# Endnotes – Non-GAAP Financial Measures

On March 18, 2024, BlackRock TCP Capital Corp. (“the Company”) completed its previously announced Merger with BlackRock Capital Investment Corporation (“BCIC”). The Merger has been accounted for as an asset acquisition of BCIC by the Company in accordance with the asset acquisition method of accounting as detailed in ASC 805-50 (“ASC 805”), *Business Combinations-Related Issues*. The Company determined the fair value of the shares of the Company’s common stock that were issued to former BCIC shareholders pursuant to the Merger Agreement plus transaction costs to be the consideration paid in connection with the Merger under ASC 805. The consideration paid to BCIC shareholders was less than the aggregate fair values of the BCIC assets acquired and liabilities assumed, which resulted in a purchase discount (the “purchase discount”). The consideration paid was allocated to the individual BCIC assets acquired and liabilities assumed based on the relative fair values of net identifiable assets acquired other than “non-qualifying” assets and liabilities (for example, cash) and did not give rise to goodwill. As a result, the purchase discount was allocated to the cost basis of the BCIC investments acquired by the Company on a pro-rata basis based on their relative fair values as of the effective time of the Merger. Immediately following the Merger, the investments were marked to their respective fair values in accordance with ASC 820 which resulted in immediate recognition of net unrealized appreciation in the Consolidated Statement of Operations as a result of the Merger. The purchase discount allocated to the BCIC debt investments acquired will amortize over the remaining life of each respective debt investment through interest income, with a corresponding adjustment recorded to unrealized appreciation or depreciation on such investment acquired through its ultimate disposition. The purchase discount allocated to BCIC equity investments acquired will not amortize over the life of such investments through interest income and, assuming no subsequent change to the fair value of the equity investments acquired and disposition of such equity investments at fair value, the Company may recognize a realized gain or loss with a corresponding reversal of the unrealized appreciation on disposition of such equity investments acquired.

As a supplement to the Company’s reported GAAP financial measures, we have provided the following non-GAAP financial measures that we believe are useful:

- **“Adjusted net investment income”** – excludes the amortization of purchase accounting discount from net investment income calculated in accordance with GAAP;
- **“Adjusted net realized and unrealized gain (loss)”** – excludes the unrealized appreciation resulting from the purchase discount and the corresponding reversal of the unrealized appreciation from the amortization of the purchase discount from the determination of net realized and unrealized gain (loss) determined in accordance with GAAP; and
- **“Adjusted net increase (decrease) in net assets resulting from operations”** – calculates net increase (decrease) in net assets resulting from operations based on Adjusted net investment income and Adjusted net realized and unrealized gain (loss).

We believe that the adjustment to exclude the full effect of purchase discount accounting under ASC 805 from these financial measures is meaningful because of the potential impact on the comparability of these financial measures that we and investors use to assess the Company’s financial condition and results of operations period over period. Although these non-GAAP financial measures are intended to enhance investors’ understanding of our business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. The aforementioned non-GAAP financial measures may not be comparable to similar non-GAAP financial measures used by other companies.

For reconciliation of these non-GAAP measures to their most comparable GAAP measures, see slide 6.
