DELIVERING GROWTH AS ONE COMPANY. ONE VOICE.

WORTHINGTON INDUSTRIES

Q2 FY2015

Becoming A Growth Company Again

Key Investment Highlights

- ✓ Leading market position in key segments
- ✓ Attractive growth opportunities across the energy value chain in production and storage, distribution (LNG) and alternative fuel (CNG) markets
- ✓ Transformation driving higher margins and capital efficiency
- ✓ Product innovation effort to drive organic growth in consumer product and industrial markets
- ✓ Conservative financial policy with low leverage and strong liquidity
- ✓ Strong management team with broad industry experience and proven track record of integrating acquisitions

Company Overview

Market-leading metals manufacturing company serving more than 5,000 customers

✓ Domestic leader in flat rolled **steel processing**

✓ Leading global manufacturer of **pressure cylinders** for consumer, industrial, alternative fuel, energy and cryogenics markets

✓ Leading independent provider of **custom-engineered operator cabs** for heavy mobile equipment

✓ Market-leading **joint ventures** serving construction and automotive end-markets

- Founded in 1955 and headquartered in Columbus, OH
- Publicly traded on the NYSE under the ticker WOR
- 82 facilities in 10 countries with 11,000 employees
- Primarily non-union facilities
- Employee, customer, supplier and investor-centered philosophy

LTM 11/30/14 Financial Metrics:

- Sales = $3,398 million
- Adj. EBITDA = $366 million
- Free Cash Flow = $132 million
- Total Leverage = 1.9x
- Corporate Credit Ratings: Baa3 / BBB

Worthington By the Numbers

WI Processed

6 MILLION TONS OF STEEL

and is the largest purchaser of steel in the U.S. behind auto makers.

Worthington's steel is in more than

TEN MILLION

OF THE 16.2 MILLION cars produced in the U.S.

Engineered Cabs manufactured and assembled some

60,000

CABS AND ROLL-OVER STRUCTURES

to keep operators of large equipment vehicles safe.

Cylinders produced more than

85 MILLION UNITS

serving the industrial and consumer products, oil & gas equipment, alternative fuels and cryogenics.

