstanding include restricted stock units, restricted stock and performance shares.

Restricted Stock and Restricted Stock Units

Restricted stock units are share equivalents that are credited with dividend equivalents. Dividend equivalents are accumulated and paid in incremental shares when the underlying units vest. Restricted stock are shares of The Hartford's common stock with restrictions as to transferability until vested. Restricted stock units and restricted stock awards are valued equal to the market price of the Company's common stock on the date of grant. Generally, restricted stock units vest at the end of or over three years; certain restricted stock units vest at the end of 5 years. Restricted stock awards were granted to non employee directors and generally vest in one year.

Performance Shares

Performance shares become payable within a range of 0% to 200% of the number of shares initially granted based upon the attainment of specific performance goals achieved at the end of or over three years. The performance shares vest at the end of or over three years; certain performance shares vest at the end of five years.

Performance share awards or portions thereof without market conditions are valued equal to the market price of the Company's common stock on the date of grant less a discount for the absence of dividends. Stock-compensation expense for these performance share awards without market conditions is based on a current estimate of the number of awards expected to vest and, therefore, may change during the performance period as new estimates of performance are available.

18. Stock Compensation Plans (continued)

Other performance share awards or portions thereof have a market condition based upon the Company's total shareholder return relative to a group of peer companies within a three year period. Stock compensation expense for these performance share awards is based on the number of awards expected to vest as estimated at the grant date and therefore does not change for changes in estimated performance. The Company uses a risk neutral Monte-Carlo valuation model that incorporates time to maturity, implied volatilities of the Company and the peer companies, and correlations between the Company and the peer companies and interest rates. The range for assumptions of inputs are disclosed below.

	For the years ended December 31,		
	2014	2013	2012
Volatility of common stock	31.6%	42.8%	70.0%
Average volatility of peer companies	17.0% - 29.0%	20.0% - 36.0%	26.0% - 75.0%
Average correlation coefficient of peer companies	62.0%	76.0%	78.0%
Risk-free spot rate	0.7%	0.4%	0.4%
Term	3.0 years	3.0 years	3.0 years

Total Share Awards

A summary of non-vested share award activity under the Company's Incentive Stock Plan is presented below.

	Restricted Stock and Restricted Stock Units		Performance Shares	
	Number of Shares (in thousands)	Weighted-Average Grant-Date Fair Value	Number of Shares (in thousands)	Weighted-Average Grant date Fair Value
Non-vested shares	For the year ended December 31, 2014			
Non-vested at beginning of year	7,172	$ 24.26	1,371	$ 24.95
Granted	1,824	$ 35.74	334	$ 36.45
Performance based adjustment	—	$ —	347	$ 20.63
Vested	(1,071)	$ 27.73	(880)	$ 20.63
Forfeited	(693)	$ 24.69	(109)	$ 26.79
Non-vested at end of year	7,232	$ 26.59	1,063	$ 30.55

The weighted average grant-date fair value per share of restricted stock units and restricted stock granted during the years ended December 31, 2014, 2013, and 2012 was $35.74, $27.72 and $21.97, respectively. The weighted average grant-date fair value per share of performance shares granted during the years ended December 31, 2014, 2013, and 2012 was $36.45, $27.92 and $20.63, respectively.

The total fair value of shares vested during the years ended December 31, 2014, 2013 and 2012 was $75, $42 and $20, respectively, based on actual or estimated performance factors. The Company did not make cash payments in settlement of stock compensation during the years ended December 31, 2014, 2013 and 2012.

Subsidiary Stock Plan

In 2013 the Company established a subsidiary stock-based compensation plan similar to The Hartford Incentive Stock Plan except that it awards non-public subsidiary stock as compensation. The Company recognized stock-based compensation plans expense of $4 and $1 in the years ended December 31, 2014 and 2013 for the subsidiary stock plan. Upon employee vesting of subsidiary stock, the Company will recognize a noncontrolling equity interest. Employees will be restricted from selling vested subsidiary stock to other than the Company and the Company will have discretion on the amount of stock to repurchase. Therefore the subsidiary stock will be classified as equity because it is not mandatorily redeemable.

18. Stock Compensation Plans (continued)

Employee Stock Purchase Plan

The Company sponsors The Hartford Employee Stock Purchase Plan ("ESPP"). Under this plan, eligible employees of The Hartford purchase common stock of the Company at a discount rate of 5% of the market price per share on the last trading day of the offering period. Accordingly, the plan is a noncompensatory plan. Employees purchase a variable number of shares of stock through payroll deductions elected as of the beginning of the offering period. The Company may sell up to 15,400,000 shares of stock to eligible employees under the ESPP. As of December 31, 2014, there were 5,193,622 shares available for future issuance. During the years ended December 31, 2014, 2013 and 2012, 258,609 shares, 321,723 shares, and 688,655 shares were sold, respectively. The weighted average per share fair value of the discount under the ESPP was $1.70, $1.00 and $1.03 during the years ended December 31, 2014 , 2013 and 2012, respectively. The fair value is estimated based on the 5% discount off the market price per share on the last trading day of the offering period.

19. Discontinued Operations

On June 30, 2014, the Company completed the sale of HLIKK and on December 12, 2013, the Company completed the sale of HLIL. For further information regarding these transactions, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

The following table summarizes the amounts related to discontinued operations in the Consolidated Statements of Operations.

	For the years ended December 31,		
	2014	2013	2012
Revenues			
Earned premiums	$ (1)	$ (1)	$ (6)
Fee income and other	239	713	865
Net investment income			
Securities available-for-sale and other	18	96	111
Equity securities, trading	134	6,200	4,564
Total net investment income	152	6,296	4,675
Net realized capital losses	(157)	(1,340)	(1,208)
Total revenues	**233**	**5,668**	**4,326**
Benefits, losses and expenses			
Benefits, losses and loss adjustment expenses	7	(98)	55
Benefits, losses and loss adjustment expenses - returns credited on international variable annuities	134	6,200	4,564
Amortization of DAC	—	907	(2)
Insurance operating costs and other expenses	23	127	153
Total benefits, losses and expenses	**164**	**7,136**	**4,770**
Income (loss) before income taxes	**69**	**(1,468)**	**(444)**
Income tax benefit	(2)	(521)	(187)
Income (loss) from operations of discontinued operations, net of tax	**71**	**(947)**	**(257)**
Net realized capital loss on disposal, net of tax [1]	(622)	(102)	(1)
Loss from discontinued operations, net of tax	**$ (551)**	**$ (1,049)**	**$ (258)**

[1] Includes income tax benefits of $265 on the sale of HLIKK and $219 on the sale of HLIL for the years ended December 31, 2014 and 2013, respectively.

20. Restructuring and Other Costs

As a result of a strategic business realignment announced in 2012, the Company is currently focusing on its Property & Casualty, Group Benefits and Mutual Fund businesses. In addition, the Company implemented restructuring activities in 2011 across several areas aimed at reducing overall expense levels. The Company intends to substantially complete the related restructuring activities over the next 6 months. For related discussion of the Company's business disposition transactions, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

Termination benefits related to workforce reductions and lease and other contract terminations have been accrued through December 31, 2014. Additional costs, mainly severance benefits and other related costs and professional fees, expected to be incurred subsequent to December 31, 2014, and asset impairment charges, if any, will be expensed in the period incurred as appropriate.

In 2013, the Company initiated a plan to consolidate its real estate operations, including the intention to exit certain facilities and relocate employees. The consolidation of real estate is consistent with the Company's strategic business realignment and follows the completion of sales of the Retirement Plans and Individual Life businesses. Asset related charges will be incurred over the remaining estimated useful life of facilities, and relocation and other maintenance charges will be recognized as incurred. The program costs will be recognized in the Corporate category for segment reporting. The Company intends to substantially complete the real estate consolidation activities over the next 12 months.

Restructuring and other costs of approximately $362, before tax have been incurred by the Company to date in connection with these activities. As the Company executes on its operational and strategic initiatives, the Company's estimate of and actual costs incurred for restructuring activities may differ from these estimates.

Estimated restructuring and other costs, including costs incurred to date, as of December 31, 2014 are as follows:

Commercial Lines	$	6
Personal Lines		3
Group Benefits		1
Mutual Funds		4
Talcott Resolution		69
Corporate		303
Total estimated restructuring and other costs	**$**	**386**

Restructuring and other costs, pre-tax incurred in connection with these activities are as follows:

	For the years ended December 31,		
	2014	2013	2012
Severance benefits	$ 16	$ 22	$ 148
Professional fees	1	19	44
Asset impairment charges	42	20	5
Contract termination and other charges	12	6	2
Total restructuring and other costs	**$ 71**	**$ 67**	**$ 199**

Restructuring and other costs costs, included in insurance operating costs and other expenses in the Consolidated Statements of Operations for each reporting segment, as well as the Corporate category are as follows:

	For the years ended December 31,		
	2014	2013	2012
Commercial Lines	$ —	$ 1	$ 5
Personal Lines	—	—	1
Group Benefits	—	—	1
Mutual Funds	—	1	3
Talcott Resolution	—	1	68
Corporate	71	64	121
Total restructuring and other costs	**$ 71**	**$ 67**	**$ 199**

20. Restructuring and Other Costs (continued)

The tables below provide roll-forwards for accrued restructuring and other costs included in other liabilities in the Consolidated Balance Sheets.

