

Letter to Shareholders

Q1 2023 | May 2, 2023

First Quarter 2023 Financial Highlights

- » Total Revenue declined 1% over the prior year quarter to \$787 million. On a foreign exchange ("FX") neutral ("FXN") basis, Total Revenue was \$822 million, up 3% over the prior year quarter.
- » Direct Revenue declined 1% (up 3% FXN) over the prior year quarter to \$774 million.
- » Tinder Direct Revenue was flat (up 4% FXN), while other brands collectively were down 3% (up 1% FXN) over the prior year quarter. Within other brands, Hinge Direct Revenue was up 27% (up 30% FXN) versus the prior year quarter.
- » Payers declined 3% to 15.9 million compared to the prior year quarter.

- » RPP increased 2% over the prior year quarter to \$16.26, up 6% FXN.
- » **Operating income** was \$198 million, a decrease of 5% over the prior year quarter, representing an operating margin of 25%.
- » Adjusted Operating Income was \$263 million, a decrease of 4% over the prior year quarter, representing an Adjusted Operating Income Margin of 33%.
- » Operating Cash Flow and Free Cash Flow were \$120 million and \$101 million, respectively, yearto-date through March 31, 2023.

Dear Shareholders,

Nearly a year has gone by since we started working together and we wanted to outline our accomplishments to date and the opportunities that lie ahead.

Our primary focus has been on Tinder – in particular, improving organizational dynamics and product and marketing execution. We've aligned the team around one product vision and are developing plans for sustainable long-term growth. While not yet easily visible in the business's financial results, we're seeing early signs in April that the changes are leading to greater momentum, which should position Tinder to exit 2023 with much improved financial performance and bright prospects going forward.

Hinge continues to shine, with a strong brand story, innovative product features, and plenty of runway on monetization. Having grown to over one million Payers primarily in English-speaking markets, we're now seeing terrific momentum in Europe and are continuing to invest to expand Hinge globally.

To drive accountability and collaboration, we've flattened the organizational structure and combined similar businesses under one leadership team. This has led to the identification of opportunities to reduce duplication and better leverage our existing resources, especially at our Evergreen brands. We're also planting the seeds of future growth across Asia and in our Emerging brands, including an exciting new app to be launched in the U.S. this summer.

We're focused on innovation to drive long-term growth. We've added a new Chief Technology Officer to work with our teams to leverage our extensive experience in the category to find new concepts and technologies that drive stronger new user adoption and increased monetization. We're leaning in on AI, where we believe developments could transform the dating experience, much like the shift to mobile transformed our business in the early 2010s, leading to the advent of Tinder.

We operate a highly profitable and cash flow generative business. Our capital allocation priorities are to invest appropriately in the business, to maintain a strong balance sheet, and to pursue compelling acquisition opportunities. Given our significant levels of cash flow, we expect to return at least half to shareholders over the next few years, and our Board has authorized a new \$1 billion share buyback program to do so. We're confident that as our momentum continues to build, we will exit 2023 as a solidly growing business. We believe this combination of capital return and growth should provide very attractive total shareholder returns.

Bernard Kim ("BK")

Business Trends

Q1 2023 Performance

In the first quarter, **Total Revenue** was \$787 million, down 1% year-over-year ("Y/Y"), driven by a 3% decline in Payers, partially offset by a 2% increase in RPP. On an FXN basis, Total Revenue was \$822 million, up 3% Y/Y. Negative Y/Y FX impacts in the quarter were \$35 million, \$7 million greater than we expected at the time of our last earnings call.

Tinder® Direct Revenue of \$441 million was flat Y/Y (up 4% FXN), driven by relatively flat Y/Y Payers and RPP, which were 10.7 million and \$13.80 for the quarter, respectively. On a sequential basis, Tinder Payers declined ~175 thousand. Revenue initiatives, which were released late in the quarter, began to contribute as expected, offset by softer than anticipated new user trends. Y/Y subscriber revenue growth remains solid, while à la carte revenue continues to be impacted by macroeconomic factors.

Hinge® Direct Revenue grew 27% Y/Y (up 30% FXN) driven by both double-digit Payers and RPP growth. Q1 Payers exceeded one million and RPP exceeded \$25. Hinge continued to drive revenue across English-speaking markets while building momentum in Continental Europe. The new subscription tiers were a limited contributor to Q1 revenue given their recent introduction, but we expect them to contribute incrementally more throughout the year.

Match Group Asia ("MG Asia") Direct Revenue declined 13% Y/Y (down 3% FXN), as continued growth at Azar® was more than offset by declines at Pairs™ and Hakuna®.