WAVE produced

1 BILLION LINEAR FEET

of ceiling grid last year. That's equal to

8 TIMES AROUND THE WORLD.

Based on FY 2014 results

WORTHINGTON'S STEEL
IT'S IN YOUR TRANSMISSION

WORTHINGTON INDUSTRIES

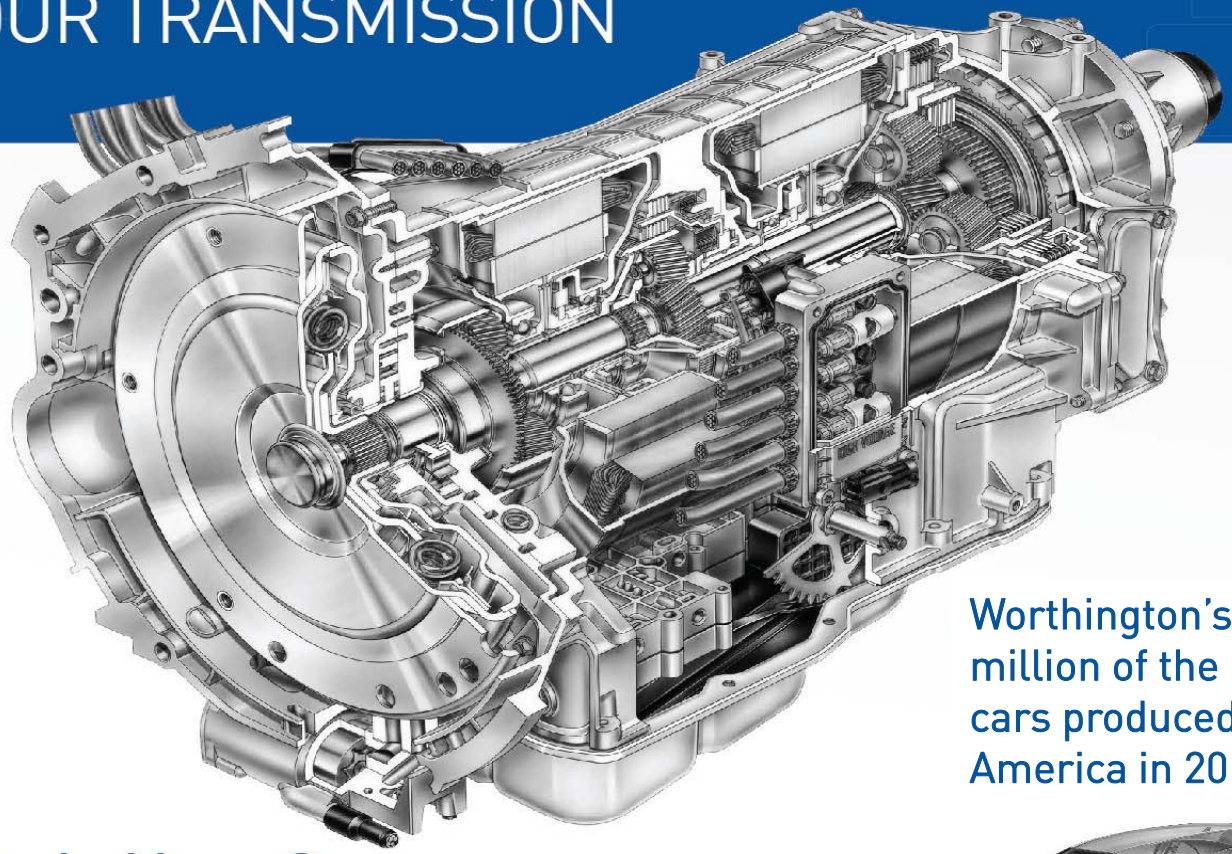

Torque Converter

The torque converter normally takes the place of a mechanical clutch in a vehicle with an automatic transmission.

Clutch Plates

Clutch plates in automatic transmissions control the torque capacity of each clutch pack.

Worthington's steel is in 10 million of the 16.2 million cars produced in North America in 2013

* EBITDA, Operating Income, and EPS exclude restructuring charges of $13 million or $0.16 per share in FY2013, restructuring charges of $56 million and non-recurring gains of $23 million for a total of $0.26 per share in FY2014, and restructuring charges of $17 million and non-recurring gains of $3 million for a total of $0.14 per share YTD FY2015.

Leveraging Our Core Competency as a Diversified Metals Manufacturer

BUSINESS STRATEGY

- ✓ Operate and grow market leading businesses
- ✓ Measure and improve the profitability of our businesses via Transformation
- ✓ Acquire higher margin, high value-added manufacturing businesses
- ✓ Use innovation to accelerate organic growth

OPERATING GOALS

- ✓ Maintain a strong capital base with modest leverage and ample liquidity
- ✓ Increase margins, free cash flow and earnings consistency
- ✓ Excel at inventory management and customer satisfaction

Changing The Way We Run Our Business

Data Driven, Accountability Focused

Performance

Transform the Business

- Operational efficiency
- Commercial excellence
- Supply chain efficiency
- High Performance Culture