	For the year ended December 31, 2014				
	Severance Benefits and Related Costs	Professional Fees	Asset impairment charges	Contract Termination and Other Charges	Total Restructuring and Other Costs
Balance, beginning of period	$ 22	$ —	$ —	$ 6	$ 28
Accruals/provisions	16	—	43	12	71
Payments/write-offs	(28)	—	(43)	(12)	(83)
Balance, end of period	**$ 10**	**$ —**	**$ —**	**$ 6**	**$ 16**

	For the year ended December 31, 2013				
	Severance Benefits and Related Costs	Professional Fees	Asset impairment charges	Contract Termination and Other Charges	Total Restructuring and Other Costs
Balance, beginning of period	$ 70	$ —	$ —	$ —	$ 70
Accruals/provisions	22	19	20	6	67
Payments/write-offs	(70)	(19)	(20)	—	(109)
Balance, end of period	**$ 22**	**$ —**	**$ —**	**$ 6**	**$ 28**

21. Quarterly Results (Unaudited)

	Three months ended							
	March 31,		June 30,		September 30,		December 31,	
	2014	2013	2014	2013	2014	2013	2014	2013
Revenues	$ 4,612	$ 6,300	$ 4,616	$ 4,734	$ 4,769	$ 4,862	$ 4,617	$ 4,777
Benefits, losses and expenses	4,003	5,994	4,466	4,497	4,273	4,416	4,173	4,295
Income from continuing operations, net of tax	466	243	150	233	388	365	345	384
Income (loss) from discontinued operations, net of tax	29	(484)	(617)	(423)	—	(72)	37	(70)
Net income (loss)	495	(241)	(467)	(190)	388	293	382	314
Less: Preferred stock dividends and discount accretion	—	10	—	—	—	—	—	—
Net income (loss) available to common shareholders [1]	$ 495	$ (251)	$ (467)	$ (190)	$ 388	$ 293	$ 382	$ 314
Basic earnings (losses) per common share	$ 1.10	$ (0.58)	$ (1.04)	$ (0.42)	$ 0.89	$ 0.65	$ 0.89	$ 0.70
Diluted earnings (losses) per common share	$ 1.03	$ (0.49)	$ (1.00)	$ (0.39)	$ 0.86	$ 0.60	$ 0.86	$ 0.65
Weighted average common shares outstanding, basic	449.8	436.3	450.6	451.4	437.2	452.1	429.6	451.1
Weighted average shares outstanding and dilutive potential common shares [2]	478.6	493.1	467.9	489.0	450.8	490.6	442.6	486.1

[1] Weighted average common shares outstanding and dilutive potential common shares are used in the calculation of diluted earnings (losses) per common share in periods of losses when the impact is dilutive to income from continuing operations, net of tax, available to common shareholders.

[2] The three months ended March 31, 2013 includes the dilutive effect of the assumed conversion of 21.2 million preferred shares. The preferred shares converted to 21.2 million common shares in April 2013.

[1] Net payables to affiliates as of December 31, 2013 was net of a $655 note receivable from White River Life Reinsurance Company ("WRR"), an affiliate captive reinsurer, and the Company, pursuant to an intercompany agreement. On April 30, 2014, the Company dissolved WRR which resulted in WRR paying off this intercompany note.

[2] In 2013, the Company inadvertently reported the comprehensive loss as comprehensive income in this table causing two subtotals to be incorrectly stated as well. This error had no impact on the reported comprehensive income of the parent company and did not impact any other disclosures in this document and has been subsequently corrected.

[1] In 2014, the Company prospectively changed its methodology for allocating assets and liabilities to align with the legal entity capital of Property and Casualty, Group Benefits, Mutual Funds and Talcott Resolution and, within Property and Casualty, align assets and liabilities following the Company's internal capital allocation models. This resulted in a reallocation of assets and liabilities from Corporate to the segments.

[2] Includes interest expense, goodwill impairment, loss on extinguishment of debt, and reinsurance loss on disposition.

[3] Excludes life insurance pursuant to Regulation S-X.

[4] For the years ended, December 31, 2013 and 2012, Talcott Resolution was recast to reflect the impact of the sale of HLIKK. For further information regarding this transaction, see Note 2 - Business Dispositions of Notes to Consolidated Financial Statements.

The Hartford
Senior Executive Officer Severance Pay Plan
(Tier 1)

This document describes your benefits under The Hartford Senior Executive Officer Severance Pay Plan, and includes the text of the Plan and other important information.

As Amended and Restated Effective October 1, 2014

THE HARTFORD SENIOR EXECUTIVE OFFICER SEVERANCE PAY PLAN

1. **Purpose**

The purpose of The Hartford Senior Executive Officer Severance Pay Plan (the "Plan") is to assist in occupational transition by providing severance pay for Tier 1 executives covered by this Plan whose employment is terminated under conditions set forth in this Plan.

2. Application of Plan

This Plan, which was initially effective February 22, 2011, is amended and restated in the form of this document effective October 1, 2014. Any termination of employment of a Covered Employee (as defined in Section 3 below) that has an Effective Date (as defined in Section 3 below) on or after October 1, 2014 shall be governed exclusively by the terms of the Plan as amended and restated herein, and by no other plan, policy, practice or arrangement.

3. Covered Employees

You are a Covered Employee under this Plan if, on your last day actively at work (the "Effective Date"), you are an "Employee" (as defined below) who (1) qualifies as an "Eligible Employee" (as described in Section 4 below), (2) is paid on a salaried basis, and (3) is identified as a Tier 1 executive whom the Plan Administrator has approved for participation in this Plan. A person who is on an authorized leave of absence, paid or unpaid (including medical leave of absence), of not more than twenty-six (26) weeks and who would otherwise qualify as a Covered Employee, but for being on leave of absence, will be considered a Covered Employee for purposes of this Plan. Notwithstanding the foregoing provisions of this Section 3, you will be an Eligible Employee hereunder only if you have agreed to such non-competition, non-solicitation, non-disparagement and other restrictive covenants as are required to be executed by the Plan Administrator.

For purposes of the Plan, "Employee" means any person regularly employed on the United States payroll by The Hartford Financial Services Group, Inc., Hartford Fire Insurance Company, or any of their designated subsidiaries or affiliates which have adopted this Plan with respect to their employees (collectively, the "Company"), but shall not include any person who performs services for the Company as an independent contractor or under any other non-employee classification, or who is classified by the Company as, or determined by the Company to be, an independent contractor.

4. Severance Pay Upon Termination of Employment

If you are a Covered Employee and the Company terminates your employment and you sign a Separation and Release Agreement, as described in Section 12, acceptable to the Company, you will be eligible to receive severance benefits in accordance with the terms of this Plan **except** if:

(1) you are terminated for misconduct or other disciplinary action, which by way of example may include, but is not limited to, the following: serious violations of Company policies; violation of the Company's Code of Ethics and Business Conduct, or any confidentiality agreement or other similar policy or undertaking of the Company; statements by you, either oral or written, that are false or misleading or that damage or have the potential to damage the Company; violation of any covenant or restriction applicable to you; or any Company-initiated termination for cause or for actions that the Company deems to be immoral, unethical, inimical to the best interests of the Company, or illegal;

(2) provided that the Effective Date is prior to a Change of Control as defined in Section 11, you are under investigation, at the time severance pay would otherwise be due, for misconduct deemed by management to be a serious violation of the Company's policies or its Code of Ethics and Business Conduct;

(3) you refuse a Comparable Position offered as alternative employment with the Company. For purposes of this Plan, "Comparable Position" shall mean a position with materially the same Base Pay (your annual base salary at the Effective Date, excluding all bonus and incentive compensation and any special remuneration) and Target Bonus (your annual bonus opportunity at the target level of payout as in effect at the Effective Date) with similar duties, or having different duties that, in management's judgment, you are able to perform and are consistent with your experience, and that either is located within a 50-mile radius of the previous position's location or does not entail a substantially longer commute from your home;

(4) you terminate employment with the Company prior to the date selected by the Company as your last day of active employment;

(5) you are terminated while on an approved leave of absence (paid or unpaid) after 26 weeks of such leave;

(6) you are terminated following acceptance or refusal of employment or continued employment in connection with any sale, divestiture or outsourcing described in Section 10;

(7) except as provided in subparagraph (3) above or in Section 11 with respect to a Termination for Good Reason, you initiate termination of employment for any reason, including resigning, retiring or failing to return to work immediately following the expiration of any leave of absence;

(8) your employment terminates as a result of your death, or as a result of your Disability. For this purpose, a termination as a result of Disability is (i) a termination of your employment by the Company as a result of a determination by the Board or the appropriate committee thereof that you are incapable of substantially fulfilling your

positions, duties, responsibilities and obligations on account of physical, mental or emotional incapacity resulting from injury, sickness or disease for a period of (A) at least four consecutive months, or (B) more than six months in any twelve month period, or (ii) a termination of your employment on account of total disability that results in your qualifying for benefits under the Company's Long Term Disability Plan for Salaried Employees; or

(9) your employment terminates due to your mandatory retirement at or after your 65th birthday, provided that such mandatory retirement would not violate any applicable provision of the Federal Age Discrimination in Employment Act of 1967, as amended.

5. <u>Schedule of Severance Pay</u>

You will be eligible to receive severance benefits under this Section if you are a Covered Employee and the Company terminates your employment other than in any of the circumstances described in subparagraphs (1) through (9) of Section 4. In such circumstances, but subject to your entering into (and not revoking) a Separation and Release Agreement, as described in Section 12, you will receive severance benefits equal to two times the sum of your Base Pay plus Target Bonus.

The severance payment provided shall be in addition to any Base Pay earned, but unpaid, for services rendered to the Company on or prior to the Effective Date, plus any paid time off accrued as of such date.

6. <u>Pro-Rata Annual Bonus and Treatment of Long Term Incentives</u>

If you receive severance pay in accordance with Section 5, you may also be eligible to receive a pro-rata annual bonus under the applicable Company annual incentive plan for the year in which the Effective Date occurs, payable as described in Section 8**.** The amount of the pro-rata annual bonus, if any, shall be determined at the Company's discretion, based on Company and individual performance for the year in which the Effective Date occurs. There is no promise of a bonus or a particular amount; along with other factors, post-termination activities, such as taking a position with a competitor, may be taken into account by the Company. In the event of a Termination for Good Reason or an involuntary termination by the Company following a Change of Control pursuant to Section 11, in no event shall the pro-rata annual bonus be less than a pro-rata bonus payable at the same percentage of the Target Bonus as is generally applicable to executives whose employment did not terminate.

If you receive severance pay in accordance with Section 5, you will also vest pro-rata (subject to achievement of any applicable performance criteria) in outstanding unvested long term incentives, including stock options, performance shares, performance units, restricted stock and restricted stock unit awards, if, and to the extent, so provided in the award agreement under The Hartford 2010 Incentive Stock Plan, The Hartford 2014 Incentive Stock Plan, or other applicable long term incentive plan under which such awards were granted; in such a case, the timing of the payment of such awards will be as set forth in such award agreement.

7. Notice or Pay in Lieu of Notice

Except as provided in this Plan, you shall not be entitled to any notice of termination or pay in lieu thereof. At the sole discretion of the Company, notice may be provided.

8. Payment of Severance Pay and Pro-Rata Annual Bonus

Any severance pay provided to you under this Plan shall be paid in a lump sum. Severance pay shall be paid within 60 days of the Effective Date.

Any pro-rata annual bonus payable in accordance with Section 6 shall be paid no later than the same time as similar awards are paid to other executives participating in the plans or programs under which the awards are paid, but in no event later than March 15 of the calendar year following the calendar year in which the Effective Date occurs, provided that, if you would have been a "covered employee" as defined in Section 162(m) of the Internal Revenue Code (the "Code") for the calendar year in which the Effective Date occurs but for the termination of your employment, the pro-rata annual bonus shall be payable to you only if, when, and to the extent that the Compensation and Management Development Committee of the Board of Directors of The Hartford Financial Services Group, Inc., certifies that the performance goals applicable to the annual bonus, as preestablished by such Committee in accordance with Section 162(m) of the Code, have been attained.

