## First-Quarter 2025 segment commentary:

Operational sales\* reflected below excludes the impact of translational currency.

### Innovative Medicine

Innovative Medicine worldwide operational sales grew 4.2%\* driven primarily by DARZALEX, CARVYKTI, ERLEADA, and RYBRENTAN/LAZCLUZ in Oncology, TREMFYA and SIMPONI/SIMPONI ARIA in Immunology, SPRAVATO in Neuroscience, and XARELTO in Cardiovascular/Metabolism/Other. Growth was partially offset by an approximate (810) basis points impact from STELARA in Immunology.

## MedTech

MedTech worldwide operational sales grew 4.1%\*, with net acquisitions and divestitures positively impacting growth by 2.8%. Growth was driven primarily by Abiomed in Cardiovascular and wound closure products in General Surgery. Growth was partially offset by Spine, Sports & Other in Orthopaedics.

### Full-year 2025 guidance:

Johnson & Johnson does not provide GAAP financial measures on a forward-looking basis because the company is unable to predict with reasonable certainty the ultimate outcome of legal proceedings, unusual gains and losses, acquisition-related expenses, and purchase accounting fair value adjustments without unreasonable effort. These items are uncertain, depend on various factors, and could be material to Johnson & Johnson's results computed in accordance with GAAP.

### Note to investors concerning forward-looking statements:

This press release contains “forward-looking statements” as defined in the Private Securities Litigation Reform Act of 1995 regarding, among other things: future operating and financial performance, product development, and market position and business strategy. The reader is cautioned not to rely on these forward-looking statements. These statements are based on current expectations of future events. If underlying assumptions prove inaccurate or known or unknown risks or uncertainties materialize, actual results could vary materially from the expectations and projections of Johnson & Johnson. Risks and uncertainties include, but are not limited to: economic factors, such as interest rate and currency exchange rate fluctuations or changes to applicable laws and regulations; competition, including technological advances, new products and patents attained

by competitors; challenges inherent in new product research and development, including uncertainty of clinical success and obtaining regulatory approvals; uncertainty of commercial success for new and existing products; challenges to patents; the impact of patent expirations; the ability of the Company to successfully execute strategic plans, including restructuring plans; the impact of business combinations and divestitures; manufacturing difficulties or delays, internally or within the supply chain; product efficacy or safety concerns resulting in product recalls or regulatory action; significant adverse litigation or government action, including related to product liability claims; changes to applicable laws and regulations, including tax laws and global health care reforms; trends toward health care cost containment; changes in behavior and spending patterns of purchasers of health care products and services; financial instability of international economies and legal systems and sovereign risk; and increased scrutiny of the health care industry by government agencies. A further list and descriptions of these risks, uncertainties and other factors can be found in Johnson & Johnson's most recent Annual Report on Form 10-K, including in the sections captioned "Cautionary Note Regarding Forward-Looking Statements" and "Item 1A. Risk Factors," and in Johnson & Johnson's subsequent Quarterly Reports on Form 10-Q and other filings with the Securities and Exchange Commission. Copies of these filings are available online at [www.sec.gov](http://www.sec.gov), [www.jnj.com](http://www.jnj.com) or on request from Johnson & Johnson. Any forward-looking statement made in this release speaks only as of the date of this release. Johnson & Johnson does not undertake to update any forward-looking statement as a result of new information or future events or developments.

Notes:

1 In fiscal 2023, the company completed a prioritization of its research and development (R&D) investment within the Innovative Medicine segment to focus on the most promising medicines with the greatest benefit to patients. This resulted in the exit of certain programs within therapeutic areas. The R&D program exits are primarily in infectious diseases and vaccines including the discontinuation of its respiratory syncytial virus (RSV) adult vaccine program, hepatitis and HIV development. The restructuring expenses of \$144 million in the fiscal first quarter of 2024 include the termination of partnered and non-partnered program costs and asset impairments. This program was completed in Q4 2024.

In fiscal 2023, the company initiated a restructuring program of its Orthopaedics franchise within the MedTech segment to streamline operations by exiting certain markets, product lines and distribution network arrangements. The restructuring expenses of \$55 million in the fiscal first quarter of 2025 and \$27 million in the fiscal first quarter of 2024 primarily includes costs related to market and product exits.

2 The tax impact related to special item adjustments reflects the current and deferred income taxes associated with the above pre-tax special items in arriving at adjusted earnings.
