

## Senior Project / Remnant Geologist

### Eagle River Mine

#### COMPANY INFORMATION

Wesdome Gold Mines has had over 30 years of continuous gold mining operations in Canada. The Company is 100% Canadian focused with a pipeline of projects in various stages of development. The Company's strategy is to build Canada's next intermediate gold producer, producing 200,000+ ounces from two mines in Ontario and Quebec. The Eagle River Complex in Wawa, Ontario is currently producing gold the Eagle River Underground Mine. Wesdome is actively exploring its brownfields asset, the Kiena Complex in Val d'Or, Quebec. The Kiena Complex is a fully permitted former mine with a 930-metre shaft and 2,000 tonne-per-day mill. The Company trades on the Toronto Stock Exchange under the symbol "WDO".

#### **Responsibilities / Job Duties Performed**

- Promote safe work practices and safety culture within a production-oriented environment.
- Monitor underground bazooka / air driven diamond drill programs.
- Supervise and participate in the selection of underground diamond drill targets in Remnant areas of the mine.
- Grade control accountabilities for Remnant areas.
- Development of 3D geological models for diamond drill targets and production data in Remnant areas.
- Communicate to and receive direction from the department head.
- Contribution to daily, weekly, and monthly meetings and reports as required.
- Participate in short and long-term mine planning.
- Assist with year-end resource and reserve calculations for Remnant areas.