Growth

Organic Growth

- Market share
- Product Innovation
- Adjacent markets

Acquisition

- New lines of business
- New markets

Excellence

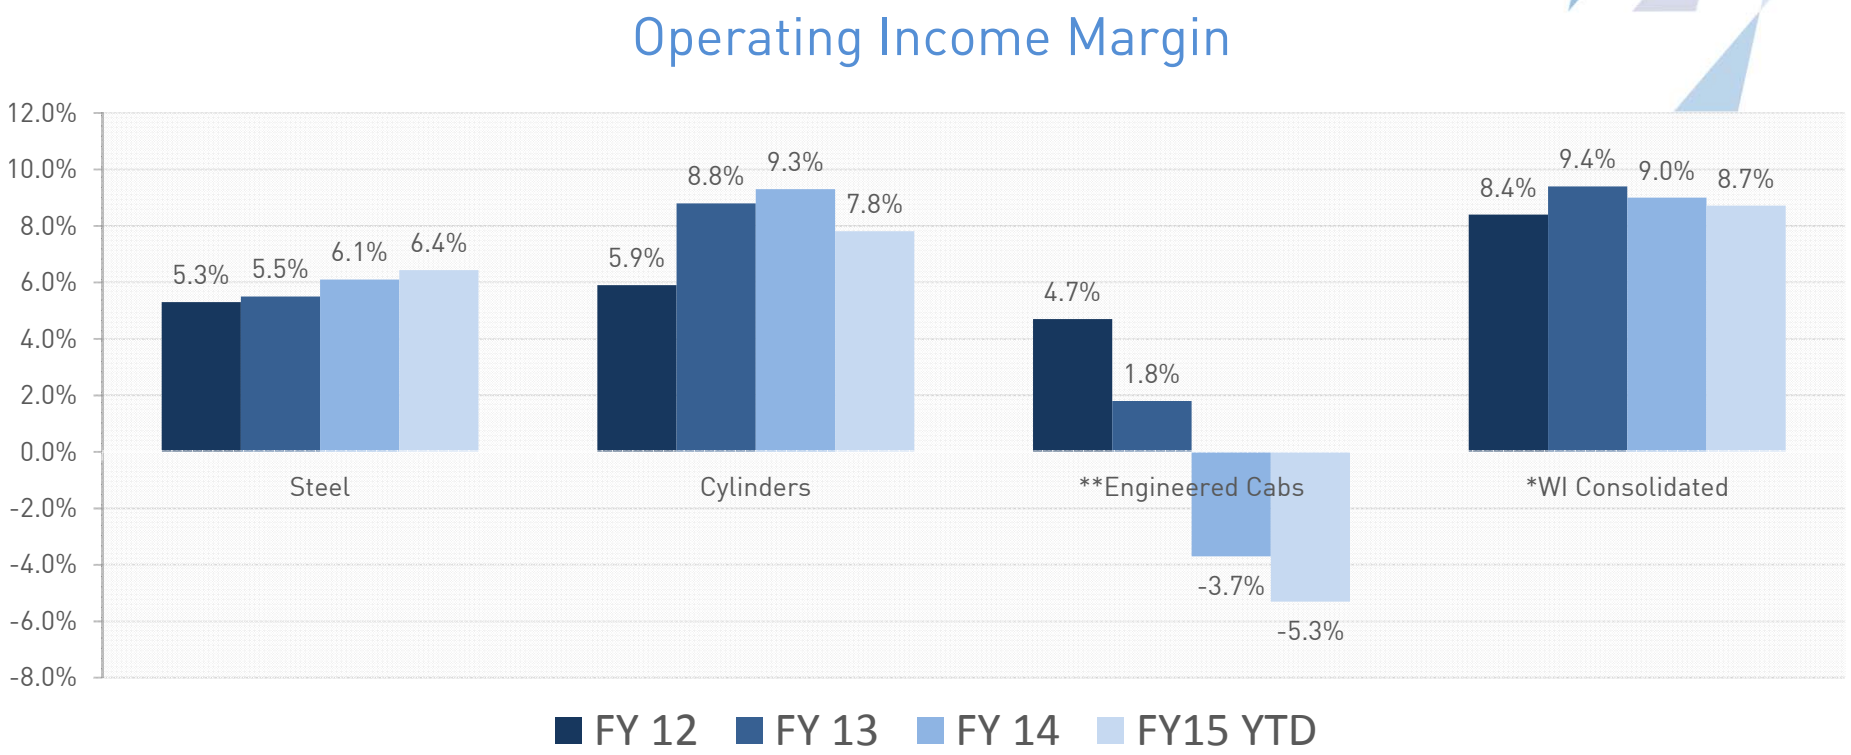

Metric Driven

- Metrics baselined, improvement goals set, regular reporting, incentives aligned

Transformation

- Operations – Lean manufacturing
- Commercial – Margin & sales momentum
- Supply Chain – Sourcing, working capital management & service levels