Evergreen & Emerging ("E&E") Direct Revenue was down 8% Y/Y (down 6% FXN) as we continued to reduce marketing spend at our Evergreen brands, leading to continued, but moderating, revenue declines in these brands. Our Emerging brands' Direct Revenue continued to grow more than 50% collectively, consistent with our expectations.

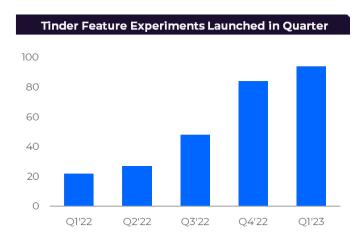

Our Q1 **Operating Income** was \$198 million, down 5% Y/Y, representing a margin of 25%. Selling and marketing spend, including stock-based compensation ("SBC") expense, was down \$15 million, or 10% Y/Y, and declined as a percentage of Total Revenue by 2 points to 17%. We increased marketing spend at Hinge, as its international expansion continued, and modestly increased it at Tinder. These increases were more than offset by decreases at nearly all other brands. Product and development costs, including SBC expense, rose 25% Y/Y, mainly due to late 2021 / early 2022 hiring at Tinder and ongoing hiring at Hinge, rising approximately 2 points as a percentage of Total Revenue to 12%. Cost of revenue, including SBC expense, was up 2% Y/Y, but essentially flat as a percentage of Total Revenue at 30%. We saw live streamer payment costs decline, but IAP fees increased 1.5 points Y/Y as a percent of Total Revenue, including the \$8 million paid into escrow related to the Google litigation.

Our Q1 **Adjusted Operating Income** ("AOI") was \$263 million, down 4% Y/Y, representing a 33% margin. We incurred approximately \$4 million in severance and similar costs during the quarter. Despite a Total Revenue shortfall versus our expectations at our last earnings call, AOI exceeded our expectations, as we achieved stronger expense discipline in the quarter than expected.

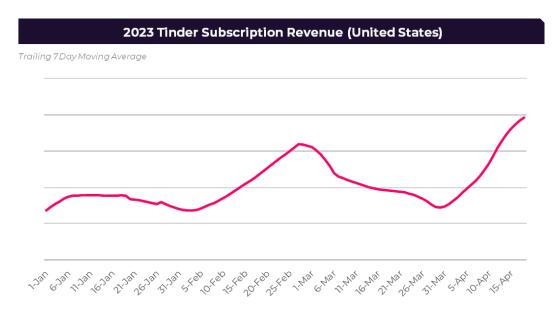

TINDER

Tinder is executing well against its 2023 priorities. The business is making clear progress on improving new feature velocity and is set up well for further product feature introductions as the year progresses, which we expect to help increase long-term user and revenue growth. In QI, the team accomplished its first two key tactical goals: begin to roll out new weekly subscription packages and price optimizations to drive incremental revenue; and roll out a global marketing campaign to begin resetting Tinder's brand narrative.

Weekly Subscriptions and Pricing Optimizations Introduced

Tinder recently expanded its test of weekly subscription packages into several additional markets, including the U.S. at the end of March. Tinder also began optimizing pricing across its subscription tiers in several markets, including the U.S., to bring its pricing much more in line with the market, though still below other key competitors. Both initiatives are leading to increased revenue, but still haven't hit full throttle yet and are expected to help drive meaningful incremental revenue as 2023 progresses. While we're cognizant that pricing actions such as these reduce Payer conversion, our focus is always on maximizing revenue and we're willing to accept lower Payer growth to achieve higher overall revenue. In Q2 we plan to further test and roll out weekly subscription packages across other markets and implement further price optimizations globally.

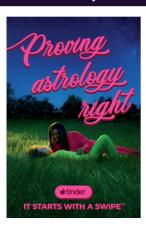

First Steps to Re-establish Tinder's Brand Narrative

In late February, Tinder launched its first global marketing campaign, *It Starts with a Swipe* $^{\text{T}}$. For years, Tinder has largely relied on virality and has made limited investments in building a resonant brand narrative, which we believe has negatively impacted brand perception and new user growth. The new campaign aims to counteract these trends by broadening Tinder's overall appeal through highlighting Tinder's vast relationship possibilities. The bold and inclusive campaign is aimed at Gen Z and, in particular, younger women.

It Starts with a Swipe™ Campaign

The campaign is underway in many key countries, including the U.S. and U.K., and is focused on out-of-home, streaming, and social media platforms. The campaign includes partnerships with influencers who share their personal Tinder success stories. We're seeing initial signs of Tinder brand perception improving, especially among young women.

It Starts with a Swipe is the first in a multi-phased, long-term effort to redefine Tinder's brand. After a strong start with the new campaign, Tinder marketing efforts will increasingly focus on highlighting new product innovations and seek to increase virality, which we expect to drive efficiencies in marketing spend.

