Rubrik Joins Coalition for Health AI (CHAI) to Advance Responsible AI in Health

2026-07-07

PALO ALTO, Calif.--(BUSINESS WIRE)-- Rubrik (NYSE: RBRK), the Security and AI Operations Company, announced today its membership in Coalition for Health AI (CHAI), an industry-led coalition committed to developing best practices and frameworks to further innovation, safety, and security for AI. Rubrik joined to collaborate with CHAI and its members on cyber resilience and AI governance. CHAI's mission is to advance the responsible development, deployment, and adoption of AI in healthcare by fostering collaboration across the health sector, including industry, government, academia and patient communities.

Healthcare organizations are tasked with protecting **50% more sensitive data** than the global average, and cyberattacks in this sector can quickly escalate into **life-and-death issues** by disrupting critical patient care. As the **healthcare industry accelerates its adoption of AI**, safeguarding this sensitive patient information and maintaining operational continuity are more critical than ever.

"The potential for AI to transform healthcare is immense, but scaling it responsibly requires strict guardrails, timely operational recovery, and the ability to comprehensively monitor, govern, and rewind AI actions," said Josh Howell, Healthcare Chief Technology Officer, Rubrik. "By joining CHAI, Rubrik is bringing our expertise to the broader health ecosystem. In collaboration with CHAI and its members, we aim to redefine cyber resilience and governance in the wake of AI, so that the next generation of health is secure."

"I am thrilled to welcome Rubrik to our growing community of organizations committed to advancing effective and responsible health AI," said Brian Anderson, CHAI's CEO. "We are driven by the engagement and expertise of our

members and the feedback of our broader health ecosystem and the public. We look forward to working together to unlock the potential benefits of AI, on a foundation of trust, safety, and security."

As a coalition bringing together leaders and experts across the community of health systems, patient advocates, researchers, professional associations, start-ups and established technology providers, CHAI has established working groups focusing on privacy and security, transparency, usefulness, and safety of AI algorithms. CHAI recently established its first Model Card registry to support the rapid growth of model cards, or 'nutrition labels' for health AI, used to simplify procurement among health systems and solution providers.

CHAI was started by clinicians. Today, it includes nearly 3,000 organizations, including health systems, patient advocacy groups, academia, and a wide range of industry start-ups and incumbents. CHAI is committed to convening and dialogue to achieve consensus.

About CHAI

The CHAI (Coalition for Health AI) mission is to be the trusted source of guidelines for Responsible AI in Health. It aims to ensure high-quality care, foster trust among users, and meet the growing healthcare needs. As a coalition bringing together leaders and experts representing health systems, startups, government and patient advocates, CHAI has established working groups focusing on privacy and security, fairness, transparency, usefulness, and safety of AI algorithms.

About Rubrik

Rubrik (RBRK), the Security and AI Operations Company, leads at the intersection of data protection, cyber resilience, and enterprise AI acceleration. Rubrik Security Cloud delivers complete cyber resilience by securing, monitoring, and recovering data, identities, and workloads across clouds. Rubrik Agent Cloud accelerates trusted AI

agent deployments at scale by monitoring and auditing agentic actions, enforcing real-time guardrails, fine-tuning for accuracy and undoing agentic mistakes. For more information, please visit www.rubrik.com and follow @rubrikInc on X (formerly Twitter) and Rubrik on LinkedIn.
