Forward-Looking Statements

During the course of this presentation, the Company (International Seaways, Inc. (INSW)) may make forward-looking statements or provide forward-looking information. All statements other than statements of historical facts should be considered forward-looking statements. Some of these statements include words such as ‘‘outlook,’’ ‘‘believe,’’ ‘‘expect,’’ ‘‘potential,’’ ‘‘continue,’’ “guidance,” ‘‘may,’’ ‘‘will,’’ ‘‘should,’’ ‘‘could,’’ ‘‘seek,’’ ‘‘predict,’’ ‘‘intend,’’ ‘‘plan,’’ ‘‘estimate,’’ ‘‘anticipate,’’ ‘‘target,’’ ‘‘project,’’ ‘‘forecast,’’ ‘‘shall,’’ ‘‘contemplate’’ or the negative version of those words or other comparable words. Although they reflect INSW’s current expectations, these statements are not guarantees of future performance, but involve a number of risks, uncertainties, and assumptions which are difficult to predict. Some of the factors that may cause actual outcomes and results to differ materially from those expressed in, or implied by, the forward-looking statements include, but are not necessarily limited to, plans to issue dividends, vessel acquisitions, general economic conditions, competitive pressures, the nature of the Company’s services and their price movements, and the ability to retain key employees. The Company does not undertake to update any forward-looking statements as a result of future developments, new information or otherwise.

Non-GAAP Financial Measures

Included in this presentation are certain non-GAAP financial measures, including Time Charter Equivalent (“TCE”) revenue, Adjusted Net Income, EBITDA, Adjusted EBITDA, free cash flow and total leverage ratios, designed to complement the financial information presented in accordance with generally accepted accounting principles in the United States of America because management believes such measures are useful to investors. TCE revenues, which represents shipping revenues less voyage expenses, is a measure to compare revenue generated from a voyage charter to revenue generated from a time charter. Adjusted Net Income consists of Net Income adjusted for the impact of certain items that we do not consider indicative of our ongoing operating performance. EBITDA represents net (loss)/income before interest expense, income taxes and depreciation and amortization expense. Adjusted EBITDA consists of EBITDA adjusted for the impact of certain items that we do not consider indicative of our ongoing operating performance. Free cash flow represents cash flows from operating activities less mandatory repayments of debt (including those under sale and leaseback agreements) less capital expenditures excluding payments made to acquire a vessel or vessels, which the Company believes is useful to investors in understanding the net cash generated from its core business activities after certain mandatory obligations. Total leverage ratios are calculated as total debt divided by Adjusted EBITDA. We present non-GAAP measures when we believe that the additional information is useful and meaningful to investors. Non-GAAP financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similar measures presented by other companies. The presentation of non-GAAP financial measures is not intended to be a substitute for, and should not be considered in isolation from, the financial measures reported in accordance with GAAP. See Appendix for a reconciliation of certain non-GAAP measures to the comparable GAAP measures.

This presentation also contains estimates and other information concerning our industry that are based on industry publications, surveys and forecasts. This information involves a number of assumptions and limitations, and we have not independently verified the accuracy or completeness of the information.