As provided in Section 4(2), prior to a Change of Control as defined in Section 11, any severance pay or pro rata annual bonus that would otherwise be payable in accordance with Section 5 or 6 shall not be payable under the Plan to an employee who is under investigation for any such misconduct at the time payment would otherwise be due.

In the event of your death after the Effective Date but prior to your receipt of severance pay, the payment that would otherwise have been due to you shall be paid within 30 days of your death, subject to applicable law, to your spouse, if any, or if you are not married, to your estate.

9. Employee Benefit Plan Coverage While Receiving Severance Pay

Except as may otherwise be specifically provided by the applicable employee benefit plan, as it may be amended from time to time, severance pay and a pro-rata annual bonus and any other payment made by the Company after the Effective Date shall not be taken into account for any purpose under any employee benefit plan of the Company, including but not limited to The Hartford Investment and Savings Plan, The Hartford Excess Savings Plan, The Hartford Retirement Plan for U.S. Employees and The Hartford Excess Pension Plan II.

If you receive severance pay under Section 5, then, provided that the following provision is not deemed discriminatory under applicable law, until the end of the month in which the one-year anniversary of the Effective Date occurs, the Company will reimburse you

for the cost of COBRA continuation coverage for you and your eligible dependents under the medical and dental benefit plans of the Company or its affiliates in which you and such dependents were participating as of the Effective Date. The reimbursement will be for the excess of the amount that you pay for such COBRA continuation coverage over the amount that you would pay for such coverage if you were still in the employ of the Company; provided that the reimbursement will be paid only so long as you otherwise continue to be eligible for such COBRA continuation coverage in accordance with the terms of the Company's medical and dental benefit plans and are not eligible for comparable coverage under the plan of a subsequent employer. An initial reimbursement shall be made during the 10 calendar days following six months from the Effective Date for payments made through that date; a second and final reimbursement, if necessary, shall be made within 10 days following the one-year anniversary of the Effective Date for any additional reimbursement due; provided that for purposes of this sentence, the Effective Date shall be deemed to occur at such time as you have also had a separation from service, as determined in accordance with any policies or practices that the Company shall adopt in accordance with, or as otherwise determined pursuant to, Section 409A of the Code and the regulations and guidance promulgated thereunder.

If you receive severance pay under Section 5, you will also be entitled to outplacement services, provided by the Company or its designee at the Company's expense, for a period of 12 months or such lesser period as you may require such services; such outplacement services to start within three months of the Effective Date.

10. Sale, Divestiture, Outsourcing, Closure or Relocation

(A) If the Company or a subsidiary, affiliate, division, department, business or function of the Company or a portion thereof at which you are employed is sold, divested or outsourced in a transaction that does not qualify as a Change of Control under Section 11 hereof, you are eligible to receive severance benefits under Section 5 and a pro-rata annual bonus in accordance with Section 6 of this Plan provided that:

(1) you are a Covered Employee at the time of the transaction whose employment with the Company terminates as a result of the transaction,

(2) you are not offered a Comparable Position with the Company, the acquirer, the vendor or the divested unit,

(3) you do not decline an interview or an invitation to apply for a Comparable Position or to determine the availability of a Comparable Position with the Company, the acquirer, the vendor or the divested unit (except where the Plan Administrator determines that business circumstances warrant otherwise),

(4) you do not accept a position with the Company, the acquirer, the vendor or the divested unit, and

(5) you are not otherwise ineligible for severance pay for any of the reasons described in Section 4 of this Plan.

An offer for a Comparable Position includes one that is contingent upon satisfaction of ordinary and customary requirements of the prospective employer, including, but not limited to, establishing work authorization under applicable immigration laws, satisfying drug-testing and background investigation standards, and executing employment agreements that include restrictive covenants and arbitration provisions.

If you continue employment with the Company or are hired on or immediately following the Effective Date by the acquirer, vendor or the divested unit, then severance payments and a pro-rata annual bonus will not be provided under this Plan. If you are hired after the Effective Date by the acquirer, vendor or the divested unit, then any severance payment or pro-rata annual bonus will be made only so long as your employment is not related to or in support of the sold, divested or outsourced business or operations.

The provisions of this Section shall apply to all sales, divestitures and outsourcings (whether accomplished as sales of assets, sales of corporate entities, service agreements or any other method), unless such sale, divestiture or outsourcing qualifies as a Change of Control as defined in Section 11 hereof, in which event the provisions of Section 11 shall apply.

(B) If the entire Company or the portion of the Company where you are employed is closed or relocated and you are not offered a Comparable Position by the Company, then you are eligible to receive severance pay under Section 5 (provided that you are not otherwise ineligible for severance pay for any of the reasons described in Section 4 of this Plan). You will not receive severance pay or a pro-rata annual bonus if you are offered a Comparable Position with the Company or if you accept a non-comparable position with the Company.

11. Severance Pay in the Event of a Change of Control

(A) Post-Change of Control Severance Pay. In the event of a Change of Control (as defined below), if, within the two-year period following such Change of Control, you are a Covered Employee whom the Plan Administrator has approved for participation in this Plan or whom the Plan Administrator had approved for participation in this Plan as of immediately prior to the Change of Control and (i) you are involuntarily terminated by the Company for any reason other than in a Termination For Cause (as defined below), a termination due to death or a termination on account of total disability that results in your qualifying for benefits under the Company's Long Term Disability Plan for Salaried Employees, or (ii) you voluntarily terminate employment with the Company in a Termination for Good Reason (as defined below), then you shall receive severance pay and be eligible for a pro-rata annual bonus as provided in Sections 5 and 6, payable as described in Section 8. For this purpose, when determining the amounts under Sections 5 and 6, the Base Pay and Target Bonus taken into account shall not be less than your greatest Base Pay and Target Bonus in effect at any time since the date immediately prior to the Change of Control. Following a Change of Control, the term "Company" shall also include any successor in interest to any of the entities included in the definition of Company immediately prior to the Change of Control and any affiliate of such successor entity by which a person who was a Covered Employee immediately prior to the Change

of Control is employed.

(B) Reduction of Severance Pay to Reduced Amount in Certain Circumstances.

(i) Determination of Existence of Reduced Amount. Notwithstanding anything herein to the contrary, in the event that Deloitte and Touche or such other nationally recognized public accounting firm as is designated by the Company prior to the Change of Control (the "Accounting Firm") shall determine that your receipt of payments hereunder would subject you to tax under Section 4999 of the Code, the Accounting Firm shall determine whether some amount of the aggregate payments meets the definition of Reduced Amount (defined below). All determinations made by the Accounting Firm under this Section shall be binding upon the Company and you and shall be made within 60 days of your termination of employment.

(ii) Consequences of Determination of Existence of Reduced Amount. If the Accounting Firm determines that there is a Reduced Amount as provided in the preceding paragraph, then the aggregate severance payments shall be reduced to such Reduced Amount, provided that the net after-tax amount that the Accounting Firm projects that you will receive, if such reduction is made, is not less than the net after-tax amount that the Accounting Firm projects that you will receive if such reduction is not made.

(iii) Consequences of Overpayment or Underpayment of Amounts. As a result of the uncertainty in the application of Section 4999 of the Code at the time of the initial determination by the Accounting Firm under Section 11(B)(i) hereof, it is possible that amounts will have been paid or distributed by the Company pursuant to the Plan that should not have been so paid or distributed ("Overpayment"), or that additional amounts that will have not been paid or distributed by the Company pursuant to this Plan that could have been so paid or distributed ("Underpayment"), in each case, consistent with the calculation of the Reduced Amount hereunder. In the event that the Accounting Firm, based upon the assertion of a deficiency by the Internal Revenue Service against either the Company or you that the Accounting Firm believes has a high probability of success, determines that an Overpayment has been made, any such Overpayment paid or distributed by the Company shall be deemed for all purposes to be a loan to you made on the date of receipt of the Overpayment, which you shall have an obligation to repay to the Company on demand, together with interest on such amount at the applicable federal rate provided for in Section 7872(f)(2) of the Code. In the event that the Accounting Firm, based upon controlling precedent or substantial authority, determines that an Underpayment has occurred, any such Underpayment shall be promptly paid by the Company together with interest at the applicable federal rate provided for in Section 7872(f)(2) of the Code.

(iv) Fees and Expenses of Accounting Firm. All fees and expenses of the Accounting Firm in implementing the provisions of this Section 11(B) shall be borne by the Company.

(A) Definitions.

For purposes of this Section 11:

"Change of Control" means an event that qualifies as a Change of Control under The Hartford 2014 Incentive Stock Plan, as it may be amended from time to time.

"Termination For Good Reason" means a termination of your employment due to the occurrence of any of the following after the occurrence of a Change of Control, where notice of termination is provided as described below:

(i) (A) the assignment to you of any duties inconsistent in any material adverse respect with your position, duties, authority or responsibili-ties, or (B) any other material adverse change in such position, including titles, authority or re-sponsibilities;

(ii) a material reduction in your Base Pay or Target Bonus;

(iii) the Company's requiring you to be based at any office or location more than 50 miles from the location at which you performed your services immediately prior to the Change of Control (provided that such change of office or location also entails a substantially longer commute from your home), except for travel reasonably required in the performance of your responsibilities;

(iv) any failure by the Company to obtain the assumption and agreement to perform the provisions of this Plan by a successor; or

(v) a Termination asserted by the Company to be For Cause that is subsequently determined in a proceeding pursuant to Section 16(A) hereof not to constitute a Termination For Cause.

Except with respect to an event described in subclause (v), you must provide written notice of Termination For Good Reason to the Plan Administrator within 180 days of your having actual knowledge of the events giving rise to such Termination For Good Reason, which sets forth in reasonable detail the facts and circumstances claimed to provide a basis for Termination For Good Reason, along with the applicable date of termination if other than the date of receipt of such notice (which date shall not be more than 15 days after the giving of such notice), provided that your failure to set forth in the notice of termination any fact or circumstance that contributes to a showing of Good Reason shall not waive any right you have or preclude you from asserting such fact or circumstance in enforcing your rights hereunder. Notwithstanding the foregoing, a termination of your employment shall not be treated as a Termination For Good Reason if (i) you have consented in writing to the occurrence of the event giving rise to the claim of Termination For Good Reason, or (ii) if you have delivered a notice of termination based on a claim of Termination For Good Reason to the Company, and the facts and circumstances specified therein as providing a basis for such Termination For Good Reason are cured by the Company within 10 days of its receipt of such notice of termination.

