Forward-Looking Statements

Statements in this presentation that express a belief, expectation, or intention, including increased 2026 guidance and other statements that are not historical fact, are forward-looking statements under the Private Securities Litigation Reform Act of 1995. They involve a number of risks and uncertainties that may cause actual events and results to differ materially from such forward-looking statements. These risks and uncertainties include, but are not limited to: economic conditions in the markets served by the company's businesses and the businesses of its customers, some of which are cyclical and experience periodic downturns and may be affected by the imposition or threat of imposition of tariffs; the impact of geopolitical activity on those markets and the global economy, including instabilities associated with the armed conflicts in the Middle East region, and impacts on shipping in that region, and in Ukraine and any conflict or threat of conflict that may affect Taiwan; uncertainties with respect to the imposition, or threat of imposition, of government tariffs, embargoes and other trade protection measures, such as "anti-dumping" duties applicable to classes of products, and import or export licensing requirements, as well as the imposition of trade sanctions against a class of products imported from or sold and exported to, or the loss of "normal trade relations" status with, countries in which the company conducts business, could significantly increase the company's cost of products or otherwise reduce its sales and harm its business; uncertainties with respect to prices and availability of raw materials, including as a result of instabilities from geopolitical conflicts and the imposition of tariffs; uncertainties with respect to the company's ability to achieve anticipated growth within the semiconductor, life sciences, and other technology-enabled markets, including uncertainties with respect to the timing of completion of facility expansions; the impact of fluctuations in relevant foreign currency exchange rates or unanticipated increases in applicable interest rates; unanticipated delays or problems in introducing new products; the impact from any labor disputes; announcements by competitors of new products, services or technological innovations; changes in the company's pricing policies or the pricing policies of its competitors; risks related to the reliance of the Advanced Surface Technologies segment on a small number of significant customers and the geographic concentration of those customers; uncertainties with respect to the company's ability to identify and complete business acquisitions consistent with its strategy and to successfully integrate any businesses that it acquires; and uncertainties with respect to the amount of any payments required to satisfy contingent liabilities, including those related to discontinued operations, other divested businesses and discontinued operations of the company's predecessors, including liabilities for certain products, environmental matters, employee benefit and statutory severance obligations and other matters. Enpro's filings with the Securities and Exchange Commission, including its most recent Form 10-K and Form 10-Q reports, describe these and other risks and uncertainties in more detail. Enpro does not undertake to update any forward-looking statements made in this press release to reflect any change in management's expectations or any change in the assumptions or circumstances on which such statements are based.

Full-year guidance is subject to the risks and uncertainties discussed above and specifically excludes changes in the number of shares outstanding, impacts from future acquisitions, dispositions and related transaction costs, restructuring costs and the impact of changes in foreign exchange rates, in each case subsequent to September 30, 2026, and any incremental impact on demands and costs arising from tariffs announced, or trade tensions arising, subsequent to November 2, 2026.

This presentation also contains certain non-GAAP financial measures (*) as defined by the Securities and Exchange Commission. A reconciliation of historical non-GAAP measures to the most directly comparable GAAP equivalents is included as an appendix to this presentation. Adjusted EBITDA and adjusted diluted earnings per share anticipated for the full-year 2026 are calculated in a manner consistent with the historical presentation of these measures in the appendix. Because of the forward-looking nature of these estimates, it is impractical to present quantitative reconciliations of such measures to comparable GAAP measures, and accordingly no such GAAP measures are presented.

Adjusted EBITDA	$ 277.6

[1]We received a long-term promissory note in connection to the sale of a divested business. As part of our regular review of the note, in the first quarter of 2024, we concluded a reserve was needed for expected future credit losses. In the fourth quarter of 2025, the obligor of the note refinanced all of its long-term debt, which led to the repayment of the note in full, and a recovery of the corresponding loss.

[2] The termination and settlement process for our defined benefit pension plan in the United States was substantially completed in the fourth quarter of 2025, resulting in the recognition of a non-cash settlement loss to recognize actuarial losses previously deferred in accumulated other comprehensive income on our consolidated balance sheet.

Adjusted EBITDA	$ 91.3	$ 69.3	$ 254.6	$ 208.3

[1]In connection with the acquisition of LeanTeq in 2019, we recognized a liability for uncertain tax positions and a related indemnification asset for the portion of that liability recoverable from the seller. We determined the statute of limitations expired on some of the uncertain tax positions in 2026 and, accordingly, removed a portion of the liability and receivable. The release of the related liability was recorded as part of our tax expense for the nine months ended September 30, 2026 and the reversal of the related receivable was recorded as an expense in other non-operating income (expense) on our consolidated statement of operations.

[2]The termination and settlement of the Company's U.S. defined benefit pension plan were substantially completed in the fourth quarter of 2025, resulting in the recognition of a non-cash settlement loss associated with actuarial losses previously deferred in accumulated other comprehensive income on our consolidated balance sheet. During 2026, the Company finalized the annuity purchase to terminate the plan and completed the pension trust settlement process, which resulted in the return of residual pension assets and excess trust funds to the Company. These transactions generated favorable adjustments that partially offset the settlement loss recognized in 2025.

Adjusted segment EBITDA is total segment revenue reduced by operating expenses and other costs identifiable with the segment, excluding acquisition expenses, restructuring and impairment expense, amortization of the fair value adjustment to acquisition date inventory, and depreciation and amortization.

Corporate expenses include general corporate administrative costs. Corporate expenses also include $0.5 million, $3.2 million, $0.1 million, and $0.2 million of restructuring expenses for the quarters and nine months ended ended September 30, 2026 and September 30, 2025, respectively. Non-operating expenses not directly attributable to the segments, corporate expenses, net interest expense, and income taxes are not included in the computation of adjusted segment EBITDA. The accounting policies of the reportable segments are the same as those for the Company.

Management of the Company believes that it would be helpful to the readers of the financial statements to understand the impact of certain selected items on the Company's reported income and diluted earnings per share, including items that may recur from time to time. The items adjusted for in this schedule are those that are excluded by management in budgeting or projecting for performance in future periods, as they typically relate to events specific to the period in which they occur. This presentation enables readers to better compare Enpro Inc. to other diversified industrial technology companies that do not incur the sporadic impact of restructuring activities, costs associated with previously disposed of businesses, acquisitions, or other selected items. Other adjustments are included in selling, general, and administrative, cost of sales, and other operating expenses on the consolidated statements of operations.

Management acknowledges that there are many items that impact a company's reported results and this list is not intended to present all items that may have impacted these results.

The adjusted income tax expense presented above is calculated using a normalized company-wide effective tax rate excluding discrete items of 25.0%. Per share amounts were calculated by dividing by the weighted-average shares of diluted common stock outstanding during the periods.

[1]In connection with the acquisition of LeanTeq in 2019, we recognized a liability for uncertain tax positions and a related indemnification asset for the portion of that liability recoverable from the seller. We determined the statute of limitations expired on some of the uncertain tax positions in 2026 and, accordingly, removed a portion of the liability and receivable.
