Rubrik Selected as an AHA Preferred Provider for Cybersecurity Resiliency

2026-04-08

Beyond Prevention: Rubrik is shifting healthcare's focus from stopping attacks to rapid, life-saving recovery.

PALO ALTO, Calif.--(BUSINESS WIRE)-- Rubrik (NYSE: RBRK), the Security and AI Operations Company, is now an **American Hospital Association (AHA) Preferred Cybersecurity Provider**. Rubrik is offering cyber resilience and data protection tools, ransomware training, and financial risk analysis to nearly 5,000 AHA member hospitals.

Hospital Cyber Incidents

U.S. healthcare is at a breaking point. Ransomware and other cyberattacks can force total facility shutdowns, a crisis that is life or death for patients, especially in communities with no other treatment options.

"A cyberattack against a hospital, which disrupts or delays healthcare delivery, is more than a technical issue; it is a threat to life crime," said John Riggi, National Advisor for Cybersecurity and Risk at AHA. "Ransomware attacks that knock critical care systems offline threaten patient and community safety. As an AHA preferred provider for cyber resiliency, we can confidently recommend Rubrik as a reliable source to defend against and recover from sophisticated cyberthreats and ransomware attacks for our hospitals and healthcare system."

The **AHA's Preferred Cybersecurity & Risk Provider Program** identifies trusted providers with vetted services that can help hospitals and health systems protect their patients and operations from cyberattacks and physical threats.

The AHA represents nearly 90 percent of the nation's hospitals and health systems, including more than 420,000 healthcare workers. With its AHA designation, Rubrik now offers hospital and health system leaders a concrete path to securing their infrastructure.

"Cyber resilience is essential now that frequent cyberattacks jeopardize the financial stability of healthcare systems and the safety of their patients," said Josh Howell, Healthcare Chief Technology Officer at Rubrik. "Rubrik's AHA designation is an honor that acknowledges the importance of minimizing the fallout from cyberattacks, knowing where and how to restore critical systems quickly, and, most importantly, ensuring uninterrupted care that saves lives."

Exclusive to AHA members, Rubrik's Cyber Resilience Bundle includes **Identity Recovery**, and **Microsoft 365 protection** to safeguard Tier 0 applications and maintain a **Minimum Viable Hospital** during attacks. The bundle includes an immersive ransomware-response workshop and a complimentary five-year financial impact assessment for providers to quantify and mitigate cyber risk.