“Net After-Tax Receipt” means the Present Value of a payment net of all taxes imposed with respect thereto under Sections 1 and 4999 of the Code, under applicable state and local laws, and for Social Security, Medicare or other employment tax purposes, determined by applying the highest marginal rate under Section 1 of the Code and under state and local laws that applied to your taxable income for the immediately preceding taxable year, or such other rate(s) as you shall certify as likely to apply to you in the relevant tax year(s).

"Present Value" means such value as determined in accordance with Sections 280G(b)(2)(A)(ii) and 280G(d)(4) of the Code.

"Reduced Amount" means the smallest amount of Plan payments that (i) has a Present Value that is less than the Present Value of all Plan payments, and (ii) results in aggregate Net After-Tax Receipts for all payments that are greater than the Net After-Tax Receipts for all payments that would result if the aggregate Present Value of Plan payments were any other amount that is less than the Present Value of all Plan payments.

“Termination For Cause” For purposes of this Section 11 only, a Termination For Cause is limited to the following: a termination of your employment due to (1) a felony conviction; (2) an act or acts of dishonesty or gross misconduct on your part that result or are intended to result in damage to the Company’s business or reputation; or (3) repeated violations of your obligations to devote your full attention during normal business hours to the business and affairs of the Company and to use your best efforts to perform faithfully and efficiently the responsibilities assigned to you except for time away from work authorized by Company policy or state or federal law, which violations are demonstrably willful and deliberate on your part and which result in damage to the Company's business or reputation.

12. Separation and Release Agreement

You must accept the terms of a separation agreement, including but not limited to a release of all claims that you may have against the Company, the Company's directors, officers, employees and employee benefit plans, in a form provided by the Plan Administrator or designee (the "Separation and Release Agreement"), as a condition for the payment of any severance benefits under this Plan. In no event shall the terms and conditions of a Separation and Release Agreement required following a Change of Control be significantly less favorable to you than the terms and conditions of the form of Separation and Release Agreement customarily used by the Company prior to the Change of Control. You have no vested right to receive severance benefits until you sign the Separation and Release Agreement and the expiration of any revocation period occurs. You must sign and return the Separation and Release Agreement no later than the date specified in that Agreement.

13. Offset

Any severance pay provided to you under this Plan may be offset by reducing such amount by any severance pay, termination pay or similar pay or allowance that you receive or are entitled to receive (i) under any other Company plan, policy, practice, program or arrangement, other than a Company retirement plan; or (ii) by virtue of any law, custom or practice, excluding any unemployment compensation that you may receive as a state unemployment award.

Any severance pay provided to you under this Plan shall also be offset by reducing such severance pay by any severance pay, termination pay or similar pay or allowance you received as a result of any prior termination of employment with the Company. Any severance pay and any notice pay provided to you under this Plan shall be offset by reducing such severance pay and notice pay by any payments made to you by the Company pursuant to the Worker Adjustment and Retraining Notification Act ("WARN") and any similar federal, state or local law.

Any severance pay provided to you under this Plan shall be offset by reducing such severance pay by any payment made or anticipated to be made to you under any Company or statutory disability plan, policy, practice, program or arrangement after the Effective Date.

Any payment to you is subject to recovery or "clawback" by the Company if the payment is based on materially inaccurate financial statements or any other materially inaccurate performance metric criteria, or as otherwise required by applicable law. Prior to a Change of Control, (1) if the Company determines that you have taken action, or failed to act, in a manner which is inimical to the best interests of the Company, the Company may, in its sole discretion, not pay any amount which has not then been paid to you from this Plan and, in addition, may recover or "clawback" any amount which has already been paid to you in accordance with this Plan, and (2) any severance pay provided to you under this Plan shall be offset by reducing such severance pay by any amount that you owe to the Company, including but not limited to any amounts owed as a result of overpayments of disability benefits, wages, bonuses or incentive compensation.

Additionally, prior to a Change of Control, any severance pay otherwise due to you may be offset by any costs to the Company in connection with any sums for which you are personally responsible.

14. Administration of Plan

Responsibility for administration of this Plan rests with the Company's Executive Vice President, Human Resources (or other individual with similar responsibilities) or his or her designee ("Plan Administrator").

The Plan Administrator shall have the exclusive right to interpret this Plan, adopt any rules and regulations for carrying out this Plan as may be appropriate and decide any and all matters arising under this Plan, including, but not limited to, the right to determine appeals. Subject to applicable federal and state law, all interpretations and decisions by the Plan Administrator shall be final, conclusive and binding on all parties affected thereby. Any claim, complaint, dispute, question, contest, controversy or issue for determination (collectively "claim") in connection with the operation, interpretation or administration of this Plan must first be appealed to the Plan Administrator according to the procedures set forth below. Only if you have exhausted such administrative appeal process and have received an adverse ruling, in whole or in part, from the Plan Administrator on one or more claims may you proceed with arbitration pursuant to Section 16(A) hereof.

If you believe you are entitled to, but do not receive, severance pay, you may make a claim for severance pay by submitting a written request to the Company's Vice President, Total Rewards within 60 days after your Effective Date. If your claim is denied, in whole or in part, the Vice President, Total Rewards or his or her designee will notify you of the Plan's denial not later than 90 days after your claim was received, unless the Vice President, Total Rewards or his or her designee determines that special circumstances require an extension of time for processing the claim. If the Vice President, Total Rewards or his or her designee determines that special circumstances require an extension of time for processing your claim, you will receive written notice of the extension prior to the end of the initial 90-day period. In no event will such extension end later than 90 days from the end of the initial period. You will be notified of the special circumstances requiring an extension of time and the date by which the Plan expects to render the benefit determination. If your claim is denied, you will receive notification from the Vice President, Total Rewards or his or her designee, which will include: (i) the specific reason or reasons why the claim was denied, (ii) reference to the specific plan provisions on which the determination is based; (iii) a description of any additional material or information necessary for you to perfect your claim and an explanation of why such material or information is necessary; and (iv) a description of the Plan's review procedures and the time limits applicable to such procedures, including a statement of your right to bring a civil action following a denial on review.

If you wish to appeal a denial of your claim, you must submit a written appeal to the Plan Administrator within 60 days of the date you receive the denial of your claim. You may include with your appeal written comments, documents, records, and other information relating to your claim for severance pay. Additionally, you will be provided, upon request

and free of charge, reasonable access to, and copies of, all documents, records, and other information relevant to your claim for benefits. The review of your appeal will take into account all comments, documents, records, and other information you submit relating to your claim, regardless of whether such information was submitted or considered in the initial benefit determination.

The Plan will notify you, within 60 days after it receives your request for review of the denial, of the Plan's benefit determination on review. If the Plan Administrator determines that an extension of time for processing is required, written notice of the extension will be furnished to you prior to the end of the initial 60-day period. In no event will such extension end later than 60 days from the end of the initial period. You will be notified of the special circumstances requiring an extension of time and the date by which the Plan expects to render the determination on review.

If your appeal is denied, the notification the Plan Administrator provides to you will include: (i) the specific reason or reasons why the appeal was denied, (ii) reference to the specific Plan provisions on which the determination is based; (iii) a description of any additional material or information necessary for you to perfect the claim and an explanation of why such material or information is necessary; (iv) a description of the Plan's review procedures and the time limits applicable to such procedures, including a statement of your right to bring a civil action under ERISA following an adverse determination on review.

15. <u>Termination or Amendment</u>

The Plan Administrator shall have the power to make amendments to the Plan that do not involve a material cost to the Company or are required by applicable law. Any other amendments to the Plan shall be made by the Board of Directors of The Hartford Financial Services Group, Inc., or the Compensation and Management Development Committee thereof. The Company reserves the right, in its sole discretion, to terminate, suspend, amend or modify this Plan ("Plan Change") in whole or in part at any time without prior notice. Notwithstanding anything in this Plan to the contrary, the Plan shall not be amended, modified, suspended or terminated following a Change of Control or during the period in which a Change of Control is threatened (as determined in accordance with The Hartford 2014 Incentive Stock Plan, as it may be amended from time to time), except that the Plan Administrator may amend this Plan during such period or following a Change of Control, or at any other time, in such manner as the Plan Administrator deems necessary or advisable, in his or her reasonable judgment, (i) to comply with a change in law or to avoid any payments hereunder being subject to an additional tax under Section 409A of the Code, or (ii) so long as such amendment does not adversely affect (A) the eligibility of any Eligible Employee to receive benefits hereunder or (B) the amount or type of benefits that might become, or the time at which such benefits would be, payable hereunder to any such Eligible Employee. This Plan is intended to comply with Section 409A of the Code, and no action taken by the Company shall be construed in a manner that would result in the imposition of an additional tax on executives under Section 409A of the Code.

16. Miscellaneous.

(A) **Arbitration**. Any claim arising under or in connection with this Plan that, following exhaustion of the administrative appeal process referenced in Section 14 hereof, has yet to be resolved in whole or in part, shall be resolved exclusively by binding arbitration. Such arbitration shall be held in the city of Hartford, Connecticut, and shall be conducted in accordance with the Employment Arbitration Rules then pending of the American Arbitration Association ("AAA"), and otherwise in accordance with the principles that would be applied by a court of law or equity. The arbitrator shall be acceptable to both you and the Company. If you and the Company cannot agree on an acceptable arbitrator, the claim shall be heard by a panel of three arbitrators, with one each appointed by you and the Company and the third appointed by the other two arbitra-tors. The award rendered by the arbitrator (or arbitrators) will be final and determinative as to any and all issues submitted for arbitration, and a judgment may be entered on any award by any state or federal court having jurisdiction over the parties or their respective property. You and the Company shall be jointly and equally responsible for all arbitration fees assessed by the AAA, and you and the Company shall each be responsible for your respective attorney's fees and related expenses; provided that, should the claim relate to circumstances occurring on or after the date of a Change of Control, if the arbitrator (or arbitrators) shall in the award determine one or more material issues in dispute in your favor, then the Company shall pay your share of any expenses of the arbitration and your reasonable attorney's fees and related expenses (or cause such fees and expenses to be paid), upon presentation of proof of such fees and expenses in a form acceptable to the Company, and as to any reasonable fees and related expenses that you have already paid, the Company shall add to the reimbursement payment an amount for simple interest thereon from the date such expense was paid by you at the 90-day United States Treasury Bill rate as in effect from time to time, compounded annually.

