TimkenSteel Investor Presentation

Second Quarter 2021

Forward looking statements & non-GAAP financial measures

Forward looking statements

This presentation includes "forward-looking" statements within the meaning of the federal securities laws. You can generally identify the company's forward-looking statements by words such as "will," "anticipate," "believe," "could," "estimate," "expect," "forecast," "outlook," "intend," "may," "possible," "potential," "predict," "project," "seek," "target," "could," "may," "should" or "would" or other similar words, phrases or expressions that convey the uncertainty of future events or outcomes. The company cautions readers that actual results may differ materially from those expressed or implied in forward-looking statements made by or on behalf of the company due to a variety of factors, such as: the potential impact of the COVID-19 pandemic on the company's operations and financial results, including cash flows and liquidity ; whether the company is able to successfully implement actions designed to improve profitability on anticipated terms and timetables and whether the company is able to fully realize the expected benefits of such actions; deterioration in world economic conditions, or in economic conditions in any of the geographic regions in which the company conducts business, including additional adverse effects from global economic slowdown, terrorism or hostilities, including political risks associated with the potential instability of governments and legal systems in countries in which the company or its customers conduct business, and changes in currency valuations; the effects of fluctuations in customer demand on sales, product mix and prices in the industries in which the company operates, including the ability of the company to respond to rapid changes in customer demand, the effects of customer bankruptcies or liquidations, the impact of changes in industrial business cycles, and whether conditions of fair trade exist in U.S. markets; competitive factors, including changes in market penetration, increasing price competition by existing or new foreign and domestic competitors, the introduction of new products by existing and new competitors, and new technology that may impact the way the company's products are sold or distributed; changes in operating costs, including the effect of changes in the company's manufacturing processes, changes in costs associated with varying levels of operations and manufacturing capacity, availability of raw materials and energy, the company's ability to mitigate the impact of fluctuations in raw materials and energy costs and the effectiveness of its surcharge mechanism, changes in the expected costs associated with product warranty claims, changes resulting from inventory management, cost reduction initiatives and different levels of customer demands, the effects of unplanned work stoppages, and changes in the cost of labor and benefits; the success of the company's operating plans, announced programs, initiatives and capital investments, and the company's ability to maintain appropriate relations with unions that represent its associates in certain locations in order to avoid disruptions of business; unanticipated litigation, claims or assessments, including claims or problems related to intellectual property, product liability or warranty, and environmental issues and taxes, among other matters; the availability of financing and interest rates, which affect the company's cost of funds and/or ability to raise capital; the company's pension obligations and investment performance, and/or customer demand and the ability of customers to obtain financing to purchase the company's products or equipment that contain its products; the amount of any dividend declared by the company's Board of Directors on the company's common shares; and the overall impact of pension and other postretirement benefit mark-to-market accounting.

Additional risks relating to the company's business, the industries in which the company operates, or the company's common shares may be described from time to time in the company's filings with the SEC. All of these risk factors are difficult to predict, are subject to material uncertainties that may affect actual results and may be beyond the company's control. Readers are cautioned that it is not possible to predict or identify all risks, uncertainties and other factors that may affect future results and that the above list should not be considered a complete list. Except as required by the federal securities laws, the company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Non-GAAP financial measures

TimkenSteel reports its financial results in accordance with accounting principles generally accepted in the United States ("GAAP") and corresponding metrics as non-GAAP financial measures. This presentation includes references to the following non-GAAP financial measures: EBIT, adjusted EBIT, EBITDA, adjusted EBITDA, free cash flow and base sales. These are important financial measures used in the management of the business, including decisions concerning the allocation of resources and assessment of performance. Management believes that reporting these non-GAAP financial measures is useful to investors as these measures are representative of the company's performance and provide improved comparability of results.

See the attached schedules for definitions of the non-GAAP financial measures referred to above and corresponding reconciliations of these non-GAAP financial measures to the most comparable GAAP financial measures. Non-GAAP financial measures should be viewed as additions to, and not as alternatives for, TimkenSteel's results prepared in accordance with GAAP. In addition, the non-GAAP measures TimkenSteel uses may differ from non-GAAP measures used by other companies, and other companies may not define the non-GAAP measures TimkenSteel uses in the same way.