Market Update: Tanker Demand Drivers

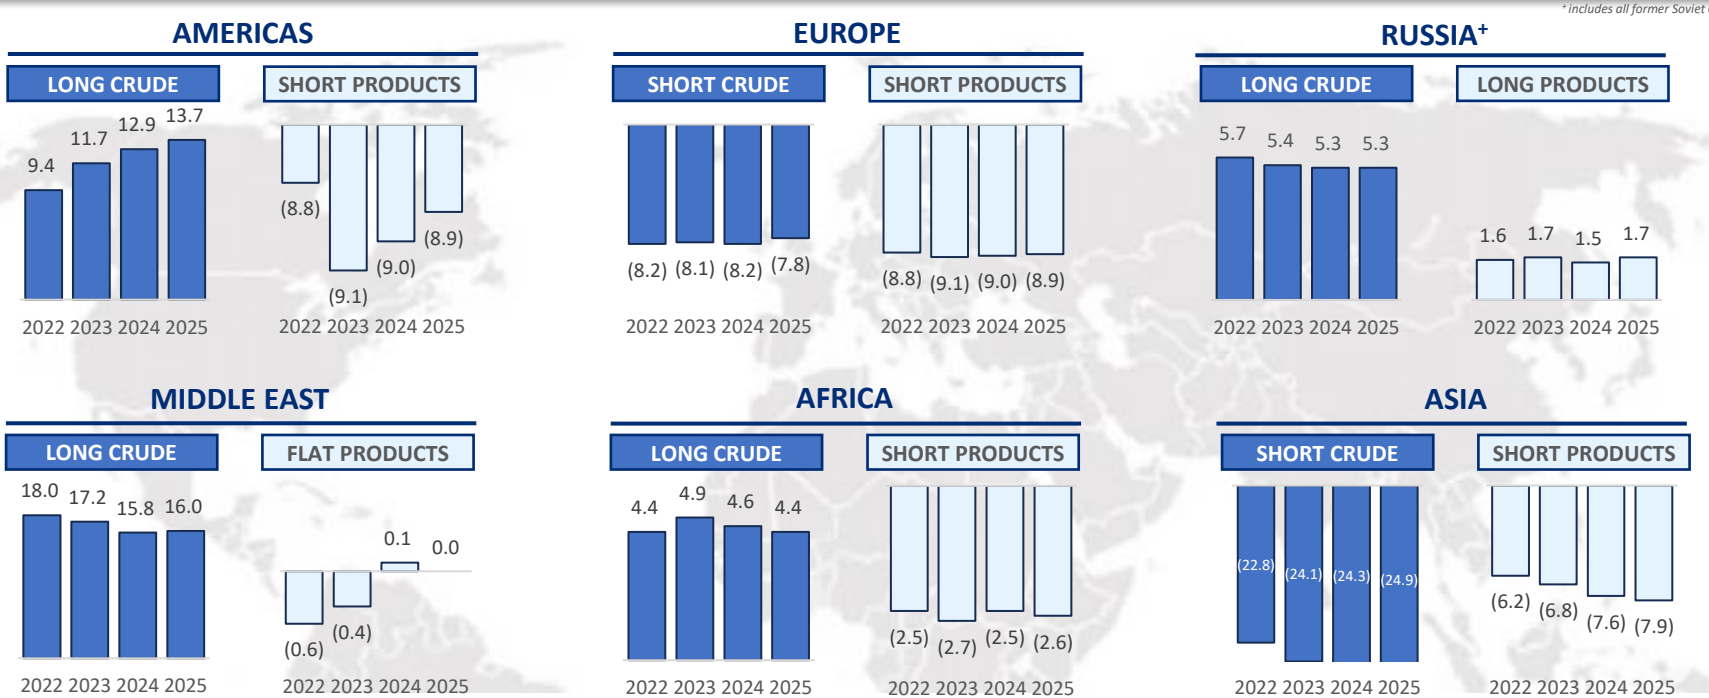

- ^ Oil demand forecasted to grow by 1.5 mpbd each in 2024 & 2025
- ^ Oil demand growth largely driven by Asia, which structurally short oil and refined products
- ^ Non-OPEC production expected to increase by more than 1 mpbd, primarily from Americas (US, Brazil, Canada, Guyana)
- v OPEC crude production remains constrained by the cartel's targets
- — Global economic indicators exhibiting volatility amid mixed data signals
- ^ Geopolitical: Enforcement of sanctions on Russia & Iranian oil ramping up; continued disruption of traditional trade routes
- ^ OECD commercial inventories drew in Q1 2024 to below 2019/2022 average
- ^ OECD SPR remains low at over 1,200 mmbls or 26 days of forward demand

Below reflects difference between crude production in the region less refinery throughput (crude) and refinery throughput less oil demand in the region (product).

Market Update: Tanker Supply Drivers

- ^ Orderbook continues to be low relative to size of the fleet: about 9% *(by dwt)*
- ^ Net fleet growth is under 4.5% since the beginning of 2022
- ^ Average age of tanker fleet has grown to 13.2 years (vs. an average age of about 9.0 years in May 2014) increasing potential recycle candidates
- v No recycling volume in major classes due to current and expected near term earnings; 3 vessels representing 0.5m dwt in Q1 2024 in aggregate
- – Sanction enforcement may impact landscape of vessel utilization
- ^ Limits to new orders: reputable shipyards filled with contracts for other shipping sectors – earliest newbuilding slots in 2027
- ^ Barriers to entry: (1) uncertain environmental regulations limiting new orders
  (2) price considerations: newbuilding prices above historical averages

Investment Highlights

Disciplined Capital Allocator	• Transformed company approximately $0.4bn market cap at time of spin-off in 2016 through today into one of the top 3 US publicly traded tanker companies by DWT with $2.6bn in market cap[1] • Invested approximately $2bn in assets at low points in the cycle (valued at over $3bn today) • In 2023, returned over $320m to shareholders, prepaid $300m in incremental debt and ordered 4x LR1s for niche pool plus took delivery of dual-fuel VLCCs placed long term time charters • Total Shareholder Return over 490% since inception
Industry Leader in ESG	• Majority independent and diverse board • Consistently at the top of Webber Research ESG rankings • Commitment to environment demonstrated by $288m dual-fuel VLCC order • Sustainability covenants in debt portfolio feature incentives to reduce our carbon footprint and focus on safety
Hybrid Operating Model ***focused on safety & flexibility***	• Focused on safety and environmental performance • Sector leading commercial pools, many with INSW ownership • Ability to scale up and down quickly with the tanker cycles
Quality Capital Structure	• Liquidity at Q1 2024: $626 million • 14% Net Loan to Asset Value[2] • Net debt is less than recycle value • 36 vessels in the Fleet are unencumbered • Spot break even rate is below $13,600 per day[3]
Compelling Tanker Fundamentals	• Regional imbalances of crude oil and refined products: low worldwide inventories and oil reserves, expanding distances between growth in oil production, refinery throughput and end-user oil demand • Limited fleet growth: Orderbook is less than 9% of current fleet, asset prices are elevated, pending regulatory changes and shipyards at capacity with other shipping sectors

(1) Average Last 30 days
(2) Fleet value from VesselsValue.com as of March 31, 2024. Net loan to value comprised of: senior debt plus all sale leasebacks less cash divided by fleet value less newbuilding capex.
(3) Estimate for next 12 months; composed of sum of vessel expenses, G&A, charterhire costs, debt service costs, DDK&Capex less profit from vessels chartered out (above expenses) divided by spot revenue days.

In Q1 2024, the Company announced the acquisition of 6 eco MRs for a total contract price of $232 million, of which 10% was paid in deposit in the same quarter. The vessels are expected to deliver during Q2 2024.