(B) **Unfunded.** Benefits under this Plan are paid for entirely by the Company from its general assets.

(C) **Withholding.** Any payments provided for herein shall be reduced by any amounts required to be withheld by the Company from time to time under applicable Federal, State or local income or employment tax laws or similar statutes or other provisions of law then in effect.

(D) **Section Headings**. The section headings contained in this Plan are included solely for convenience of reference and shall not in any way affect the meaning of any provision of this Plan.

17. Other Important Information

(A) Notice

This Plan is not a contract of employment. It does not guarantee your employment for any specified period and does not limit the right of the Company to terminate your employment at any time for any reason. Employment with the Company is terminable at will.

Except as otherwise provided in a written agreement with the Company, any employee retains the right to terminate his or her employment at any time, with or without notice, and with or without cause. Likewise, the Company can terminate the employment of any employee at any time, with or without notice, and with or without cause, subject to applicable law.

No supervisor or manager has any authority to enter into an employment agreement, written or oral, or to make any agreement or representations contrary to the preceding paragraph, unless it is authorized by the Chairman of The Hartford Financial Services Group, Inc., and such agreement is in writing. Further no document, communication or publication of The Hartford Financial Services Group, Inc., the Company, or any affiliate of either of the foregoing should be understood as, or construed as, making such an agreement or extending such a representation.

THE HARTFORD
SENIOR EXECUTIVE SEVERANCE PAY PLAN
(Tier 2)

This document describes your benefits under The Hartford Senior Executive Severance Pay Plan, and includes the text of the Plan and other important information.

As Amended and Restated Effective October 1, 2014

THE HARTFORD SENIOR EXECUTIVE SEVERANCE PAY PLAN

1. **Purpose**
The purpose of The Hartford Senior Executive Severance Pay Plan (the "Plan") is to assist in occupational transition by providing severance pay for Tier 2 executives and Hartford Funds Senior Managing Directors covered by this Plan whose employment is terminated under conditions set forth in this Plan.

2. **Application of Plan**
This Plan, which was initially effective October 1, 1997, is amended and restated in the form of this document effective October 1, 2014. Any termination of employment of a Covered Employee (as defined in Section 3 below) that has an Effective Date (as defined in Section 3 below) on or after October 1, 2014 shall be governed exclusively by the terms of the Plan as amended and restated herein, and by no other plan, policy, practice or arrangement.

3. Covered Employees

You are a Covered Employee under this Plan if, on your last day actively at work (the “Effective Date”), you are an “Employee” (as defined below) who (1) qualifies as an “Eligible Employee” (as described in Section 4 below), (2) is paid on a salaried basis, and (3) is identified as a Tier 2 executive or a Hartford Funds Senior Managing Director whom the Plan Administrator has approved for participation in this Plan. A person who is on an authorized leave of absence, paid or unpaid (including medical leave of absence), of not more than twenty-six (26) weeks and who would otherwise qualify as a Covered Employee, but for being on leave of absence, will be considered a Covered Employee for purposes of this Plan. Notwithstanding the foregoing provisions of this Section 3, you will be an Eligible Employee hereunder only if you have agreed to such non-competition, non-solicitation, non-disparagement and other restrictive covenants as are required to be executed by the Plan Administrator.

For purposes of the Plan, “Employee” means any person regularly employed on the United States payroll by The Hartford Financial Services Group, Inc., Hartford Fire Insurance Company, or any of their designated subsidiaries or affiliates which have adopted this Plan with respect to their employees (collectively, the “Company”), but shall not include any person who performs services for the Company as an independent contractor or under any other non-employee classification, or who is classified by the Company as, or determined by the Company to be, an independent contractor.

4. Severance Pay Upon Termination of Employment

If you are a Covered Employee and the Company terminates your employment and you sign a Separation and Release Agreement, as described in Section 12, acceptable to the Company, you will be eligible to receive severance benefits in accordance with the terms of this Plan **except** if:

(1) you are terminated for misconduct or other disciplinary action, which by way of example may include, but is not limited to, the following: serious violations of Company policies; violation of the Company's Code of Ethics and Business Conduct, or any confidentiality agreement or other similar policy or undertaking of the Company; statements by you, either oral or written, that are false or misleading or that damage or have the potential to damage the Company; violation of any covenant or restriction applicable to you; or any Company-initiated termination for cause or for actions that the Company deems to be immoral, unethical, inimical to the best interests of the Company, or illegal;

(2) provided that the Effective Date is prior to a Change of Control as defined in Section 11, you are under investigation, at the time severance pay would otherwise be due, for misconduct deemed by management to be a serious violation of the Company's policies or its Code of Ethics and Business Conduct;

(3) you refuse a Comparable Position offered as alternative employment with the Company. For purposes of this Plan, "Comparable Position" shall mean a position with materially the same Base Pay (your annual base salary at the Effective Date, excluding all bonus and incentive compensation and any special remuneration) and Target Bonus (your annual bonus opportunity at the target level of payout as in effect at the Effective Date) with similar duties, or having different duties that, in management's judgment, you are able to perform and are consistent with your experience, and that either is located within a 50-mile radius of the previous position's location or does not entail a substantially longer commute from your home;

(4) you terminate employment with the Company prior to the date selected by the Company as your last day of active employment;

(5) you are terminated while on an approved leave of absence (paid or unpaid) after 26 weeks of such leave;

(6) you are terminated following acceptance or refusal of employment or continued employment in connection with any sale, divestiture or outsourcing described in Section 10;

(7) except as provided in subparagraph (3) above or in Section 11 with respect to a Termination for Good Reason, you initiate termination of employment for any reason, including resigning, retiring or failing to return to work immediately following the expiration of any leave of absence;

(8) your employment terminates as a result of your death, or as a result of your Disability. For this purpose, a termination as a result of Disability is (i) a termination of your employment by the Company as a result of a determination by the Board or the appropriate committee thereof that you are incapable of substantially fulfilling your positions, duties, responsibilities and obligations on account of physical, mental or emotional incapacity resulting from injury, sickness or disease for a period of (A) at least four consecutive months, or (B) more than six months in any twelve month period, or (ii) a termination of your employment on account of total disability that results in your qualifying for benefits under the Company's Long Term Disability Plan for Salaried Employees; or

(9) your employment terminates due to your mandatory retirement at or after your 65th birthday, provided that such mandatory retirement would not violate any applicable provision of the Federal Age Discrimination in Employment Act of 1967, as amended.

5. Schedule of Severance Pay

You will be eligible to receive severance benefits under this Section if you are a Covered Employee and the Company terminates your employment other than in any of the circumstances described in subparagraphs (1) through (9) of Section 4. In such circumstances, but subject to your entering into (and not revoking) a Separation and Release Agreement, as described in Section 12, you will receive severance benefits equal to a number of months of your Base Pay determined as follows:

Years of Service	Number of Months of Base Pay
Less than 4 Years of Service	12 months
4 Years of Service	13 months
5 Years of Service	14 months
6 Years of Service	15 months
7 Years of Service	16 months
8 Years of Service	17 months
9 Years of Service	18 months
10 Years of Service	19 months
11 Years of Service	20 months
12 Years of Service	21 months
13 Years of Service	22 months
14 Years of Service	23 months
15 or more Years of Service	24 months

"Base Pay" means your annual base salary at the Effective Date, excluding all bonus and incentive compensation and any special remuneration, divided by twelve (12) months.

"Years of Service" shall mean the total number of completed years of employment measured from your Company Service Date to your Effective Date, rounded to the nearest whole year. Your “Company Service Date” is the date used to determine your eligibility for vesting under the applicable Company retirement plan in effect on the Effective Date.

The severance payment provided shall be in addition to any Base Pay earned, but unpaid, for services rendered to the Company on or prior to the Effective Date, plus any paid time off accrued as of such date.

6. Pro-Rata Annual Bonus and Treatment of Long Term Incentives

If you receive severance pay in accordance with Section 5, you may also be eligible to receive a pro-rata annual bonus under the applicable Company annual incentive plan for the year in which the Effective Date occurs, payable as described in Section 8**.** The amount of the pro-rata annual bonus, if any, shall be determined at the Company's discretion, based on Company and individual performance for the year in which the Effective Date occurs. There is no promise of a bonus or a particular amount; along with other factors, post-termination activities, such as taking a position with a competitor, may be taken into account by the Company. In the event of a Termination for Good Reason or an involuntary termination by the Company following a Change of Control pursuant to Section 11, in no event shall the pro-rata annual bonus be less than a pro-rata bonus payable at the same percentage of the Target Bonus as is generally applicable to executives whose employment did not terminate.

If you receive severance pay in accordance with Section 5, you will also vest pro-rata (subject to achievement of any applicable performance criteria) in outstanding unvested long term incentives, including stock options, performance shares, performance units, restricted stock and restricted stock unit awards, if, and to the extent, so provided in the award agreement under The Hartford 2010 Incentive Stock Plan, The Hartford 2014 Incentive Stock Plan, or other applicable long term incentive plan under which such awards were granted; in such a case, the timing of the payment of such awards will be as set forth in such award agreement.

7. Notice or Pay in Lieu of Notice

Except as provided in this Plan, you shall not be entitled to any notice of termination or pay in lieu thereof. At the sole discretion of the Company, notice may be provided.

8. Payment of Severance Pay and Pro-Rata Annual Bonus

Any severance pay provided to you under this Plan shall be paid in a lump sum. Severance pay shall be paid within 60 days of the Effective Date.

Any pro-rata annual bonus payable in accordance with Section 6 shall be paid no later than the same time as similar awards are paid to other executives participating in the plans or programs under which the awards are paid, but in no event later than March 15 of the calendar year following the calendar year in which the Effective Date occurs, provided that, if you would have been a "covered employee" as defined in Section 162(m) of the Internal Revenue Code (the "Code") for the calendar year in which the Effective Date occurs but for the termination of your employment, the pro-rata annual bonus shall be payable to you only if, when, and to the extent that the Compensation and Management Development Committee of the Board of Directors of The Hartford Financial Services Group, Inc., certifies that the performance goals applicable to the annual bonus, as preestablished by such Committee in accordance with Section 162(m) of the Code, have been attained.

As provided in Section 4(2), prior to a Change of Control as defined in Section 11, any severance pay or pro rata annual bonus that would otherwise be payable in accordance

with Section 5 or 6 shall not be payable under the Plan to an employee who is under investigation for any such misconduct at the time payment would otherwise be due.

In the event of your death after the Effective Date but prior to your receipt of severance pay, the payment that would otherwise have been due to you shall be paid within 30 days of your death, subject to applicable law, to your spouse, if any, or if you are not married, to your estate.