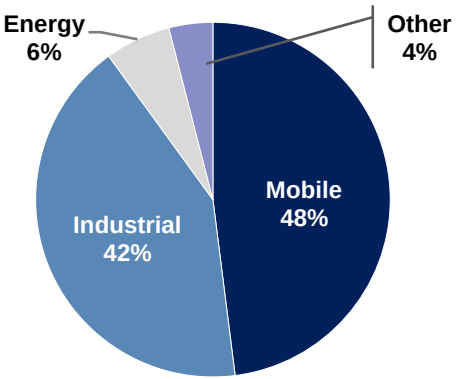

TimkenSteel overview

Overview

- Headquartered in Canton, Ohio
- Annual melt capacity of ~1.2M tons with ~900k tons annual ship capacity
- Focused North American SBQ producer with wide size range of bar capability
- Largest domestic producer of seamless mechanical tubes
- Producer of manufacturer steel components

2020 Shipments by End Market

Tons: 640,400

Products [1]

76% [2] Alloy Steel Bars (SBQ)

9% Seamless Mechanical Tubing

15% Manufactured Components

Quality

TimkenSteel applications

- Bearings
- Gears
- Crankshafts
- Energy drilling tools

Non-TimkenSteel applications

- Fasteners
- Hand tools
- Reinforcing bar
- Leaf springs

[2] Includes billets

Key investment considerations

Founded in 1917 and established as an independent public company in 2014, TimkenSteel is a manufacturer of high-quality, high-performance engineered steel, manufactured components and supply chain solutions

Brand
Best-in-class quality brand

Customers
Longstanding relationships in diverse industries

Operations
- Modern assets
- Improved through-cycle utilization via consolidated melt capacity

Cost Structure
Significant cost reductions completed & ongoing

Balance Sheet
Strong balance sheet & liquidity position enabled by cash flow generation

ESG
- Established framework with focus on GHG reduction
- 100% recycling-based electric arc furnace steel production

Employees
New & experienced leadership supported by technical & capable workforce

Broadest SBQ product offering in North America

Tubes

Tubes
3” – 13” (47.6mm – 330.2mm)

Bars

Round Corner Squares
3.1” – 12.5” (79.4mm – 317.5mm)

Bar
1” – 16” (25.4mm – 406.4mm)

Broad Commercial Position

- 400+ customers
- ~400 grades of steel
- ~8,000 customer specifications
- 35-ton average order size
- ~33,000+ orders per year
- Additional product offering forms including ingots, cast blooms, billets & manufactured components

Manufactured Components Overview

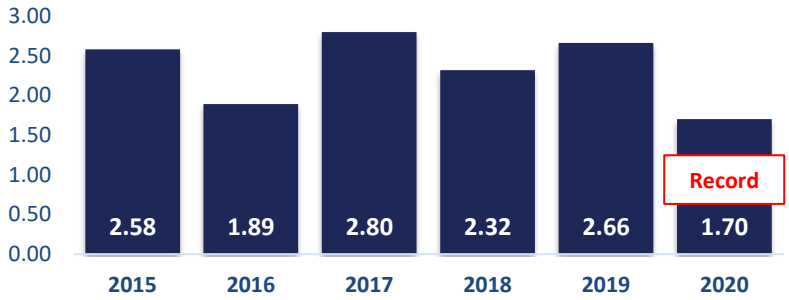

Mobile	• Planetary gear preforms; blanks for shafts and hubs • Awarded contracts for electric & hybrid vehicles • Served through SW Ohio owned facility & supplier network
Industrial	• Bearing, heavy equipment and military blanks • Served through N. Carolina owned facility & supplier network
Energy	• Transitioned to supplier network

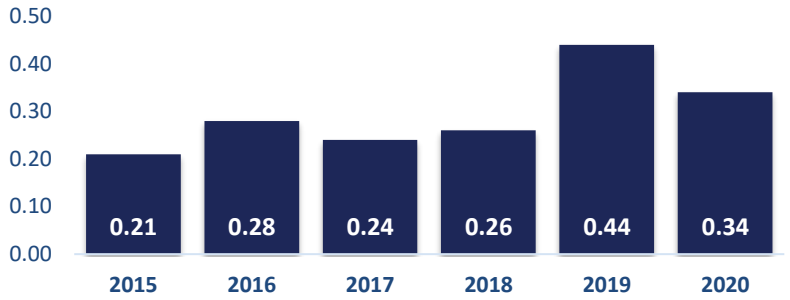

Safety remains our top priority

Total Recordable Injury Rate [1]

Lost Time Injury Rate [2]