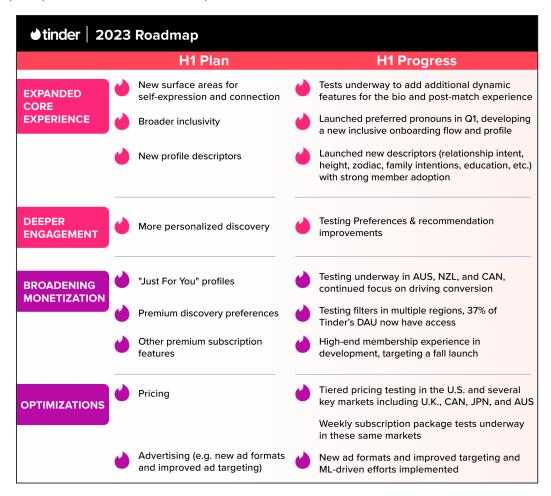

Marketing Campaign Impact¹

Tinder Product Roadmap Update

Tinder also continues to execute well on other components of its 2023 roadmap: (1) new product features to drive deeper user engagement; (2) improvements to the health of its ecosystem; and (3) additional monetization features, including the launch of a high-end membership experience, which is expected to launch in the fall.

Focus on Women's Experience

The critical focus of Tinder's product evolution is improving women's user experience, which we believe is vital to reigniting top-of-funnel growth and driving long-term success. We believe women are looking for three key aspects in their experience with Tinder: *relevancy, realness,* and *respect*. Our roadmap initiatives aim to deliver all three.

To drive *relevant* experiences, Tinder has begun testing Just for You, a curated selection of high-quality profiles that we believe women are more likely to like and use the Swipe Right® feature on. Tinder is also working on adding more dynamic and interactive profile elements such as text prompts, quizzes, and polls, and improving content creation methods to enable a richer and more engaging user experience. We expect this set of features to be rolled out in late summer.

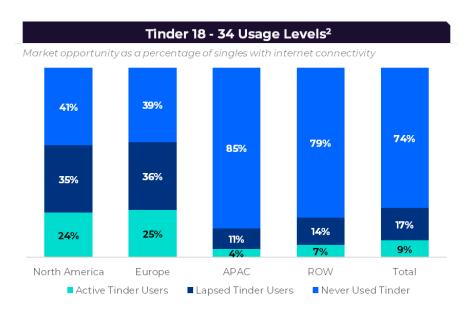

To improve *realness*, Tinder is deploying technology and new policies aimed at aggressively eliminating users who are solely on the app to target Tinder's mass audience in order to redirect its users to other social platforms. We believe this change will improve real matching for dating purposes and enhance overall user satisfaction. Additionally, Tinder recently released an AI-enabled update to its Photo Verification feature to require a series of video selfies instead of static photos to further improve realness on the app.

To help ensure that users are treated with *respect*, Tinder recently updated its 'Does This Bother You?' and 'Are You Sure?' features to include more phrases and terms that are classified as harmful or inappropriate. In addition, the team reintroduced Incognito Mode, which gives users control over who sees them while reviewing profiles on Tinder.

Ample Market Opportunity Remains

While Tinder is an iconic brand used by many, our data shows that approximately 40% of eligible singles age 18 to 34 in North America and Europe are still not using Tinder, and an additional approximately 35% have used Tinder previously, but not in the last year ("lapsed users"). This ample provides opportunity for Tinder to bring both singles who have never tried the app and lapsed users into the fold. Tinder has a strong history of reactivating lapsed users, and the large pool of lapsed users

provides significant opportunity to increase reactivations. The way for Tinder to attract new and lapsed users is to deliver exciting features and a product experience that resonates. We're confident that as Tinder does so, it can both return to stronger new user growth and reactivate the large population of lapsed users, which will ultimately drive revenue growth.

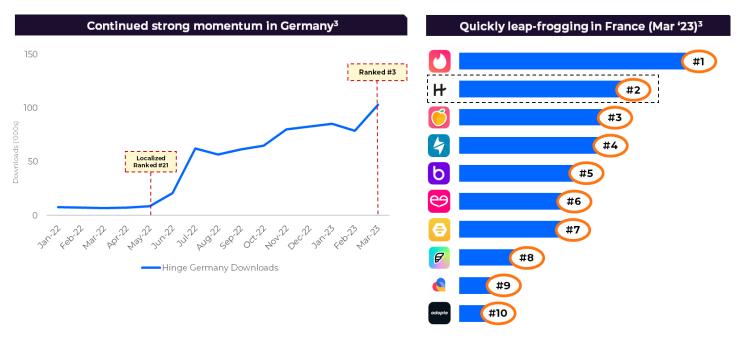

It is worth adding that less developed markets in APAC and other parts of the world are significantly underpenetrated by Tinder and other dating products. Tinder is by far the best-known brand in these markets. We believe that as Tinder continues to localize its product and focus on these markets, it can capture significant user growth. Given that some of these markets monetize at lower rates, the revenue generation opportunity is more limited than in developed markets. That said, we expect the large populations in many of these markets to provide a meaningful revenue opportunity over the coming decade, especially as social customs in these regions evolve.