Operating Income Margin

Note: excludes impact of FIFO gains or losses, restructuring expenses
*WI Consolidated includes equity in net income of affiliates
**Engineered Cabs FY12 data is based on 5 months. Also, prior quarter presentations included an adjustment for purchase accounting

Steel Processing

WHO WE ARE TODAY

- One of the largest processors of flat-rolled steel and a leader in galvanized and cold rolled carbon steel
- Top 5 purchaser of flat rolled steel in the U.S.
- Market leading price risk management and hedging capabilities
- Leader in large program management for OEMs

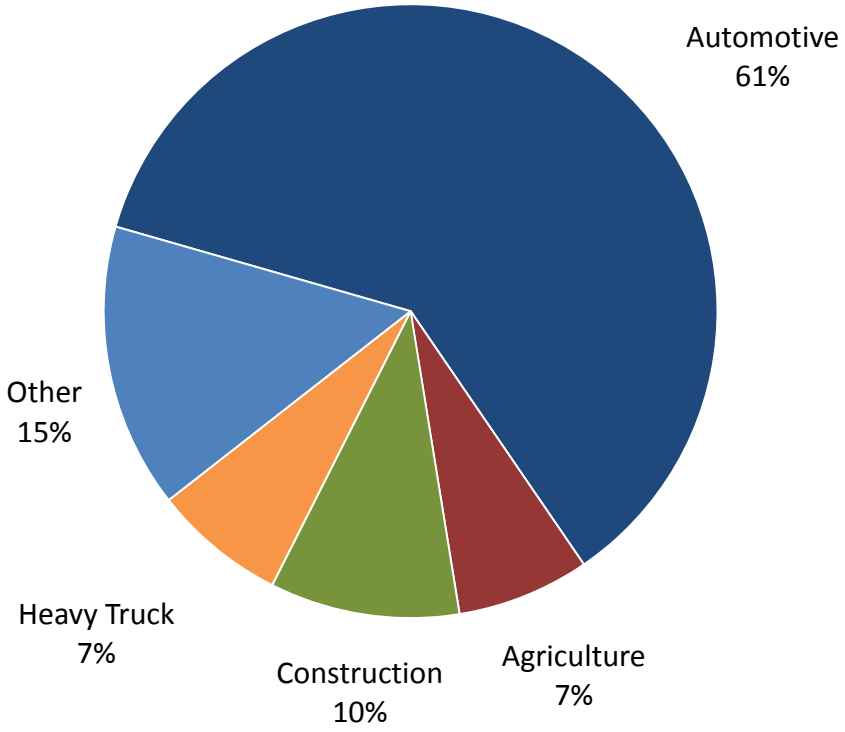

GROWTH STRATEGY

- Transformation driving improved operational, commercial and supply chain efficiency
- Focused on growth in higher margin niches and higher growth markets

Automotive Industry Dynamics

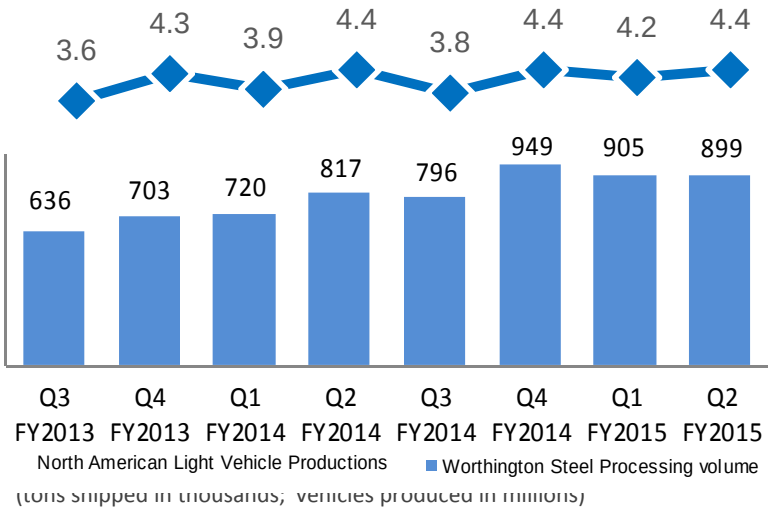

NORTH AMERICAN LIGHT VEHICLE PRODUCTION FORECAST

(vehicles produced in millions)

