Rubrik Security Cloud – Government Achieves FedRAMP® Authorization

2024-12-12

National Nuclear Security Agency sponsors Rubrik's authorization as the company showcases its ability to deliver data security and cyber resilience

PALO ALTO, Calif.--(BUSINESS WIRE)-- **Rubrik** (NYSE: RBRK), the Zero Trust Data Security™ Company, today announces **Rubrik Security Cloud – Government** has received Federal Risk and Authorization Management Program (FedRAMP®) authorization at the Moderate Impact Level. Rubrik Security Cloud – Government, built on zero trust architecture, secures enterprise, cloud, and SaaS data to ensure mission continuity in the wake of cyberattacks. The National Nuclear Security Administration (NNSA), an Office of the U.S. Department of Energy, served as the agency sponsor for Rubrik's FedRAMP authorization.

FedRAMP is a government-wide program which provides a standardized approach to security assessment, authorization, and continuous monitoring of cloud products and services. FedRAMP helps to accelerate the adoption of secure, modern cloud technologies for federal agencies, with emphasis on the security and protection of federal information. FedRAMP Moderate Impact Level authorization is most appropriate for government agencies where the "loss of confidentiality, integrity, and availability would result in serious adverse effect on an agency's operations, assets, or individuals," according to FedRAMP.

"For nearly a decade, public sector customers have trusted Rubrik to secure their data and applications, detect anomalies, and recover data post-cyberattack," said Anneka Gupta, Chief Product Officer at Rubrik. "With ransomware attacks, coordinated data exfiltration efforts by nation-state actors, and insider threats on the rise

across the government, protecting the nation's data and systems is more important than ever. Rubrik is committed to partnering with our agency customers to strengthen their cyber resilience and overall cyber posture. With our FedRAMP authorization, we can now extend our offering and support to this important market."

About Rubrik Security Cloud – Government

Built to meet FedRAMP, CJIS, FERPA, and StateRAMP security requirements, Rubrik Security Cloud – Government allows federal customers to bolster cyber resilience against cyberattacks, malicious insiders, and operational disruptions with minimal recovery downtime with air-gapped, immutable, and access-controlled data backups. The Rubrik Security Cloud platform allows customers to continuously monitor for data anomalies and emergent threats using data risk assessment, contain threats, and surgically restore affected applications and files, while avoiding malware reinfection.