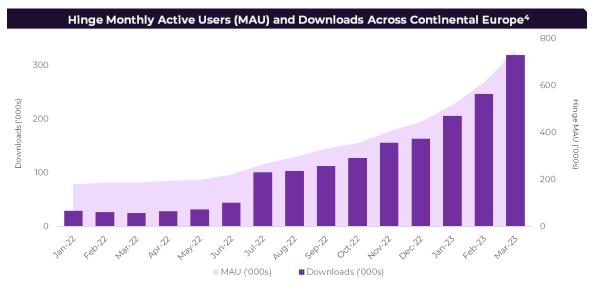

HINGE

Exceptional Momentum in Europe

Hinge has rapidly built traction as it continues its push through Europe. In March, Hinge was the second most downloaded dating app in the U.K. and remains a top three most downloaded dating app in many other key markets, including Germany and the Nordic countries. Hinge launched in France in January and by March had become the second most downloaded dating app in that market. Hinge plans to launch more targeted marketing efforts in Italy, Spain, and the Netherlands in Q2, though the app is already seeing a high level of downloads in these markets, driven by organic word-of-mouth.

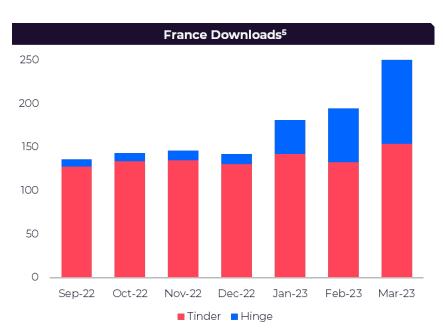

Hinge Entry into New Markets Incremental to Match Group Growth

Through our portfolio approach, we aim to cater to all demographics and dating intents. Hinge focuses its efforts squarely on intentioned daters with an app that's Designed to be Deleted®, while Tinder serves a broad audience that is open to a range of relationship possibilities. The distinct focuses are evident in the respective platforms. At Tinder, typical new user onboarding takes three to four minutes, while at Hinge the process can take more than 5x that.

As Hinge has grown in additional markets over the past few years, users have a new scaled dating option from which to choose. However, it is important to keep in mind that many singles are using, on average, three to four dating apps at any given time. In fact, based on an assessment of consumer survey data, we believe the vast majority of Tinder users who try Hinge remain active on Tinder, suggesting that Hinge usage is incremental as opposed to cannibalizing Tinder. Further, we estimate that approximately 10% of Tinder lapsed users are on Hinge.

Our data also shows that introducing Hinge in a market can lead to overall Match Group user growth, not simply a share shift among apps in the market. In markets where Hinge has recently entered, like France for example, downloads across both Tinder and Hinge have increased simultaneously, benefitting Match Group as a whole.

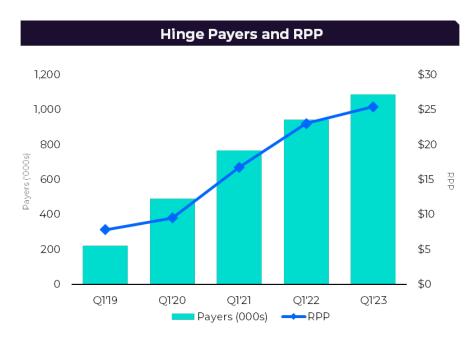

Monetization Update

In mid-February, Hinge launched new subscription tiers, $HingeX^{\mathbb{T}}$ and $Hinge+^{\mathbb{T}}$. The take rate for the premium HingeX tier remains consistent with our expectations at approximately 20% of new users.

The tiers are built to provide intentioned and motivated daters greater efficiency, compatibility, and control. Hinge's data shows that Hinge+ subscribers are going on twice as many 'great dates', and HingeX subscribers are going on four times as many 'great dates', compared to non-subscribing users.

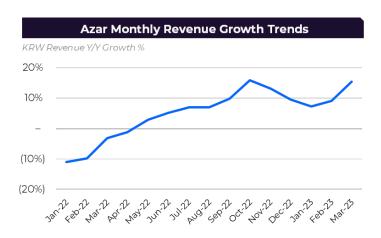

Hinge's monetization growth has been fueled by a sizable and growing base of active users in English-speaking markets, which is now being supplemented by Hinge's expansion into new markets across Europe. It is important to note that Hinge remains in the very early

stages of its monetization journey and has significant further global expansion opportunties as well.

