Adjusted operating income and adjusted net income from continuing operations per share attributable to Tyson (adjusted EPS) are presented as supplementary financial measurements in the evaluation of our business. We believe the presentations of adjusted operating income and adjusted EPS help investors assess our financial performance from period to period and enhance understanding of our financial performance. However, adjusted operating income and adjusted EPS may not be comparable to those of other companies in our industry, which limits the usefulness as comparative measures. Adjusted operating income and adjusted EPS are not measures required by or calculated in accordance with GAAP and should not be considered as substitutes for any measures of financial performance reported in accordance with GAAP. Investors should rely primarily on our GAAP results, and use non-GAAP financial measures only supplementally in making investment decisions.