9. Employee Benefit Plan Coverage While Receiving Severance Pay

Except as may otherwise be specifically provided by the applicable employee benefit plan, as it may be amended from time to time, severance pay and a pro-rata annual bonus and any other payment made by the Company after the Effective Date shall not be taken into account for any purpose under any employee benefit plan of the Company, including but not limited to The Hartford Investment and Savings Plan, The Hartford Excess Savings Plan, The Hartford Retirement Plan for U.S. Employees and The Hartford Excess Pension Plan II.

If you receive severance pay under Section 5, then, provided that the following provision is not deemed discriminatory under applicable law, until the end of the month in which the one-year anniversary of the Effective Date occurs, the Company will reimburse you for the cost of COBRA continuation coverage for you and your eligible dependents under the medical and dental benefit plans of the Company or its affiliates in which you and such dependents were participating as of the Effective Date. The reimbursement will be for the excess of the amount that you pay for such COBRA continuation coverage over the amount that you would pay for such coverage if you were still in the employ of the Company; provided that the reimbursement will be paid only so long as you otherwise continue to be eligible for such COBRA continuation coverage in accordance with the terms of the Company's medical and dental benefit plans and are not eligible for comparable coverage under the plan of a subsequent employer. An initial reimbursement shall be made during the 10 calendar days following six months from the Effective Date for payments made through that date; a second and final reimbursement, if necessary, shall be made within 10 days following the one-year anniversary of the Effective Date for any additional reimbursement due; provided that for purposes of this sentence, the Effective Date shall be deemed to occur at such time as you have also had a separation from service, as determined in accordance with any policies or practices that the Company shall adopt in accordance with, or as otherwise determined pursuant to, Section 409A of the Code and the regulations and guidance promulgated thereunder.

If you receive severance pay under Section 5, you will also be entitled to outplacement services, provided by the Company or its designee at the Company's expense, for a period of 12 months or such lesser period as you may require such services; such outplacement services to start within three months of the Effective Date.

10. Sale, Divestiture, Outsourcing, Closure or Relocation

(A) If the Company or a subsidiary, affiliate, division, department, business or function

of the Company or a portion thereof at which you are employed is sold, divested or outsourced in a transaction that does not qualify as a Change of Control under Section 11 hereof, you are eligible to receive severance benefits under Section 5 and a pro-rata annual bonus in accordance with Section 6 of this Plan provided that:

(1) you are a Covered Employee at the time of the transaction whose employment with the Company terminates as a result of the transaction,

(2) you are not offered a Comparable Position with the Company, the acquirer, the vendor or the divested unit,

(3) you do not decline an interview or an invitation to apply for a Comparable Position or to determine the availability of a Comparable Position with the Company, the acquirer, the vendor or the divested unit (except where the Plan Administrator determines that business circumstances warrant otherwise),

(4) you do not accept a position with the Company, the acquirer, the vendor or the divested unit, and

(5) you are not otherwise ineligible for severance pay for any of the reasons described in Section 4 of this Plan.

An offer for a Comparable Position includes one that is contingent upon satisfaction of ordinary and customary requirements of the prospective employer, including, but not limited to, establishing work authorization under applicable immigration laws, satisfying drug-testing and background investigation standards, and executing employment agreements that include restrictive covenants and arbitration provisions.

If you continue employment with the Company or are hired on or immediately following the Effective Date by the acquirer, vendor or the divested unit, then severance payments and a pro-rata annual bonus will not be provided under this Plan. If you are hired after the Effective Date by the acquirer, vendor or the divested unit, then any severance payment or pro-rata annual bonus will be made only so long as your employment is not related to or in support of the sold, divested or outsourced business or operations.

The provisions of this Section shall apply to all sales, divestitures and outsourcings (whether accomplished as sales of assets, sales of corporate entities, service agreements or any other method), unless such sale, divestiture or outsourcing qualifies as a Change of Control as defined in Section 11 hereof, in which event the provisions of Section 11 shall apply.

(B) If the entire Company or the portion of the Company where you are employed is closed or relocated and you are not offered a Comparable Position by the Company, then you are eligible to receive severance pay under Section 5 (provided that you are not otherwise ineligible for severance pay for any of the reasons described in Section 4 of this Plan). You will not receive severance pay or a pro-rata annual bonus if you are offered a Comparable Position with the Company or if you accept a non-comparable position with the Company.

11. Severance Pay in the Event of a Change of Control

(A) Post-Change of Control Severance Pay. In the event of a Change of Control (as defined below), if, within the two-year period following such Change of Control, you are a Covered Employee whom the Plan Administrator has approved for participation in this Plan or whom the Plan Administrator had approved for participation in this Plan as of immediately prior to the Change of Control, and (i) you are involuntarily terminated by the Company for any reason other than in a Termination For Cause (as defined below), a termination due to death or a termination on account of total disability that results in your qualifying for benefits under the Company's Long Term Disability Plan for Salaried Employees, or (ii) you voluntarily terminate employment with the Company in a Termination for Good Reason (as defined below), then you shall receive severance pay and be eligible for a pro-rata annual bonus as provided in Sections 5 and 6, payable as described in Section 8, except that, in such a case, the amount of severance pay shall be equal to two times your Base Pay rather than the amount provided for in Section 5. For this purpose, when determining the amounts payable, the Base Pay and Target Bonus taken into account shall not be less than your greatest Base Pay and Target Bonus in effect at any time since the date immediately prior to the Change of Control. Following a Change of Control, the term "Company" shall also include any successor in interest to any of the entities included in the definition of Company immediately prior to the Change of Control and any affiliate of such successor entity by which a person who was a Covered Employee immediately prior to the Change of Control is employed.

(B) Reduction of Severance Pay to Reduced Amount in Certain Circumstances.

(i) Determination of Existence of Reduced Amount. Notwithstanding anything herein to the contrary, in the event that Deloitte and Touche or such other nationally recognized public accounting firm as is designated by the Company prior to the Change of Control (the "Accounting Firm") shall determine that your receipt of payments hereunder would subject you to tax under Section 4999 of the Code, the Accounting Firm shall determine whether some amount of the aggregate payments meets the definition of Reduced Amount (defined below). All determinations made by the Accounting Firm under this Section shall be binding upon the Company and you and shall be made within 60 days of your termination of employment.

(ii) Consequences of Determination of Existence of Reduced Amount. If the Accounting Firm determines that there is a Reduced Amount as provided in the preceding paragraph, then the aggregate severance payments shall be reduced to such Reduced Amount, provided that the net after-tax amount that the Accounting Firm projects that you will receive, if such reduction is made, is not less than the net after-tax amount that the Accounting Firm projects that you will receive if such reduction is not made.

(iii) Consequences of Overpayment or Underpayment of Amounts. As a result of the uncertainty in the application of Section 4999 of the Code at the time of the initial determination by the Accounting Firm under Section 11(B)(i) hereof, it is possible that amounts will have been paid or distributed by the Company pursuant

to the Plan that should not have been so paid or distributed ("Overpayment"), or that additional amounts that will have not been paid or distributed by the Company pursuant to this Plan that could have been so paid or distributed ("Underpayment"), in each case, consistent with the calculation of the Reduced Amount hereunder. In the event that the Accounting Firm, based upon the assertion of a deficiency by the Internal Revenue Service against either the Company or you that the Accounting Firm believes has a high probability of success, determines that an Overpayment has been made, any such Overpayment paid or distributed by the Company shall be deemed for all purposes to be a loan to you made on the date of receipt of the Overpayment, which you shall have an obligation to repay to the Company on demand, together with interest on such amount at the applicable federal rate provided for in Section 7872(f)(2) of the Code. In the event that the Accounting Firm, based upon controlling precedent or substantial authority, determines that an Underpayment has occurred, any such Underpayment shall be promptly paid by the Company together with interest at the applicable federal rate provided for in Section 7872(f)(2) of the Code.

(iv) Fees and Expenses of Accounting Firm. All fees and expenses of the Accounting Firm in implementing the provisions of this Section 11(B) shall be borne by the Company.

(A) Definitions.

For purposes of this Section 11:

“Change of Control” means an event that qualifies as a Change of Control under The Hartford 2014 Incentive Stock Plan, as it may be amended from time to time.

"Termination For Good Reason" means a termination of your employment due to the occurrence of any of the following after the occurrence of a Change of Control, where notice of termination is provided as described below:

(i) (A) the assignment to you of any duties inconsistent in any material adverse respect with your position, duties, authority or responsibili-ties, or (B) any other material adverse change in such position, including titles, authority or re-sponsibilities;

(ii) a material reduction in your Base Pay or Target Bonus;

(iii) the Company's requiring you to be based at any office or location more than 50 miles from the location at which you performed your services immediately prior to the Change of Control (provided that such change of office or location also entails a substantially longer commute from your home), except for travel reasonably required in the performance of your responsibilities;

(iv) any failure by the Company to obtain the assumption and agreement to perform the provisions of this Plan by a successor; or

(v) a Termination asserted by the Company to be For Cause that is subsequently determined in a proceeding pursuant to Section 16(A) hereof not to constitute a Termination For Cause.

Except with respect to an event described in subclause (v), you must provide written notice of Termination For Good Reason to the Plan Administrator within 180 days of your having actual knowledge of the events giving rise to such Termination For Good Reason, which sets forth in reasonable detail the facts and circumstances claimed to provide a basis for Termination For Good Reason, along with the applicable date of termination if other than the date of receipt of such notice (which date shall not be more than 15 days after the giving of such notice), provided that your failure to set forth in the notice of termination any fact or circumstance that contributes to a showing of Good Reason shall not waive any right you have or preclude you from asserting such fact or circumstance in enforcing your rights hereunder. Notwithstanding the foregoing, a termination of your employment shall not be treated as a Termination For Good Reason if (i) you have consented in writing to the occurrence of the event giving rise to the claim of Termination For Good Reason, or (ii) if you have delivered a notice of termination based on a claim of Termination For Good Reason to the Company, and the facts and circumstances specified therein as providing a basis for such Termination For Good Reason are cured by the Company within 10 days of its receipt of such notice of termination.

"Net After-Tax Receipt" means the Present Value of a payment net of all taxes imposed with respect thereto under Sections 1 and 4999 of the Code, under applicable state and local laws, and for Social Security, Medicare or other employment tax purposes, determined by applying the highest marginal rate under Section 1 of the Code and under state and local laws that applied to your taxable income for the immediately preceding taxable year, or such other rate(s) as you shall certify as likely to apply to you in the relevant tax year(s).