MATCH GROUP ASIA

At Hyperconnect®, we've been focused on product improvements at Azar, which drives the vast majority of Hyperconnect's Direct Revenue. The team made significant enhancements to Azar's matching algorithm and introduced a new monetization feature called Supermatch. These efforts have led to accelerating Y/Y Direct Revenue growth, and we're optimistic Azar can maintain this momentum. Hyperconnect is also focused on improving profitability, with a 10% AOI margin target for 2023.

The Japanese dating market remains soft, but Pairs continues to make product advances and retain its leading position in that market. In March, Pairs was the only major dating app in the Japanese market to grow Y/Y revenue⁶, due to several initiatives and marketing efficiencies. Pairs recently appointed a new CEO to help the team innovate and prepare for the next phase of growth in the Japanese dating market.

EVERGREEN & EMERGING

Even though it's only been a few months since we combined our Evergreen & Emerging ("E&E") brands under one umbrella, we're already pleased with the cross-brand collaboration and see significant opportunity to reduce duplicative efforts across brands and better leverage existing talent and systems. The team is analyzing how best to deploy our resources, and we expect to provide more details on our plans as the year progresses.

The E&E team sees continued growth opportunities in its Emerging brands, including Chispa™, BLK®, and The League®, and has identified an opportunity for a new app in a large addressable market that Match Group currently does not directly serve. This new app is being developed by a team of passionate individuals from the Evergreen brands who we believe are well-positioned to address this large and growing demographic. We expect to launch our new app this summer, and are optimistic it will be superior to existing offerings in the space.

Financial Outlook

Capital Structure and Allocation

We're fortunate to operate an economically resilient business with a fairly predictable revenue stream that is highly profitable and cash flow generative. Our capital allocation goal is to grow returns for our shareholders while appropriately investing in our business and maintaining our strong credit profile.

Since we became a fully independent company in mid-2020, we've targeted under 3.0x net leverage, which we continue to believe is the appropriate level of leverage for our company. Our trailing twelve-month net leverage currently sits at 3.0x.

We expect the company to generate approximately \$800 million in free cash flow this year, with further growth over the coming years. Going forward, we expect to return at least half of our free cash flow to our shareholders. The remainder of our free cash flow will be deployed to drive organic growth, further strengthen our balance sheet, and make compelling acquisitions. If we can't find attractive ways to deploy the remaining free cash flow, we'll return that cash to shareholders as well.

In consultation with our Board of Directors, we continually evaluate the optimal tools to return capital to our shareholders, including via share buybacks and/or dividends. We're announcing today that our Board of Directors has approved a new share repurchase authorization of \$1 billion that will replace the current authorization, which was nearly completed at the end of Q1. We expect to deploy this new authorization over the coming years, in a manner consistent with the approach stated above.

Financial Outlook

Q2 2023

For Q2, we expect Total Revenue of \$805 to \$815 million, up 1% to 3% Y/Y compared to Q2 '22. We expect FX to be a little more than a one-point Y/Y headwind to Total Revenue.

For Tinder, we expect Direct Revenue to be up low single digits Y/Y over Q2 '22, with FX representing a one-point Y/Y headwind. On a sequential basis, we expect Tinder Direct Revenue to be up low-to-mid single digits. We expect Tinder Payers to decline Y/Y, impacted by several ongoing trends and initiatives, particularly pricing optimizations. As mentioned earlier, Tinder extensively tested a number of price variants in the U.S. and ultimately selected a higher price point, which we expect will maximize revenue but cause a significant reduction in Payers. Tinder intends to test various price points internationally beginning in Q2.

At Hinge, we expect meaningfully accelerating Y/Y Direct Revenue growth in Q2 as the overall business momentum, the impact of the new subscription tiers, and the European expansion continue to deliver incremental revenue.

Across MG Asia, we expect moderating Y/Y declines in Direct Revenue at both Pairs and Hyperconnect, driven by ongoing initiatives and product improvements at each of the three apps. On an FXN basis, we expect MG Asia's Direct Revenue to be essentially flat Y/Y.

Within E&E, we expect similar Y/Y Direct Revenue trends as in the first quarter of 2023.

For Q2, we expect AOI of \$275 to 280 million, with a margin of 34% at the mid-point of the range.

We expect to increase marketing spend Y/Y, driven by increases at Tinder to fund its ongoing brand campaign, at Hinge as it continues to expand into new markets, at The League, and at our new dating app which we plan to launch this summer. We expect to incur approximately \$4 million in severance and similar costs in Q2. As has been the case for the past several quarters, we will continue to be judicious with spending across the remainder of the business.