Focus in 2021

- **Maintain incident rate** – top 1/3 Steel Manufacturers Association performance
- **Strategic projects continue** – COVID-19 mitigation planning & protocols, fatality & serious injury prevention training, confined space rescue, machine guarding, lockout tagout
- **Systemic / foundational projects** – incident & corrective action item tracking, serious incident/fatality investigation, case management & program auditing, improved use of union safety reps
- **Employee engagement & awareness** – through safety teams & Iron Shield annual safety projects

(1) Total Recordable Injury Rate is defined as OSHA recordable incidents x 200,000 / hours worked
(2) Lost Time Injury Rate is defined as OSHA days away from work cases x 200,000 / hours worked

Operating responsibly & sustainably is a strategic imperative

Highlights

- Steel production is 100% from electric arc furnaces
- Products are made from nearly 100% post-consumer scrap metal

Focus in 2021

- Published first SASB disclosure on TMST website in April 2021
- Plan to reduce GHG emissions intensity by 10% in 2021
- In process of establishing long-term goals, including GHG reduction targets, to be communicated by end of 2021

TimkenSteel maintained ISO 14001 Environmental Management System certifications for all of its domestic facilities which produce or process steel.

Received Encouraging Environmental Excellence Award from Ohio EPA for metals reclamation at the company's water treatment plant.

802,278 tons of 100% recycled scrap were delivered to our melt shops in 2020.

(1) Greenhouse Gas (GHG) Emissions defined as average metric tons of CO_2 emitted per metric ton of steel produced
(2) Energy Intensity defined as average gigajoule per metric ton of steel produced
(3) https://www.worldsteel.org/steel-by-topic/sustainability/sustainability-indicators.html. Global average GHG emissions incorporates Scopes 1 (direct), 2 (indirect), and 3 (optional). TimkenSteel data incorporates Scopes 1 and 2. TimkenSteel has not created a Scope 3 inventory.

Significant investments

Our investments have built the leading domestic capacity for high-performance SBQ materials and manufacturing components capabilities

Major Project	Commission Year	Investment ($M)	Rationale
New Refiner	2013	25	Reduce melt constraint; target high alloy products
Intermediate Finishing Line	2013	46	Improve safety & productivity; target completion tubing
Forge Press & Peeler	2013	34	Improve yield; target highly uniform bars for industrial & energy markets
Jumbo Bloom Vertical Caster	2014	200	Increase yield, capacity & flexibility
Advanced Quench & Temper Facility	2016	41	Increase share in energy completion products
Manufactured Components Expansion	2020	21	Grow manufacturing components capabilities to support automotive market share gain

Jumbo Bloom Vertical Caster

- ~125,000 tons of added capacity
- 10% yield improvement
- Flexible capacity in all environments
- Superior cleanness for strand cast products
- Broader capability to support higher-value SBQ products

Manufactured Components Expansion

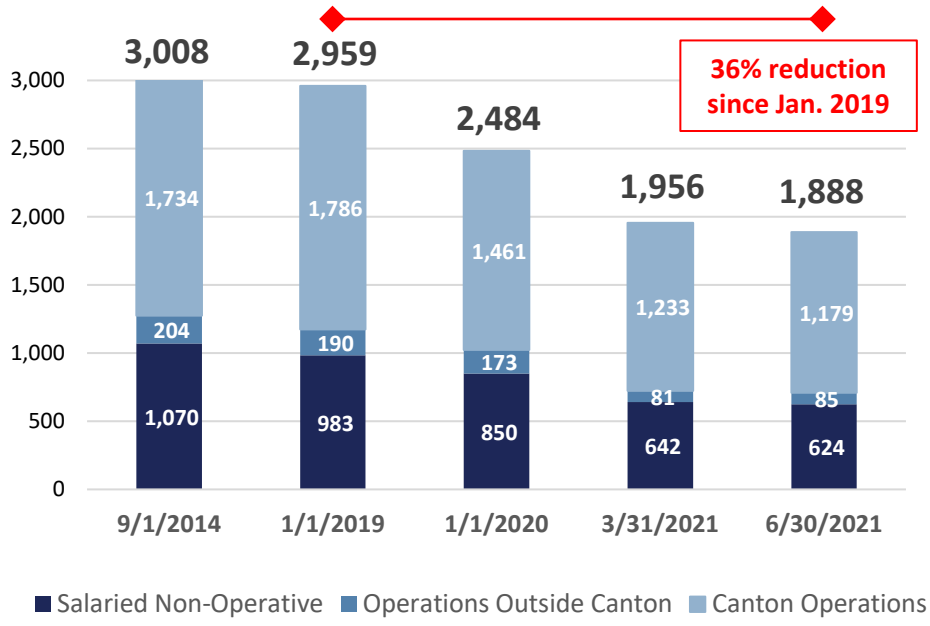

- $21M expansion at in Eaton, Ohio facility completed in 2020
- Specialized machining focus in automotive high-quality components
- 6 additional machining lines installed with room to grow
- ~3.5M unit incremental gear machining capacity
- Currently executing planned new business through 2028+

