ASSURANCE STATEMENT

Context

We have been engaged by easyJet PLC to perform an independent verification with reasonable assurance of the fuel consumption, CO₂ emissions, and key performance indicators (KPI) from flights operated in fiscal year (FY) 2020-2021, i.e., October 2020-September 2021. The verification included all flights operated by the airline subsidiaries of easyJet PLC, i.e., easyJet UK Limited, easyJet Switzerland SA, and easyJet Europe Airline GMBH.

easyJet PLC was responsible for the design, implementation, and maintenance of a data management system to ensure the preparation and fair representation of the fuel consumption, CO₂ emission and other data in accordance with its Sustainability Reporting Requirement.

Our verification strategy used a combined data and controls testing approach and evidence-gathering procedures, remote staff interviews (to inspect the completeness of the inventory and to interview site personnel to confirm operational behaviour and standard operating procedures), sampling of records to confirm accuracy of source data, as well as the recalculation of the fuel, emissions, and other indicators.

Criteria

In order to prepare its FY2020-2021 Fuel consumption & KPI report, easyJet PLC abided by:

- "eJ Fuel Burn and CO₂ emission KPIs calculation methodology doc_FY21" document of 29 October 2021, prepared by easyJet PLC, which states key assumptions and procedures to be followed in the preparation of the report
- Greenhouse gas reporting: conversion factors 2021, issued by the UK government, Department for Business, Energy & Industrial Strategy. Published 2 June 2021
- BS EN 16258 2012 Methodology for calculation and declaration of energy consumption and GHG emissions of transport services (freight and passengers)

We conducted the independent verification based on the following verification criteria:

- ISO 14065:2013 Greenhouse Gases Requirements for greenhouse gas validation and verification bodies for use in accreditation or other forms of recognition
- ISO 14064-3:2019 Greenhouse Gases Specification with guidance for the validation and verification of greenhouse gas emissions and removals
- The IAF MD 6:2014 IAF Mandatory Document for the Application of ISO 14065:2013

Responsibilities

easyJet PLC is solely responsible for the preparation and reporting of their fuel and emissions data, for any information and evidence that support the reported data, for determining the company's objectives in relation to emissions information and management, and for establishing and maintaining appropriate performance management and internal control systems from which reported information is derived.

In accordance with our verification contract with easyJet PLC, it is our responsibility to form an independent opinion, based on the examination of information and data presented in the Fuel consumption & KPI report, and to report that opinion to easyJet PLC.

We conducted our examination having regard to the verification criteria documents listed above. This involved remote staff interviews with representatives from easyJet PLC. It also included examining, on a test basis, evidence to give us reasonable assurance that the amounts and disclosures relating to the data have been properly prepared in accordance with the rules in terms of relevance, completeness, consistency, transparency, and accuracy.

Independence statement

We confirm that Verifavia SARL and the verification team are independent of easyJet PLC and have not assisted in any way with the development of the fuel consumption, CO_2 emissions, and KPI report, except for this Assurance Statement.

Opinion

We conducted a verification of the FY2020-2021 fuel consumption, the associated emissions, and the key performance indicators determined by easyJet PLC in its Fuel consumption & KPI report dated 05 November 2021. Based on the verification work undertaken to reasonable assurance, these data are fairly stated and contain no material misstatements or material non-conformities.

easyJet PLC	664137.3	653950	25404698.4	2540469.8
FY21	(metric tonnes)	(metric tonnes)	(000's)	(000's)
metrics	consumption	fuel consumption	kilometres (RPKs)	kilometres (RTKs)
Absolute	Total fuel	Revenue-based	Revenue passenger	Revenue tonne

easyJet PLC	2091813.4	2112906.4	2059726.8	2080496.2
	(metric tonnes)	(metric tonnes)	(metric tonnes)	(metric tonnes)
FY21	fuel use	total fuel use	based fuel use	revenue-based fuel use
metrics	from total	emissions from	from revenue-	emissions from
Absolute	CO ₂ emissions	<i>CO</i> ₂ e (equivalent)	CO ₂ emissions	CO ₂ e (equivalent)

easyJet PLC	81.08	81.89	consumption (litres per 100 revenue pax km) 3.21
Intensity/relative metrics FY21	gCO ₂ /RPK	gCO₂e/RPK	Specific fuel consumption

Intensity/relative	gCO₂/RTK	gCO₂e/RTK
metrics FY21		
easyJet PLC	810.77	818.9
