Note 1. The Company

Organization

Canada Goose Holdings Inc. and its subsidiaries (the "Company") design, manufacture, and sell performance luxury apparel for men, women, youth, children, and babies. The Company's product offerings include various styles of down-filled outerwear, rain and everyday jackets, fleece, vests, apparel, footwear, and accessories for the fall, winter, and spring seasons. The Company's head office is located at 100 Queens Quay East, Toronto, Canada, M5E 1V3. The use of the terms "Canada Goose", "we", and "our" throughout these notes to the condensed consolidated interim financial statements ("Interim Financial Statements") refer to the Company.

Canada Goose is a public company listed on the Toronto Stock Exchange and the New York Stock Exchange under the trading symbol "GOOS". The principal shareholders of the Company are investment funds advised by Bain Capital LP and its affiliates ("Bain Capital"), and DTR LLC ("DTR"), an entity indirectly controlled by the Chairman and Chief Executive Officer of the Company. The principal shareholders hold multiple voting shares representing 52.5% of the total shares outstanding as at June 29, 2025, or 91.7% of the combined voting power of the total voting shares outstanding. Subordinate voting shares that trade on public markets represent 47.5% of the total shares outstanding as at June 29, 2025, or 8.3% of the combined voting power of the total voting shares outstanding.

Statement of compliance

The Interim Financial Statements are prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"), specifically IAS 34, *Interim Financial Reporting*. Certain information, which is considered material to the understanding of the Interim Financial Statements and is normally included in the audited annual consolidated financial statements prepared in accordance with IFRS Accounting Standards, is not provided in these notes. These Interim Financial Statements should be read in conjunction with the Company's audited annual consolidated financial statements for the year ended March 30, 2025.

The Interim Financial Statements were authorized for issuance in accordance with a resolution of the Company's Board of Directors on July 30, 2025.

Fiscal year

The Company's fiscal year is a 52 or 53-week reporting cycle with the fiscal year ending on the Sunday closest to March 31. Each fiscal quarter is 13 weeks for a 52-week fiscal year. Fiscal 2026 is a 52-week fiscal year.

Operating segments

The Company classifies its business in three operating and reportable segments: Direct-to-Consumer ("DTC"), Wholesale, and Other. The DTC segment comprises sales through country-specific e-Commerce platforms available across numerous markets, which includes the recommerce platform Canada Goose Generations, currently available in the United States and Canada, and our Company-owned retail stores.

The Wholesale segment comprises sales made to a mix of retailers and international distributors, who are partners that have exclusive rights to an entire market, and travel retail locations.

The Other segment comprises revenue and costs that are not related to the Company's DTC or Wholesale segments, such as sales to employees and friends and family sales.

Seasonality

The business is seasonal, and we have historically realized a significant portion of our Wholesale revenue and operating income in the second and third quarters of the fiscal year and DTC revenue and operating income in the third and fourth quarters of the fiscal year. Thus, lower-than-expected revenue in these periods could have an adverse impact on our annual operating results.

Cash flows from operating activities are typically highest in the third and fourth quarters of the fiscal year due to revenue from the DTC segment and the collection of trade receivables from Wholesale revenue earlier in the year. Working capital requirements typically increase as inventory builds. Borrowings have historically increased in the first and second quarters and been repaid in the balance of the year.

Note 2. Material accounting policy information

Basis of presentation

The accounting policies and critical accounting estimates and judgments as disclosed in the Company's audited annual financial statements for the year ended March 30, 2025 have been applied consistently in the preparation of these Interim Financial Statements except as noted below. The Interim Financial Statements are presented in Canadian dollars, the Company's functional and presentation currency.

Certain comparative figures have been reclassified to conform with the current year presentation.

Management identified an immaterial reclassification to the interim statement of financial position as at June 30, 2024, the annual statement of financial position as at March 30, 2025, and related note disclosures for comparative figures pertaining to sales taxes receivables presented in trade receivables, and sales taxes payables presented in accounts payable and accrued liabilities. Management reclassified \$9.8m and \$15.2m from accounts payable and accrued liabilities to trade receivables as at June 30, 2024 and March 30, 2025, respectively. These reclassifications did not impact the interim statement of loss, the annual statement of income, and (loss) earnings per share for either reporting period. Comparative figures have been appropriately reclassified in the interim statement of financial position as at June 30, 2024, annual statement of financial position as at March 30, 2025, and related note disclosures.

