FY22 Trading Update Continuing to deliver on our growth strategy

Foresight Group Holdings Limited ("Foresight", "Foresight Group", "the Group"), a leading infrastructure and private equity manager, today provides an update on its performance for the financial year ended 31 March 2022 ("FY22").

Financial Highlights¹

- Strong growth in AUM to £8.7 billion, up 21% on the prior year and meeting our ambitious target, with FUM increasing 27% to £6.5 billion. This increase was achieved through wholly organic growth
- Both Revenue and Core EBITDA (pre share-based payments) are anticipated to be in line with or slightly ahead of our expectations, with operational margins remaining robust
- Total net inflows and performance of £1.5 billion for FY22, an increase of 57% on the prior year (FY21: £0.9 billion) with positive inflows in every quarter. Further disclosure on inflows and performance will be provided in the Group's FY22 results

Operational Highlights¹

Infrastructure

- Continued to invest in core asset classes including Forestry and Fibre networks, while expanding into adjacent assets such as Geothermal Energy, Pumped Hydro, and Interconnectors. This has been largely achieved through further investment in development platforms which involve moderate initial deployments but provide substantial opportunities for further future deployments
- FY22 deployment figures reflect this, with 41 transactions at a total value of £484 million coupled with substantial future deployment rights² of £427 million giving a total of £911 million (FY21: 46 transactions, £595 million deployed, future deployment rights² £47 million)

Private Equity

- Deployed £81 million across 53 equity transactions as SME entrepreneurs and owner-managers were able to focus on their corporate strategies as the uncertainties created by COVID-19 ease (FY21: £59 million deployed, across 41 equity transactions)
- Considerably grew our presence in secured lending, investing £47 million (FY21: £13 million)
- As announced in January, strong performance by the Group's first North-West fund (FRIF) exceeded expectations, generating performance fees in FY22

Foresight Capital Management ("FCM")

- Expanded the OEIC offering in Q4 FY22 with the launch of the FP Foresight Sustainable Future Themes Fund. This fund aims to deliver growth by investing in the shares of listed companies that operate across five core themes, underpinned by sustainable development and decarbonisation
- At 31 March 2022, FCM had £1.6 billion of AUM, with net inflows and performance of £455 million in the 12 month period. This includes £72 million of net inflows and performance in Q4 FY22, which we view as a strong performance given the challenging market backdrop

- The Group has recently offset its scope 1, 2, and 3 emissions³ using verified carbon credits from

ClimateCare, a step on the Group's journey to becoming Net-Zero by 2050 or before

- Agreed an innovative new collaboration with the Eden Project, with launch scheduled by the end of June 2022 when further details will be announced

Bernard Fairman, Executive Chairman of Foresight Group Holdings Limited, commented:

"Foresight Group's first full year as a listed company has been extremely successful. We set out a clear strategy and ambitious targets at IPO and I am delighted that we are delivering as promised.

"Additionally, we are actively engaged in a number of strategically compelling M&A opportunities.

"Progress towards a low-carbon power system and a sustainable society more broadly is accelerating. This transition will impact multiple sectors, including energy itself but also industry, transport, agriculture and the way we value and use our land. We expect to see an increased appreciation of the natural capital services provided by forests, soil and oceans - in particular their ability to facilitate carbon sequestration and the reestablishment of biodiversity.

"Underpinned by strong business fundamentals and proven expertise as a sustainability-led investor, Foresight is well positioned to benefit from long term structural trends and macro conditions favouring both sustainable infrastructure and UK regional private equity investment. In short, the outlook for the Group through this year and beyond remains very positive."

FY22 Results Announcement

Foresight's Full Year Results to 31 March 2022 are scheduled to be released on Tuesday 12 July 2022, with a presentation for analysts on the same day. Details on how to attend the presentation will be available on <https://www.fsg-investors.com/> in due course.

Please note that all figures contained in this announcement are unaudited and subject to change.

About Foresight Group Holdings Limited

Foresight Group was founded in 1984 and is a leading infrastructure and private equity investment manager, operating from 12 offices across six countries in Europe and Australia with AUM of £8.7 billion as of 31 March 2022. With a long-established focus on ESG and sustainability-led strategies, it aims to provide attractive returns to its institutional and private investors from hard-to-access private markets.

Foresight Group manages over 300 infrastructure assets with a focus on solar and onshore wind assets, bioenergy and waste, as well as renewable energy enabling projects, energy efficiency management solutions, social and core infrastructure projects and sustainable forestry assets. Its private equity team manages eight regionally focused investment funds across the UK, supporting over 120 SMEs. Foresight Capital Management manages four strategies across six investment vehicles with an AUM of over £1.6 billion. It has made over 270 clean energy investments to date.

Foresight Group listed on the Main Market of the London Stock Exchange in February 2021. <https://www.fsg-investors.com/>