	Total Revenue	Adjusted Operating Income
Q2 2023	\$805 to \$815 million	\$275 to \$280 million

FY 2023

As we start to see the benefits of the work at Tinder, we remain confident that the Company's Total Revenue and Tinder Direct Revenue can both exit 2023 with double digit Y/Y growth. The lower than initially expected first half of 2023 business performance may contribute to full year Match Group Total Revenue and Tinder Direct Revenue growth rates closer to the low end of our previously communicated ranges of 5% to 10% Y/Y. That said, we've already seen improved momentum in April and there are numerous initiatives in flight that could drive incremental growth this year, so we are eager to see how those progress. Note that we estimate \$17 million more of Y/Y FX headwinds for Q2 to Q4 than we anticipated at the time of our last earnings call.

We also remain committed to delivering flat or better AOI margin for the full year.

Conference Call

Match Group will audiocast a conference call to answer questions regarding its first quarter financial results on Wednesday, May 3, 2023, at 8:30 a.m. Eastern Time. This call will include the disclosure of certain information, including forward-looking information, which may be material to an investor's understanding of Match Group's business. The live audiocast will be open to the public on Match Group's investor relations website at https://ir.mtch.com.

Liquidity and Capital Resources

During the three months ended March 31, 2023, we generated operating cash flow of \$120 million and Free Cash Flow of \$101 million, both of which were impacted by the timing of a cash receipt.

During the quarter ended March 31, 2023, we repurchased 2.6 million shares of our common stock for \$113 million on a trade date basis at an average price of \$42.92. On April 28, 2023, the Board of Directors approved a new program for the repurchase of up to \$1.0 billion in aggregate value of shares of Match Group stock, which replaced the existing share repurchase program.

As of March 31, 2023, we had \$578 million in cash and cash equivalents and short-term investments and \$3.9 billion of long-term debt, \$3.5 billion of which is fixed rate debt, including \$1.2 billion of Exchangeable Senior Notes. Our \$750 million revolving credit facility was undrawn as of March 31, 2023. Match Group's trailing twelve-month leverage⁷ as of March 31, 2023 is 3.5x on a gross basis and 3.0x on a net basis.

Income Taxes

We recorded an income tax provision of \$42 million, a tax rate of 26%, for the first quarter of 2023. The tax rate is higher than the U.S. federal statutory rate primarily due to a lower stock price on the date stock-based awards vested compared to the stock price used to determine the fair value of such awards at their grant date, partially offset by a lower tax rate on U.S. income derived from foreign sources. The income tax benefit of \$7 million in the first quarter of 2022 was primarily driven by excess tax benefits generated by the exercise or vesting of stock-based awards.

Dilutive Securities

Match Group has various tranches of dilutive securities. The table below details these securities and their potentially dilutive impact (shares in millions; rounding differences may occur).

	Average Exercise	
	Price	4/28/2023
Share Price		\$36.90
Absolute Shares		278.5
Equity Awards		
Options	\$15.73	1.4
RSUs and subsidiary denominated equity awards		10.2
Total Dilution - Equity Awards		11.7
Outstanding Warrants		
Warrants expiring on September 15, 2026 (6.6 million outstanding)	\$134.76	_
Warrants expiring on April 15, 2030 (6.8 million outstanding)	\$134.82	_
Total Dilution - Outstanding Warrants		_
Total Dilution		11.7
% Dilution		4.0%
Total Diluted Shares Outstanding		290.1

The dilutive securities presentation above is calculated using the methods and assumptions described below; these are different from GAAP dilution, which is calculated based on the treasury stock method.

Options — The table above assumes the option exercise price is used to repurchase Match Group shares.

RSUs and subsidiary denominated equity awards — The table above assumes RSUs are fully dilutive. All performance-based and market-based awards reflect the expected shares that will vest based on current performance or market estimates. The table assumes no change in the fair value estimate of the subsidiary denominated equity awards from the values used for GAAP purposes at March 31, 2023.

Exchangeable Senior Notes — The Company has two series of Exchangeable Senior Notes outstanding. In the event of an exchange, each series of Exchangeable Senior Notes can be settled in cash, shares, or a combination of cash and shares. At the time of each Exchangeable Senior Notes issuance, the Company purchased call options with a strike price equal to the exchange price of each series of Exchangeable Senior Notes ("Note Hedge"), which can be used to offset the dilution of each series of the Exchangeable Senior Notes. No dilution is reflected in the table above for any of the Exchangeable Senior Notes because it is the Company's intention to settle the Exchangeable Senior Notes with cash equal to the face amount of the notes; any shares issued would be offset by shares received upon exercise of the Note Hedge.