Over $400M of capital investments over last ~10 years while sustaining a long-term approach to asset integrity

Ongoing efforts to improve cost competitiveness

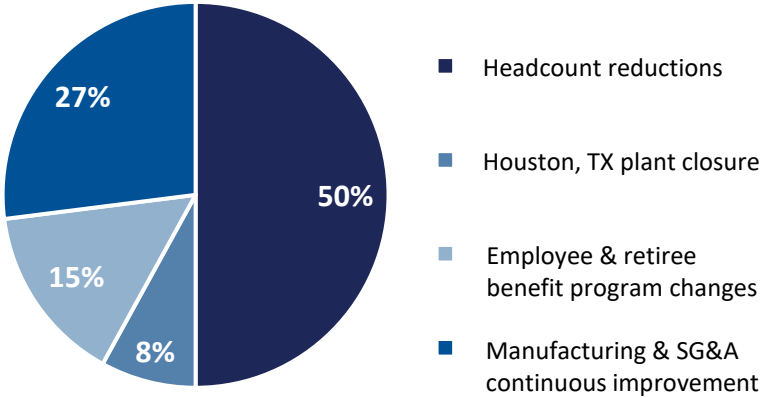

Delivered >$100M of run rate savings in 2020, with additional actions to be completed and in process in 2021+

Total Employees

Summary of Cost Reduction Actions

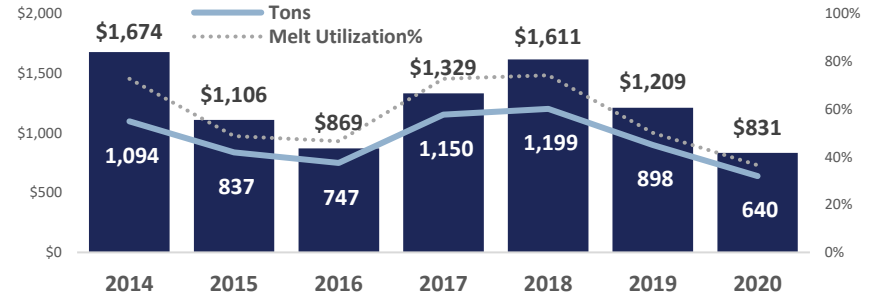

- **Achieved > $100M of run rate savings in 2020** with ~75% structural & ~25% variable with volume
- **Components of achieved > $100M run rate savings:**

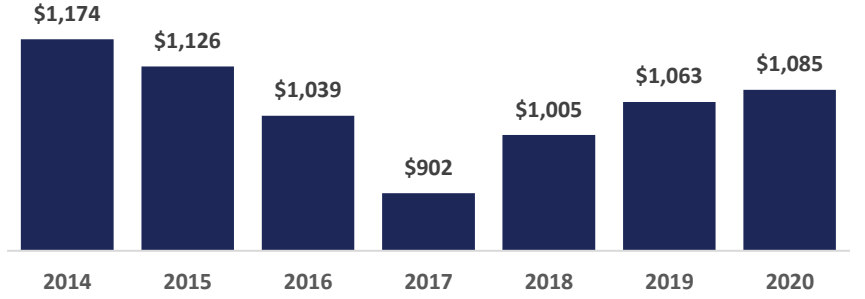

- **Additional recent actions:**
  - Transitioned to single melt shop = ~$15M to ~$20M of annual savings (~50% savings recognized in 2020 / ~50% savings beginning in 2022)
  - Exited small diameter tubing = ~$3M annual savings (starting Q2 2021)