"Present Value" means such value as determined in accordance with Sections 280G(b)(2)(A)(ii) and 280G(d)(4) of the Code.

"Reduced Amount" means the smallest amount of Plan payments that (i) has a Present Value that is less than the Present Value of all Plan payments, and (ii) results in aggregate Net After-Tax Receipts for all payments that are greater than the Net After-Tax Receipts for all payments that would result if the aggregate Present Value of Plan payments were any other amount that is less than the Present Value of all Plan payments.

"Termination For Cause" For purposes of this Section 11 only, a Termination For Cause is limited to the following: a termination of your employment due to (1) a felony conviction; (2) an act or acts of dishonesty or gross misconduct on your part that result or are intended to result in damage to the Company's business or reputation; or (3) repeated violations of your obligations to devote your full attention during normal business hours to the business and affairs of the Company and to use your best efforts to perform faithfully and efficiently the

responsibilities assigned to you except for time away from work authorized by Company policy or state or federal law, which violations are demonstrably willful and deliberate on your part and which result in damage to the Company's business or reputation.

12. Separation and Release Agreement

You must accept the terms of a separation agreement, including but not limited to a release of all claims that you may have against the Company, the Company's directors, officers, employees and employee benefit plans, in a form provided by the Plan Administrator or designee (the "Separation and Release Agreement"), as a condition for the payment of any severance benefits under this Plan. In no event shall the terms and conditions of a Separation and Release Agreement required following a Change of Control be significantly less favorable to you than the terms and conditions of the form of Separation and Release Agreement customarily used by the Company prior to the Change of Control. You have no vested right to receive severance benefits until you sign the Separation and Release Agreement and the expiration of any revocation period occurs. You must sign and return the Separation and Release Agreement no later than the date specified in that Agreement.

13. Offset

Any severance pay provided to you under this Plan may be offset by reducing such amount by any severance pay, termination pay or similar pay or allowance that you receive or are entitled to receive (i) under any other Company plan, policy, practice, program or arrangement, other than a Company retirement plan; or (ii) by virtue of any law, custom or practice, excluding any unemployment compensation that you may receive as a state unemployment award.

Any severance pay provided to you under this Plan shall also be offset by reducing such severance pay by any severance pay, termination pay or similar pay or allowance you received as a result of any prior termination of employment with the Company. Any severance pay and any notice pay provided to you under this Plan shall be offset by reducing such severance pay and notice pay by any payments made to you by the Company pursuant to the Worker Adjustment and Retraining Notification Act ("WARN") and any similar federal, state or local law.

Any severance pay provided to you under this Plan shall be offset by reducing such severance pay by any payment made or anticipated to be made to you under any Company or statutory disability plan, policy, practice, program or arrangement after the Effective Date.

Any payment to you is subject to recovery or "clawback" by the Company if the payment is based on materially inaccurate financial statements or any other materially inaccurate performance metric criteria, or as otherwise required by applicable law. Prior to a Change of Control, (1) if the Company determines that you have taken action, or failed to act, in a manner which is inimical to the best interests of the Company, the Company may, in its sole discretion, not pay any amount which has not then been paid to you from this Plan and, in addition, may recover or "clawback" any amount which has already been

paid to you in accordance with this Plan, and (2) any severance pay provided to you under this Plan shall be offset by reducing such severance pay by any amount that you owe to the Company, including but not limited to any amounts owed as a result of overpayments of disability benefits, wages, bonuses or incentive compensation. Additionally, prior to a Change of Control, any severance pay otherwise due to you may be offset by any costs to the Company in connection with any sums for which you are personally responsible.

14. <u>Administration of Plan</u>

Responsibility for administration of this Plan rests with the Company's Executive Vice President, Human Resources (or other individual with similar responsibilities) or his or her designee ("Plan Administrator").

The Plan Administrator shall have the exclusive right to interpret this Plan, adopt any rules and regulations for carrying out this Plan as may be appropriate and decide any and all matters arising under this Plan, including, but not limited to, the right to determine appeals. Subject to applicable federal and state law, all interpretations and decisions by the Plan Administrator shall be final, conclusive and binding on all parties affected thereby. Any claim, complaint, dispute, question, contest, controversy or issue for determination (collectively "claim") in connection with the operation, interpretation or administration of this Plan must first be appealed to the Plan Administrator according to the procedures set forth below. Only if you have exhausted such administrative appeal process and have received an adverse ruling, in whole or in part, from the Plan Administrator on one or more claims may you proceed with arbitration pursuant to Section 16(A) hereof.

If you believe you are entitled to, but do not receive, severance pay, you may make a claim for severance pay by submitting a written request to the Company's Vice President, Total Rewards within 60 days after your Effective Date. If your claim is denied, in whole or in part, the Vice President, Total Rewards or his or her designee will notify you of the Plan's denial not later than 90 days after your claim was received, unless the Vice President, Total Rewards or his or her designee determines that special circumstances require an extension of time for processing the claim. If the Vice President, Total Rewards or his or her designee determines that special circumstances require an extension of time for processing your claim, you will receive written notice of the extension prior to the end of the initial 90-day period. In no event will such extension end later than 90 days from the end of the initial period. You will be notified of the special circumstances requiring an extension of time and the date by which the Plan expects to render the benefit determination. If your claim is denied, you will receive notification from the Vice President, Total Rewards or his or her designee, which will include: (i) the specific reason or reasons why the claim was denied, (ii) reference to the specific plan provisions on which the determination is based; (iii) a description of any additional material or information necessary for you to perfect your claim and an explanation of why such material or information is necessary; and (iv) a description of the Plan's review procedures and the time limits applicable to such procedures, including a statement of your right to bring a civil action following a denial on review.

If you wish to appeal a denial of your claim, you must submit a written appeal to the Plan Administrator within 60 days of the date you receive the denial of your claim. You may include with your appeal written comments, documents, records, and other information relating to your claim for severance pay. Additionally, you will be provided, upon request and free of charge, reasonable access to, and copies of, all documents, records, and other information relevant to your claim for benefits. The review of your appeal will take into account all comments, documents, records, and other information you submit relating to your claim, regardless of whether such information was submitted or considered in the initial benefit determination.

The Plan will notify you, within 60 days after it receives your request for review of the denial, of the Plan's benefit determination on review. If the Plan Administrator determines that an extension of time for processing is required, written notice of the extension will be furnished to you prior to the end of the initial 60-day period. In no event will such extension end later than 60 days from the end of the initial period. You will be notified of the special circumstances requiring an extension of time and the date by which the Plan expects to render the determination on review.

If your appeal is denied, the notification the Plan Administrator provides to you will include: (i) the specific reason or reasons why the appeal was denied, (ii) reference to the specific Plan provisions on which the determination is based; (iii) a description of any additional material or information necessary for you to perfect the claim and an explanation of why such material or information is necessary; (iv) a description of the Plan's review procedures and the time limits applicable to such procedures, including a statement of your right to bring a civil action under ERISA following an adverse determination on review.

15. Termination or Amendment

The Plan Administrator shall have the power to make amendments to the Plan that do not involve a material cost to the Company or are required by applicable law. Any other amendments to the Plan shall be made by the Board of Directors of The Hartford Financial Services Group, Inc., or the Compensation and Management Development Committee thereof. The Company reserves the right, in its sole discretion, to terminate, suspend, amend or modify this Plan ("Plan Change") in whole or in part at any time without prior notice. Notwithstanding anything in this Plan to the contrary, the Plan shall not be amended, modified, suspended or terminated following a Change of Control or during the period in which a Change of Control is threatened (as determined in accordance with The Hartford 2014 Incentive Stock Plan, as it may be amended from time to time), except that the Plan Administrator may amend this Plan during such period or following a Change of Control, or at any other time, in such manner as the Plan Administrator deems necessary or advisable, in his or her reasonable judgment, (i) to comply with a change in law or to avoid any payments hereunder being subject to an additional tax under Section 409A of the Code, or (ii) so long as such amendment does not adversely affect (A) the eligibility of any Eligible Employee to receive benefits hereunder or (B) the amount or type of benefits that might become, or the time at which such benefits would be, payable hereunder to any such Eligible Employee. This Plan is intended to comply with Section 409A of the Code, and no action taken by the Company

shall be construed in a manner that would result in the imposition of an additional tax on executives under Section 409A of the Code.

16. **Miscellaneous**

(A) **Arbitration**. Any claim arising under or in connection with this Plan that, following exhaustion of the administrative appeal process referenced in Section 14 hereof, has yet to be resolved in whole or in part, shall be resolved exclusively by binding arbitration. Such arbitration shall be held in the city of Hartford, Connecticut, and shall be conducted in accordance with the Employment Arbitration Rules then pending of the American Arbitration Association ("AAA"), and otherwise in accordance with the principles that would be applied by a court of law or equity. The arbitrator shall be acceptable to both you and the Company. If you and the Company cannot agree on an acceptable arbitrator, the claim shall be heard by a panel of three arbitrators, with one each appointed by you and the Company and the third appointed by the other two arbitrators. The award rendered by the arbitrator (or arbitrators) will be final and determinative as to any and all issues submitted for arbitration, and a judgment may be entered on any award by any state or federal court having jurisdiction over the parties or their respective property. You and the Company shall be jointly and equally responsible for all arbitration fees assessed by the AAA, and you and the Company shall each be responsible for your respective attorney's fees and related expenses; provided that, should the claim relate to circumstances occurring on or after the date of a Change of Control, if the arbitrator (or arbitrators) shall in the award determine one or more material issues in dispute in your favor, then the Company shall pay your share of any expenses of the arbitration and your reasonable attorney's fees and related expenses (or cause such fees and expenses to be paid), upon presentation of proof of such fees and expenses in a form acceptable to the Company, and as to any reasonable fees and related expenses that you have already paid, the Company shall add to the reimbursement payment an amount for simple interest thereon from the date such expense was paid by you at the 90-day United States Treasury Bill rate as in effect from time to time, compounded annually.

(B) **Unfunded.** Benefits under this Plan are paid for entirely by the Company from its general assets.

(C) **Withholding.** Any payments provided for herein shall be reduced by any amounts required to be withheld by the Company from time to time under applicable Federal, State or local income or employment tax laws or similar statutes or other provisions of law then in effect.

(D) **Section Headings**. The section headings contained in this Plan are included solely for convenience of reference and shall not in any way affect the meaning of any provision of this Plan.

17. **Other Important Information**

(A) Notice

This Plan is not a contract of employment. It does not guarantee your employment for any specified period and does not limit the right of the Company to terminate

your employment at any time for any reason. Employment with the Company is terminable at will.