Warrants — At the time of the issuance of each series of Exchangeable Senior Notes, the Company also sold warrants for the number of shares with the strike prices reflected in the table above. The cash generated from the exercise of the warrants is assumed to be used to repurchase Match Group shares and the resulting net dilution, if any, is reflected in the table above.

Non-GAAP Financial Measures

Match Group reports Adjusted Operating Income, Adjusted Operating Income Margin, Free Cash Flow, and Revenue Excluding Foreign Exchange Effects, all of which are supplemental measures to U.S. generally accepted accounting principles ("GAAP"). The Adjusted Operating Income, Adjusted Operating Income Margin, and Free Cash Flow measures are among the primary metrics by which we evaluate the performance of our business, on which our internal budget is based and by which management is compensated. Revenue Excluding Foreign Exchange Effects provides a comparable framework for assessing the performance of our business without the effect of exchange rate differences when compared to prior periods. We believe that investors should have access to the same set of tools that we use in analyzing our results. These non-GAAP measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP results. Match Group endeavors to compensate for the limitations of the non-GAAP measures presented by providing the comparable GAAP measures and descriptions of the reconciling items, including quantifying such items, to derive the non-GAAP measures. We encourage investors to examine the reconciling adjustments between the GAAP and non-GAAP measures, which we describe below. Interim results are not necessarily indicative of the results that may be expected for a full year.

Definitions of Non-GAAP Measures

Adjusted Operating Income is defined as operating income excluding: (1) stock-based compensation expense; (2) depreciation; and (3) acquisition-related items consisting of (i) amortization of intangible assets and impairments of goodwill and intangible assets, if applicable, and (ii) gains and losses recognized on changes in the fair value of contingent consideration arrangements, as applicable. We believe Adjusted Operating Income is useful to analysts and investors as this measure allows a more meaningful comparison between our performance and that of our competitors. The above items are excluded from our Adjusted Operating Income measure because they are non-cash in nature. Adjusted Operating Income has certain limitations because it excludes certain expenses.

Adjusted Operating Income Margin is defined as Adjusted Operating Income divided by revenues. We believe Adjusted Operating Income Margin is useful for analysts and investors as this measure allows a more meaningful comparison between our performance and that of our competitors. Adjusted Operating Income margin has certain limitations in that it does not take into account the impact to our consolidated statement of operations of certain expenses.

Free Cash Flow is defined as net cash provided by operating activities, less capital expenditures. We believe Free Cash Flow is useful to investors because it represents the cash that our operating businesses generate, before taking into account non-operational cash movements. Free Cash Flow has certain limitations in that it does not represent the total increase or decrease in the cash balance for the period, nor does it represent the residual cash flow for discretionary expenditures. Therefore, we think it is important to evaluate Free Cash Flow along with our consolidated statement of cash flows.

We look at Free Cash Flow as a measure of the strength and performance of our businesses, not for valuation purposes. In our view, applying "multiples" to Free Cash Flow is inappropriate because it is subject to timing, seasonality and one-time events. We manage our business for cash and we think it is of utmost importance to maximize cash – but our primary valuation metric is Adjusted Operating Income.

Revenue Excluding Foreign Exchange Effects is calculated by translating current period revenues using prior period exchange rates. The percentage change in Revenue Excluding Foreign Exchange Effects is calculated by determining the change in current period revenues over prior period revenues where current period revenues are translated using prior period exchange rates. We believe the impact of foreign exchange rates on Match Group, due to its global reach, may be an important factor in understanding period over period comparisons if movement in rates is significant. Since our results are reported in U.S. dollars, international revenues are favorably impacted as the U.S. dollar weakens relative to other currencies, and unfavorably impacted as the U.S. dollar strengthens relative to other currencies. We believe the presentation of revenue excluding foreign exchange effects in addition to reported revenue helps improve the ability to understand Match Group's performance because it excludes the impact of foreign currency volatility that is not indicative of Match Group's core operating results.

Non-Cash Expenses That Are Excluded From Our Non-GAAP Measures

Stock-based compensation expense consists principally of expense associated with the grants of stock options, RSUs, performance-based RSUs and market-based awards. These expenses are not paid in cash, and we include the related shares in our fully diluted shares outstanding using the treasury stock method; however, performance-based RSUs and market-based awards are included only to the extent the applicable performance or market condition(s) have been met (assuming the end of the reporting period is the end of the contingency period). To the extent stock-based awards are settled on a net basis, we remit the required tax-withholding amounts from our current funds.

Depreciation is a non-cash expense relating to our property and equipment and is computed using the straight-line method to allocate the cost of depreciable assets to operations over their estimated useful lives, or, in the case of leasehold improvements, the lease term, if shorter.

