Johnson & Johnson Launches First and Only Daily Disposable Multifocal Toric Contact Lens¹ - ACUVUE OASYS MAX 1-Day MULTIFOCAL for ASTIGMATISM

World's leading contact lens brand ACUVUE brings pioneering innovation for astigmatic patients with presbyopia, providing visual clarity and comfort²*

Launch reinforces Johnson & Johnson's position as world leader in contact lenses – pushing boundaries in optical and material science*

JACKSONVILLE, FL – June 23, 2025 – Today, Johnson & Johnson,[†] a global leader in eye health, announced the launch of ACUVUE OASYS MAX 1-Day MULTIFOCAL for ASTIGMATISM, the first and only daily disposable contact lens for people with both astigmatism and presbyopia.¹ This pioneering contact lens provides patients crisp, clear, stable vision at all distances and in all lighting conditions, along with comfort that lasts all day.² The lens is now available in the U.S. and Canada, and the launch of ACUVUE OASYS MAX 1-Day for ASTIGMATISM is expected later this summer.

"Building on our legacy of firsts, we are thrilled to launch ACUVUE OASYS MAX 1-Day MULTIFOCAL for ASTIGMATISM," said Peter Menziuso, Company Group Chairman, Vision at Johnson & Johnson.[‡] "ACUVUE is the world's leading contact lens brand* and with these new products, we now have the first and only complete family of daily-disposable contact lenses.^{#1} Clear sight empowers people to live their best lives, and we believe everyone should have the opportunity to achieve it. That's why we focus our innovation on areas with the greatest unmet needs for patients. Today, we are working to fulfill that promise, providing millions of patients with a differentiated ACUVUE experience."

"Finally, patients with both presbyopia and astigmatism can enjoy the freedom and comfort of a daily disposable lens without compromising the quality of their vision," said Dr. Mark Wells, "This new lens was designed to help patients who struggle with multiple vision correction issues, allowing them to experience the comfort and clarity of MAX."²

Based on extensive studies, 95% of people wearing ACUVUE OASYS MAX 1-DAY MULTIFOCAL for ASTIGMATISM contact lenses reported their vision was clear during their daily activities,^{§ 2} while 87% saw clearly while driving at night.^{§ 2} Additionally, 92% of wearers said their eyes felt comfortable throughout the entire day.^{¶ 2}

Astigmatism affects about 50% of the population,³ making it one of the most common vision conditions. It is characterized by imperfections in the curvature of the eye, leading to distorted or blurred vision. Presbyopia, commonly beginning in the early to mid-40s, is the gradual loss of near vision. Traditionally, there has been a gap for people with astigmatism when they begin to experience presbyopia. They've had to make compromises by either switching from daily contact lenses to reusables, or layering reading glasses over their contact lenses.

The ACUVUE OASYS MAX 1-Day MULTIFOCAL for ASTIGMATISM contact lens is built with the combination of four proprietary technologies⁴ which enable its comfort and visual results: BLINK STABILIZED Design helps the lens stay put, so vision is not distorted or blurry when you blink or move your head.^{2,4} PUPIL OPTIMIZED Design helps meet presbyopic vision needs, even as you age and your vision continues to change.⁵ TearStable Technology helps keep the lens hydrated, facilitating end of day comfort.^{†† 2,6,7,8} Finally, the OptiBlue Light Filter provides 60% blue-violet light filtering, the highest in the industry.^{**†† 7,8}

Later this summer, the ACUVUE OASYS MAX 1-Day for ASTIGMATISM contact lens will launch in both the U.S. and Canada, making the ACUVUE OASYS MAX 1-Day Family of lenses the first and only complete daily disposable family of contact lenses on the market.^{# 1} Both ACUVUE OASYS MAX 1-Day MULTIFOCAL for ASTIGMATISM and ACUVUE OASYS MAX 1-Day for ASTIGMATISM are planned to be introduced in additional markets outside North America during 2025 and beyond. To learn more about ACUVUE OASYS MAX 1-Day MULTIFOCAL for ASTIGMATISM or to search for an eye care provider, visit <https://www.ACUVUE.com/en-us/oasys-max/>.

Important information for contact lens wearers: ACUVUE Contact Lenses are available by prescription only for vision correction. An eye care professional will determine whether contact lenses are right for you. Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and the lens care instructions provided by your eye doctor. Do not wear contact lenses if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, remove the lens and contact your eye doctor immediately. For more information on proper wear, care and safety, talk to your eye care professional, call 1-800-843-2020, or download the [Patient Instruction Guides](#).

Cautions Concerning Forward-Looking Statements

This press release contains "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995 regarding the launch of ACUVUE OASYS MAX 1-Day MULTIFOCAL for ASTIGMATISM and ACUVUE OASYS MAX 1-Day for ASTIGMATISM contact lenses. The reader is cautioned not to rely on these forward-looking statements. These statements are based on current expectations of future events. If underlying assumptions prove inaccurate or known or unknown risks or uncertainties materialize, actual results could vary materially from the expectations and projections of Johnson & Johnson. Risks and uncertainties include, but are not limited to: uncertainty of commercial success; challenges to patents; competition, including technological advances, new products and patents attained by competitors; manufacturing difficulties and delays; product efficacy or safety concerns resulting in product recalls or regulatory action; changes to applicable laws and regulations, including global health care reforms; changes in behavior and spending patterns of purchasers of health care products and services; and trends toward health care cost containment. A further list and descriptions of these risks, uncertainties and other factors can be found in Johnson & Johnson's most recent Annual Report on Form 10-K, including in the sections captioned "Cautionary Note Regarding Forward-Looking Statements" and "Item 1A. Risk Factors," and in Johnson & Johnson's subsequent Quarterly Reports on Form 10-Q and other filings with the Securities and Exchange Commission. Copies of these filings are available online at www.sec.gov, www.jnj.com or on request from Johnson & Johnson. Johnson & Johnson does not undertake to update any forward-looking statement as a result of new information or future events or developments.
