FIRST QUARTER CONSOLIDATED RESULTS

	Three Months Ended July 31,		
	2026	2025	% Increase (Decrease)
(Dollars and shares in millions, except per share data)			
Net sales	\$2,219.3	\$2,113.3	5 %
Operating income	\$511.6	\$45.6	n/m
Adjusted operating income	540.7	370.3	46 %
Net income (loss) per common share – assuming dilution	\$3.03	(\$0.41)	n/m
Adjusted earnings per share – assuming dilution	\$3.24	\$1.90	71 %
Weighted-average shares outstanding – assuming dilution	107.1	106.6	— %

Net Sales

Net sales increased \$106.0 million, or 5 percent. The increase in net sales reflects a 4 percentage point increase from net price realization, primarily driven by higher net pricing for coffee. Net sales also reflects a 1 percentage point increase from volume/mix, primarily driven by increases for *Uncrustables*® sandwiches and coffee, partially offset by decreases for sweet baked goods and peanut butter.

Operating Income

Gross profit increased \$504.9 million, or 106 percent. The increase primarily reflects lower costs, including a net favorable impact of derivative gains and losses, as well as tariff refunds, higher net price realization, and favorable volume/mix. Gross profit included tariff refunds received of approximately \$115.0 million during the quarter. Operating income increased \$466.0 million, primarily reflecting the increase in gross profit, partially offset by an increase in selling, distribution, and administrative (“SD&A”) expenses.

Adjusted gross profit increased \$207.0 million, or 28 percent. The difference between adjusted gross profit and generally accepted accounting principles (“GAAP”) results reflects the exclusion of the change in net cumulative unallocated derivative gains and losses and special project costs. Adjusted operating income increased \$170.4 million, or 46 percent, which further reflects the exclusion of amortization expense and other special project costs as compared to GAAP operating income.

Interest Expense and Income Taxes

Net interest expense decreased \$17.9 million, primarily due to reduced debt outstanding as compared to the prior year. Net interest expense included \$4.0 million of interest income associated with the receipt of tariff refunds during the quarter.

The effective income tax rate was 24.2 percent in the quarter, as compared to 22.3 percent in the prior year. The increase in the effective income tax rate was primarily due to the impact of the loss before income taxes in the prior year. The adjusted effective income tax rate was 24.2 percent in the quarter and the prior year.

Cash Flow and Debt

Cash provided by operating activities was \$425.7 million, compared to cash used for operating activities of \$10.6 million in the prior year, primarily reflecting higher net income (loss) adjusted for noncash items and less cash required to fund working capital requirements. Free cash flow was \$337.3 million, compared to (\$94.9) million in the prior year, primarily reflecting the increase in cash provided by operating activities. Net cash outflows related to debt were \$230.8 million.

FULL-YEAR OUTLOOK

The Company updated its full-year fiscal 2027 guidance, as summarized below.

	Current	Previous
Net sales decrease vs. prior year	(2.0)% to (1.0)%	(4.0)% to (3.0)%
Adjusted earnings per share	\$10.50 - \$11.00	\$9.75 - \$10.25
Free cash flow (in billions)	\$1.1	\$1.0
Capital expenditures (in millions)	\$325.0	\$325.0
Adjusted effective income tax rate	24.2%	24.3%

The Company continues to operate in a dynamic and evolving external environment, including geopolitical, macroeconomic, and policy changes, as well as changes in consumer behaviors, that could impact its fiscal year 2027 outlook. This guidance reflects the Company's expectations based on its current understanding of these factors and does not assume any impacts from new tariffs, changes to existing tariffs, or changes to the tariff refunds received in the first quarter.

Net sales is now expected to decrease 1.0 to 2.0 percent versus the prior year. The decrease in net sales primarily reflects lower net price realization and neutral volume/mix. Adjusted earnings per share is now expected to range from \$10.50 to \$11.00. This updated guidance reflects the decrease in net sales, adjusted gross profit margin of approximately 38.75 percent, which now includes approximately \$115.0 million of tariff refunds received in the first quarter, an increase of SD&A expenses of approximately 8.0 percent versus the prior year, interest expense of approximately \$335.0 million, an adjusted effective income tax rate of 24.2 percent, and 107.1 million weighted-average common shares outstanding. The adjusted earnings per share range now includes a net benefit of approximately \$0.60 related to the receipt of tariff refunds, which reflects the \$0.84 benefit from tariff refunds received in the first quarter, net of planned investments in SD&A expenses. Free cash flow is now expected to be \$1.1 billion at the midpoint of our adjusted earnings per share guidance range, with capital expenditures of \$325.0 million.

Non-GAAP Financial Measures

The Company uses non-GAAP financial measures, including: net sales excluding divestitures and foreign currency exchange; adjusted gross profit; adjusted operating income; adjusted income; adjusted earnings per share; earnings before interest, taxes, depreciation, amortization expense, impairment charges related to intangible assets, and gains and losses on divestitures (“EBITDA (as adjusted)”); and free cash flow, as key measures for purposes of evaluating performance internally. The Company believes that investors’ understanding of its performance is enhanced by disclosing these performance measures. Furthermore, these non-GAAP financial measures are used by management in preparation of the annual budget and for the monthly analyses of its operating results. The Board of Directors also utilizes certain non-GAAP financial measures as components for measuring performance for incentive compensation purposes.

Non-GAAP financial measures exclude certain items affecting comparability that can significantly affect the year-over-year assessment of operating results, which include amortization expense and impairment charges related to intangible assets; certain divestiture, acquisition, integration, and restructuring costs (“special project costs”); gains and losses on divestitures; the net change in cumulative unallocated gains and losses on commodity and foreign currency exchange derivative activities (“change in net cumulative unallocated derivative gains and losses”); and other infrequently occurring items that do not directly reflect ongoing operating results. Income taxes, as adjusted is calculated using an adjusted effective income tax rate that is applied to adjusted income before income taxes and reflects the exclusion of the previously discussed items, as well as any adjustments for one-time tax-related activities, when they occur. While this adjusted effective income tax rate does not generally differ materially from the GAAP effective income tax rate, certain exclusions from non-GAAP results can significantly impact the adjusted effective income tax rate.

These non-GAAP financial measures are not intended to replace the presentation of financial results in accordance with U.S. GAAP. Rather, the presentation of these non-GAAP financial measures supplements other metrics used by management to internally evaluate its businesses and facilitate the comparison of past and present operations and liquidity. These non-GAAP financial measures may not be comparable to similar measures used by other companies and may exclude certain nondiscretionary expenses and cash payments. A reconciliation of certain non-GAAP financial measures to the comparable GAAP financial measure for the current and prior year periods is included in the “Unaudited Non-GAAP Financial Measures” tables. The Company has also provided a reconciliation of non-GAAP financial measures for its fiscal year 2027 outlook.