Amortization of intangible assets and impairments of goodwill and intangible assets are non-cash expenses related primarily to acquisitions. At the time of an acquisition, the identifiable definite-lived intangible assets of the acquired company, such as customer lists, trade names and technology, are valued and amortized over their estimated lives. Value is also assigned to (i) acquired indefinite-lived intangible assets, which consist of trade names and trademarks, and (ii) goodwill, which are not subject to amortization. An impairment is recorded when the carrying value of an intangible asset or goodwill exceeds its fair value. We believe that intangible assets represent costs incurred by the acquired company to build value prior to acquisition and the related amortization and impairment charges of intangible assets or goodwill, if applicable, are not ongoing costs of doing business.

Additional Definitions

Americas includes North America, Central America, South America, and the Caribbean islands.

Europe includes continental Europe, the British Isles, Iceland, Greenland, and Russia, but excludes Turkey (which is included in APAC and Other).

APAC and Other includes Asia, Australia, the Pacific islands, the Middle East, and Africa.

Match Group Asia ("MG Asia") consists of the brands primarily focused on Asia including Pairs, Azar, and Hakuna.

Evergreen and Emerging ("E&E") consists primarily of the brands Match, Meetic, OkCupid, Plenty of Fish, BLK, Chispa, and The League.

Direct Revenue is revenue that is received directly from end users of our services and includes both subscription and à la carte revenue.

Indirect Revenue is revenue that is not received directly from end users of our services, substantially all of which is advertising revenue.

Payers are unique users at a brand level in a given month from whom we earned Direct Revenue. When presented as a quarter-to-date or year-to-date value, Payers represents the average of the monthly values for the respective period presented. At a consolidated level, duplicate Payers may exist when we earn revenue from the same individual at multiple brands in a given month, as we are unable to identify unique individuals across brands in the Match Group portfolio.

Revenue Per Payer ("RPP") is the average monthly revenue earned from a Payer and is Direct Revenue for a period divided by the Payers in the period, further divided by the number of months in the period.

Leverage on a gross basis is calculated as principal debt balance divided by Adjusted Operating Income for the period referenced.

Leverage on a net basis is calculated as principal debt balance less cash and cash equivalents and short-term investments divided by Adjusted Operating Income for the period referenced.

Other Information

Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995

This letter and our conference call, which will be held at 8:30 a.m. Eastern Time on May 3, 2023, may contain "forwardlooking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements that are not historical facts are "forward looking statements." The use of words such as "anticipates," "estimates," "expects," "plans" and "believes," among others, generally identify forward-looking statements. These forward-looking statements include, among others, statements relating to: Match Group's future financial performance, Match Group's business prospects and strategy, anticipated trends, and other similar matters. These forward-looking statements are based on management's current expectations and assumptions about future events, which are inherently subject to uncertainties, risks and changes in circumstances that are difficult to predict. Actual results could differ materially from those contained in these forward-looking statements for a variety of reasons, including, among others: competition, our ability to maintain user rates on our higher monetizing services, our ability to attract users to our services through cost-effective marketing and related efforts, foreign currency exchange rate fluctuations, our ability to distribute our services through third parties and offset related fees, the integrity and scalability of our systems and infrastructure (and those of third parties) and our ability to adapt ours to changes in a timely and cost-effective manner, our ability to protect our systems from cyberattacks and to protect personal and confidential user information, risks relating to certain of our international operations and acquisitions, certain risks relating to our relationship with IAC post-separation, the impact of the outbreak of pandemics such as the COVID-19 coronavirus, the risks inherent in separating Match Group from IAC, including uncertainties related to, among other things, the tax treatment of the transaction, uncertainties related to the acquisition of Hyperconnect, including, among other things, the expected benefits of the transaction, any litigation arising out of or relating to the transaction, and the impact of the transaction on the businesses of Match Group, and inflation and other macroeconomic conditions. Certain of these and other risks and uncertainties are discussed in Match Group's filings with the Securities and Exchange Commission. Other unknown or unpredictable factors that could also adversely affect Match Group's business, financial condition and results of operations may arise from time to time. In light of these risks and uncertainties, these forward-looking statements may not prove to be accurate. Accordingly, you should not place undue reliance on these forward-looking statements, which only reflect the views of Match Group management as of the date of this letter. Match Group does not undertake to update these forward-looking statements.

About Match Group

Match Group (NASDAQ: MTCH), through its portfolio companies, is a leading provider of digital technologies designed to help people make meaningful connections. Our global portfolio of brands includes Tinder®, Hinge®, Match®, Meetic®, OkCupid®, Pairs™, PlentyOfFish®, Azar®, Hakuna®, and more, each built to increase our users' likelihood of connecting with others. Through our trusted brands, we provide tailored services to meet the varying preferences of our users. Our services are available in over 40 languages to our users all over the world.