Except as otherwise provided in a written agreement with the Company, any employee retains the right to terminate his or her employment at any time, with or without notice, and with or without cause. Likewise, the Company can terminate the employment of any employee at any time, with or without notice, and with or without cause, subject to applicable law.

No supervisor or manager has any authority to enter into an employment agreement, written or oral, or to make any agreement or representations contrary to the preceding paragraph, unless it is authorized by the Chairman of The Hartford Financial Services Group, Inc., and such agreement is in writing. Further no document, communication or publication of The Hartford Financial Services Group, Inc., the Company, or any affiliate of either of the foregoing should be understood as, or construed as, making such an agreement or extending such a representation.

THE HARTFORD 2014 INCENTIVE STOCK PLAN:

ADMINISTRATIVE RULES

RELATING TO AWARDS FOR NON-EMPLOYEE DIRECTORS

Set forth below, effective as of the first day of the 2015-2016 Board service year, are the Administrative Rules ("Rules") which have been authorized by the Compensation and Management Development Committee (the "Compensation Committee") of the Board of Directors of The Hartford Financial Services Group, Inc. (the "Company") for the administration of awards under The Hartford 2014 Incentive Stock Plan (the "Plan") for Non-Employee Directors of the Company. All terms and conditions of the Plan (including those relating to any Change of Control of the Company), as they may be amended from time to time, and the rules and interpretations applicable under the Plan, as they may be adopted by the Compensation Committee from time to time, shall apply to all awards granted under the Plan except as otherwise provided pursuant to the Rules set forth herein. Capitalized terms used herein shall have the meanings specified herein or assigned by the Plan.

1. Annual Non-Employee Director Restricted Unit Awards. An annual award of Restricted Units automatically shall be made in an amount as may be determined appropriate by the Nominating and Corporate Governance Committee of the Board (the "Nominating Committee") from time to time, to each director of the Company who is not an officer of, or otherwise employed by, the Company or any of its subsidiaries or affiliates (a "Non-Employee Director"). The grant date of such award shall be the first day of the next scheduled trading window following the date of the Annual Meeting of Stockholders of the Company ("Annual Meeting") at which such Non-Employee Director is elected.

2. Amount of Awards. The amount of Restricted Units granted for each Non-Employee Director's annual award shall be determined by dividing (a) the dollar amount of the annual award by (b) the Fair Market Value of the Stock on the grant date of the annual award.

3. Restriction Period for Restricted Units. Except as otherwise provided in the Plan and in Rule 6, the Restriction Period for Restricted Units awarded to Non-Employee Directors under the Plan shall (unless otherwise determined by the Nominating Committee) lapse as of the earlier of (i) the last day of the Board service year (the period between dates of Annual Meetings) during which the Non-Employee Director is elected or (ii) the first anniversary of the award grant date. Notwithstanding the preceding sentence, Restricted Units awarded to a Non-Employee Director shall automatically vest upon the occurrence of any of the following events: (a) retirement from service on the Board in accordance with the Company's Corporate Governance Guidelines, (b) death of the Non-Employee Director, (c) Total Disability of the Non-Employee Director, (d) resignation by the Non-Employee Director under cases of special circumstances where the

Compensation Committee, in its sole discretion, consents to waive the remaining Restriction Period, or (e) a Change of Control (in the event of a Change of Control as described in Section 9(a)(iii) or Section 9(a)(iv) of the Plan, in the case of a Non-Employee Director whose service on the Board involuntarily terminates on or after the date of the stockholder approval described in either of such Sections but before the date of the consummation described in either of such Sections, the date of termination of such Non-Employee Director's service shall be deemed for purposes of the Plan to be the day following the date of the applicable consummation). Restricted Units shall be forfeited only when the Compensation Committee, in its sole discretion, so determines. In each case, the shares of Stock related to Restricted Units that vest shall be delivered to the Non-Employee Director within 60 days of the applicable vesting date.

4. Dividends. Pursuant to Section 7(g) of the Plan, the Restricted Unit accounts of Non-Employee Directors shall be credited with Dividend Equivalents with respect to all Restricted Units during the period from the grant date to the payment date. These Dividend Equivalents shall be subject to the same terms and conditions and become payable and be paid as the Restricted Units to which they relate. All Dividend Equivalents payable in respect of Restricted Units shall be deemed reinvested in the number of Restricted Units determined based on the Fair Market Value on the date the corresponding dividend on the Stock is payable to stockholders.

5. Prorated Awards for Non-Employee Directors Elected After Annual Non-Employee Director Restricted Unit Awards are Made.

   (a) A Non-Employee Director elected to the Board after the annual Non-Employee Director Restricted Unit Awards described in Rule 1 are made shall receive a prorated annual Award of Restricted Units for the portion of the Board service year (the period between dates of Annual Meetings of Stockholders) during which he or she is elected, determined in accordance with current administrative procedures. The number of Restricted Units granted to the Non-Employee Director shall be determined by dividing the dollar value of the prorated award amount by the Fair Market Value of the Stock on the grant date (which shall be the first day of the next scheduled trading window following such Non-Employee Director's election to the Board).
   (b) A Non-Employee Director who is elected to the Board before the annual Non-Employee Director Restricted Unit Awards described in Rule 1 are granted, but after the start of the Board service year to which such Restricted Unit Awards relate, shall receive the full annual Restricted Unit Award for such upcoming Board service year, calculated as described in Rule 2 and granted as described in Rule 1.

6. Election to Receive Restricted Units in Lieu of Annual Cash Retainer, Committee Chair Retainer and Presiding Director Retainer. A Non-Employee Director may

elect to receive fully-vested Restricted Units in lieu of all or a portion of the annual Board cash retainer, any Committee Chair retainer and any Presiding Director retainer for a Board service year. Such election shall be made (a) prior to the first day of the calendar year in which the applicable Board service year begins or (b), solely with respect to a Non-Employee Director whose Board service starts after the first day of the calendar year in which the Board service year begins, prior to the start of such Non-Employee Director's Board service. Any such Restricted Units shall be granted to the Non-Employee Director on the first day of the next scheduled trading window following the date the applicable retainer would have been payable in cash. The number of Restricted Units shall be determined by dividing (i) the dollar amount of the applicable cash retainers elected by the Non-Employee Director, by (ii) the Fair Market Value of the Stock on the first day of the applicable trading window. The shares of Stock related to Restricted Units credited under this Rule 6 shall be delivered to the Non-Employee Director within 60 days following the date his or her Board service terminates.

7. Election to Defer Receipt of Annual Equity Retainer. A Non-Employee Director may elect that all or a portion of the Restricted Units that would otherwise be payable for a Board service year in accordance with Rule 3 shall not be payable until his or her Board service terminates, provided, however, that such election is made (a) prior to the first day of the calendar year in which the applicable Board service year begins, or (b), solely with respect to a Non-Employee Director whose Board service starts after the first day of the calendar year in which the Board service year begins, prior to the start of such Non-Employee Director's Board service. Such an election shall not extend the Restriction Period applicable to the Award; the Award shall continue to vest as provided in Rule 3. However, the shares of Stock related to the Restricted Units subject to such election shall be delivered to the Non-Employee Director within 60 days following the date his or her Board service terminates.

EXHIBIT 12.01

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

COMPUTATION OF RATIOS OF EARNINGS TO FIXED CHARGES

AND PREFERRED SHARE DIVIDENDS

(In millions)

	For the years ended December 31,				
	2014	**2013**	**2012**	**2011**	**2010**
EARNINGS (LOSS):					
Income (loss) from continuing operations, before income taxes	**$ 1,699**	$ 1,471	$ (89)	$ (293)	$ 2,189
Less: Undistributed earnings from limited partnerships and other alternative investments	188	33	(8)	65	60
Add: Total fixed charges, before interest credited to contractholders	407	434	498	562	566
Total earnings, before interest credited to contractholders	**1,918**	**1,872**	**417**	**204**	**2,695**
Interest credited to contractholders [1]	680	860	1,400	1,435	1,491
Total earnings	**$ 2,598**	**$ 2,732**	**$ 1,817**	**$ 1,639**	**$ 4,186**
FIXED CHARGES:

Interest factor attributable to rentals and other [2]	31	37	41	54	58
Total fixed charges, before interest credited to contractholders	**407**	**434**	**498**	**562**	**566**
Interest credited to contractholders [1]	680	860	1,400	1,435	1,491
Total fixed charges	**1,087**	**1,294**	**1,898**	**1,997**	**2,057**
Preferred stock dividend requirements [3]	—	12	—	—	687
Total fixed charges and preferred stock dividend requirements, before interest credited to contractholders	**407**	**446**	**498**	**562**	**1,253**
Total fixed charges and preferred stock dividend requirements	**$ 1,087**	**$ 1,306**	**$ 1,898**	**$ 1,997**	**$ 2,744**
RATIOS:					
Total earnings to total fixed charges [4]	2.4	2.1	NM	NM	2.0
Total earnings to total fixed charges and preferred stock dividend requirements [4]	2.4	2.1	NM	NM	1.5
Deficiency of total earnings to total fixed charges [5]	$ —	$ —	$ 81	$ 358	$ —
Deficiency of total earnings to total fixed charges and preferred stock dividend requirements [5]	$ —	$ —	$ 81	$ 358	$ —
Ratios before interest credited to contractholders [6]					
Total earnings to total fixed charges [4]	4.7	4.3	NM	NM	4.8
Total earnings to total fixed charges and preferred stock dividend requirements [4]	4.7	4.2	NM	NM	2.2

[1] Interest credited to contractholders includes interest credited on general account assets and interest credited on consumer notes.

[2] Interest factor attributable to rental and others includes 1/3 of total rent expense as disclosed in the notes to the financial statements, capitalized interest and amortization of debt issuance costs.

[3] Preferred stock dividend requirements represent the amount of pre-tax earnings that would be required to pay the dividends on outstanding preferred stock. Preferred stock dividend requirements are determined using the Company's effective income tax rate unless use of the Company's effective income tax rate would result in pre-tax losses for purposes of determining the dividend requirements, as in 2012 and 2011 when income tax benefits exceeded losses from continuing operations.

[4] Ratios of less than one-to-one are presented as "NM" or not meaningful.

[5] Represents additional earnings that would be necessary to result in a one-to-one ratio.

[6] These secondary ratios are disclosed for the convenience of fixed income investors and the rating agencies that serve them and are more comparable to the ratios disclosed by all issuers of fixed income securities.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350
AS ENACTED BY SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Christopher J. Swift, certify that:

1. I have reviewed this Annual Report on Form 10-K of The Hartford Financial Services Group, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