Source: IHS Global

VOLUME AND AUTOMOTIVE PRODUCTION

- ✓ Worthington's Steel Processing segment generates over half of its net sales from the automotive sector
- ✓ Exposure to Detroit Three as well as "New Domestics"(1)
- ✓ Increased auto sales and further re-stocking of the automotive supply chain could provide further growth opportunities

Source: Company filings and WI Auto Production Report.

(1) "New Domestics" denote foreign automotive original equipment manufacturers with domestic production.

Engineered Cabs

WHO WE ARE TODAY

- Leading independent designer and manufacturer of custom-engineered operator cabs for heavy mobile equipment
- Long-standing partnerships with blue-chip customers serving construction, agriculture and mining
- Strategically located in South Dakota, Tennessee and South Carolina near key customer manufacturing locations
- Engineering and multi-year manufacturing based recurring revenue model

EXAMPLE PRODUCTS

Engineered Cabs: Market Trends

Construction ↑

Product Applications

Articulated dump trucks, compactors, cranes, excavators, boom forklifts, wheel loaders

Agriculture ↔ ↓

Product Applications

Combines, windrowers, pickers, row crop tractors, compact tractors

Mining ↓

Product Applications

Blast hole drills, motor graders, track-type tractors, mining trucks

Forestry ↑

Product Applications

Feller bunchers, log loaders, log skidders (track & wheel)

