

U.S. Bank Treasury Management App Mobile SinglePoint® Now Available on Android™ Devices

3/3/2016

MINNEAPOLIS--(BUSINESS WIRE)--Mar. 3, 2016-- U.S. Bank's Mobile SinglePoint app is now available for Android users, giving the bank's business clients a secure and convenient way to manage their company's day-to-day treasury functions while away from the office.

Mobile SinglePoint has an array of features including the ability to remotely view balances, search for transaction detail, read LaunchPoint bank messages and approve ACH, wire and book transfer transactions. The app is an extension of the U.S. Bank SinglePoint desktop web portal and utilizes the same security features.

"We continue to see mobile demand grow with our commercial clients and we're excited to now extend SinglePoint functions to their Android devices," said Mary Burchette, senior vice president for U.S. Bank Global Treasury Management. Mobile SinglePoint clients have access to their company's financial information through our mobile optimized site, iPhone, iPad, and now Android apps.

U.S. Bank conducted pilot programs with several clients using Mobile SinglePoint with Android in late 2015, including The Saint Paul Foundation.

"As the primary signor for my organization, I often need to manage transfers while I'm attending an industry conference or out of the office," said Christine Searson, vice president of finance and operations at The Saint Paul Foundation. "I found that Mobile SinglePoint is very intuitive – it's optimized for Android and the navigation brings me directly to where I need to go."

Mobile SinglePoint is available for download in the App Store and Google Play stores for existing U.S. Bank SinglePoint or SinglePoint Essentials users. To learn more about Mobile SinglePoint or speak with one of the bank's treasury management representatives, call 1-800-216-3204 or send an email request to commercialsupport@usbank.com.
