New Rubrik AI Delivers Agentic Experience for Rubrik Security Cloud and Rubrik Agent Cloud

LAS VEGAS--(BUSINESS WIRE)-- Rubrik FORWARD -- Rubrik (NYSE: RBRK), the Security and AI Operations Company, today announced the launch of Rubrik AI, which transforms its platform with agentic-first experiences to operate at AI speed. Rubrik AI adapts to each organization's context and security threats and autonomously acts at machine speed across Rubrik's product portfolio.

From day one, Rubrik built an API-first platform to provide the industry's leading cyber resilience for customers. Now, the company has innovated the Rubrik platform even further for the agentic era. Rubrik AI powers a new way of interaction with Rubrik's solution suites that is fully agent first: Customers define the business outcomes, and Rubrik AI reasons and autonomously acts to deliver those outcomes.

"Today, Rubrik becomes an agent. Our Agentic Cyber Resilience is designed to mitigate risks from both external AI attacks and internal agent deployments," said Bipul Sinha, CEO, Chairman and Co-Founder, Rubrik. "Rubrik AI will deliver agentic automation to enable resilience against machine-speed cyber breaches and compromised AI agents."

Rubrik AI: Patent pending design reasons, acts, and recovers at machine speed, and features:

- **Agentic Mode:** One agent across RSC and RAC, reasoning over data, identity, and the agents customers deploy.
- **Agentic Guardrails:** Built-in controls with RAC ensure every autonomous action is auditable, attributable, and

reversible, preventing runaway AI risks.

- **Orchestrated Workflows:** Multi-step recovery sequences that once took human teams weeks now complete in minutes.