Principles of consolidation

The Interim Financial Statements include the accounts of the Company and its subsidiaries and those investments over which the Company has control. All intercompany transactions and balances have been eliminated.

Standards issued and not yet adopted

Certain new standards, amendments, and interpretations to existing IFRS Accounting Standards have been published but are not yet effective and have not been adopted early by the Company. Management anticipates that pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of the pronouncement. Information on new standards, amendments, and interpretations is provided below.

In May 2024, the International Accounting Standards Board ("IASB") issued amendments to IFRS 9, *Financial Instruments* and IFRS 7, *Financial Instruments: Disclosure* to clarify the timing of recognition and derecognition of financial assets and liabilities, the settlement of financial liabilities using an electronic payment system, and the assessment of contractual cash flow characteristics, classification and disclosure of financial assets with environmental, social, and governance linked or other contingent features. The IASB also amended the disclosure requirements for investments in equity instruments designated as fair value through other comprehensive income and added disclosure requirements for financial instruments with contingent features. These amendments are effective for annual reporting periods beginning on or after January 1, 2026. The Company is currently evaluating the impact of these amendments on the consolidated financial statements.

In April 2024, the IASB issued IFRS 18, *Presentation and Disclosure in Financial Statements* to improve reporting of financial performance. IFRS 18 replaces IAS 1, *Presentation of Financial Statements*. Many requirements from IAS 1 remain unchanged into IFRS 18. The standard sets out requirements on presentation and disclosures in financial statements. It introduces a defined structure for the statement of income composed of required categories and subtotals. The standard also introduces specific disclosure requirements for management-defined performance measures and a reconciliation between these measures and the most similar subtotal specified in IFRS Accounting Standards, which must be disclosed in a single note. IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027. Earlier application is permitted. The Company is currently evaluating the impact of the adoption of IFRS 18 on the consolidated financial statements.

Note 3. Segment information

The Company has three reportable operating segments: DTC, Wholesale, and Other. The Company measures each reportable operating segment's performance based on revenue and segment operating loss, which is the profit metric utilized by the Company's chief operating decision maker, the Chairman and Chief Executive Officer, for assessing the performance of operating segments. No single customer contributed 10 per cent or more to the Company's revenue for the first guarters ended June 29, 2025 and June 30, 2024.

Corporate expenses comprises costs that do not occur through the DTC, Wholesale, or Other segments, including the cost of marketing expenditures to build brand awareness across all segments, management overhead costs in support of manufacturing operations, other corporate costs, and foreign exchange gains and losses not specifically associated with segment operations.

The following table presents key performance information of the Company's reportable operating segments:

Note 8. Accounts payable and accrued liabilities

During the first quarter ended June 29, 2025, an arbitration that took place in fiscal 2024 concluded between the Company and a former supplier of the Company in connection with a previously announced commercial dispute relating to the termination of a contract in 2021. The arbitration resulted in an unfavourable judgment against the Company with financial compensation to be awarded to the former supplier.

Refer to "Note 23. Litigation and other contingencies" in our fiscal 2025 Annual Financial Statements for previously disclosed information on the matter.

As a result of the arbitration, the Company is required to make a one-time financial award to the former supplier of USD32.0m (\$43.8m), inclusive of legal costs. The Company recorded an accrued liability of USD32.0m (\$43.8m) for the financial award in the Interim Financial Statements for the first quarter ended June 29, 2025, which was recognized in SG&A expenses in the interim statements of loss. Subsequent to the first quarter ended June 29, 2025, the award and legal costs were paid to the former supplier.

	First quarter ende

PSUs vest on the third anniversary of the award date and are earned only if certain performance targets are achieved. Shares issued per PSU at the vesting date can decrease or increase if minimum or maximum performance targets are achieved ranging from 0% to 200% of the PSU award granted. If performance targets are achieved, the Company expects that those vested PSUs will be paid at settlement through the issuance of one subordinate voting share per PSU. The Company recorded an increase of JPY115.8m (\$0.7m, excluding translation losses of \$0.4m) on the remeasurement of the put option liability during the first quarter ended June 29, 2025. The change in fair value of the contingent consideration and the put option liability was driven by progression through the 10-year term.

For the first quarter ended June 30, 2024, the Company recorded a decrease of JPY1,259.1m (\$11.6m, excluding translation losses of \$0.9m) on the remeasurement of the contingent consideration. The Company recorded an increase of JPY242.5m (\$0.6m, excluding translation losses of \$1.5m) on the remeasurement of the put option liability during the first quarter ended June 30, 2024.

