

NEWS RELEASE

Rubrik Security Cloud Launches on the AWS European Sovereign Cloud

2026-07-08

The launch will allow highly regulated European Union organisations to meet strict EU data residency requirements

LONDON--(BUSINESS WIRE)-- Rubrik, the Security and AI Operations Company, today announced the availability of Rubrik Security Cloud on the AWS European Sovereign Cloud, providing the European Union (EU) public sector and highly regulated private organisations with a cloud-native path for sovereign cyber resilience.

Organisations increasingly require resilience measures that are sovereign, not just contractually compliant. Rubrik Security Cloud on the AWS European Sovereign Cloud meets this demand. It will allow highly regulated industries, such as banking, utilities, healthcare, and government, to leverage the full power of AWS, while meeting stringent data residency requirements within the European Union (EU).

Advanced security features on a fully featured, independently operated sovereign cloud

The AWS European Sovereign Cloud is a fully featured, independently operated sovereign cloud backed by strong technical controls, and sovereign assurances designed to meet the needs of European governments and enterprises. The availability of Rubrik Security Cloud on the AWS European Sovereign Cloud allows European enterprises to protect their workloads while aligning with strict compliance frameworks, including the German Federal Office for Information Security (BSI) Cloud Computing Compliance Criteria Catalogue (C5), the Digital Operational Resilience Act (DORA), and the NIS2 Directive.

Key capabilities of Rubrik Security Cloud on the AWS European Sovereign Cloud include:

- **Data Residency:** All customer data remain strictly within the EU.
- **Core Resiliency Capabilities:** Delivers architecture-native immutable backups, Agentic AI security, sensitive data discovery, rapid recovery, and cloud-native SaaS operations.
- **Strict Compliance Standards:** Backed by C5 attestation, SOC 2 Type 1 and ISO 27001:2022.

"The AWS European Sovereign Cloud marks a significant step forward for European organisations, and Rubrik is proud to make sovereign cyber resilience available through it," said Mike Tornincasa, Chief Business Officer at Rubrik. "By bringing Rubrik Security Cloud to the AWS European Sovereign Cloud, we are expanding our trusted sovereign portfolio, delivering the same immutable protection and recovery certainty to cloud-first teams moving regulated workloads to the cloud."

Building on Forward-Looking Innovation

Today's announcement builds on the suite of advanced capabilities recently introduced at Rubrik Forward 2026, including:

- **Autonomous Business Recovery:** Automating multi-cloud application reconstruction.
- **Rubrik AI:** The agentic AI system built for cyber recovery.
- **Identity Resilience Solutions:** Safeguarding user authentication during identity provider outages.
