Announcing Schrödinger Software Release 2018-4

11/14/2018

NOTE: This contains archival information which should not be considered current.

We are pleased to announce Schrödinger software release 2018-4, which is available for **download now**.

This quarterly release includes usability improvements and performance enhancements across all of our software. Of special note, the superposition of molecules, proteins, nucleic acids, and membranes is now significantly easier and more powerful. Additionally, a new workflow involving Glide MCS constrained docking that generates ligand alignments, ideal as input to FEP+, is now available.