Note 15. Financial risk management objectives and policies

The Company's primary risk management objective is to protect the Company's assets and cash flow, in order to increase the Company's enterprise value.

The Company is exposed to capital management risk, liquidity risk, credit risk, market risk, foreign exchange risk, and interest rate risk. The Company's senior management and Board of Directors oversee the management of these risks. The Board of Directors reviews and agrees upon policies for managing each of these risks which are summarized below.

Capital management

The Company manages its capital and capital structure with the objectives of safeguarding sufficient working capital over the annual operating cycle and providing sufficient financial resources to grow operations to meet long-term consumer demand. The Board of Directors of the Company monitors the Company's capital management on a regular basis. The Company will continually assess the adequacy of the Company's capital structure and capacity and make adjustments within the context of the Company's strategy, economic conditions, and risk characteristics of the business.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to satisfy the requirements for business operations, capital expenditures, debt service and general corporate purposes, under normal and stressed conditions. The primary source of liquidity is funds generated by operating activities; the Company also relies on the Mainland China Facilities, the Japan Facility, and the Revolving Facility as sources of funds for short-term working capital needs. The Company continuously reviews both actual and forecasted cash flows to ensure that the Company has appropriate capital capacity.

The following table summarizes the amount of contractual undiscounted future cash flow requirements as at June 29, 2025:

Contractual obligations by fiscal year	Q2 to Q4 2026	2027	2028	2029	2030	2031	Thereafter	Total

Total contractual obligations	355.3	124.8	463.1	51.7	40.7	32.1	48.2	1,115.9

¹ Interest commitments are calculated based on the loan balance and the interest rate payable on the Japan Facility and the Term Loan of 0.93% and 7.94% respectively, as at June 29, 2025.

As at June 29, 2025, we had additional liabilities which included provisions for warranty, sales returns, asset retirement obligations, deferred income tax liabilities, the put option liability and the contingent consideration on the Japan Joint Venture. These liabilities have not been included in the table above as the timing and amount of future payments are uncertain.

Letter of guarantee facility

On April 14, 2020, Canada Goose Inc. entered into a letter of guarantee facility in the amount of \$10.0m. Within the facility, letters of guarantee are available for terms of up to 12 months from the date of issuance and will be charged a fee equal to 1.0% per annum calculated against the face amount and over the term of the guarantee. Amounts issued on the facility will be used to finance working capital requirements through letters of guarantee, standby letters of credit, performance bonds, counter guarantees, counter standby letters of credit, or similar credits. The Company immediately reimburses the issuing bank for amounts drawn on issued letters of guarantees. At June 29, 2025, the Company had \$8.3m outstanding.

In addition, a subsidiary of the Company in Mainland China entered into letters of guarantee and as at June 29, 2025 the amount outstanding was \$9.3m. Amounts will be used to support retail operations of such subsidiaries through letters of guarantee, standby letters of credit, performance bonds, counter guarantees, counter standby letters of credit, or similar credits.

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

Credit risk arises from the possibility that certain parties will be unable to discharge their obligations. The Company manages its credit risk through a combination of third party credit insurance and internal house risk. Credit insurance is provided by a third party for customers and is subject to continuous monitoring of the credit worthiness of the Company's customers. Insurance covers a specific amount of revenue, which may be less than the Company's total revenue with a specific customer. The Company has an agreement with a third party who has insured the risk of loss for up to 90% of trade accounts receivable from certain designated customers subject to a total deductible of \$0.1m, to a maximum of \$30.0m per year. As at June 29, 2025, trade accounts receivable totalling approximately \$9.0m (June 30, 2024 - \$12.0m, March 30, 2025 - \$10.7m) were insured subject to the policy cap. Complementary to the third party insurance, the Company establishes payment terms with customers to mitigate credit risk and continues to closely monitor its trade accounts receivable credit risk exposure.

Within Japan, the Company has an agreement with a third party who has insured the risk of trade accounts receivable for certain designated customers for a maximum of JPY540.0m per annum subject to a deductible of 10% and applicable only to accounts with receivables over JPY100k. As at June 29, 2025, trade accounts receivable totalling \$0.1m (JPY8.6m) were insured subject to the policy cap (June 30, 2024 - less than \$0.1m (JPY2.9m), March 30, 2025 - \$0.9m (JPY90.7m)).