Military ↓ ↓

Product Applications

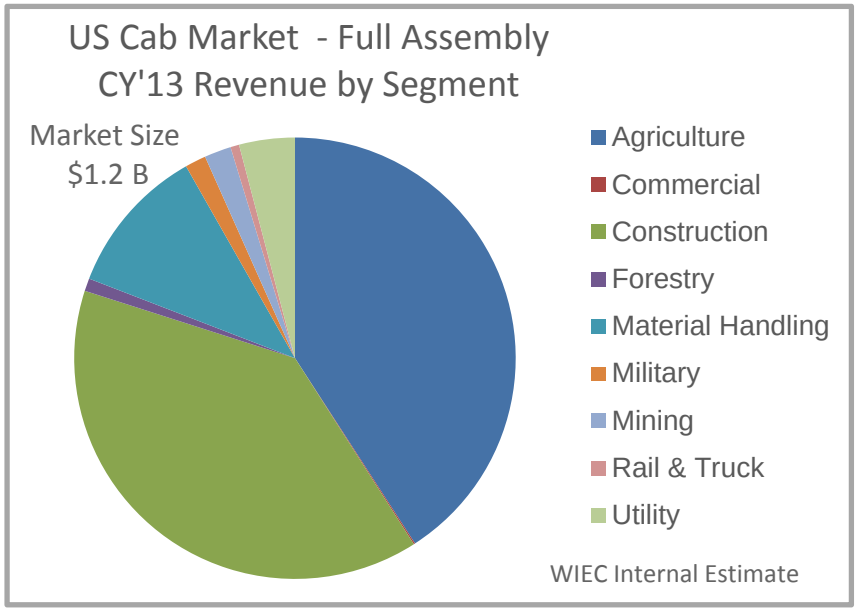

Transport plane loaders, munitions and container handlers, backhoe loaders

Utility ↔

Product Applications

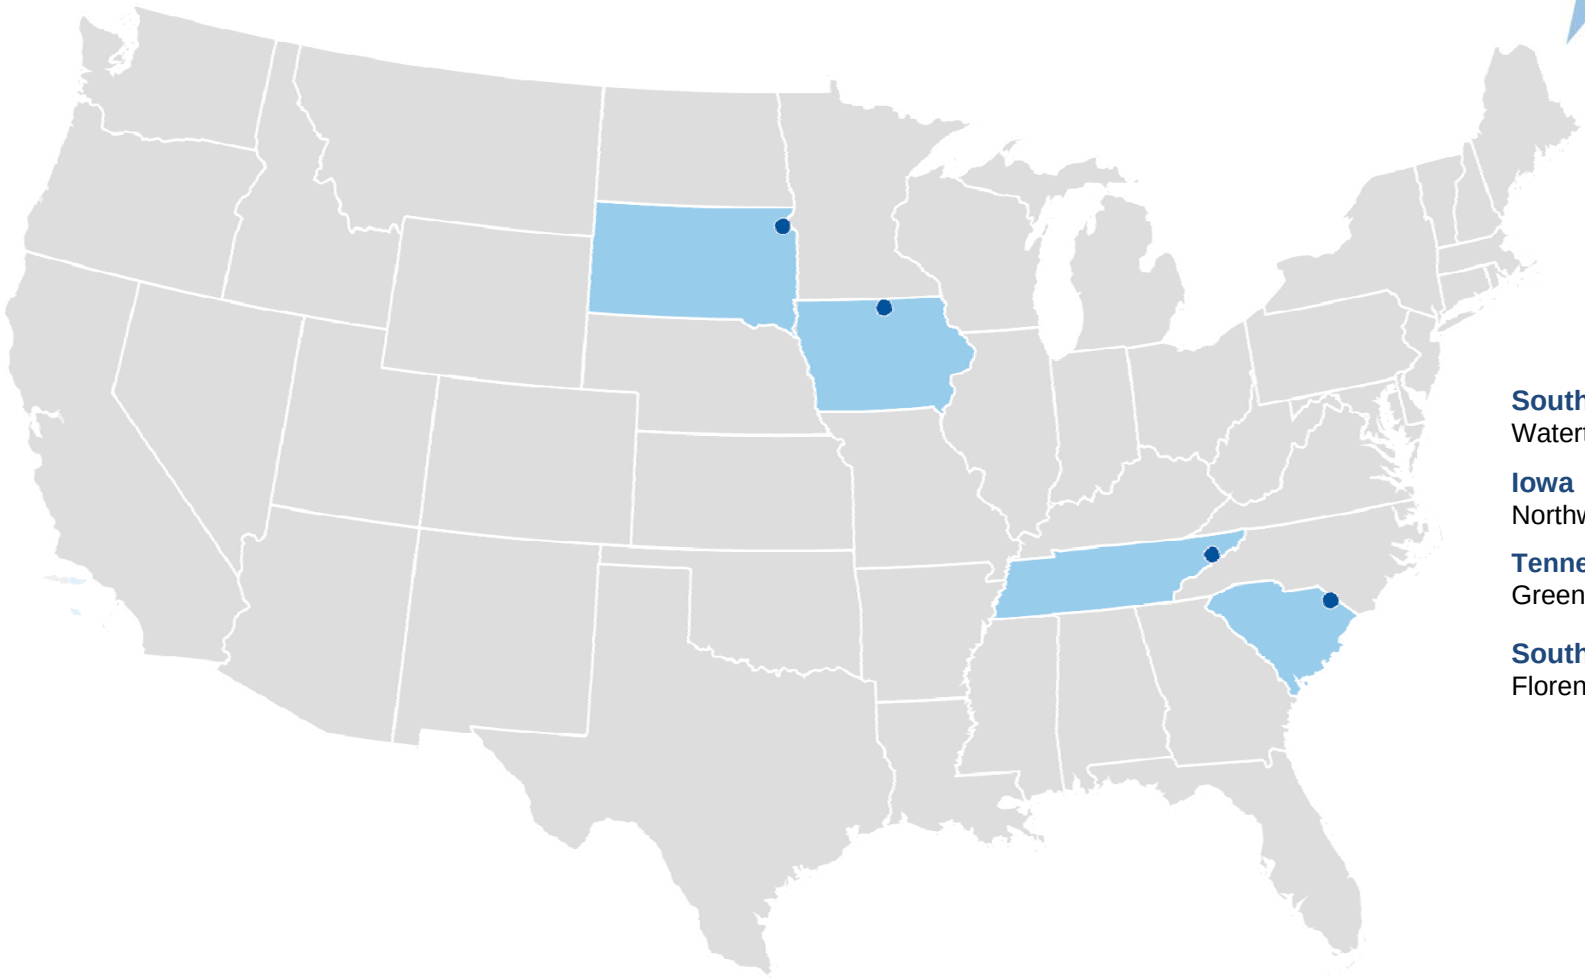

All terrain vehicles, snow groomers, street sweepers, yard trucks

Construction is recovering from market lows. Despite some improvement, large mining equipment business remains extremely weak. Forestry, considered a leading market indicator, is growing rapidly.

Successful Joint Ventures

Serving automotive and construction end markets

- Successful JV portfolio built with trusted partners who help make a business better versus the alternative of going solo
- JVs managed to produce regular cash dividends that closely approximate earnings
- Two largest (WAVE and ClarkDietrich) are market leaders with strong free cash flow

	Business	Ownership	Created
