Adjusted EBITDA and Adjusted EBITDA Margin reconciliation

(Figures in millions of Soles and millions of US Dollars, unless expressed otherwise)

Adjusted EBITDA: is calculated as profit (loss) before tax for the period plus net finance cost, depreciation and amortization, pre-operating expenses for projects under construction, business development (income) expenses for expansion into new markets, change in fair value of earn-out liabilities, stock-based consideration and personnel extraordinary compensation.

Adjusted EBITDA Margin: is calculated as Adjusted EBITDA divided by total revenue from contracts with customers.