Recent quarterly financial performance

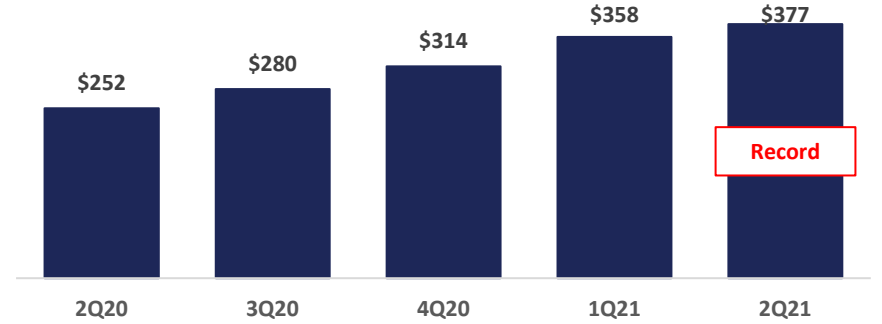

2Q 2021 Highlights & Outlook

- Net sales of $327.3M increased 20% sequentially
- Record profitability with net income of $54.0 million and adj. EBITDA[(1)] of $71.0 million, a significant improvement both sequentially & compared with 2Q 2020
- **Outlook for 3Q 2021**
  - **Ship tons** – expected to be similar to second quarter levels
  - **Annual shutdown** – cost of approx. $5 million in 3Q and $5 million in 4Q
  - **Melt utilization** – 85% or higher with single Faircrest melt shop
  - **CapEx** – approx. $15 million to $20 million in 2021

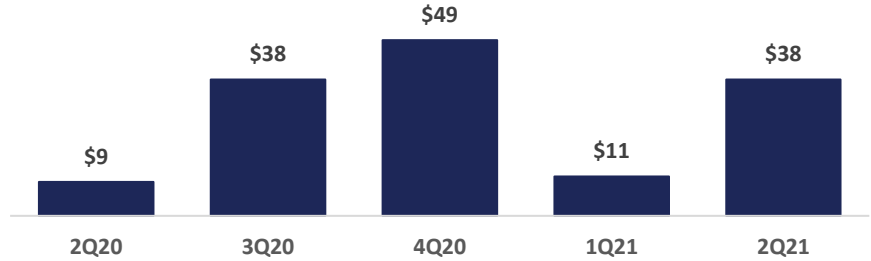

Adjusted EBITDA ($M)[(1)]

Total Liquidity ($M)[(2)]

Free Cash Flow ($M)[(3)]

(1) Adjusted EBITDA is defined as net income (loss) before interest expense, income taxes, depreciation and amortization, presented on a non-GAAP basis excluding certain items; see Appendix for a reconciliation of non-GAAP measures
(2) Total Liquidity is defined as available debt under credit facility plus cash and cash equivalents
(3) Free Cash Flow is defined as net cash provided (used) by operating activities less capital expenditures; see Appendix for a reconciliation of non-GAAP measures

Reconciliation of Earnings (Loss) Before Interest and Taxes (EBIT)[1], Adjusted EBIT[3], Earnings (Loss) Before Interest, Taxes, Depreciation and Amortization (EBITDA)[2] and Adjusted EBITDA[4] to GAAP Net Income (Loss)

This reconciliation is provided as additional relevant information about the Company's performance. EBIT, Adjusted EBIT, EBITDA and Adjusted EBITDA are important financial measures used in the management of the business, including decisions concerning the allocation of resources and assessment of performance. Management believes that reporting EBIT, Adjusted EBIT, EBITDA and Adjusted EBITDA is useful to investors as these measures are representative of the Company's performance, and provide improved comparability of results. Management also believes that it is appropriate to compare GAAP net income (loss) to EBIT, Adjusted EBIT, EBITDA and Adjusted EBITDA.

Reconciliation of Earnings (Loss) Before Interest and Taxes (EBIT)[1], Adjusted EBIT[3], Earnings (Loss) Before Interest, Taxes, Depreciation and Amortization (EBITDA)[2] and Adjusted EBITDA[4] to GAAP Net Income (Loss)

This reconciliation is provided as additional relevant information about the Company's performance. EBIT, Adjusted EBIT, EBITDA and Adjusted EBITDA are important financial measures used in the management of the business, including decisions concerning the allocation of resources and assessment of performance. Management believes that reporting EBIT, Adjusted EBIT, EBITDA and Adjusted EBITDA is useful to investors as these measures are representative of the Company's performance, and provide improved comparability of results. Management also believes that it is appropriate to compare GAAP net income (loss) to EBIT, Adjusted EBIT, EBITDA and Adjusted EBITDA.