WAVE	Architectual and acoustical grid ceilings	50%	1993
ClarkDietrich	Metal framing for commercial construction	25%	2011
Serviacero	Steel processing in Mexico	50%	2005
ArtiFlex	Automotive tooling and stamping	50%	2011

WAVE

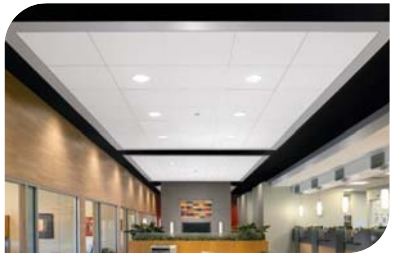

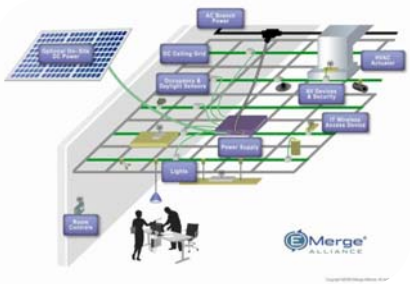

WHO WE ARE TODAY

- Worldwide leader in suspension ceiling systems
- Products marketed primarily through Armstrong brand
- Significant portion of sales to renovation markets

GROWTH OPPORTUNITIES

- Emerging market expansion
- Innovation through ceiling solutions

GROWTH FROM PRODUCT INNOVATION

Drywall Grid	Drywall Grid is a ceiling solution that provides for speedy construction and labor saving for the installer	
Axiom	An adjacent ceiling solution that creates "open ceiling" space and is aesthetically	
DC Flexzone	Safe, low voltage DC power delivered to lighting fixtures, sensors and other electrical devices	