Trade accounts receivable factoring program

A subsidiary of the Company in Europe had an agreement to factor, on a limited recourse basis, certain of its trade accounts receivable up to a limit of EUR20.0m in exchange for advanced funding equal to 100% of the principal value of the invoice. On April 12, 2024, this agreement was terminated with an immaterial impact to the Company's trade accounts receivables.

Refer to "Note 22. Financial risk management objectives and policies" in the Annual Financial Statements for details on the termination of this program.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise foreign exchange risk and interest rate risk.

Foreign exchange risk

Foreign exchange risk in operating cash flows

The Company's Interim Financial Statements are expressed in Canadian dollars, but a substantial portion of the Company's revenues, purchases, and expenses are denominated in other currencies, principally U.S. dollars, euros, British pounds sterling, Swiss francs, Chinese yuan, Hong Kong dollars, Japanese yen, Taiwanese dollars, and Australian dollars. The Company has entered into forward foreign exchange contracts to reduce the foreign exchange risk associated with revenues, purchases, and expenses denominated in these currencies. Certain forward foreign exchange contracts were designated at inception and accounted for as cash flow hedges.

Revenues and expenses of all foreign operations are translated into Canadian dollars at the foreign currency exchange rates that approximate the rates in effect at the dates when such items are recognized. As a result, we are exposed to foreign currency translation gains and losses. Appreciating foreign currencies relative to the Canadian dollar, to the extent they are not hedged, will positively impact operating income and net income by increasing our revenue, while depreciating foreign currencies relative to the Canadian dollar will have the opposite impact.

The Company recognized the following unrealized losses and gains in the fair value of derivatives designated as cash flow hedges in other comprehensive loss:

	First quarter ended

Foreign exchange risk on borrowings

The Company enters into derivative transactions to hedge a portion of its exposure to interest rate risk and foreign currency exchange risk related to principal and interest payments on the Term Loan denominated in U.S. dollars (see "Note 10. Borrowings"). The Company also entered into a five-year forward exchange contract by selling \$368.5m and receiving USD270.0m as measured on the trade date, to fix the foreign exchange risk on a portion of the Term Loan borrowings.

The Company recognized the following unrealized losses in the fair value of derivatives designated as hedging instruments in other comprehensive loss:

			First quar	ter ended
		June 29, 2025		June 30, 2024
(in millions of Canadian dollars)	Net loss	Tax recovery	Net loss	Tax recovery
	\$	\$	\$	\$
Swaps designated as cash flow hedges	(1.6)	0.6	(1.2)	0.4

The Company reclassified the following losses and gains from other comprehensive loss on derivatives designated as hedging instruments to net interest, finance and other costs:

	First quarter ended		
(in millions of Canadian dollars)	June 29, 2025	June 30, 2024	
Loss (gain) from other comprehensive loss	\$	\$	
Swaps designated as cash flow hedges	0.8	(0.3)	

For the first quarter ended June 29, 2025, unrealized losses of \$14.7m (first quarter ended June 30, 2024 - unrealized gains of \$2.2m) in the fair value of the long-dated forward exchange contract related to a portion of the Term Loan balance were recognized in net interest, finance and other costs in the interim statements of loss.

Interest rate risk

The Company is exposed to interest rate risk related to the effect of interest rate changes on the borrowings outstanding under the Japan Facility and the Term Loan, which currently bear interest rates at 0.93% and 7.94%, respectively.

Interest rate risk on the Term Loan is partially mitigated by interest rate swap hedges. The Company has entered into five-year interest rate swap agreements terminating December 31, 2025 to pay fixing interest rates and receive floating interest rates on notional debt of USD270.0m. The floating interest benchmark reference rate contained within the swap agreements is SOFR with the average fixed rates of 1.76%. These swap agreements fix the interest rate on the USD300.0m Term Loan. The interest rate swaps continue to be designated and accounted for as cash flow hedges.

Based on the closing balance of outstanding borrowings, a 1.00% increase in the closing interest rate during the first quarter ended June 29, 2025 would have increased interest expense on the Japan Facility and the Term Loan before hedging by less than \$0.1m and \$1.0m, respectively (first quarter ended June 30, 2024 - less than \$0.1m and \$1.0m, respectively). In the comparative period, as at June 30, 2024, along with the Japan Facility and Term Loan, the Company also had outstanding borrowings on the Mainland China Facilities and Revolving Facility, for which a 1.00% increase in the closing interest rate would have increased interest expense by less than \$0.1m and \$0.1m.