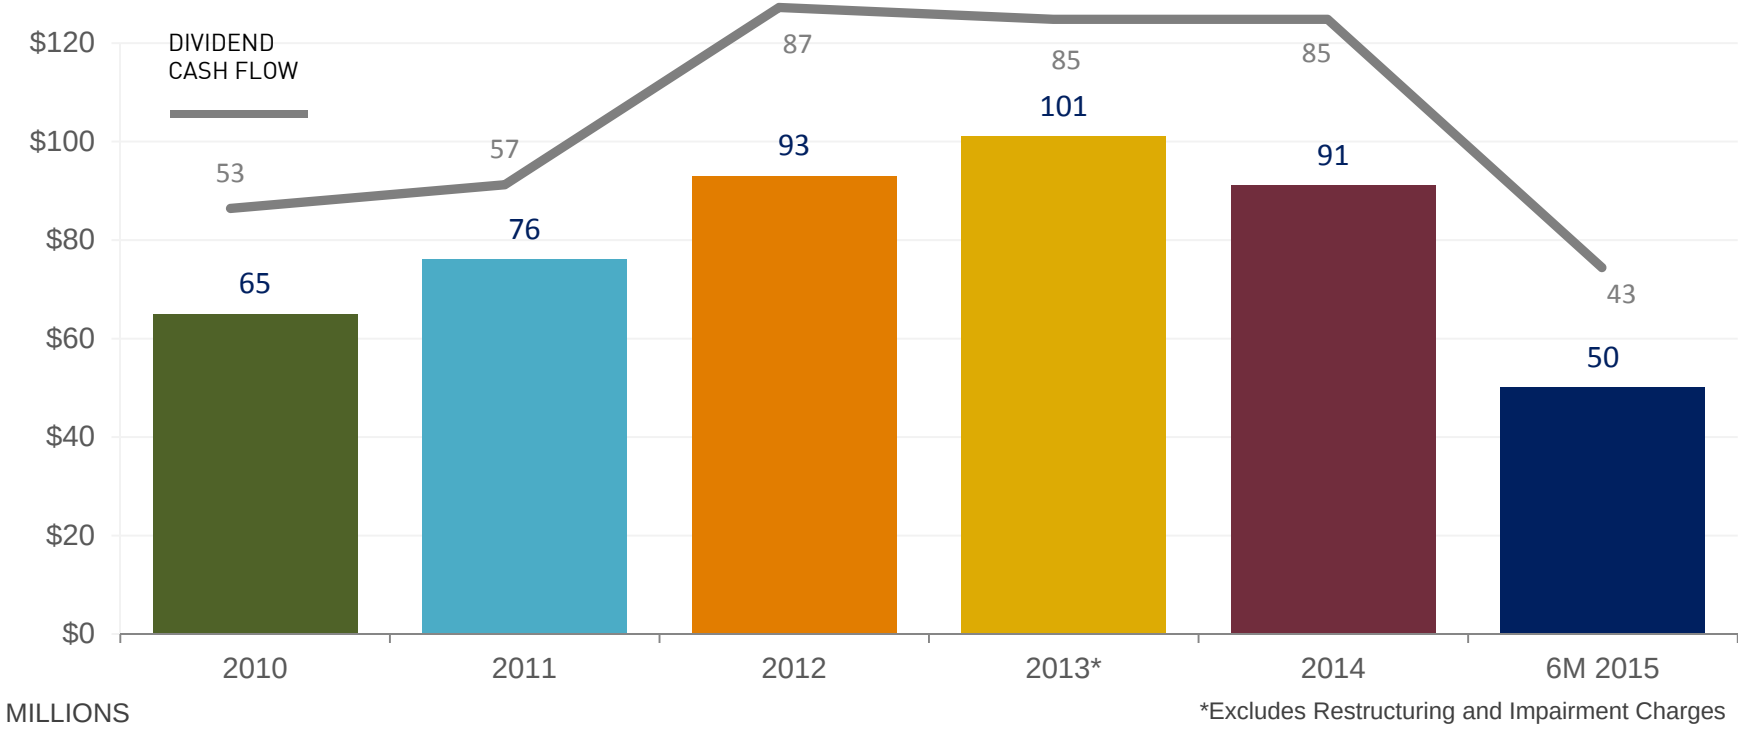

DELIVERING GROWTH AS

Key Joint Venture Earnings

Joint ventures contribute strong earnings and cash flow (from dividends)

Worthington's Joint Venture Earnings Are Growing

Joint ventures are strong contributors to the Company's pre-tax income and free cash flow.

Note: 2014 only represents two months of equity income for TWB because as of July 31, 2013 our ownership percentage increased to 55% from 45% and financials are now consolidated into Steel Processing segment. 2012 dividend cash flow excludes WAVE's special dividend of $51 million.

Key Investment Highlights

- ✓ Leading market position in key segments
- ✓ Attractive growth opportunities across the energy value chain in production and storage, distribution (LNG) and alternative fuel (CNG) markets
- ✓ Transformation driving higher margins and capital efficiency
- ✓ Product innovation effort to drive organic growth in consumer product and industrial markets
- ✓ Conservative financial policy with low leverage and strong liquidity
- ✓ Strong management team with broad industry experience and proven track record of integrating acquisitions
